.. T. Harris, M.C.	.. Leave ex. India

## THE ROMAN CATHOLIC CHURCH.

With regard to numbers, the *Catholic Directory of India*, 1924, gives the following tables:—

	1901	1911	1921
1. <i>British India and Indian States</i> —			
(a) Latin Rite .. ..	1,312,224	1,614,620	1,851,408
(b) Syriac Rite .. ..	315,923	364,660	440,488
2. <i>French India</i> .. ..	25,859	25,918	25,480
3. <i>Portuguese India</i> .. ..	282,650	296,148	288,741
Total, India .. ..	1,916,656	2,301,346	2,606,117
4. <i>Ceylon</i> .. ..	285,018	322,163	363,986
Total, India and Ceylon ..	2,201,674	2,623,509	2,970,103

NOTE (1):—In 1860, the total for India and Ceylon was 1,170,854. In 1880 it had risen to 1,810,265, and in 1900 to 2,201,674.

NOTE (2):—The number of Catholics under the Royal Patronage of Portugal (the *Padroado*) in 1921 were reckoned at 604,802, of whom more than half are in British India.

NOTE (3):—In 1860 there were 1,504 priests. In 1921 there were 3,155.

The Catholic community as thus existing is composed of the following elements:—

(1) The "Syrian" Christians of the Malabar Coast, traditionally said to have been converted by the Apostle St. Thomas. They were brought under allegiance to the Pope by the Portuguese in 1599, and placed first under Jesuit bishops and then under Carmelite Vicars Apostolic. They are at present ruled by four bishops of their own Syriac rite.

(2) Converts of the Portuguese missionaries from 1500 and onwards, starting from Goa and working in the south of the peninsula and up the west coast, Ceylon, Bengal, etc.

(3) European immigrants at all times, including British troops.

(4) Modern converts from Hinduism and Animism in recent mission centres.

The Portuguese mission enterprise starting after 1500, continued for about 200 years, after which it began to decline. To meet this decline fresh missionaries were sent out by the Congregation *de propaganda fide*, till by the middle of the 19th century the whole country was divided out among them except such portions as were occupied by the Goa clergy. Hence arose a conflict of jurisdiction in many parts between the Portuguese clergy of the "padroado" or royal patronage, and the *propaganda* clergy. This conflict was set at rest by the Concordat of 1886. At the same time the whole country was placed under a regular hierarchy, which after subsequent adjustments now stands as follows:—

Of the Portuguese Jurisdiction:—

The archbishopric of Goa (having some extension into British territory) with suffragan bishoprics at Cochin, Mylapore and Damaun (all three covering British territory).

Of the Propaganda Jurisdiction:—

The archbishopric of Agra with suffragan bishoprics of Allahabad and Ajmere.

The archbishopric of Bombay, with suffragan bishoprics of Poona, Mangalore and Trichinopoly.

The archbishopric of Calcutta, with suffragan bishoprics of Dacca, Krishnagar and Patna, and the Prefecture Apostolic of Assam.

The archbishopric of Madras, with suffragan bishoprics of Hyderabad, Vizagapatam and Nagpur.

The archbishopric of Pondicherry (French) with suffragan bishoprics of Mysore, Coimbatore and Kumbakonam.

The archbishopric of Simla with suffragan bishopric of Lahore and the Prefecture Apostolic of Kashmir.

The archbishopric of Colombo (Ceylon) with suffragan bishoprics at Kandy, Galle, Jaffna and Trincomalee.

The archbishopric of Verapoly, with suffragan bishopric of Quilon.

One Archbishopric and three bishoprics of the Syriac rite for the Syrian Christians of Malabar.

Three Vicariates Apostolic of Burma.

During 1923 two new dioceses have been constituted; Tuticorin and Calicut.

The European clergy engaged in India almost all belong to religious orders, congregations or mission seminaries, and with a few exceptions are either French, Belgian, Dutch, Swiss, Spanish or Italian by nationality. They number about 1,000 besides which there is a body of secular clergy mostly native to the country, numbering about 2,000 and probably about 2,000 nuns. The first work of the clergy is parochial administration to existing Christians, including railway people and British troops. Second comes education, which is not confined to their own people; their schools being frequented by large numbers

of Hindus, Mahomedans, Parsis, etc. Among the most important institutions are St. Xavier's College, Calcutta, St. Peter's College, Agra, St. Xavier's College, Bombay, St. Joseph's College, Trichinopoly, St. Aloysius College, Mangalore, teaching university courses; besides a large number of high schools and elementary schools. The education of girls is supplied for by numerous convent schools worked by religious congregations of nuns to say nothing of orphanages and other charitable institutions. The total number under education amounted in 1904 to 143,051 boys and 72,164 girls, later figures being unavailable. As to missionary work proper, the country is covered with numerous mission centres, among which those in Chota Nagpur, Gujerat, Orissa, the Nizam's Dominions, the Ahmednagar district and the Telugu coasts may be mentioned. (Full particulars on all points will be found in the Catholic Directory already quoted.) The mission work is limited solely

by shortage of men and money, which if forthcoming would give the means to an indefinite extension. The resources of the clergy after the ordinary church collections and pay of a few military and railway chaplains are derived mainly from Europe, that is, from the collections of the *Society for the Propagation of the Faith* and of the *Holy Childhood*, helped out by private or other donations secured from home by the different local missionaries. In mission work the fathers count as enrolled only those who are baptised and persevering as Christians, and no baptism, except for infants or at point of death, is administered except after careful instruction and probation. This, while keeping down the record, has the advantage of guaranteeing solid results.

The Holy See is usually represented by a Delegate Apostolic of the East Indies who resides at Bangalore; but at present this office is vacant.

### THE SCOTTISH CHURCHES.

**The Church of Scotland.**—The Chaplaincy work of the Church of Scotland dates from 1814, when the Rev. Dr. Bryce landed in Calcutta, and organised a congregation of his Scottish fellow countrymen. The centenary of the churches in the three Presidency towns was celebrated: Calcutta, 1914; Bombay, 1919; Madras, 1921. Since 1903 there have been eighteen chaplains on the staff, of whom nine belong to the Bengal Presidency, five to Bombay, and four to Madras. These minister both to the Scottish troops and to the civil population of the towns where they are stationed, but when there is a Scottish regiment the chaplain is attached to the regiment, instead of being posted to the station where the regiment happens to be placed and as a rule moves with the regiment. There are three Presidency senior Chaplains in charge of Bengal, Bombay, and Madras respectively. There are churches in the chief towns of the Presidencies, and churches have also been built, in all considerable military stations, e.g., Chakrata, Lucknow, Peshawar, Ranikhet, Bawalpindi, Sialkot, Umballa and Jubburpore. In addition to the regular establishment there are a number of acting Chaplains sent out by the Colonial Committee of the Church of Scotland, and these are serving in such stations as Rawalpindi, Lahore, Cawnpore, Meerut, Mhow and Quetta. The Additional Clergy Societies in India contribute towards the cost of this additional establishment. In other places such as Sialkot, Murree, Dalhousie, and Darjeeling, regular services are provided by Scottish Missionaries. Simla has a minister of its own sent out from Scotland.

The Mission work of the Church of Scotland dates from 1829, when Alexander Duff, one of the greatest of modern missionaries, was sent to Calcutta. He was the first to open schools where English was made the medium for instruction, and where religious teaching was given daily. Similar educational missions were soon afterwards started in Bombay and Madras. Educational work is still an important branch of the mission work of the Church,

but the Bombay College was closed in 1891, and in 1907 the College in Calcutta was united with the College of the United Free Church of Scotland, to form the Scottish Churches College. In the Punjab Evangelistic work is being carried on from eight centres under seventeen missionaries. The baptised Christian community now numbers over 14,000. Work commenced in Darjeeling in 1870 is now carried on throughout the whole Eastern Himalayan district, and there is a Christian community there of over 8,000. In the five mission districts of Calcutta, the Eastern Himalayas, Madras, Poona, and the Punjab there were at the end of 1919 over 24,787 baptised Indian Christians. In connection with these missions the Women's Association of Foreign Missions does invaluable service in school, medical and zenana work, having in India 41 European missionaries, 163 teachers, over 50 schools, three hospitals and six dispensaries.

The Church of Scotland has also done much to provide education for European children in India. Together with the United Free Church St. Andrew's Church provides the governing body of the Bombay Scottish High Schools, which have always held a high place among such institutions, and exercises pastoral supervision over the Bombay Scottish Orphanage. In Bangalore there is the St. Andrew's High School, and both in Bangalore and in Madras the local congregation supports the school for poor children. The *Ayrleff Girls' Boarding and High School* is under the care of the Kirk-Session of St. Andrew's Church, Simla. The now well-known St. Andrew's Colonial Homes at Kalimpong, Bengal, though not directly part of the work of the Church of Scotland, were initiated by and are being locally managed by missionaries of that Church. The homes exist for the benefit of the domiciled European Community, and are doing magnificent work. There are now twenty cottages, and about 600 children in residence. Further information may be found in "Reports of the Schemes of the

Church of Scotland," Blackwood & Sons; "The Church of Scotland Year Book" and "The Handbook of the Church of Scotland in India and Ceylon" a new edition of which is being prepared.

**The United Free Church of Scotland.**—This branch of the Scottish Church has only three purely European congregations in India, two in Calcutta, Wellesley Square, and Howrah and one in Bombay, Waudby Road. In Calcutta the Howrah Church is in the district of the mills, and every effort is made to minister to the Scottish Engineers and other workers in the mills. As noted above members of these congregations co-operate with the Established Church of Scotland in providing education for European children.

The Church carries on Mission work in seven different areas. They are Bengal (Calcutta, Kaina and Chinsura); the Santal Parganas, with five stations; Western India (Bombay, Poona and Allahab); Hyderabad State (Jaina, Bethel and Parbhani); Madras (Madras City, Chingleput, Sriperumbudur and Conjeevaram); the Central Provinces (Nagpur, Bhandara, Wardha, and Amraoti); Rajputana, where the extensive work instituted by the United Presbyterian Church

in 1860 is now carried on from eleven centres.

The work falls into three main divisions, evangelistic, medical, and educational. The Christian community has been organised in all the chief centres into congregations which form part of the Indian Presbyterian Church, and this Church is seeking to take an increasing share in the work of evangelism. There are nineteen Mission Hospitals, among which are four excellently equipped and staffed Women's Hospitals, in Madras, Nagpur, Ajmer, and Jaipur. From the days of Duff in Calcutta and Wilson in Bombay the Mission has given a prominent place to education. It has many schools in all parts of its field and it has also made a large contribution to the work of higher education through four Christian Colleges. The Scottish Churches College, Calcutta, is under the joint management of the Church of Scotland and the United Free Church. The Madras Christian College, which owes so much to the work of Dr. William Miller, is now under the direction of a Board representing several Missionary Societies. Wilson College, Bombay, with which the names of Wilson and Dr. MacKichan are specially associated and Hishop College, Nagpur, are under the direct management of the United Free Church.

## BAPTIST SOCIETIES.

**THE BAPTIST MISSIONARY SOCIETY OF GREAT BRITAIN.**—Formed in 1792, largely through the efforts of Dr. Wm. Carey, operates mainly in Bengal, Bihar and Orissa, the United Provinces, the Punjab and Ceylon. The Baptist Zenana Mission has been united with this Society. The staff of the united Mission in India numbers 205 missionaries and about 936 Indian workers. Connected with the Society are 337 Indian Churches, 313 Primary Day Schools, 22 Middle and High Schools, and 2 Theological Training Colleges. The Church membership at the close of 1924 stood at 19,168 and the Christian community at 55,759. The membership during the past ten years has increased by about 53 per cent., and the community by 50 per cent. in the same period. Amongst the non-caste people great progress has been made in recent years, and many of the Churches formed from amongst these peoples are self-supporting.

Special work amongst students is carried on in Calcutta, Dacca, Cuttack and Delhi, where hostels have been erected for the prosecution of this form of work.

**EDUCATIONAL WORK.**—Ranges from Primary School to Colleges. Serampore College, the only College in India able to bestow a theological degree granted under Royal Charter by His Danish Majesty in 1827, confirmed by the British Government in the Treaty of purchase of the Settlement of Serampore in 1845, and placed in 1856 by the College Council at the disposal of the Baptist Missionary Society to become a part of its Missionary Educational operations, Arts and Theological. It was affiliated in 1857 to the newly-formed Calcutta University; reorganised in 1910 on the lines of its original foundation with the appointment of a qualified Theological Staff on an Inter-denominational basis

for the granting of Theological Degrees to qualified students of all Churches.

As the only College in India granting a Theological Degree a large number of students are now resident in the College. In Arts, the College prepares for the Calcutta Arts Examinations. *Principal*: Rev. G. Howells, M.A., B.D., B.Litt., Ph. D.

A Vernacular Theological Department likewise attaches to Serampore. There is an institute also at Cuttack for the training of Indian preachers and Bible schools in several centres.

There are 9 or 10 purely English Baptist Churches connected with the Society, but English services are carried on in many of the stations. Medical work connected with the Society is carried on in 6 Hospitals, and 5 Dispensaries. Two large Printing Presses for both English and Vernacular work are conducted at Calcutta and Cuttack. The Secretaries of the Mission are the Rev. John Reid and W. Craig Eadie, Esq., 43, Ripon Street, Calcutta.

The Headquarters of the Mission are at 19, Fumival Street, Holborn, London. The total expenditure of the Society for 1923 amounted to £244,310.

**THE CANADIAN BAPTIST MISSION.**—Was commenced in 1873, and is located in the Telugu Country to the north of Madras, in the Kistna, Godavari, Vizagapatam and Ganjam Districts. There are 22 stations and 363 out-stations with a staff of 90 missionaries, including 8 qualified physicians, and 964 Indian workers, with Gospel preaching in 1,296 villages. Organised Churches number 86, communicants 17,506 and adherents 12,116 for the past year. Fourteen Churches are entirely self-supporting. In the Educational department are 421 village day schools, with 12,488 children, 13 boarding schools,

<sup>1</sup> High school, a Normal Training school, a Theological Seminary providing in all for 1,000 pupils, and an Industrial school. There are 6 Hospitals and two leper asylums. The Mission publishes a Telugu newspaper. Village Evangelisation is the central feature of the Mission, and stress is laid upon the work amongst women and children. During the last decade membership has increased by 52 per cent., the Christian community by 85 per cent., and scholars by 500 per cent. The Indian Secretary is the Rev. A. Arthur Scott, Tuni, Godavari District.

**THE AMERICAN BAPTIST TELUGU MISSION.**—Was commenced in the year 1836, and covers large parts of Nellore, Guntur, Kistna, and Kurnool Districts, parts of the Deccan and an important work in Madras and the surrounding vicinity. Its main work is evangelism, but there are also Educational and Medical Institutions of importance. Industrial Settlement work for the Erukalas is carried on at Kavali and vicinity. Industrial departments are maintained also in connection with the Mission High School at Nellore, and the Mission High School at Kurnool. Organized Telugu Churches number 184, with 75,841 baptized communicants. There are 95 missionaries, and 1,886 Indian workers. The mission maintains in co-operation with the Canadian Baptist Mission a Union Theological Seminary at Ramapatnam for the training of Indian preachers. A bible Training School for the training of Telugu women is located in Nellore. A total of 27,794 receive instruction in 879 primary schools, 13 secondary schools and 4 High schools. In Medical work 7 Hospitals and 7 Dispensaries report 2,681 in-patients, 55,077 out-patients, and 122,482 treatments during the year.

*Secretary:* Rev. S. W. Stenger, Nandyal.

**AMERICAN BAPTIST FOREIGN MISSION SOCIETY**, organized in 1814, has Missions in Burma begun 1814; Assam 1836; Bengal and Orissa 1836; South India 1840. It owes its rise to the celebrated Adoniram Judson. Until 1910 the Society was known as the American Baptist Missionary Union. There are 33 main stations in Burma, 12 in Assam, 10 in Bengal and Orissa, 25 in South India, besides hundreds of out-stations. All forms of missionary enterprise come within the scope of the Society.

The missionary staff numbers 450 in all, with an Indian workers' staff of 5,713. Communicants number 176,620. Organized churches number 1,500 of which 880 are self-supporting. Educational work is conducted on a large scale, the total number of schools of all grades being 2,147 with over 69,121 pupils. The Christian College has 125 students in college classes. There are twenty High Schools with 4,423 pupils.

Medical work embraces 15 Hospitals and 32 Dispensaries, in which 75,789 out-patients and 4,582 in-patients were treated last year.

Indian Christians contribute annually more than Rs. 5,47,861 for religious and benevolent work within the Mission.

The great work of the Mission continues to be evangelistic and the training of the native preachers and Bible-women, and extends to many races and languages, the most important of which, in Burma, has been the practical transformation of the Karens, whose language has been reduced to writing by the Mission. The work in Assam embraces 9 different languages, and large efforts are made amongst the employers on the tea plantations. There are 12 Theological Seminaries and training schools with 765 pupils. The Mission Press at Rangoon is the largest and finest in Burma.

*Assam Secretary*, Rev. R. B. Longwell, Gauhati, Assam.

*Burma Secretary*, Rev. Walter E. Wiatt, 15, Mission Road, Rangoon, Burma.

*Bengal and Orissa Secretary*, Rev. Harold I. Frost, Balasore, Orissa.

*South India (or Telugu) Secretary*, Rev. W. L. Ferguson, D.D., Madras.

**THE AUSTRALIAN BAPTIST MISSION.**—With 2 missionaries, established at Serajgunge E. Bengal.

*Missionary-in-charge:* Rev. T. C. Kelly, Mission House, Serajgunge.

**THE AUSTRALIAN BAPTIST FOREIGN MISSION.**—Embracing the societies representing the Baptist Churches of the States of the Australian Commonwealth. The field of operations is in East Bengal. The staff numbers 41 Australian workers. There are 2,007 communicants and a Christian community of 4,456.

*Secretary, Field Council:* Rev. H. J. Sutton, M.A., Mymensingh.

**THE STRICT BAPTIST MISSION.**—Has 13 European Missionaries, and 120 Indian Workers in Madras, and Salem District. Communicants number 270; organised Churches 8; elementary schools 34, with 1,600 pupils.

*Secretary:* Rev. E. A. Booth, Kilpauk, Madras, W.

**AMERICAN BAPTIST, BENGAL-ORISSA MISSION**, commenced in 1836. Area of operation: Midnapore district of Lower Bengal, Balasore district of Orissa and Jamshepur Mission staff 32. Indian workers 321. Two English Churches and 21 Vernacular Churches, Christian Community 5,000. Two dispensaries. Educational: One Theological and one Boys' High School and one Girls' High School and 129 Elementary Schools, pupils 3,883. One Industrial School for carpentering, iron work and motor mechanics. The Vernacular Press of this mission printed the first literature in the Santali language.

*Secretary:* Rev. Harold I. Frost, Balasore, Orissa.

## PRESBYTERIAN SOCIETIES.

**THE IRISH PRESBYTERIAN CHURCH MISSION.**—Operates in Gujarat and Kathiawar with a staff of 42 Missionaries of whom 5 are qualified doctors and an Indian staff of 406 including school teachers. There are 11 Organised Churches, a communicant roll of 1,728, and a Christian com-

munity of 7,078. In Medical work there are 3 Hospitals, 6 Dispensaries, with 968 in-patients and 12,818 new cases and a total attendance of 45,926. The Mission conducts 3 High schools, 1 Anglo-Vernacular school, and 102 Vernacular schools affording tuition for 6,290 pupils, 4 Or-

phanages, a Divinity College at Ahmedabad, a Teachers' Training College for women at Borsad and a Mission Press at Surat. The Mission has made a speciality of farm colonies, of which there are about a score in connection with it, most of them thriving.

The Jungle Tribes Mission with 7 missionaries is a branch of the activities of the above, working in the Panch Mahals and Rewa Kantha districts, with farm colonies attached.

*Secretary:* Rev. Hamilton Martin, B.A., Mission House, Ahmedabad.

**THE UNITED PRESBYTERIAN CHURCH OF NORTH AMERICA.**—The Sialkot Mission of the above Church was opened at Sialkot, Punjab, in 1855. It is now carrying on work in ten districts of the province and one in the N. W. F. Provinces. Its missionaries number 170, and its Indian workers 893. Its educational work comprises one Theological Seminary, one College, six High Schools, one Industrial School, nine Middle Schools, and 220 Primary Schools. The total enrolment in all schools was 15,065 in 1925. The Mission is also carrying on Medical work through five hospitals and eight dispensaries. The total Christian community in connection with the Mission is 70,086 and Church membership 38,517.

*General Secretary:* Rev. N. D. Mercerl, Gujranwala, N. Punjab.

**THE AMERICAN PRESBYTERIAN MISSION** operates in 3 main sections known as the Punjab, North India and Western India Missions. The American Staff (including women) numbers 275 and the Indian Staff 1,211. There are 34 main stations and about 240 out-stations. Organized churches number 82, 25 of which are self-supporting. There are 11,985 communicants and a total baptized community of 82,000. Educational work as follows: 2 Men's Colleges, and an interest in the Isabella Thoburn and the Kinnaird Colleges for women, students 1,279; Theological School 1, students 20; Training Schools for village workers 2, students about 180; High Schools 14, students about 1,500; Industrial Schools 6; Agricultural Demonstration Farms 4; Teachers' Training Departments 6; The Miraj Medical School and an interest in the Ludhiana Medical School for women, students 100; Elementary Schools 230; Schools of all grades 271, pupils 10,646; Medical work: Hospitals 6; Dispensaries 17. Sunday Schools 371 with 13,401 pupils. Contributions for Church and Evangelistic work on the part of the Indian Church, Rs. 26,949.

The Hospital at Miraj, under the care of Dr. W. J. Wanless and Dr. C. E. Vail, is well known throughout the whole of S. W. India, and the Forman Christian College at Lahore under the principalship of Rev. E. D. Lucas, D.D., is equally well-known and valued in the Punjab. The Ewing Christian College (Dr. C. A. B. Janvier, Principal) has grown rapidly in numbers and influence.

*Secretary of Council of A.P. Missions in India:* Rev. H. D. Griswold, D.D., Ph.D., Lahore.

*Secretary, Punjab Mission:* Rev. C. H. Elce, M.A., Lahore.

*Secretary, North India Mission:* Rev. W. T. Mitchell, M.A., Mainpuri, U. P.

*Secretary, Western India Mission:* Rev. M. W. Strahler, M.A., Kolhapur.

**THE NEW ZEALAND PRESBYTERIAN MISSION**—Commenced as recently as 1910 at Jagadhri, Punjab.

*Secretary:* Miss M. Salmond, M.A., Jagadhri.

**THE UNITED CHURCH OF CANADA MISSION.**—Commenced in 1877; has 15 main stations in the Indore, Gwalior, Rutlam, Dhar, Alirajpur, Barwani, Jobat, Jaora, Sitamau, Banawara and other Native States. The Mission staff numbers 85; Indian workers 200; Organised Churches 14; Communicants, (Sept. 30, 1921) 1,248; Baptised non-communicants, 2,827; unbaptised and catechumens, 399. Total Christian community 4,474.

Educational work comprises Elementary and Middle Schools, High Schools for boys and girls, College, Theological Seminary and Classes. Industrial teaching and work are done in the three Girls' Boarding Schools, women's Industrial work in Mhow and in Rasulpura Boys' School. Technical and practical training is given in Printing, Weaving and Carpentry. The Medical work is large. There are three General Hospitals, where both men and women are treated, and five Women's Hospitals and also a number of dispensaries in central and out-stations.

*Secretary:*—The Rev. J. S. Mackay, B.A., Neemuch, Central India.

**THE WELSH CALVINISTIC METHODIST (PRESBYTERIAN) MISSION** established in 1840 with a staff of 40 Missionaries, 950 Indian workers, occupies stations in Assam in the Khasia and Jaintia Hills, the Lushai Hills and at Sylhet and Cachar. The Khasia language has been reduced to writing, the Bible translated, and many books published in that language by the Mission. A large amount of literature has also been produced in the Lushai language. Communicants number 25,436; the total Christian community 70,000; organised Churches 642; Elementary schools number 626, scholars 17,209; in addition to Industrial Schools and Training Institutions and 2 Theological Seminaries. Three Hospitals and several Dispensaries provided in 1924 for more than 10,000 patients.

*Secretary:* Rev. F. J. Sandy, Durtiang, Aijal.

**THE AMERICAN ARCOT MISSION** of the Reformed Church in America organised in 1853 occupies the North and South Arcot and Chittoor districts in S. India with a staff of 58 Missionaries, and 701 Indian ministers and workers. Churches number 17, Communicants 4,584; total Christian community 20,000; Boarding schools 11, scholars 853; Theological school 1, students 30; Voorhees College, Vellore, students 123. High schools 3, scholars 1,863; Training schools 2, students 125; Industrial schools 2, Agricultural Farm and school 1, pupils 133; Elementary schools 230, scholars 8,283. Two Hospitals and 5 Dispensaries with a staff of 24 provided for 1,376 in-patients and 25,359 out-patients excluding the Union Medical College, Hospitals and Dispensaries, Vellore.

The Union Mission Medical College for South India and a Union Mission Training School are located at Vellore, the headquarter of the Mission. The Union Mission Tuberculosis Sanitarium for S. India is near Madanapalle, Arrogivaram P. O., Chittoor Dist.

*Secretary:* Rev. H. J. Scudder, M.A., B.D., Punganur, S. India.

## CONGREGATIONAL SOCIETIES.

**THE AMERICAN BOARD OF COMMISSIONERS FOR FOREIGN MISSIONS.**—Has two large Missions, the American Marathi Mission, and the Madura Mission. The Marathi Mission covers a considerable part of the Bombay Presidency, with centres at Bombay, Ahmednagar, Satara, and Sholapur. It was commenced in 1813, the first American Mission in India. Its activities are large and varied. The staff at the beginning of 1925 consisted of 50 missionaries and 551 Indian workers operating in 133 out-stations exclusive of Bombay City. Organised Churches number 66 with 9,353 communicants, and 6,922 adherents. There is a Leper work at Sholapur. The Educational work embraces 13 training and secondary schools, with 1,050 pupils and 171 primary schools, with 7,382 pupils, three-fifths of whom are non-Christians. A Theological College at Ahmednagar trains for the Indian Ministry. Zenana work and Industrial work are vigorously carried on, the latter embracing carpentry and lace work. A school for the blind is conducted on both Educational and Industrial lines. 39,771 patients were treated in the Hospitals and Dispensaries of the Mission last year. This Mission was the first to translate the Christian scriptures into the Marathi tongue. At Sholapur, a settlement for Criminal Tribes is carried on under the supervision of Government. *Secretary:* Rev. William Hazen, M.A., Bahuri.

**THE MADURA MISSION.**—In the South of the Madras Presidency, commenced in 1834, has a staff of 62 missionaries and 952 Indian workers, operates in the Madura and Ramanad districts and has a communicant roll of 9,502 and a total Christian community of 27,898 and 32 organised churches, most of which are entirely self-supporting and self-governing. Schools number 311 with 16,305 pupils. There is a Christian College at Madura, high and training Schools for Girls as also Hospitals for men and women; at Pasmalai are a High School, Theological Institution, Trade School, Teachers' Training School and Printing Press. Five Elementary Boarding Schools are found in at many out-stations. Industrial work is increasingly taught. The *Secretary* is the Rev. John J. Banninga, D.D., Pasmalai.

**THE AROOT MISSION** commenced under the American Board was transferred to the Reformed Church of America in 1851.

**THE SCANDINAVIAN ALLIANCE MISSION OF NORTH AMERICA.**—Embraces two Branches, one in Bengal and the other in Khandesh. The total mission staff is represented by 12 missionaries and 20 Indian workers. There are 75 communicants and a Christian community of 158. Ten Elementary Schools provide for 200 pupils.

*Secretaries:* Rev. J. S. Otteson, Amalner, Khandesh, and Miss H. Abrahamson, Domar, Bengal.

**THE SWEDISH ALLIANCE MISSION.**—Working among the Bhils in West Khandesh has 28 missionaries and 60 Indian workers. There are 8 congregations with a total membership of 850 of whom 348 are communicants. There are 11 Elementary Schools, 2 Training Schools and 4 School Homes. The pupils in all schools are 375.

*Secretary:* Rev. K. N. Gustafsson, Nandurbar, West Khandesh.

**FREE CHURCH OF FINLAND MISSION.**—Total Mission Staff is represented by 8 Missionaries, one being on furlough, one native Pastor, two Catechists, one Teacher. There are about 138 communicants and total community 218. There is one day school, two dispensaries, Weaving and Hand-Carrier Industries.

*Acting Secretary:* Rev. E. A. Ollila, Lachung, Gangtok, P. O. Sikkim.

**THE LONDON MISSIONARY SOCIETY.**—Commenced work in India in 1798 and occupies 10 centres in N. India, 12 in S. India and 7 in Travancore. The Mission engages in every form of Missionary activity. The European staff numbers 160, Indian workers 2,123; Organised Churches 520; Communicants 17,456 and Christian Community 115,068. There are 4 Christian Colleges, students 159; 5 Theological Institutions, students 70; 4 Training Institutions, pupils 114; 22 High schools, pupils 4,849; 25 Boarding schools, scholars 1,167; 9 Industrial schools, pupils 116 and 862 Elementary schools with 56,775 scholars. In Medical work Hospitals number 23, Dispensaries 14, qualified doctors 9 (European), 41 Assistants and 3,971 in-patients and 174,898 out-patients for the year.

The main centres of the Mission in N. India are at Calcutta, Benares and Almora. The Bhowanipour Institution at Calcutta is now a Teachers' Training College. Evangelistic work is carried on amongst the thousands of pilgrims visiting Benares and Almora is noted for its Hospital and Leper Asylum. Special efforts are made amongst the Nama Sudras and the aboriginal tribes known as the Majhwars, Cheros and Pankas. The S. India district is divided into the Kanarese, Telugu, Tamil and Malayalam with 12 stations and 472 out-stations. At Nagercoil (Travancore) is the Scott Memorial College with 985 students, a Church and congregation said to be the largest in India, and a large Printing Press, the centre of the S. Travancore Tract Society.

*N. India Secretary:* Rev. J. H. Brown, B.A., B.D., Calcutta.

*S. India Secretary:* Rev. Geo. Wilkins, Bangalore City.

## ALL-INDIA MISSIONS.

**THE CHRISTIAN AND MISSIONARY ALLIANCE.**—Dates from the year 1893 under the name of the International Missionary Alliance, but a number of its missionaries were at work in Berar Province much earlier. Work is carried on in the Provinces of Berar, Khandesh, Gujarat, North-West Frontier Province and Darjeeling

District. There is a staff of 83 missionaries and 152 Indian workers. The number of mission stations is 19, with additional out-stations. There is a Christian community of 2,306 adults. There are 4 Boarding Schools, 2 for boys and 2 for girls, 2 Training Schools for Indian workers, and 1 English congregation at Bhusawal.

*Executive Secretary:* Rev. K. D. Garrison, Akola, Berar, C.P.

**THE CHURCH OF THE BRETHREN (AMERICAN)**—Opened work in 1895, and operates in Broach, Surat and Thana Districts, also in Baroda and Rajpala States. Its staff number 60 foreign workers including missionaries' wives, and 275 Indian workers. The Baptized (immersed) membership stands at 8,141. Education is carried on in 6 Girls' Boarding Schools, 7 Boarding Schools for Boys, and 83 Village Day Schools and 35 Village Night Schools. Females under instruction number 591, males 2,320, total under instruction 2,911. Of this number 1,138 are supported in Boarding Schools and 96 in Training Schools and other institutions of learning. There are 174 teachers of which 49 are women. There are 89 Sunday Schools having 165 teachers and a total enrolment of 8,788. There were 35,340 calls at mission dispensaries in 1924. The foreign medical staff consists of three doctors, three nurses, and one medical Evangelist. At Umalla, Rajpala State, there is a Home for Babies with 22 inmates. Industrial work is carried on in six of the Boarding Schools, and a vocational training school was opened at Anklesvar in June 1924. Evangelistic, Temperance and Publicity work receives due emphasis; the "Gujarati Sunday School Quarterly" (1,800 copies) and the "Prakash Patra," a Christian monthly of 800 copies, are published. *Secretary:* L. A. Bickenstaff, Bulsar, Surat District.

**THE POONA AND INDIAN VILLAGE MISSION.**—Founded in 1893. Mission Stations—Khed Shivapur, Poona District; Nasrapur (Bhor State), Poona District; Lonand, M. S. M. Ry., Satara District; and Pandharpur, Sholapur District. The staff consists of 23 European and 36 Indian workers, with a community of about 20 Indian Christians and their families. The main work is evangelising in the villages, women's zenana work, and primary education. Medical work is conducted at each station, with a hospital at Pandharpur. *Headquarters:* Nasrapur, Poona District. *Secretary:* J. W. Stothard.

**THE AMERICAN CHURCHES OF GOD MISSION.**—Has two missionaries at Bogra, two at Khanjanpur, Bogra District, Bengal and three at Ulbaria, Howrah District.

*Executive Secretary:* Rev. Howard W. Coover, M.A., Bogra, E.B.R.

*Recording Secretary:* Miss Leah K. Becker, Khanjanpur, Bogra District.

**THE INDIA CHRISTIAN MISSION.**—Founded in 1897, has 41 Organised Churches, 17 Missionaries, 43 stations, and out-stations, 1,759 Communicants, 45 Primary schools and two Industrial Schools in the Elore District, also Bible Training Institute, Doddballapur, near Bangalore, S. India. stations also in Nuwara Eliya, Mulpotha Uva Province and Polgawella, Ceylon; Girls' Orphanage at Colombo; Industrial School for children of mixed parentage, Nuwara Eliya. Total Christian community 4,092. *Director:* Rev. A. S. Paynter, Nuwara Eliya, Ceylon.

**THE CHURCH OF THE NAZARENE MISSION.**—Has its headquarters for Western India at Buldana Berar, where it has a boys' boarding school for training native preachers and a girls' school for training Bible women. This mission

has 3 stations in Thana District, namely, Khardi, Shahapur and Murbad. There is a total force of 11 missionaries at present in this part of India, also 36 native preachers and Bible women.

*District Superintendent:* Roy G. Coddling, Buldana, Berar.

The headquarters for Eastern India are at Kishorganj, Mymensingh District, with an orphanage and a force of 7 missionaries; also about 11 preachers and Bible women. This totals 19 missionaries and 89 native preachers and Bible women for the Church of the Nazarene in India.

*District Superintendent:* F. E. Blackman, Kishorganj, Mymensingh District.

**THE TANAKPUR AND LOHAGHAT BIBLE AND MEDICAL MISSION.**—Was established in 1910. It is now carried on in Tanakpur and District only, that neighbourhood having again been attached to the Naiin Tal District in Kumaon. *Address:* Tanakpur, Rohilkhand and Kumaon Railway, United Provinces.

**THE HEPHEZBAH FAITH MISSIONARY ASSOCIATION.**—Has seven missionaries. *Field Superintendent:* D. W. Zook, Adra, B. N. Ry.

**THE TIBETAN MISSION.**—Has 4 Missionaries with headquarters at Darjeeling, and Tibet as its objective. *Secretary:* Miss J. Ferguson, Darjeeling.

**THE INDIAN MISSIONARY SOCIETY OF TINNEVELLY (DORNAKAL MISSION).**—Opened in 1904, operates in the Warangal District of the Nizam's Dominions as well as among the hill tribes called Paliars in the British and Travance Hills. It is the missionary effort of the Tamil Christians of Tinnevely. There are now nearly 4,000 Telugu Christians in 106 villages and 350 Paliar Christians in the hills. *Secretary:* Rev. R. V. Asirvadam, Palamcottah.

**THE MISSION TO LEPERS.**—Founded in 1874 is an inter-denominational and international Society for the establishment and maintenance of Asylums for Lepers and Homes for their untainted children, working in 12 countries but largely in India, China and Japan. Its work in India is carried on through co-operation with 33 Missionary Societies. In India alone the Mission now has 42 Asylums of its own with about 5,000 inmates and is aiding or has some connection with work for lepers at 21 other places in India. Altogether in India over 7,000 lepers are being helped.

An important feature of the work of the Mission is the segregation of the untainted or healthy children of lepers from their diseased parents. Nearly 600 children are thus segregated and saved from becoming lepers.

Most of the Mission's income is received from voluntary contributions. Some funds are raised in India, but the bulk of the money expended by the Mission in India, was received from Britain, although the Provincial Governments give regular maintenance grants.

There is an Indian Auxiliary of the Mission to Lepers, of which H. E. Lady Wilson who represents the Bombay Presidency is a Vice-President.

The General Secretary of the Mission is Mr. W. H. P. Anderson, 33, Henrietta St., Covent Garden, London, W.C. The Secretary for India is Mr. A. Donald Miller, Purulia, Behar.

**THE REGIONS BEYOND MISSIONARY UNION.**—An interdenominational Society commenced work at Motihari, Behar, in 1900, and now occupies 6 stations and 6 out stations in the Champaran and Saran Districts, with a staff of 13 European and 3 Indian Missionaries and 40 other Indian workers. The mission maintains 1 Hospital, 1 Girls' Orphanage, 1 Boys' Orphanage and Boarding School, 1 M. E. School and 16 Primary Schools, with 500 pupils. Communicants number 80. *Secretary:* Rev. J. Z. Hodge, Motihari.

**THE NATIONAL MISSIONARY SOCIETY OF INDIA**—Established 1905, it has a staff of 17 Indian Missionaries and 65 helpers and Volunteers. Operates in Montgomery District (the Punjab), Nukkar Tahsil (U. P.), Halaughat, Mymensingh District (Bengal), Rewah State (C. I.), Jharsagudah (B. & O.), North Kanara (Bombay), Karjat—Karmala Talukas (Bombay), and Tirupattur Taluk (N. Arcot). Christian community over 7,000. Fifteen Elementary Schools and two High Schools, one printing press, two Dispensaries and one Hospital. Annual expenditure Rs. 60,000. Supported by Indian Christians of all denominations and Provinces. *Organs:* *The National Missionary Intelligencer* (a monthly journal in English sold at Re. 1 per year post free), *Qasid* (a monthly journal in Persian-Urdu) at Re 1-8-0, *Deepakai* (a monthly journal in Tamil and Kanarese) at 4 as. per year post free.

*General Secretary:* Rai Bahadur A. C. Mukerji, B.A., N.M.S. Office, Vepery, Madras.

**THE SEVENTH DAY ADVENTISTS.**—The Seventh-day Adventists commenced mission work in India in 1893, and now employ a staff of approximately five hundred workers, European and Indian, including ninety-seven ordained or licensed ministers. Evangelistic and educational work is conducted in fifteen vernaculars, besides work for English-speaking peoples in the large cities. For administrative purposes, the work is organised into four Union Missions located as follows:—

Burma Union Mission of S. D. A. (J. Phillips, Superintendent). Office address:—1, Franklin Road, Rangoon.

North-East India Union Mission of S. D. A. (A. H. Williams, Superintendent). Office address:—36, Park Street, Calcutta.

North-West India Union Mission of S. D. A. (I. F. Blue, Superintendent). Office address:—17, Abbott Road, Lucknow.

South India Union Mission of S. D. A. (G. G. Lowry, Superintendent). Office address:—7, Cunningham Road, Bangalore.

The general headquarters for India and Burma is located at Salisbury Park, Poona. (A. W. Cormack, *Chairman*; A. H. Williams, *Secretary and Treasurer*. Office address: Post Box No. 15, Poona). On the same estate is an up-to-date publishing house, devoted entirely to the printing of evangelical and associated literature. (Address: Oriental Watchman Publishing Association, Post Box No. 35, Poona). A large number of day and boarding vernacular and Anglo-vernacular schools are conducted in different parts of the country; and at Vincent Hill School, Mussoorie, European education is provided, a regular high-school course, with more advanced work for commercial and other

special students, being available. In all the denominational boarding schools increasing emphasis is being laid on vocational work, the students being required to share in the domestic work of the institutions, and in many cases to engage in some trades work or other. Four physicians, one maternity worker, (C.M.B.) and a number of qualified nurses are employed, regular medical work being conducted at fourteen stations. The baptised membership (adult) is 2,500, organised into 66 churches; and in addition a substantial community of enquirers is receiving systematic instruction. 167 Sabbath Schools are conducted with an enrolled membership of 3716.

**THE AMERICAN MENNONITE MISSION.**—Established 1899, works in the C. Provinces. Mission staff numbers 20, Indian workers 80, Church members 1,400, 1 Industrial Training Institution, 1 High School, 2 Vernacular Middle Schools, 1 Men's Home, 2 Homes for untainted children of lepers, 1 Bible School, 2 Orphanages, 1 Widows' Home, 1 Leper Aylum; Elementary Schools, 8; Dispensaries, 6.

*Secretary:* Rev. A. C. Brunk, Dhamtari, C. P. **THE GENERAL CONFERENCE—MENNONITE MISSION.**—Started in 1901 in the C. Provinces. Workers number 30; Leper, Medical, Orphan, Zenana, Evangelistic and educational work carried on. *Secretary:* Rev. P. W. Penner, Janjgir, C. P.

**THE KURKU AND CENTRAL INDIA HILL MISSION.**—Established 1890 in the C. P. and Berar, has a mission staff of 14, Indian workers 18, Churches 6, Communicants 171; Christian community 357; 2 Boarding schools with 109 boarders and 5 Elementary schools. *Secretary:* Rev. Carl Wyder, Ellichpur, Berar, C. P.

**THE Ceylon and India GENERAL MISSION.**—Established 1892, occupies stations in India in the Coimbatore and Anantapur Districts and also stations in Panadura, Ceylon. Mission staff 38; Indian workers 148; Churches 11, with Communicants 688, and Christian community 2,109; Orphanages 5; Elementary schools 45; pupils 1,262.

*Secretary:* Mr. A. Scott, Kadiri, Anantapur District.

**THE BOYS' CHRISTIAN HOME MISSION.**—Owes its existence to a period of famine, was commenced in 1899. Mission staff 17, Indian workers 95. There are elementary schools with three orphanages, two boys and one girl, and a Widows' Home, where industrial training is given. There are four main stations—At Dhond, in the Poona District and at Bahrach, Orsi and Benares in United Provinces. There are also 30 out-stations. *Director:* Rev. John E. Norton, Dhond, Poona District. *Secretary:* W. K. Norton, Benares, U. P.

### Ladies' Societies.

**ZENANA BIBLE AND MEDICAL MISSION.**—This is an interdenominational society, with headquarters, 33, Surrey Street, London, working among women and girls in six stations in the Bombay Presidency, 10 in United Provinces, and 3 in the Punjab. There are 81 European Missionary ladies on the staff and 41 Assistant Missionaries, 189 Indian teachers and nurses and 53 Bible women. During 1924 there were 2,761 in-patients in the five hospitals supported

by the Society (Nasik, Benares, Jaunpur, Lucknow and Patna), but the Victoria Hospital, Benares, was closed. There were 28,001 out-patients, 102,124 attendances at the Dispensaries. In their 42 schools were 3,206 pupils, and there is a University Department at Lahore. The evangelistic side of the work is largely done by house to house visitations and teaching the women in Zonanas, 1,271 women were regularly taught and 1,654 houses were visited. The 63 Bible women visited 550 villages; the number of houses was 1,814.

**Hon. Treasurer:** The Lord Meston of Dunottar.

**Secretaries:** Rev. Dr. Carter, Rev. E. S. Carr, M.A. (Hon.), and Miss M. G. Liesching.

**WOMEN'S CHRISTIAN MEDICAL COLLEGE, WITH WHICH IS INCORPORATED THE PUNJAB MEDICAL SCHOOL FOR WOMEN.**—In 1894 the North India School of Medicine for Christian Women was opened in Ludhiana in order to give a Medical Education under Christian influences to Indian Women. Doctor Edith Brown, M.A., M.D., was its Founder and Principal. The School was Interdenominational, and trained students for various Missionary Societies.

Clinical work was at first given at the Charlotte Hospital, which belonged to the Ludhiana Zenana and Medical Mission. The Memorial Hospital was opened in 1900, and has now 180 beds. In 1913 non-Christian Students were also admitted for training, and the name was modified to its present title given above.

In 29 years 116 Medical Students have qualified as Doctors, over 50 as Compounders, over 120 as Nurses, and over 150 as Dais. Plans are now on hand to enlarge both Hospital and College considerably.

**THE MISSIONARY SETTLEMENT FOR UNIVERSITY WOMEN** was founded in Bombay in 1895 to reach the higher class of Indian ladies, its activities now include a hostel for women students, in addition to educational, social, and evangelistic work, and a Holiday House for students and other ladies at Jahbord-Gholvad, B. B. & C. I. Ry. **Warden:** Miss Gedge, Vachagandhi Road, P. O. 7, Bombay.

**THE RAMABAI MUKTI MISSION** (affiliated with the Christian and Missionary Alliance Mission in 1925) the wellknown worker of the late Pandita Ramabai, shelters about 700 deserted wives, widows and orphans, educating and fitting them to earn their living. The Mission is worked on Indian lines and carried on by Indian and European workers. Evangelistic work is carried on in the surrounding villages of Kodgaon, Poona District.

### Disciple Societies.

The India Mission Disciples of Christ, under the United Christian Missionary Society, St. Louis, U.S.A., began work in India in 1882. It works in the Central Provinces and South United Provinces. There are 86 Missionaries including missionaries' wives and 349 Indian workers. There are 14 Organised Churches with the membership of 2,385. There is a Christian community of 4,117. There are 7 Hospitals and 12 Dispensaries in which 141,264 in-patients and out-patients were treated last year. Two Orphanages and Industrial Homes show 375 inmates. A Boarding School for girls and one for boys and 3 Hostels for boys show 501

inmates. 2 Lepor Asylums have 160 inmates. A Tuberculosis Sanitarium at Pandra Road admitted 95 patients during the year. An Industrial School is conducted at Damoh in connection with which a 400 acre farm is used for practical work. In the Home for women and children at Kulpahar needle work, gardening, etc., are taught in connection with which a large business is done each year. The Mission Press at Jubbulpore printed about 3,000,000 pages of Christian Literature. There is a High School; also 8 Middle Schools, 28 Primary Schools with about 3,000 pupils.

The Australian Branch has 3 Mission Stations in the Poona District. The Great Britain and Ireland Branch in Mirzapur District of U.P. and Palamau District in Orissa. These two have no organised connection with the India Mission Disciples of Christ.

**Secretary and Treasurer:** W. H. Scott, Jubbulpore, C. P.

### Undenominational Missions.

**THE CENTRAL ASIAN MISSION**, with a Church Dispensary and School, is found on the N.-W. Frontier, conducted on the lines of the China Inland Mission, and has Kafristan as its objective.

**THE FRIENDS' FOREIGN MISSION ASSOCIATION** works in five stations of the Hoshangabad Division of the Central Provinces, and in two of the adjacent Bhopal State, and has also some work going on in that of Gwalior. There are 7 Churches, 14 missionaries, 185 members in full communion, 1,076 Christian adherents, 1 boarding School for girls and 1 also for boys, 2 Anglo-Vernacular Middle Schools and 12 Primary Schools; and two hospitals with dispensaries attached. In addition to a self-supporting weaving community at Itarsi and a Farm Colony at Makoriya, in Hoshangabad District. **Secretary:** Mr. A. Taylor, Sehore Cantonment, C. I.

**THE AMERICAN FRIENDS' MISSION** with 8 Missionaries is working in Bundelkhand. **Secretary:** Miss E. E. Baird, Nowgong, C. I.

**THE OLD CHURCH HEBREW MISSION** was established in 1858, in Calcutta, and is said to be the only Hebrew Christian Agency in India. **Secretary:** The Rev. Walter Plant, 11, Mission Row, Calcutta.

**THE OPEN BRETHREN**—Occupy 46 stations in the U. Provinces, Bengal, S. Mahratta, Godavari Delta, Kanarese, Tinnevely, Malabar Coast, Coimbatore and Nilgiri Districts. They hold an annual Conference at Bangalore.

### Lutheran Societies.

**THE INDIA MISSION OF THE UNITED LUTHERAN CHURCH IN AMERICA.**—Formerly American Evangelical Lutheran Mission, Guntur and Rajahmundry. Work is conducted in the Godavari, Kistna, Guntur and Vizagapatam Districts. Its Missionary staff consists of 10, including Missionaries' wives and 3,221 Indian workers. The baptised membership is 106,503. There are 928 Village Schools, 13 Boys' Boarding Schools, 6 Girls' Boarding Schools, 3 High Schools, a Second Grade College, 7 Bible and Secular Training Schools, a Theological Seminary, 1 Agricultural School, 5 Hospitals and 2 Mission Presses. **Chairman:** The Rev. F. L. Coleman, Bhimavaram.

**THE EVANGELICAL NATIONAL MISSIONARY SOCIETY OF STOCKHOLM, SWEDEN**, founded in 1856, occupies the districts of Saugor, Betul, and Chhindwara in the Central Provinces. There are about 2,000 Church members constituted into an indigenous Church with 12 local congregations. The European and Indian Staff numbers 34 and 165 respectively. One Theological Seminary for training catechists and pastors, and one training school for training Bible Women. 38 Day Schools with 1,442 children. 35 Sunday Schools with 1,121 children. 10 Dispensaries with 39,068 patients during 1922. 8 Workshops, one of them with an aided Carpenter School. One Female Industrial School, one Widows' Home, 6 Orphanages and one Boarding School for Christian children. At the end of 1922 there were 165 boys and 218 girls in these institutions.

*Secretary:* Rev. G. A. Bjork, B.D., Chhindwara, C. P.

**THE KANARESE EVANGELICAL MISSION** with Headquarters at Mangalore, South Kanara, was organised on January 1st, 1919, to take over the Mission work done formerly by the Basel Evangelical Mission in two of her fields, namely, the Districts of South Kanara and South Mahratta. The missionaries and the Funds come from Switzerland. The Mission has 12 chief stations and 56 out-stations with a total missionary staff of 40 and 374 Indian workers. There are 48 organised congregations with a total membership of 12,457, which gave last year Rs. 15,889 for church and mission work. Educational work embraces 71 schools, of which there are 3 High Schools. The number of scholars is 8,578.

Medical work is done at Betgeri, South Mahratta, with a full staff and a hospital and two branch hospitals and dispensaries. A women's and children's hospital has been opened in June 1923 at Udipi, South Kanara. A wing is being added to it this year.

The Mission maintains a Home-Industrial department for women's work, and a large Publishing department at Mangalore with a bookshop and a printing press occupying some 150 hands and doing work in many languages.

*Ag. Secretary:* The Rev. P. E. Burckhardt, Ph.D., Udipur.

**THE CHURCH OF SWEDEN MISSION** was founded in 1874. Operated till 1915 in the Madras, Tanjore, Trichinopoly and Ramnad Districts. Since 1915 the Mission having taken full charge of the former Leipzig Evangelical Lutheran Mission field, works also in the Madras, Chingleput, Coimbatore, Salem and S. Arcot Districts with diaspora congregations in Rangoon, Penang and Colombo. European staff numbers 35; ordained Indian ministers 42; Indian workers 84; organised churches 43; baptised membership 23,654; Schools 334; pupils 16,537 (boys 12,703 and girls 3,834); and teaching staff 728. *President:* Rt. Rev. Bishop E. Heuman, D.D., Ph.D., Trichinopoly.

**THE INDIA MISSION OF THE EVANGELICAL LUTHERAN SYNOD OF MISSOURI, OHIO AND O.S.**, is located in North Arcot, Salem, and Tinnevely Districts, in Travancore, and the Kolar Gold Fields, with 18 missionaries, 3 nurses (American),

1 doctor (Indian), 1 Zenana worker, 1 American teacher in charge of Missionary Home for children, and 1 Lady educationist. Besides the three Training Institutes there are one complete and one incomplete High Schools, and among the Elementary Schools three complete Higher Elementary. In addition to evangelistic and educational work, the Mission has now an up-to-date Dispensary and Lying-in Hospital with 18 beds in Ambur, a Dispensary in Krishnagiri (Salem) and a Theological Seminary. *Secretary:* Rev. T. Gutknecht, Nagercoil, & Travancore.

**THE DANISH MISSIONARY SOCIETY.**—Established 1863 in South Arcot, working there and in North Arcot, on the Shevaroy Hills and in Madras, has a total staff of 385 Indian and 43 European workers, Communicants 1,620, Christian community 4,367, 1 High School, 3 Boarding Schools, 4 Industrial Schools, Elementary Schools 84; total scholars 5,099. *President:* Rev. K. Lange, B.A., B.D., Cuddalore.

*Treasurer:* Rev. K. Heiberg, B.A., B.D., 38, Broadway, Madras.

**THE SANTAL MISSION OF THE NORTHERN CHURCHES** (formerly known as the India Home Mission to the Santals)—Founded in 1867, works in the Santal Parganas, Goalpara (Assam), Malda and Dinajpur. Work is principally among the Santals. The mission staff numbers 27; Indian workers 480; communicants 4,000; Christian community 23,000; organised churches 86; boarding schools 4; pupils 508; elementary schools 69; pupils 1,035; industrial schools 2; Orphanage 1; children 29. *Secretary:* Rev. P. O. Boddington, Dumka, Santal Parganas.

**MISSIONS AND ENEMY TRADING ACT.**—In May 1918, the following notice regarding Missions was published in the "Gazette of India":—"The following missions or religious associations are declared companies under Act 2 (the Enemy Trading Act) of 1916:—The Leipzig Evangelical Lutheran Mission, Madras, the Hordmannsberg Evangelical Lutheran Mission, Madras, the Schleswig-Holstein Evangelical Lutheran Mission, Madras, the Gosnor Evangelical Lutheran Mission of the United Provinces and Behar and Orissa, the German Evangelical Lutheran Mission of Ranchi, Behar and Orissa. The Governor-General in Council notifies that the powers conferred under Section 7 of the said Act shall extend to the property, movable and immovable, of these missions or religious associations."

In June, 1919, the Government of India stated:—"Effect is already being given to the suggestion that enemy missions in India should be taken over by British societies. The properties and undertakings of hostile missions have been vested in the Provisional Custodian of Enemy Property with a view to their transfer to boards of trustees composed partly of non-official members nominated by the National Missionary Council of India with the approval of the Government of India and partly of Government officials, and those Boards of Trustees will in due course transfer the undertakings and properties to a missionary society to be selected by them with the approval of the Governor-General in Council."

### Methodist Societies.

The Methodist Episcopal Church is the organization in the United States of America which grew out of the Wesleyan revival in England and her American colonies during the latter part of the eighteenth century. This Church began its work in India in 1856, at first confining its activities to what is now the United Provinces. From that centre it spread until the outposts of its work were found in Baluchistan, Burma, Malaysia, Netherlands Indies and the Philippine Islands. In 1920 a rearrangement of the mission field of the Church separated India, Burma and Baluchistan into what is now known as the Southern Asia division. Within this present field the Church now has a total baptized Christian community of 456,000, of whom 36,000 were baptised the year ending with 1925.

The avowed task of the Church has been the uplift of the depressed classes, and its work has been largely among that class. As a matter of fact, however, it has large numbers who came from the Mohammedans and the caste Hindus, and among such its influence is extending.

The educational work of the Church is extensive, it having in this area a total of 1,027 schools of all grades, including three colleges, twenty-two high schools, and numerous normal training and the logical institutions. The registered attendants in these schools number 46,750.

Special effort is made for the instruction and development of the young people of the Church, there now being 987 chapters of the Epworth League with 46,035 enrolled members, and 6,469 organized Sunday Schools with an enrolment 205,963.

The publishing interests of the Church are represented in two presses at Madras and Lucknow, the former doing work in four vernaculars and the latter in six. The periodicals issued cover the interests of both the evangelistic and the educational field, the Indian Witness, the Junior Methodist and Methodist Education being in English, while the *Kaukab-i-Hind*, the *Rasik-i-Niswan*, the *Bal Hit Karak*, and other periodicals for women and children are issued in several of the vernaculars, as are lesson helps of various grades for the Sunday Schools.

The governing body of the Church is the General Conference held quadrennially in America in which the ten conferences now existing in India are represented by twenty-eight delegates. The polity of the Church in India looks forward to complete independence under the general governing body, there at present being but about three hundred and fifty American men and women as compared to 480 ordained and 3,162 unordained Indian and Burmese workers. At present the area is divided into seventy-five districts each in charge of a superintendent and among whom are many Indians. The work is supervised by four Bishops, elected by the General Conference, and resident as follows: Bishop Frank W. Warne, Bangalore; Bishop John W. Robinson, Delhi; Bishop Frederick B. Fisher, Calcutta; and Bishop Brenton T. Badley, Bombay.

THE AMERICAN WESLEYAN METHODIST MISSION, Sanjan, Thana District Headquarters. Station with missionaries, Danda Maroli, via Nargol, Thana District. Vapi (Daman Road Station), Surat District. Pardi 6, Surat District. Six missionaries on field. Two on furlough. One under appointment. Four main stations. Two boarding schools. One industrial school. One Bible school. Six village schools. *Superintendent*, C.B. Harvey, Sanjan, Thana District.

THE REFORMED EPISCOPAL CHURCH OF AMERICA at Latipur and Lucknow, U. P., has 2 Missionaries, 4 Outstations, 1 Hospital, 2 Orphanages and a membership of nearly 100.

THE WESLEYAN METHODIST MISSIONARY SOCIETY commenced work in India in 1817 (Ceylon in 1814). The Mission in India, apart from Ceylon, is organised into 8 District Synods with 2 Provincial Synods. There is a large English work connected with the Society, 20 ministers giving their whole time to Military work and English churches.

The districts occupied include 64 main stations in Bengal, Madras, Mysore, Bombay, Punjab, Central Provinces, Hyderabad (Nizam's Dominions), United Provinces and Burma. The European staff numbers 98 with 61 Indian Ministers and 615 Indian workers; Communicants 15,688, and total Christian community 68,892. There are 8 large numbers of organized Churches many of which are self-supporting.

Educational work comprises 3 Christian Colleges, students, 1,993; 5 Theological Institutions, students, 238; 10 High Schools, pupils, 4,524; 14 Industrial schools, pupils, 400; 707 Elementary schools, with 23,034 scholars in Medical work there are 3 hospitals, 6 dispensaries, 1,038 in-patients and 43,227 out-patients. The Society expended over £85,000 on its Indian Missions in 1922.

The Women's Auxiliary carry on an extensive work in the places occupied by the men's society. There are 71 women workers from Britain of whom 9 are qualified doctors. The Indian women workers number 274. There are 116 girls' day schools with 13,377 pupils and 31 boarding schools with 1,979 boarders. There are several philanthropic institutions for the rescue and training of women. The Women's Auxiliary manage 12 hospitals and 3 dispensaries, which had 5,788 in-patients and 70,529 out-patients. The cost of the work to the Women's Auxiliary in 1922 was over £20,000.

*Vice-Chairman of General Synod*: Rev. D. A. Rees, Mysore.

The Woman's Foreign Missionary Society of the M. E. Mission is divided into 9 Conferences and is co-extensive with the main work of the Mission. 235 Lady Missionaries are engaged in Educational, Zenana, Evangelistic and Medical work. The Secretary for the Bombay Conference is Miss A. A. Abbott, B.A., Basim, Berar.

THE FREE METHODIST MISSION of North America—Established at Yeotmal, 1893, operates in Berar with a staff of 19 Missionaries and 42 Indian workers. Organised churches 4, 1 Theological school and 5 Elementary schools, and 3 Anglo-Vernacular schools and Dispensaries 3. *Secretary*: Rev. Elizabeth Morland, Wun, Berar.

## THE SALVATION ARMY.

For many years the operations of the Salvation Army in India were under the immediate direction of eight Territorial Commanders, in part responsible to Commissioner Booth-Tucker, as Special Commissioner for India, and in part to International Headquarters. The General recently decided to divide the country into four distinct Commands, each under its own Territorial Commissioner and directly responsible to International Headquarters.

**Northern India.**—The area under this command is the S. A. work in the whole of the Punjab and the United Provinces with Headquarters at Lahore.

In addition to an extensive evangelistic work in the Punjab, and in several centres in the United Provinces, there are a number of Settlements for the Criminal Tribes in the United Provinces (where this important work was first introduced) and several also in the Punjab.

In the Punjab is situated an agricultural settlement consisting of a large village of 1,800 inhabitants who cultivate some 2,000 acres of land, in which they will gradually acquire proprietary rights, the Government having given it to the Salvation Army on easy terms. This is proving to be very successful.

The Nambardari of a large tract of country in the Punjab, comprising some two thousand acres of land, has been handed over to the Salvation Army, for the purpose of establishing a Colony.

Other Industries include Weaving Schools, Agricultural, Dairy and Fruit Farms, Day and Boarding Schools, a Home for stranded Europeans, and for British Military Soldiers, a Hospital and Dispensaries.

Village Centres occupied, 1,778; Officers, 359, Employees, 364; Social Institutions, 23.

**Territorial Headquarters:** S. A., Ferozepore Road, Lahore, Punjab.

**Territorial Commander:** Lt. Commissioner Jai Kumar (Toft).

**Chief Secretary:** Lt.-Colonel Jayadas (Hancock).

**Western India.**—The three Territories of Bombay, Guzerat, and Maratha now form the Territory of Western India.

Besides the distinctly evangelistic operations, there are established a large General Hospital—Thomas Emery Memorial—several Dispensaries, at which during the year about 20,000 patients are treated, over 240 Day and Boarding Schools, also a Boarding School and Hostel for Bhil Children, a Home for Juvenile Criminals, an Industrial Home for Women, a British Soldiers' and Sailors' Furlough Home, Weaving and Silk Schools; a Factory for Weaving, Warping, and Reeling Machines, and a Land Colony having a population of some hundreds of Salvationists.

Corps, 289; Outposts, 528; Officers, 634, of whom 589 are Indian; employees and teachers, 123; Social Institutions, 15.

**Territorial Headquarters:** S. A., Moreland Road, Byculla, Bombay.

**Territorial Commander:** Commissioner Horskins.

**Chief Secretary:** Lt.-Col. Jaya Prakas (Gore).

**Madras and Telugu Territory.**—This Territory comprises the city of Madras and work situated in the Nellore, Guntur, Kistna and West Godavari Districts of the Northern Circars of the Madras Presidency, also Bangalore.

There are the following agencies at work:—261 Corps and outposts, *etc.*, places in which work is systematically done.

163 Village Primary schools, 4 Settlements for Criminal Tribes with a total population of 3,568, 2 Industrial Schools for children of Criminal Tribes, 1 Rescue Home, 1 Silk Farm, where some 75 boys are being instructed in the various branches of sericulture, 2 Institutions for the training of officers and 1 girls' boarding school.

1 Trading Department, where cloth, leather goods, furniture, carpets, silk, lace, *etc.*, the products of Industrial Institutions, are disposed off.

**Territorial Headquarters.**—The Salvation Army, Broadway, Madras.

**Territorial Commander:** Colonel N. Muthiah.  
**Chief Secretary:** Brigadier Charles F. A. Mackenzie (Anandham).

**The South Indian Territory** of the Salvation Army comprises that vast stretch of country to the south of a line drawn from Pondicherry, skirting the State of Mysore, to the most southerly point of the Bombay Presidency, though the real sphere of operations is in Travancore, that in Cochin State and the Tinnevely District adjoining Travancore being of a few years. The work had a very humble beginning on an estate in Travancore, being commenced principally for the well-being of the coolies and labourers, but it had gradually increased and extended, the entire inhabitants of certain villages have become Salvationists and to-day representatives of The Army are carrying on that work in 1,207 different villages.

In the villages round Nagercoil over a thousand women have been taught lace-making and needle-work, and as a direct result their home income has been considerably helped. The Medical work, too, plays an important part in the work of the Salvation Army. Staff Captain (Dr.) W. A. Noble is in charge of this branch, which consists of the mother hospital, known as the Catherine Booth Hospital, and five Branch Hospitals. During the past year, its value has been increased by the bringing into being of a Dental Department.

There are 1,207 Corps and outposts, *i.e.*, villages in which work is systematically carried on: 1,009 Officers and Teachers; 299 Day Schools, 2 Boarding Schools, 4 Training Garisons; with a total constituency of 46,227.

**Territorial Headquarters:** The Salvation Army, Kuravancanam, Trivandrum.

**Territorial Commander:** Lt.-Colonel (Mrs.) A. Trounce.

## Laws and the Administration of Justice.

The indigenous law of India is personal and divisible with reference to the two great classes of the population, Hindu and Mahomedan. Both systems claim divine origin and are inextricably interwoven with religion, and each exists in combination with a law based on custom. At first the tendency of the English was to make their law public and territorial, and on the establishment of the Supreme Court at Calcutta in 1773 and the advent of English lawyers as judges, they proceeded to apply it to Europeans and Indians alike. This error was rectified by the Declaratory Act of 1780, by which Parliament declared that as against a Hindu the Hindu law and usage, and as against a Mahomedan the laws and customs of Islam should be applied. The rules of the Shastras and the Koran have been in some cases altered and relaxed. Instances can be found in the Bengal Sati Regulation Act of 1829; the India Slavery Act, 1843; the Caste Disabilities Removal Act of 1850; the Hindu Widows' Remarriage Act, 1856; and other Acts and Codes. To quote the Imperial Gazetteer, "A certain number of the older English statutes and the English common law are to a limited extent still in force in the Presidency Towns as applicable to Europeans, while much of the old Hindu and Mahomedan law is everywhere personal to their native fellow subjects; but apart from these, and from the customary law, which is as far as possible recognised by the Courts, the law of British India is the creation of statutory enactments made for it either at Westminster or by the authorities in India to whom the necessary law-giving functions have from time to time been delegated."

### Codification.

Before the transfer of India to the Crown the law was in a state of great confusion. Sir Henry Cunningham described it as "hopelessly unwieldy, entangled and confusing." The first steps toward general codification were taken in 1833, when a Commission was appointed, of which Lord Macaulay was the moving spirit, to prepare a penal code. Twenty-two years elapsed before it became law, during which period it underwent revision from his successors in the Law Membership, and especially by Sir Barnes Peacock, the last Chief Justice of the Supreme Court of Calcutta. The Penal Code, which became law in 1860, was followed in 1861 by a Code of Criminal Procedure. Substantially the whole criminal law of British India is contained in these two Codes. One of the most eminent lawyers who ever came to India, Sir James Stephen, said "The Indian penal code may be described as the criminal law of England freed from all technicalities and superfluities, systematically arranged and modified in some few particulars (they are surprisingly few) to suit the circumstances of British India. It is practically impossible to misunderstand the code." The rules of Civil Procedure have been embodied in the Code of Civil Procedure. The Indian Penal Code has from time to time been amended. The Code of Civil Procedure was remodelled in 1908 and the Code of Criminal Procedure in 1898. These Codes are now in force.

### Statute Law Revision.

In October, 1921, a committee was appointed under the presidency of the Hon. Mr. A. P. Muddiman, I.C.S., to deal with the question of statute law revision. The functions of the Committee are to prepare for the consideration of Government such measures of consolidation and clarification, as may be necessary to secure the highest attainable standard of formal perfection in the statute law of India. In several branches of the law consolidation has long been overdue, and it is suggested that the preparation of a Bill consolidating the existing law relating to merchant shipping, with such amendments therein as are necessitated or rendered desirable by the enactment of the English statutes since 1894 on the same subject should form the first duty undertaken by the Committee. Under the conditions resulting from the establishment of the reformed Constitution, increasing importance will attach hereafter to the periodical examination and revision of the Statute Book and the Government of India hope that the Committee will take its place as a permanent feature of the legislative machinery of the country.

### European British Subjects.

Whilst the substantive criminal law is the same for all classes, certain distinctions of procedure have always been maintained in regard to criminal charges against European British subjects. Until 1872 European British subjects could only be tried or punished by one of the High Courts. It was then enacted that European British subjects should be liable to be tried for any offences by magistrates of the highest class, who were also justices of the peace, and by judges of the Sessions Courts; but it was necessary in both cases that the magistrate or judge should himself be a European British subject. In 1883 the Government of India announced that they had decided "to settle the question of jurisdiction over European subjects in such a way as to remove from the code at once and completely every judicial disqualification which is based merely on race distinctions." This decision, embodied in the Ilbert Bill, aroused a storm of indignation which is still remembered. The controversy ended in a compromise which is thus summarised by Sir John Strachey ("India"). "The controversy ended with the virtual, though not avowed, abandonment of the measure proposed by the Government. Act III of 1884; by which the law previously in force was amended, cannot be said to have diminished the privileges of European British subjects charged with offences, and it left their position as exceptional as before. The general disqualification of native judges and magistrates remains; but if a native of India be appointed to the post of district magistrate or sessions judge, his powers in regard to jurisdiction over European British subjects are the same as those of an Englishman holding the same office. This provision however is subject to the condition that every European British subject brought to trial before the district magistrate or sessions judge has the right, however trivial be the charge, to claim to be tried by a jury of which

## *Laws and the Administration of Justice.*

not less than half the number shall be Europeans or Americans.....Whilst this change was made in the powers of district magistrates, the law in regard to other magistrates remained unaltered." Since 1836 no distinctions of race have been recognised in the civil courts throughout India.

After a discussion on this subject in the Legislative Assembly in September 1921, the following motion was adopted:—"That in order to remove all racial distinctions between Indians and Europeans in the matter of their trial and punishment for offences, a committee be appointed to consider what amendments should be made in the provisions of the Code of Criminal Procedure, 1898, which differentiate between Indians and European British subjects and American and Europeans who are not British subjects in criminal trials and proceedings and to report on the best methods of giving effect to their proposals."

### **High Courts.**

The highest legal tribunals in India are the High Courts of Judicature. These were constituted by the Indian High Courts Act of 1861 for Bengal, Bombay and Madras, and later for the United Provinces and the Punjab superseding the old supreme and Sudder Courts. The Judges are appointed by the Crown; they hold office during the pleasure of the Sovereign; at least one-third of their number are barristers, one-third are recruited from the judicial branch of the Indian Civil Service, the remaining places being available for the appointment of Indian lawyers. Trial by jury is the rule in original criminal cases before the High Courts, but juries are never employed in civil suits in India.

For other parts of India High Courts have been formed under other names. The chief difference being that they derive their authority from the Government of India, not from Parliament. In Burma there is a Chief Court, with three or more Judges; in the other provinces the chief appellate authority is an officer called the Judicial Commissioner. In Sind the Judicial Commissioner is termed Judge of the Sudder Court and has two colleagues.

The High Courts are the Courts of appeal from the superior courts in the districts, criminal and civil, and their decisions are final, except in cases in which an appeal lies to His Majesty in Council and is heard by the Judicial Committee of the Privy Council in England. The High Courts exercise supervision over all the subordinate courts. Returns are regularly sent to them at short intervals and the High Courts are able, by examining the returns, by sending for proceedings, and by calling for explanations, as well as from the cases that come before them in appeal, to keep themselves to some extent acquainted with the manner in which the courts generally are discharging their duties.

### **Lower Courts.**

The Code of Criminal Procedure provides for the constitution of inferior criminal courts styled courts of session and courts of magistrates. Every province, outside the Presidency towns, is divided into sessions divisions, consisting of one or more districts and every

sessions division has a court of session and a sessions judge, with assistance if need be. These stationary sessions courts take the place of the English Assizes, and are competent to try all accused persons duly committed, and to inflict any punishment authorised by law; but sentences of death are subject to confirmation by the highest court of criminal appeal in the province. Magistrates' courts are of three classes with descending powers. Provision is made and largely utilised in the towns; for the appointment of honorary magistrates; in the Presidency towns Presidency magistrates deal with magisterial cases and benches of Justices of the Peace or honorary magistrates dispose of the less important cases.

Trials before courts of session are either with assessors or juries. Assessors assist, but do not bind the judge by their opinions; on juries the opinion of the majority prevails if accepted by the presiding Judge. The Indian law allows considerable latitude of appeal. The prerogative of mercy is exercised by the Governor-General-in-Council and the Local Government concerned without prejudice to the superior power of the Crown.

The constitution and jurisdiction of the inferior civil courts varies. Broadly speaking one district and sessions judge is appointed for each district; as District Judge he presides in its principal civil court of original jurisdiction; his functions as Sessions Judge have been described. For these posts members of the Indian Civil Service are mainly selected though some appointments are made from the Provincial Service. Next come the Subordinate Judges and Munsiffs, the extent of whose original jurisdiction varies in different parts of India. The civil courts, below the grade of District Judge, are almost invariably presided over by Indians. There are in addition a number of Courts of Small Causes, with jurisdiction to try money suits up to Rs. 500. In the Presidency Towns, where the Chartered High Courts have original jurisdiction, Small Cause Courts dispose of money suits up to Rs. 2,000. As Insolvency Courts the chartered High Courts of Calcutta, Bombay and Madras have jurisdiction in the Presidency towns. In the mofussil similar powers were conferred on the District Courts by the Insolvency Act of 1906.

Coroners are appointed only for the Presidency Towns of Calcutta and Bombay. Elsewhere their duties are discharged by the ordinary staff of magistrates and police officers unaided by jurors.

### **Legal Practitioners.**

Legal practitioners in India are divided into Barristers-at-Law, Advocates of the High Court; Vakils and Attorneys (Solicitors) of High Courts; and Pleaders, Mukhtars and revenue agents. Barristers and Advocates are admitted by each High Court to practise in it and its subordinate courts; and they alone are admitted to practise on the original side of some of the chartered High Courts. Vakils are persons duly qualified who are admitted to practise on the appellate side of the chartered High Courts and in the Courts subordinate to the High Courts. Attorneys are required to qualify before admission to practise in much the same way as in England. The rule that a solicitor must instruct counsel

prevails only on the original side of certain of the High Courts. Pleaders practise in the subordinate courts in accordance with rules framed by the High Courts.

### Organisation of the Bar.

At Calcutta, Madras, and Bombay there is a Bar Committee presided over, *ex-officio*, by the Advocate-General. This body is elected by the barristers practising in each High Court, and its functions are to watch the interests of the Bar and to regulate its etiquette. At Allahabad, Lahore, Nagpore, and Rangoon a similar Bar Committee exists, but the electorate is extended to include the vakils or native pleaders, and the president is either the senior practising member of the Bar or the Government Advocate. In the larger Districts and Sessions Courts, an organisation representing the Bar is usually to be found, and in the subordinate Courts, including the Revenue Courts, similar machinery is generally in use. Pending an opportunity of detailed inquiries in India, these general descriptions must suffice.

### Composition of the Bar.

A considerable change is occurring in the composition of the Indian Bar. The following extract from an informing article in the *Times* (May 25, 1914) indicates the character and incidence of this development. "During the last forty years, a striking change has taken place in the professional class. The bulk of practice has largely passed from British to Indian hands, while, at the same time, the profession has grown to an enormous extent. One typical illustration may be quoted. Attached to the Bombay High Court in 1871 there were 38 solicitors, of whom 10 were Indian and 28 English, and 24 advocates, of whom 7 were Indian and 17 English. In 1911, attached to the same High Court, there were 150 solicitors, of whom more than 130 were Indian and the remainder English, and 250 advocates, of whom 16 only were English and the remainder Indian."

### Law Officers.

The Government of India has its own law colleague in the Legal Member of Council. All Government measures are drafted in this department. Outside the Council the principal law officer of the Government of India is the Advocate-General of Bengal, who is appointed by the Crown, is the leader of the local Bar, and is always nominated a member of the Provincial Legislative Council. In Calcutta he is assisted by the Standing Counsel and the Government Solicitor. There are Advocates-General and Government Solicitors for Bombay and Madras, and in Bombay there is attached to the Secretariat a Legal Remembrancer and an Assistant Legal Remembrancer, drawn from the Judicial Branch of the Indian Civil Service. The Government of Bengal

consults the Bengal Advocate-General, the Standing Counsel and the Government Solicitor, and has besides a Legal Remembrancer (a Civil Servant) and a Deputy Legal Remembrancer (a practising barrister); the United Provinces are equipped with a civilian Legal Remembrancer and professional lawyers as Government Advocate and Assistant Government Advocate; the Punjab has a Legal Remembrancer, Government Advocate and a Junior Government Advocate; and Burma a Government Advocate, besides a Secretary to the Local Legislative Council.

Sheriffs are attached to the High Courts of Calcutta, Madras and Bombay. They are appointed by Government, selected from non-officials of standing, the detailed work being done by deputy sheriffs, who are officers of the Court.

### Law Reports.

The Indian Law Reports are published in four series—Calcutta, Madras, Bombay, and Allahabad, under the authority of the Governor-General in Council. They contain cases determined by the High Court and by the Judicial Committee on appeal from the particular High Court. These appeals raise questions of very great importance, and the Council of Law Reporting for England and Wales show their appreciation by printing the Indian Appeals in a separate volume, and have also compiled a digest of Indian Appeals covering the period 1874-1893. The other Provinces and States have series of reports issued under the authority either of the Judiciary or the State.

### Legislative Power.

The supreme power of Parliament to legislate for the whole of India cannot be questioned in practice, however, this power is little used, there being a majority of officials on the Imperial Legislative Council—a majority deliberately reserved in the India Councils Act of 1909—the Secretary of State is able to impose his will on the Government of India and to secure the passage of any measure he may frame, regardless of the opinion of the Indian authorities. Legislative Councils have been established both for the whole of India and for the principal provinces. Their constitution and functions are fully described in detailing the powers of the Imperial and Provincial Councils (q.v.). To meet emergencies the Governor-General is vested with the power of issuing ordinances, having the same force as Acts of the Legislature, but they can remain in force for only six months. The power is very little used. The Governor-General-in-Council is also empowered to make regulations, having all the cogency of Acts, for the more backward parts of the country, the object being to bar the operation of the general law and permit the application of certain enactments only.

## THE INDIAN POLICE.

The Indian Government employ (1923-24) about 203,000 Officers and men in the Indian Police. In addition to these there are about 50,000 Officers and men of the military police, of whom more than half belong to Burma. The total cost of maintaining the Force has greatly risen in recent years on account of increases of pay and allowances made on account of the increased cost of living. The Budget Estimate for 1922-23 is Rs. 90,78,000. In large cities the Force is concentrated and under direct European control; in the mofussil the men are scattered throughout each District and located at various Outposts and Police stations. The smallest unit for administrative

**Distribution of Police.**—The area of a Police Station varies according to local conditions. The latest figures available are:—

purposes is the Outpost which generally consists of 3 or 4 Constables under the control of a Head Constable. Outpost Police are maintained to patrol roads and villages and to report all matters of local interest to their superior, the Sub-Inspector. They have no powers to investigate offences and are a survival of the period when the country was in a disturbed state and small bodies of Police were required to keep open communications and afford protection against the raids of dacoits. It is an open question whether they are now of much use. Each Outpost is under a Police Station which is controlled by an officer known as a Sub-Inspector.

Police Station varies according to local con-

## Organisation of Police.

The Police Station Officer (the Sub-Inspector) is responsible for the investigation of all cognisable crimes, that is to say, all offences in which the Police can arrest without a warrant from a Magistrate, which occur within his jurisdiction; he is also held responsible for the maintenance of the public peace and the prevention of crime. From the point of view of the Indian Ryot, he is the most important Police Officer in the District and may rightly be considered the backbone of the Force.

Superior to the Sub-Inspector is the Inspector who holds charge of a Circle containing 4 or 5 Police Stations. His duties are chiefly those of supervision and inspection. He does not ordinarily interfere in the investigation of crime unless the conduct of his subordinates renders this necessary.

The Inspector is usually a selected and experienced Sub-Inspector. Each District contains 3 or 4 Circles, and in the case of large

Districts, is divided into 2 Sub-divisions—one of which is given to an Assistant Superintendent of Police, a European gazetted Officer. The Police Force in each District is controlled by a District Superintendent of Police, who is responsible to the District Magistrate (Collector or Deputy Commissioner) for the detection and prevention of crime and for the maintenance of the public peace, and, to his Deputy Inspector-General and Inspector-General, for the internal administration of his Force. Eight or ten Districts form a Range administered by a Deputy Inspector-General, an officer selected from the ranks of the Superintendents. At the head of the Police of each Province is the Inspector-General who is responsible to the Local Government for the administration of the Provincial Police.

Separate but recruited from the District Force is the Criminal Investigation Department, which is under the control of a specially selected European Officer of the rank and

standing of a Deputy Inspector-General. The Criminal Investigation Department, usually called the C. I. D., is mainly concerned with political inquiries, seditious cases and crimes with ramifications over more than one District or which are considered too important to leave in the hands of the District Police. It is a small force of Sub-Inspectors and Inspectors who have shown their ability and intelligence when working in the mofussil and forms in each Province a local Scotland Yard.

The larger Cities of Calcutta, Bombay, and Madras have their own Police Force, independent of the Inspector-General of Police, and under the control of a Commissioner and 2 or more Deputies. For Police purposes each city is divided into divisions; in Calcutta each division is in charge of a Deputy Commissioner of Police; in Bombay and Madras of a Superintendent, these officers being selected from the European ranks of the City Force. In Bombay, however, the Superintendents are Gazetted Officers, and two of them are Indians. Each division is sub-divided into a small number of Police Stations, the station being in charge of an Inspector assisted by Deputy Inspectors, Indian Sub-Inspectors and European Sergeants.

The Supreme Government at Delhi and Simla keeps in touch with the Provincial Police by means of the Director of Criminal Intelligence and his Staff. The latter do not interfere in the Local Administration and are mainly concerned with the publication of information regarding international criminals, inter-provincial crime and Political enquiries in which the Supreme Government is interested.

**Recruitment.**—The constable is enlisted locally. Certain castes are excluded from service and the formation of cliques by filling up the Force from any particular caste or locality is forbidden. In some Provinces a fixed percentage of foreigners must be enlisted. Recruits must produce certificates of good character and pass a medical test. They must be above certain standards of physical development. The constable rises by merit to the rank of Head Constable and, prior to the Police Commission, could rise to the highest Indian subordinate appointments. Since 1906, his chances of promotion have been greatly curtailed; this has certainly lowered the standard coming forward for service in the Force in the lower ranks.

The Sub-Inspector, until 1906, was a selected Head Constable, but Lord Curzon's Commission laid down that Sub-Inspectors should be recruited direct from a socially better class of Indians. In most Provinces, eighty per cent. of the Sub-Inspectors are selected by nomination, trained for a year or 18 months at a Central Police

School, and, after examination, appointed direct to Police Stations to learn their work by actual experience. It is too early to judge this system by results, but it has no doubt great disadvantages and undetected crime in India is increasing rapidly.

An Inspector is generally a selected Sub-Inspector. Direct nomination is the exception, not the rule.

The Deputy Superintendent, a new class of officer, instituted on the recommendation of the Commission, is an Indian gazetted officer and is the native Assistant to the District Superintendent of Police. He is either selected by special promotion from the ranks of the Inspectors or is nominated direct, after a course at the Central Police School.

Prior to 1893, the gazetted ranks of the Force were filled either by nomination or by regimental officers seconded from the Army for certain periods. In 1893, this system was abandoned and Assistant Superintendents were recruited by examination in London. On arrival in India, they were placed on probation until they had passed their examinations in the vernacular, in law, and in riding and drill. The establishment of Police Training Schools in 1906 has done much to improve the training of the Police Probationer, and selection by examination has given Government a better educated officer, but open competition does not reveal the best administrators and should be tempered, as in the Navy, by selection.

**Internal Administration.**—The District Force is divided into 2 Branches—Armed and Unarmed. As the duties of the armed branch consist of guarding Treasuries, escorting treasure and prisoners and operating against dangerous gangs of dacoits, they are maintained and controlled on a military basis. They are armed and drilled and taught to shoot after military methods. The unarmed branch are called upon to collect fines magisterially inflicted, serve summonses and warrants, control traffic, destroy stray dogs, extinguish fires, enquire into accidents and non-cognizable offences. The lower grades are clothed and housed by Government without expense to the individual. The leave rules are fairly liberal, but every officer, European or Native, must serve for 30 years before he is entitled to any pension, unless he can obtain a medical certificate invaliding him from the service. This period of service in an Eastern climate is generally admitted to be too long and the efficiency of the Force would be considerably improved if Government allowed both the officers and men to retire after a shorter period of service.

## STATISTICS OF POLICE WORK.

The undesirability of attaching undue importance to statistical results as a test of the merits of police work was a point upon which considerable stress was laid by the Indian Police Commission, who referred to the evils likely to result from the prevalence among subordinate officers of an impression that the advancement of an officer would depend upon his being able to show a high

ratio of convictions, both to cases and to persons arrested, and a low ratio of crime. The objection applies more particularly to the use of statistics for small areas; but they cannot properly be used as a basis of comparison even for larger areas without taking into account the differences in the conditions under which the police work; and, it may be added, they can at the best indicate only very

imperfectly the degree of success with which the police carry out that important branch of their duties, which consists in the prevention of crime. These considerations have been emphasized in recent orders of the Government of India. Subject to these observations,

the figures below may be given as some indication of the volume of work falling upon the police, and of the wide differences between the conditions and the statistical results in different provinces:—

Administrations.	Number of Offences reported.	Number of Persons under Trial.	Persons whose cases were disposed of				Persons remaining under Trial at the end of the Year.

## JAILS.

Jail administration in India is regulated generally by the Prisons Act of 1894, and by rules issued under it by the Government of India and the local governments. The punishments authorised by the Indian Penal Code for convicted offenders include transportation, penal servitude, rigorous imprisonment (which may include short periods of solitary confinement), and simple imprisonment. Accommodation has also to be provided in the jails for civil and under-trial prisoners.

The origin of all jail improvements in India in recent years was the Jail Commission of 1889. The report of the Commission, which consisted of only two members, both officials serving under the Government of India, is extremely long, and reviews the whole question of jail organization and administration in the minutest detail. In most matters the Commission's recommendations have been accepted and adopted by Local Governments, but in various matters, mainly of a minor character, their proposals have either been rejected *ab initio* as unsuited to local conditions, abandoned as unworkable after careful experiment or accepted in principle but postponed for the present as impossible.

The most important of all the recommendations of the Commission, the one that might in fact be described as the corner stone of their report, is that there should be in each Presidency three classes of jails: in the first place, large central jails for convicts sentenced to more than one year's imprisonment; secondly, district jails at the head-quarters of districts; and, thirdly, subsidiary jails and "lock-ups" for under-trial prisoners and convicts sentenced to short terms of imprisonment. The jail department in each province is under the control of an Inspector-General; he is generally an officer of the Indian Medical Service with jail experience, and the Superintendents of certain jails are usually recruited from the same service. The district jail is under the charge of the civil surgeon, and is frequently inspected by the district magistrate. The staff under the Superintendent includes, in large central jails, a Deputy Superintendent to supervise the jail manufactures, and in all central and district jails one or more subordinate medical officers. The executive staff consists of jailors and warders, and convict petty officers are employed in all central and district jails, the prospect of promotion to one of these posts being a strong inducement to good behaviour. A Press Note issued by the Bombay Government in October, 1915, says:—"The cadre and emoluments of all ranks from Warder to Superintendent have been repeatedly revised and altered in recent years. But the Department is not at all attractive in its lower grades. The two weak spots in the jail administration at the moment are the insufficiency of Central Prisons and the difficulty of obtaining good and sufficient warders."

**Employment of Prisoners.**—The work on which convicts are employed is mostly carried on within the jail walls, but extra-mural employment on a large scale is sometimes allowed, as, for example, when a large

number of convicts were employed in excavating the Jhelum Canal in the Punjab. Within the walls prisoners are employed on jail service and repairs, and in workshops. The main principle laid down with regard to jail manufactures is that the work must be penal and industrial. The industries are on a large scale, multifarious employment being condemned, while care is taken that the jail shall not compete with local traders. As far as possible industries are adapted to the requirements of the consuming public departments, and printing, tent-making; and the manufacture of clothing are among the commonest employments. Schooling is confined to juveniles; the experiment of teaching adults has been tried, but literary instruction is unsuitable for the class of persons who fill an Indian jail.

The conduct of convicts in jail is generally good, and the number of desperate characters among them is small. Failure to perform the allotted task is by far the most common offence. In a large majority of cases the punishment inflicted is one of those classed as "minor." Among the "major" punishments feters take the first place. Corporal punishment is inflicted in relatively few cases, and the number is steadily falling. Punishments were revised as the result of the Commission of 1889. Two notable punishments then abolished were shaving the heads of female prisoners and the stocks. The latter, which was apparently much practised in Bombay, was described by the Commission as inflicting exquisite torture. Punishments are now scheduled and graded into major and minor. The most difficult of all jail problems is the internal maintenance of order among the prisoners, for which purpose paid warders and convict warders are employed. With this is bound up the question of a special class of well-behaved prisoners which was tried from 1905 onwards in the Thana Jail.

**Juvenile Prisoners.**—As regards "youthful offenders"—i.e., those below the age of 15—the law provides alternatives to imprisonment, and it is strictly enjoined that boys shall not be sent to jail when they can be dealt with otherwise. The alternatives are detention in a reformatory school for a period of from three to seven years, but not beyond the age of 18; discharge after admonition; delivery to the parent or guardian on the latter executing a bond to be responsible for the good behaviour of the culprit; and whipping by way of school discipline.

The question of the treatment of "young adult" prisoners has in recent years received much attention. Under the Prisons Act, prisoners below the age of 18 must be kept separate from older prisoners, but the recognition of the principle that an ordinary jail is not a fitting place for adolescents (other than youthful habituals) who are over 15, and therefore ineligible for admission to the reformatory school, has led Local Governments to consider schemes for going beyond this by treating young adults on the lines followed at Borstal, and considerable progress has been made in this direction. In 1905, a special class for selected juveniles and young adults was established at the Dharwar

jail in Bombay; in 1908 a special juvenile jail was opened at Alipore in Bengal; in 1909 the Melktila jail in Burma and the Tanjore jail in Madras were set aside for adolescents, and a new jail for juvenile and "juvenile adult" convicts was opened at Bareilly in the United Provinces; and in 1910 it was decided to concentrate adolescents in the Punjab at the Lahore District jail, which is now worked on Borstal lines. Other measures had previously been taken in some cases; a special reformatory system for "juvenile adults" had, for example, been in force in two central jails in the Punjab since the early years of the decade, and "Borstal enclosures" had been established in some jails in Bengal. But the public is slow to appreciate that it has a duty towards prisoners, and but little progress has been made in the formation of Prisoners' Aid Societies except in Bombay and Calcutta, though even in those cities much remains to be done.

**Reformatory Schools.**—These schools have been administered since 1899 by the Education department, and the authorities are directed to improve the industrial education of the inmates, to help the boys to obtain employment on leaving school, and as far as possible to keep a watch on their careers.

**Transportation.**—Transportation is an old punishment of the British Indian criminal law, and a number of places were formerly appointed for the reception of Indian transported convicts. The only penal settlement at the present time is Port Blair in the Andaman Islands.

**Commission of Enquiry, 1919.**—A committee was appointed to investigate the whole system of prison administration in India with special reference to recent legislation and experience in Western countries. Its report, published in 1921, was summarised in the Indian Year Book, 1922 (pages 670-671). A number of reforms were advocated but, owing to financial stringency, it has not yet been possible to introduce some of the more important of them.

**Fines and Short Sentences.**—Those sections of the Indian Penal Code, under which imprisonment must be awarded when a conviction occurs, should be amended so as to give discretion to the court. Sentences of imprisonment for less than twenty-eight days should be prohibited.

**The Indeterminate Sentences.**—The sentence of every long-term prisoner should be brought under revision, as soon as the prisoner has served half the sentence in the case of the non-habitual, and two-thirds of the sentence in the case of the habitual, remission earned being counted in each case. The revision should be carried out by a Revising Board, composed of the Inspector-General of Prisons, the Ses-

sions Judge and a non-official. In all cases, the release of a prisoner on parole should be made subject to conditions, breach of which would render him liable to be remanded to undergo the full original sentence. The duty of seeing that a prisoner fulfils the conditions on which he was released should not be imposed upon the police or upon the village headman, but special officers, to be termed parole officers, should be appointed for the purpose. These parole officers should possess a good standard of education, though not necessarily a university degree, and should both protect and advise the released prisoner and report breaches of the conditions of release.

**Transportation and the Andamans.**—If any fresh attempt at colonisation is made, it should be in an entirely new locality. A fresh attempt at colonisation in the Middle Andaman is not recommended. The retention of the settlement at Port Blair on the present lines is not recommended. The entire abandonment of the Andamans as a place of deportation is not recommended. Deportation to the Andamans should cease, except in regard to specially dangerous prisoners and any others whose removal from Indian jails is considered by the Government to be in the public interests. The existing restrictions as to age and physical condition of prisoners sentenced to transportation to the Andamans should, unless special medical grounds exist in any particular case, cease to apply. The Indian Penal Code should be amended by the substitution of rigorous imprisonment for transportation. In provinces where the available prison accommodation will not permit of the immediate cessation of deportation of all but selected prisoners, the Star class should be the first, and the habitual the last, to be detained in Indian jails. No female should in future be deported to the Andamans, and those now there should be brought back to India and distributed among the Provinces to which they belong. In those Provinces where the jails are insufficient to detain prisoners now deported, additional accommodation should be provided as soon as possible.

**Criminal Tribes.**—The first essential of success in dealing with the criminal tribes is the provision of a reasonable degree of economic comfort for the people. It is therefore of paramount importance to locate settlements where sufficient work at remunerative rates is available. Large numbers of fresh settlers should never be sent to a settlement without first ascertaining whether there is work for them. Commitment to settlements should, as far as possible, be by gangs not by individuals. It is desirable to utilise both Government and private agency for the control of settlements.

The variations of the jail population in British India during the five years ending 1923 are shown in the following table:—

	1923.	1922.	1921.	1920.	1919.
Jail population of all classes on 1st January .. .. .	134,286	126,917	118,250	120,183	122,158
Admissions during the year .. ..	535,590	639,001	593,348	578,109	696,568
Aggregate .. ..	669,876	765,918	711,598	698,292	818,726
Discharged during the year from all causes .. .. .	543,398	631,628	581,681	579,992	698,591
Jail population on 31st December ..	126,478	134,290	126,917	118,250	120,135
Convict population on 1st January ..	114,817	106,117	100,541	101,617	106,220
Admissions during the year .. ..	158,336	185,092	176,056	168,572	200,442
Aggregate .. ..	273,153	291,209	276,597	270,189	300,662
Released during the year .. ..	161,166	173,313	167,403	166,184	195,164
Transported beyond seas .. ..	329	1,514	537	1,556	1,208
Casualties, &c. .. ..	2,428	3,244	2,832	2,568	3,584
Convict population on 31st December.	109,230	114,817	106,117	100,541	101,617

More than one-half of the total number of convicts received in jails during 1922 came from the classes engaged in agriculture and cattle tending, about 150,000 out of 185,000 are returned as illiterate.

The percentage of previously convicted prisoners was 13·21 as against 13·37 in 1921 while the number of youthful offenders fell from 417 to 366. The following table shows the nature and length of sentences of convicts admitted to jails in 1921 to 1923:—

Nature and Length of Sentence.	1923.	1922.	1921.
Not exceeding one month .. .. .	32,684	38,028	38,661
Above one month and not exceeding six months.	62,252	72,141	73,362

The total daily average population for 1922 was 110,738 the total offences dealt with by criminal courts was 39, and by Superintendents 126,967. The corresponding figures for 1920 were 99,735 and 127,595, respectively.

The total number of corporal punishments showed an increase, viz., from 234 to 330. The total number of cases in which penal diet (with and without solitary confinement) was prescribed was 7,227 as compared with 6,037 in the preceding year.

Total expenditure increased from Rs. 1,67,54,616 to Rs. 1,94,20,232 and total cash earnings decreased from Rs. 28,07,629 to Rs. 26,34,877, there was consequently an increase of Rs. 2,68,937 in the net cost to Government.

The death rate increased from 20·34 per mille in 1921 to 22·13 in 1922. The admissions to hospital were higher, and the daily average number of sick rose from 20·32 to 29·42. The chief causes of death were tubercle of the lungs, dysentery and pneumonia.

# The Laws of 1925

BY

RATANLAL AND DHIRAJLAL,

Editors, "Bombay Law Reporter."

**The Indian Merchant Shipping Act.**—This Act permits the levy of fees for inspection of the wireless installations of vessels, and the grant of certificates in that respect.

**The Indian Paper Currency (Amendment) Act.**—During recent years the maximum amount of Paper Currency Reserve has been gradually increased. It stood at 85 crores of rupees; this Act raises it to 100 crores of rupees. An important proviso is added that the value of created securities shall at no time exceed 500 millions of rupees.

**The Workmen's Breach of Contract (Repealing) Act.**—It sounds somewhat archaic that the legislature should invent penal sanctions to preserve the sanctity of contracts; and it seems strange that a workman should be compelled to work for his employer against his will. Yet in 1850, it was enacted that the workman who had received an advance of money from his employer should either return it in specie or work it off in wages. And in the following year 1860, the Indian Penal Code was enacted with ss. 490 and 492. The former penalised the breach of contract of service during voyage or journey with imprisonment for one month or a fine which might extend to Rs. 100; and the latter section visited a like punishment on breach of contract to serve at a distant place to which the servant is conveyed at the master's expense. All these are repealed with effect from 1st April 1926. It seems inexplicable why s. 491 is allowed to linger on the statute book.

**The Indian Soldiers' (Litigation) Act.**—This Act replaces the Indian Soldiers' Litigation Act of 1918 with its Amending Act of 1924. It is meant to afford facilities in a Court of Law to a soldier who is serving under special conditions, which mean (1) service under war conditions or overseas or in Persia, Tibet, Afghanistan, Kashmir, Nepal, China, Uthral, Waziristan, North-West Frontier Province or British Baluchistan; (2) under war conditions, or serving overseas (s. 3). In a suit brought against a soldier as above, the plaintiff is bound to state in his plaint the fact of the soldier being on service (s. 4). If he is undefended, the Collector can intervene on his behalf (s. 5); and the court has to suspend the proceeding and give notice to the prescribed authority (s. 6). The suspension remains in force till the authority certifies that the soldier is not serving or fails to issue the certificate for three months (s. 8). If a soldier is on leave the proceedings have to be suspended (s. 9). A decree passed otherwise against a soldier is liable to be set aside (s. 10). The time during which a soldier is serving under war or special conditions is to be excluded in computing periods of limitation for suits against him, excepting a suit for pre-emption (s. 11).

**The Indian Income-Tax (Amendment) Act.**—In the case of the *Commissioner of Income-Tax v. Mellor*, reported in the *Bombay Law Reporter*, Vol. XXVI, at p. 366, it was held by the Bombay High Court that, for purposes of super-tax, partners in a registered firm, in which there has been a change in the constitution of the firm owing to one or more of the partners retiring or new partners being taken into the firm, should be assessed, not according to the shares to which they were entitled in the year of assessment, but according to the shares to which they were entitled in the previous year in which the profits were earned. This view has not been accepted by the legislature and it is now enacted that such profits are to be taken for the year of assessment.

**The Legislative Assembly (President's Salary) Act.**—Towards the end of the year 1925, the nominated President of the Legislative Assembly has made way for the elected President. The salary of the elected President has been fixed at Rs. 4,000 per month, and the President has been incapacitated from practising any profession or engaging in any trade.

**The Cantonments (Amendment) Act.**—The verbal amendments enacted by this Act are meant to fill in lacunæ discovered in the working of the Cantonments Act of 1924, during the first year of its existence. The important changes made are: (1) every servant of the Cantonment Authority is a public servant; (2) the Cantonment Authority has the power to manage the property of Government on certain terms; and (3) that authority has also the power to compel the owners to remove ruinous buildings in Cantonments.

**The Obscene Publications Act.**—On September 12th, 1922, the Government of India signed an International Convention for the suppression of the circulation of, and traffic in, obscene publications, at Geneva. The present Act is enacted to carry out the terms of that convention. It re-enacts in a more precise phraseology the sections 292 and 293 of the Indian Penal Code. Under s. 292, any person (1) who sells, lets to hire, distributes or publicly exhibits, or (2) exhibits or conveys, or (3) takes part in or receives profits from the business in, or (4) advertises any obscene publication is liable to be sentenced to imprisonment for three months or a fine. And if such an offence is committed with reference to a person under 20 years of age, he is liable to be punished with imprisonment for 6 months or fine. By amendment of s. 98 of the Criminal Procedure Code, wide powers are given for search of such publications. But if any person charged with the offence elects to be tried by a Court of Session, he can do so (s. 4).

**The Indian Ports (Amendment) Act.**—At the time when the Indian Ports Act of 1908 was passed, liquid fuel was not much in use on vessels. Now it has become common. With it has arisen the necessity of safeguarding life and property. Government are, therefore, given the power to make rules for regulating the bunkering of vessels with liquid fuel in ports.

**The Cantonments (House Accommodation) Amendment Act.**—The passing of the Cantonments Act of 1924 has rendered necessary certain verbal changes in the above Act. They are effected by this Act. The only noteworthy change is that "Military Works Service" will hereafter be known as "Military Engineer Service."

**The Indian Merchant Shipping (Second Amendment) Act.**—The amendments made affect only pilgrim-ships. Such ships can be required to touch Aden, and if necessary be detained there (s. 2). Section 5 says that no pilgrim can leave by a pilgrim-ship unless he possesses a return ticket or has deposited a sum to cover the expenses of the return journey. Such restriction does not apply to a pilgrim who does not intend to return within 3 years of his embarkation. A new section 209A is added which imposes a duty on the pilgrim-ship to take up any pilgrim who wishes to return from Hedjaz under his return ticket; such a pilgrim cannot be delayed beyond a period of 25 days.

**The Cotton Ginning and Pressing Factories Act.**—Every cotton ginning factory is under an obligation to keep a register showing the amount of cotton ginned, the dates on which it is ginned, and the persons for whom it is ginned: the number of bales pressed each day (s. 3). Each bale pressed by a factory shall bear its mark and name (s. 4). Failure to observe this rule is punishable with a fine of Rs. 50. The owner of each gin or press is bound to make return to Government week by week communicating the information contained in its register (s. 5). Every such factory is bound to keep scales or weights prescribed as standard ones for the district (s. 6). The lessee of a factory is deemed to be its owner under the Act (s. 7). Factories to be constructed hereafter must conform to the requirements laid down in s. 9. Prosecutions under the Act can lie only in the Court of a District Magistrate or the Chief Presidency Magistrate (s. 11). A person has the right to refuse to accept bales not marked as provided, if they are tendered in fulfilment of their contract (s. 14).

**The Bengal Criminal Law Amendment Act.**—When the bill for this Act was introduced into the Legislative Assembly in February 1925, it was thrown out by way of protest. It was, therefore, certified as an Act under the provisions of s. 72E of the Government of India Act. It is to continue in force for a space of five years. Section 3 empowers the Government of Bengal to direct trial of certain offenders by Commissioners, appointed by that Government. Two of such Commissioners should have served for a period of three years either as Sessions Judges or Additional Sessions Judges or as persons qualified to be appointed as Judges of the High Court (s. 4). They can take cognizance of a case without commitment

(s. 5); and can pass any sentence permitted by law (s. 6). The procedure to be followed may conform as nearly as may be to the procedure provided by the Criminal Procedure Code (s. 7). The Commissioners are given wide powers for tender of pardon (s. 8); and may receive as evidence statements made by persons before any Magistrate (s. 9). The Government are given power to deal with suspects (s. 11); and wide powers are given for arrest without warrant (s. 13). The suspects are bound, and can be compelled, to have their photographs taken, or finger impressions to be taken or furnish specimens of their hand-writings and signatures. They are also bound to attend at such times and places as required (s. 16). Section 17 gives extensive powers of search. An order passed under s. 11 is liable to be scrutinised by two Judges (s. 18), or suspended by Local Government (s. 19). Persons kept under restraint and their dependants are entitled to be maintained by Government (s. 21).

**The Indian Finance Act.**—This is enacted every year to provide for revenue arising from tariff, income-tax and postage. It is simply a re-echo of the Finance Act of 1924.

**The Indian Tariff (Amendment) Act.**—The duty on sugar which hitherto was *ad valorem* of 25 per cent. assessed on a tariff valuation is now converted into a specific duty of Rs. 4-8-0 a cwt. on 23 Dutch standard; and of Rs. 4-0-0 per cwt. on 23 to 8 Dutch standard; while it remains the same for standards below Dutch 8. Cigarettes of value of Rs. 10-8-0 or less per thousand and those exceeding Rs. 10-8-0 per thousand are levied with duty of Rs. 7-0-0 and Rs. 10-8-0 each. Silk mixtures are levied with 20 per cent. duty.

**The Indian Stamp (Amendment) Act.**—Insurance by way of indemnity under the Workmen's Compensation Act is to be stamped at the rate of one anna for every Rs. 100 payable as premium.

**The Indian Income Tax (Second Amendment) Act.**—Certain officers draw their overseas pay in sterling from the High Commissioner for India in London; this pay is liable to Indian income-tax. It is now arranged that such tax should be collected every month by the authority in India which pays the officer the rest of his pay.

**The Prisons (Amendment) Act.**—The recommendations by the Indian Jails Committee are carried out by this Act. The maximum period of solitary (or, as it is now called, cellular) confinement is reduced from 6 to 3 months. It cannot be combined with separate confinement so as to prolong the total period of confinement. It also provides against combination of any two punishments.

**The Indian Cotton Cess (Amendment) Act.**—This Act provides for the refund of the cotton cess levied on cotton exported from British India by land in case of its re-importation into India. It is meant to cover cotton exported by land to Goa which is re-imported into India.

**The Bengal Criminal Law Amendment (Supplementary) Act.**—This Act, like the other Act on the same subject, is promulgated by the

**Governor-General of India** without reference to the Legislative Assembly or the Council of State. It provides for appeal to the High Court; and every sentence of death has to be confirmed by the High Court (s. 3). Section 4 gives the power to the Local Government to order custody in jail outside Bengal. No writ of *Habeas Corpus* can be issued with reference to any person arrested under this Act. (s. 6).

**The Provident Funds Act.**—The evident benefits of provident funds are well-known. The older Acts on the subject are hereby repealed. Section 3 of the Act protects compulsory deposits under the Act from attachment by the Court. The next section lays down rules for repayment of such deposits. The rights of nominees are next defined; and the power to make deductions out of deposits is described.

**The Civil Procedure Code (Amendment) Act.**—Some time ago salaries under Rs. 20 per month were wholly exempt from attachment under a process from the Civil Court; and salaries from Rs. 20 to Rs. 40 were liable to be attached to the extent of their moieties. These limits were recently raised to "forty" and "eighty" respectively. But when the decree-holder is a co-operative society and the judgment debtor a member of the society, the increased figures are again reduced to their former maxima, *i.e.*, Rs. 20 and Rs. 40 respectively.

**The Religious Endowment (Amending) Act.**—Hitherto suits under the Act could be filed only in District Courts; now they can be filed in any Court empowered in that behalf by the Local Government (s. 2). But the power to fill up vacancies on temple committees continues to reside in District Courts only (s. 3).

**The Salt Law Amendment Act.**—This Act effects an important administrative change. The Salt Departments in Bombay and Madras are no longer to be controlled by the respective Local Governments, but by the Government of India working through the Central Board of Revenue.

**The Legislative Members Exemption Act.**—The Legislative Members are excused from serving as jurors or assessors; and they are not liable to be arrested and detained under civil process.

**The Sikh Gurdwars (Supplementary) Act.**—The Sikh Gurdwars Act of 1925 enacted by the Punjab Legislative Council gave certain jurisdiction to the Lahore High Court. This jurisdiction cannot be conferred by a local legislature on the High Court. This validates the jurisdiction conferred on the Lahore High Court by the Punjab Act.

**The Bamboo Paper Industry (Protection) Act.**—This is a protective measure carrying out the recommendations of the Indian Tariff Committee. It is meant to protect the paper industry in India. This is done by imposing an import duty of one anna per pound on every printing paper containing less than 65 per cent. of mechanical wood pulp and on writing paper of all sorts.

**The Indian Carriage of Goods by Sea Act.**—In October 1922, an International Confe-

rence on Maritime Law was held at Brussels at which rules were adopted for unification of certain rules relating to bills of lading. These rules are here given a legislative sanction and re-enacted as rules of law.

**The Oplum Amendment Act.**—Section 3 of this Act provides for appointment of officers to superintend the provision of opium for Government. Government are also given power to appoint officers to conduct suits (s. 6).

**The Provident Funds (Amendment) Act.**—This Act makes inconsequential verbal alterations in the wording of the main Act passed in 1925.

**The Indian Penal Code (Amendment) Act.**—In 1892, when the Government of India raised the age of consent from ten to twelve years, it raised a storm of indignation throughout the length and breadth of this vast peninsula. In 1925, when the age of consent is again raised from twelve to fourteen, no one has even bestirred himself. The public opinion on the subject has so far been materially altered. The age of consent in the case of husband is raised to thirteen only. The punishment to be imposed on a husband in carnally knowing his wife not under twelve years is imprisonment for ten years or fine. A husband is protected from the above penalty if he has married his wife before September 23, 1925 (s. 4).

**The Indian Limitation (Amendment) Act.**—The article 5 in terms referred only to the summary procedure provided by s. 128 (2) (f); it is now extended to suits under order XXXVII of the Civil Procedure Code. The period of limitation under the article is enlarged from six months to one year.

**The Coal Grading Board Act.**—This Act is meant to carry out the recommendation made by the Indian Coal Committee, for the improvement of the coal trade of the country. It starts with the incorporation of the Coal Grading Board, which consists of the Chief Mining Engineer to the Railway Board and four other persons nominated by Indian Mining Association, Indian Mining Federation, and the two Chambers of Commerce in Bengal (s. 3). The board to be constituted is given the power to grade coallites, to revise grading, and to grant certificates (s. 4). The result of such grading is to be kept in a register; and a grade list is to be maintained which is to be published (s. 5). The board can also grant export certificate (s. 6), which will attract rebates and preferences from the railway companies (s. 8).

**The Oudh Courts (Supplementary) Act.**—The Judicial Commissioner's Court at Lucknow was raised to the Chief Court of Oudh, by the United Provinces Act IV of 1925. The purpose of this Act is to recognise the change made in the constitution of the Court, in the several Acts of the Indian Legislature.

**The Criminal Tribes (Amendment) Act.**—The purpose of this Act is to tighten the control of police over the movements of the members of a criminal tribe registered in one district. When such a member moves from one district to another, the relevant entry with regard to him in the register shall be transferred to the Superintendent of Police of the latter district.

And the rules and restrictions applying to such immigrating member in the former district shall also apply to him in the latter district, wherever such district may happen to be.

**The Cotton Transport (Amendment) Act.**—In the year 1923, the legislature had passed the Cotton Transports Act, under s. 3, clause (1) of which it is competent to a Local Government to issue a notification prohibiting, except under a license, the import of cotton or any specified kind of cotton into a protected area—such import may be prohibited generally by rail, road, river or sea. This Act is enacted to enable the Local Government to prohibit such importation in any one particular method of import, by the addition of the words "or by any one or more of such routes."

**The Madras, Bengal and Bombay Children (Supplementary) Act.**—The Children Act was passed by the Madras Legislature in 1920; in Bengal in 1922, and in Bombay in 1924. Each of these Acts contained provisions affecting the appellate and revisional jurisdiction of the respective High Court in each province. These provisions are *ultra vires* of the local legislature as laid down by the Bombay High Court in *Hari v. Secretary of State*, (reported in the Bombay Law Reporter, Vol. 5, page 241.) The object of this Act is to validate the above provisions.

**The Indian Ports (Amendment) Act.**—Under s. 31 of the Indian Ports Act of 1908 vessels of the measurement of 200 tons and upwards cannot enter a port without a pilot. Native crafts are, however, exempted from the above rule, when entering the port of Bombay. With the recent improvement in the port of Karachi, it has been found possible to relax the rule, so far as regards that port is concerned, and power is given to the Governor-General in Council to exempt the native craft from restrictions with reference to any other port in India.

**The Repealing and Amending Act.**—This is something like a scavenging Act. It sweeps out obsolete provisions, expressions and words in the Acts of Indian Legislature, which have

ceased to have any operation or have become defunct in use.

**The Transfer of Property (Amendment) Act.**—There existed an anomaly in the provisions of the Transfer of Property Act. The transfer of an actionable claim, whether with or without money consideration, *i.e.*, whether for money consideration or merely by way of gift, can be made under s. 130 of the Act, only on the execution of an instrument. If such transfer is by way of gift without any money consideration, then the provisions of s. 123 come in, which require that such a transfer could be effected only by a registered instrument. This conflict of provisions comes sharply into view in the case of assignments of life policies by way of gifts. The practice with regard to them has so far been that the assignments, though unregistered, are accepted as good assignment by the insurance companies. But as the law stood it was more than doubtful if the Courts could uphold that view. Now, however, it has been made perfectly plain that assignments of actionable claims by way of gift can be validly made in absence of registered documents.

**The Indian Succession Act.**—This is a consolidating measure, that is, it enacts nothing new, but re-embodies the provisions of law lying scattered in different Acts into one place and co-ordinates them. The old Succession Act of 1865 applied to Christians alone. The portions of it relating to probates were re-enacted in 1881 as Probate and Administration Act, for the proof of wills made by all other nationalities in India. The Parsis had their own Intestate Succession Act of 1865; the Native Christians had their Administration of Estates Act of 1901; and Hindus had the Hindu Wills Act of 1870. The law of succession, as applying to different communities in India, was hitherto contained in 12 different Acts of legislature. It is now brought together in one Act, which unifies and consolidates the whole law in one place. It is always convenient and less confusing to gather the mandates of law at one place, instead of looking for them at half-a-dozen places.

## -Labour.

Various causes have combined to give added importance to the great group of human activities concentrated under the generic term of Labour. India is still a predominantly agricultural country and more than seventy per cent. of its people are dependent on the soil for their livelihood. Nevertheless a process of industrialisation has gone steadily forward. Calcutta and Bombay are great manufacturing cities. Whilst the jute mills dominate Calcutta and the cotton mills Bombay, there has grown up round these industries a substantial body of other manufactories. Another considerable manufacturing centre has developed at Cawnpore, with cotton, wool and leather factories. The textile industry of Bombay has overflowed into the mofussil, and Ahmedabad and Sholapur are considerable centres of manufacture, with a lesser one at Broach. In the Central Provinces the cotton mills of Nagpur are famous throughout India. The Province of Bihar and Orissa is the centre of the great coal mining trade, having absorbed the bulk of the coal mines formerly included in the Province of Bengal. It also embraces the most remarkable example of scientific industrialism in India in the works of the Tata Iron and Steel Company at Jamshedpur, where in what was jungle fifteen years ago a considerable city is springing up, which will produce over a million tons of steel a year, and house subsidiary industries which combined with the iron and steel works will probably maintain a city of a quarter of a million in the near future. The railway works of the North-Western Railway form the core of the industrialism of the Punjab, where other manufactories, notably of cement, are developing. The industrial expansion in India may be judged from the number of factories coming under the operation of the Indian Factories Act of 1911 as amended by the Act of 1922, which amounted to 5,985 for the whole of British India during the year 1922. The average daily number of persons employed amounted to over a million and a quarter and rose from 1,253,395 in 1921 to 1,409,173 in 1923. At the moment of writing no official figures are available in respect of the statistics for the whole of British India but it may safely be predicted that the number of factory workers at the beginning of this year must be very near a million and a half. The different Local Administrations in India are now each faced with a vivid and growing industrial question.

### Social Consciousness.

Side by side with this industrialization there has grown an increased social consciousness of the responsibility of the community towards Labour. The Government of India passed its first Factory Act in 1881 and amended it in 1891. But experience showed that these Acts permitted considerable abuses and largely as the result of the agitation raised by *The Times of India* in Bombay in 1905 against the excessive hours worked in the Bombay textile mills inquiries were set afoot which resulted in the passing of a new Act which limited the hours of labour in 1911. With the constitution of the League of Nations, India as a signatory thereto became a participator in the decisions of the League on Labour questions.

India was represented at the International Labour Conference held in Washington in 1919 and it became obligatory on her to enact legislation giving effect to the decisions of the Conference. Another International Labour Conference was held at Genoa in 1920 to consider a number of questions relating to seamen, such as the hours of labour, manning scales, accommodation, the provision for finding employment and other cognate questions and the Third and Fourth Sessions of the Conference were held at Geneva in 1921 and 1922. The Fifth Session of the Conference assembled on 22nd Oct. 1923 and dealt with only one item of importance—factory inspection. The Sixth Session of the International Labour Conference was held in Geneva from the 16th June to the 5th July 1924. Forty countries were represented at the Conference. The agenda of the Conference comprised (1) Development of facilities for utilisation of workers' leisure, (2) equality of treatment for national and foreign workers as regards compensation for accidents, (3) weekly suspension of work for twenty-four hours in glass manufacturing processes where tank furnaces are used, and (4) night work in bakeries. The Seventh Session was held at Geneva on the 21st May 1925. The agenda consisted of four items—(1) the report by the Director of the International Labour Office; (2) equality of treatment for national and foreign workers as regards compensation for accidents; (3) weekly suspension of work for 24 hours in glass manufacturing processes where tank furnaces are used; and (4) night work in bakeries. India was represented at all of these Conferences. In 1922 India was admitted as one of the eight countries of industrial importance after protracted examination of the grounds of her claim by experts appointed by the League of Nations. India, therefore, assumes responsibility for giving effect to the decisions of these Conferences. There has been a considerable extension of what is known as **Welfare Work**, and although this so far depends on the individual activities of employers of labour, the work is progressing well. Further there is the nascent Trade Union movement in India. This movement lies rather more on the surface than in deep roots, but it flares up in times of labour unrest and is nominally at all events focussed in The All India Trade Union Congress. The frequency of strikes, and the lack of any means to hasten a solution have given rise to careful investigation of the possibility of establishing Boards of Conciliation and Arbitration. The increase of industrial unrest in the winter of 1920-21 led to the stimulation of public interest in labour questions. The fact that several of the more protracted strikes occurred in public utility services strengthened the demand that some efforts should be made towards a solution of the problem. In nearly every strike or lock-out of importance which has occurred in the last five years there has been a fairly strong demand from some section of the public for reference of the points at issue to arbitration. The last few years have therefore seen a remarkable change in the attitude of the State and the community towards Labour, which under the more democratic constitution which now obtains is assured of a hearing in the Legislatures.

## INDUSTRIAL SAFETY AND INSPECTION.

The conditions of factory labour until 1913 were regulated by the Indian Factories Act of 1891, as amended in 1891. The chief provisions of the amended Act were Local Governments were empowered to appoint inspectors of factories, and certifying surgeons to certify as to the age of children. A mid-day stoppage of work was prescribed in all factories, except those worked on an approved system of shifts, and Sunday labour was prohibited, subject to certain exceptions. The hours of employment for women were limited to 11, with intervals of rest amounting to at least an hour and a half; their employment between 8 p.m. and 5 a.m. was prohibited, as a general rule, except in factories worked by shifts. The hours of work for children (defined as persons below the age of 14) were limited to seven, and their employment at night time was forbidden; children below the age of nine were not to be employed. Provision was made for the fencing of machinery and for the promulgation of rules as to water supply, ventilation, the prevention of overcrowding, etc.

### Hours Fixed.

The next Factory Act was finally passed into law as Act XII of 1911.

The new Act extended the definition of "factory" so as to include seasonal factories working for less than four months in the year; shortened the hours within which children, and, as a general rule, women, may be employed, and further restricted the employment of women by night by allowing it only in the case of cotton-spinning and pressing factories. It also contained a number of new provisions for securing the health and safety of the operatives, making inspection more effective, and securing generally the better administration of the Act. The most important feature of the Act, however, was the introduction of a number of special provisions applicable only to textile factories. The report of the Factory Commission showed that excessive hours were not worked except in textile factories. The Act for the first time applied a statutory restriction to the hours of employment of adult males by laying down that, subject to certain exceptions, "no person shall be employed in any textile factory for more than twelve hours in any one day." It is also provided in the case of textile factories that no child may be employed for more than six hours in any one day, and that (subject to certain exceptions, among which are factories worked in accordance with an approved system of shifts) no person may be employed before 5-30 a.m. or after 7 p.m. (the new limits laid down generally for the employment of women and children).

### The Act of 1922.

The acceptance by India of her obligation under the International Labour Conference of Washington in 1919 necessitated the further amendment of the Factory Act in 1922. The Act of 1922 was further amended in 1923. The principal object of the Amending Act of 1923

was the removal of a difficulty which had arisen in connexion with the law relating to weekly holiday.

In the following pages it is intended to give the present law on the subject by combining the Act of 1911 with that of 1922 and the Amending Act of 1923. The Amended Act of 1922 came into force on 1st July 1922, and it extends to the whole of British India, including British Baluchistan and the Sonthal Parganas.

### Hours of Employment.

**Rest periods in factories.**—In every factory there shall be fixed,—

(a) for each person employed on each working day—

(i) at intervals not exceeding six hours, periods of rest of not less than one hour, or

(ii) at the request of the employees concerned, periods of rest of not less than half an hour each so arranged that, for each period of six hours' work done, there shall be periods of rest of not less than one hour's duration in all, and that no person shall work for more than five hours continuously, and

(b) for each child working more than five and a half hours in any day, a period of rest of not less than half an hour.

(2) The period of rest under clause (b) shall be so fixed that no such child shall be required to work continuously for more than four hours.

**Weekly Holiday.**—(1) No person shall be employed in any factory on a Sunday, unless—

(a) he has had, or will have, a holiday for a whole day on one of the three days immediately preceding or succeeding the Sunday, and

(b) the manager of the factory has previous to the Sunday or the substituted day, whichever is earlier, given notice to the Inspector of his intention so to employ the said person and of the day which is to be substituted and has at the same time affixed a notice to the same effect in the place mentioned in section 36.

Provided that no such substitution shall be made as will result in any person working for more than ten consecutive days without a holiday for a whole day.

(2) Where in accordance with the provisions of sub-section (1) any person is employed on a Sunday in consequence of his having had a holiday on one of the three days preceding that Sunday, that Sunday shall, for the purpose of calculating the weekly hours of work of such person, be deemed to be included in the preceding week.

**Employment of Children.**—With respect to the employment of children in factories the following provisions shall apply:—

(a) no child shall be employed in any factory unless he is in possession of a certificate granted under section 7 or section

8 showing that he is not less than twelve years of age and is fit for employment in a factory and while at work carries either the certificate itself or a token giving reference to such certificate;

(b) no child shall be employed in any factory before half-past five o'clock in the morning or after seven o'clock in the evening;

(c) no child shall be employed in any factory for more than six hours in any one day.

**Employment of Women.**—With respect to the employment of women in factories the following provisions shall apply:—

(a) no woman shall be employed in any factory before half-past five o'clock in the morning or after seven o'clock in the evening;

(b) no woman shall be employed in any factory for more than eleven hours in any one day.

**Prohibition of Employment of Persons in two Factories on Same Day.**—No person shall employ, or permit to be employed, in any factory any woman or child or, save in such circumstances as may be prescribed, any other person whom he knows, or has reason to believe, to have already been employed on the same day in any of the factory.

**Hours of Employment to be fixed.**—The manager of a factory shall fix specified hours for the employment of each person employed in such factory, and no person shall be employed except during such hours.

**Limitation of Working Hours per Week.**—No person shall be employed in a factory for more than sixty hours in any one week.

**Limitation of Working Hours per Day.**—No person shall be employed in any factory for more than eleven hours in any one day.

#### Exceptions.

Where it is proved to the satisfaction of the Local Government—

(a) that any class of work in a factory is in the nature of preparatory or complementary work which must necessarily be carried on outside the limits laid down for the general working of the factory; or

(b) that the work of any class of workers is essentially intermittent; or

(c) that there is in any class of factories any work which necessitates continuous production for technical reasons; or

(d) that any class of factories supplies the public with articles of prime necessity which must be made or supplied every day; or

(e) that in any class of factories the work performed by the exigencies of the trade or by its nature, cannot be carried on except at stated seasons or at times dependent on the irregular action of natural forces;

the Local Government may, subject to the control of the Governor-General in Council, by notification in the local official Gazette, exempt on such conditions, if any, as it may impose.

The system of inspection is being steadily improved by the appointment of more whole-time inspectors with good technical qualifications in the principal industrial centres. The principle of appointing women as factory Inspectresses has already been accepted by the Government of Bombay and a beginning was made in the year 1924 by the appointment of Dr. Tehmina I. H. Cama as a whole-time Inspectress of Factories.

The experience of the last three years indicates that the Indian Factories Act of 1911, as amended by Act II of 1922, has worked smoothly on the whole, and that the main principles followed in 1922 command general acceptance. The Government of India do not propose, therefore, to modify any of the main principles of the Act. But administrative difficulties have arisen in connexion with some sections of the Act; one such difficulty relates to section 21 which provides for intervals of rest. In practice it has proved difficult to enforce the provisions of this section in some industries. Local Governments were asked in June 1923 to consider a possible solution of the difficulty and to bring to the notice of the Government of India any difficulties which might have arisen in connexion with other provisions. On receipt of their replies, a conference of Chief Inspectors of Factories was convened; this met in Simla, in August 1924, and was attended by the officers at the head of the inspection staff in every province but one. The Act was examined in detail in the light of the criticisms received and the Conference recommended a number of alterations designed by allowing greater elasticity in some directions and by increasing control in others, to make for smoother working. The Government of India have therefore drafted a new Bill further to amend The Indian Factories Act of 1911. The main object of this Bill is to amend the existing law with regard to rest periods in such a manner as to make the application of the principle of allowing two rest periods of half an hour each instead of one rest period of a full hour more elastic in operation. Night employment of women is to be made permissible in fish curing and canning factories and it is further proposed that provision should be made for the regulation of temperatures in factories.

The Government of India have repealed the Workmen's Breach of Contract Act of 1859 with effect from 1st April 1924.

The Government of India have also decided to repeal the Workmen's Breach of Contract Act of 1859 with effect from 1st April 1924.

**The Indian Mines Act, 1923.**—The Indian Mines Act, 1923, received the assent of the Governor-General on the 23rd February 1923. It extends to the whole of British India, including British Baluchistan and the South Mal Parganas, and comes into force on the first day of July 1924. By this Act the definition of a mine was made clear, and the weekly hours of employment were limited to 60 hours for work above ground and 54 hours for work below ground.

## INDUSTRIAL HOUSING.

In most industrial centres in India the question of proper and adequate housing is engaging the attention of all public bodies and governments to an increasing extent. Employers themselves are becoming increasingly alive to this burning question and whenever finances permit tenements are constructed for the housing of the workmen. In cases where housing is provided the amounts charged for rent are just sufficient to cover the interest charges on the capital outlay. In Bombay City, where the housing question was one of great difficulty a few years ago, the City Improvement Trust and the Development Directorate of the Government of Bombay have done much useful work in endeavouring to solve the problem. The scheme originally outlined by the Development Directorate for Industrial Housing aimed at a construction programme of 50,000 tenements providing accommodation for a quarter million people and to be completed within a period of eight years. This scheme was conceived in the boom period when labour conditions in Bombay were probably abnormal. By the end of December 1925 the Directorate had 16,544 tenements completely ready for occupation out of which 3,780 were let. The total number of chawls completely ready at the time when this section was compiled was 207. Government have decided that until the tenements now provided are fully occupied no additional and is to be taken up for Industrial Housing

and that no new schemes are to be embarked upon without Government approval.

The average economic rent of the chawls works out at Rs. 16 per month per tenement. All the tenements are now provided with *Nahanis*. The rents fixed for the present, per month, for each tenement, vary from Rs. 6-8-0 at Worli to Rs. 10-8-0 at DeLisle Road. On this basis there is an annual loss of Rs. 15½ lakhs and this is being met from the cotton cess.

The City Improvement Trust in Bombay have also made very good progress in the direction of providing industrial housing. The Trust had a total number of 8,364 tenements ready at the end of December 1925, out of which 8,242 tenements were let for living purposes, 123 as shops, 59 as godowns and 18 as schools. 40 tenements were reserved for occupation by Muccadams, for offices and stores, and as Superintendents' Quarters. The floor area of each tenement inclusive of a small verandah varied from 125 square feet to 176 square feet but the majority of the tenements were provided with the maximum floor space allowed. The average rent for a tenement in an Improvement Trust Chawl works out at Rs. 5-10 but the actual rents vary from Rs. 3-12-0 to Rs. 15-5-0. The maximum permissible population in adults for a total of 8,242 tenements has been fixed at 36,091. The actual population living in these tenements, at the end of the year 1925, was 28,137 or 25,533 when equalised to adults.

## INDUSTRIAL DISPUTES.

Complete statistics in connexion with Industrial Disputes are now available for the whole of India. The increasing importance that is being attached to the weapon of strike by the workmen in this country may be gathered from the figures given below in respect of the industrial disputes in British India for which statistics have been collected for the year 1924. This was one of the worst years in the history of Industrial relations in the country. The number of disputes reported was 133 as against 214 in the preceding year. The number of workers involved in these disputes was 312,462 and the number of working days lost amounted to 8,730,918. The corresponding figures for

1923 were 291,083 and 5,051,704. The increase is due entirely to the strike in the Bombay Cotton Mills in the first quarter of the year which accounts for the loss of about 7,500,000 working days. Of the strikes reported, only one-third were successful in whole or in part. This represents a slightly higher proportion of successful strikes than in the preceding years, when only 53 strikes of the 214 reported achieved any measure of success. The following table shows (1) the number of disputes; (2) the number of workpeople affected; and (3) the number of working days lost on account of Industrial disputes in the different Provinces of British India during the year 1924 :—

Province.	Number of Disputes.	Number of Workpeople Involved.	Number of Working Days lost.
Bengal .. .. .	55	86,608	477,427
Bombay .. .. .	51	179,048	7,559,330
Madras .. .. .	16	10,987	50,542
Central Provinces and Berar .. .. .	3	9,339	363,387
United Provinces .. .. .	4	6,511	148,338
Bihar and Orissa .. .. .	1	1,000	7,000
Burma .. .. .	3	19,000	129,400
<b>British India .. .. .</b>	<b>133</b>	<b>312,462</b>	<b>8,730,918</b>

The following table shows the data given above reclassified according to different classes of Industries :—

Class of Industry.	Number of Disputes.	Number of Workpeople Involved.	Number of Working Days lost.
Cotton Mills .. .. .	55	200,347	8,111,402
Jute Mills .. .. .	20	69,983	887,996
Engineering Works .. .. .	8	3,231	15,333
Jute Presses .. .. .	1	1,835	3,770
Dock Workers and Labourers .. .. .	5	16,900	105,500
Oil Works .. .. .	2	1,030	2,060
Printing Works .. .. .	4	955	11,145
Railways (Workshops and Staff) .. .. .	4	2,977	27,676
Paper Mills .. .. .	1	200	600
Municipal Workers .. .. .	11	3,714	6,698
Miscellaneous .. .. .	22	11,240	58,738
All Industries .. .. .	133	312,462	8,780,918

The next two tables show the causes of disputes by Provinces and Classes of Industries.

During the last three years the Cotton Mill industry in the Bombay Presidency has suffered from three big general strikes, each of which has lasted for more than two months.

The general strike in Ahmedabad which affected 56 out of 61 cotton mills in that locality commenced on the 1st of April 1923 and continued till the 4th June 1923. The reasons of the strike were (1) the announcement that the millowners in Ahmedabad would reduce wages by 20 per cent. with effect from 1st April 1923 and (2) the alleged non-payment by many mills of the bonus on the precise terms agreed on by arbitrators to whom a settlement of this question was referred. The number of workpeople affected was 43,118 and the total time loss amounted to 2,370,938 working days. This strike lasted for 64 days, the men were almost completely defeated and on the 4th June a compromise was arrived at by the terms of which (1) wages were to be reduced by 15½ per cent. instead of by 20 per cent. and (2) the question of the interpretation of the last bonus award was to be again referred to arbitration. The President of the Millowners' Association also gave an assurance that wages would not be reduced again for at least six months from the date of the compromise.

The second big dispute in the Presidency was the general strike in the cotton mills in Bombay City at the beginning of the year 1924. It had its origin in the no-bonus decision of the Millowners in Bombay. The men had been paid a bonus regularly for five years and had come to regard its payment as an annual affair. In view of its regularity it also came to be considered as deferred pay. The bonus was usually paid in the middle of January in each year along with the pay due for the month of December. When the bonus was not paid at pay-time in January, the operatives of one mill demanded the payment of bonus on the 17th January and on its being refused went on strike. The strike-fever soon spread and in about a week almost all cotton mills in Bombay had to close down. On the 22nd February 1924, His Excellency the Governor of Bombay appointed a Committee of Enquiry with the Hon. Sir Norman Macleod, Kt., Chief Justice of the High Court in Bombay, as Chairman to enquire into the dispute. The terms of reference were (1) to consider the nature and basis of the bonus which was granted to the employees in the cotton mills of Bombay since 1919 and to declare whether the employees established any enforceable claim, customary, legal or equitable, and (2) to enquire into the profits made in each year

since 1917 with a view to comparing these profits with the profits made in the year 1923 and to report on the contention of the millowners that the grant of a bonus such as was given in previous years was not justified by the profits of the mill industry as a whole in 1923. The findings of the Committee on these points were submitted to Government on the 11th March, and were (1) that the mill workers had not established any enforceable claim, customary, legal or equitable to the payment annually of a bonus, and (2) that the results of the working of the mill industry as a whole for the year 1923 were such as to justify the contention of the millowners that the profits did not admit of the payment of a bonus. The strike, however, did not terminate till the 25th March when work was resumed in almost all the mills although with considerably reduced staff due to the fact that there was an almost general exodus of all up-country workers to their homes before the strike ended.

The third and perhaps the largest of all industrial disputes in India was the **general strike in the cotton mills in Bombay City and Kurla** at the end of the year 1925. This strike had its origin in the decision arrived at by the Bombay Millowners' Association in July 1925 to reduce the wages of all workpeople in the mills affiliated to the Association by eleven and a half per cent with effect from the 1st September 1925. The millowners stated that they were forced to reduce wages on account of the severe and unprecedented depression which had overtaken the cotton mill industry in India during the year 1925 on account of (1) high prices ruling for cotton; (2) increased costs of production due principally to the high standard of wages paid to workpeople and generally to increased prices of coal and stores and heavier interest charges; (3) Japanese competition; (4) the maintenance of an excise duty of three and a half per cent. on cotton manufactures; and (5) unprecedented accumulations of cloth and yarn due to the demand for cloth not keeping pace with production. Several representations were made to the Government of India urging them to abolish the Excise Duty entirely or, alternatively, to suspend the collection of this duty for the remainder of the current financial year. The millowners maintained that the non-collection of the duty would afford relief to the industry to the extent of nearly a crore of rupees which would help to tide over an exceptionally critical period. Proposals were also put before Government to afford protection to the industry either by increasing the import duty on Japanese cotton manufactures and/or by the levy of an export duty on raw cotton purchased by Japan in India. His Excellency the Viceroy, in his reply to the address presented to him by a joint deputation of the Bombay and the Ahmedabad Millowners' Associations, said that it was impossible to remove the excise duty in the middle of the financial year before the commitments and the prospects of the next year were fully known, and that it would only be at the time of the next budget that the situation could be thoroughly reviewed and a proper estimate formed. His Excellency pointed out (1) that the remission of Provincial Contributions to the Central Exchequer was the first charge on the consideration of the Government

of India; (2) that the position of the industry could not be considered at that juncture as so exceedingly critical as to justify the abolishing of the duty; and (3) that the duty would be abolished as soon as financial considerations permitted.

The millowners stated that in view of the very unsatisfactory reply received from Government to their various representations regarding the abolishing of the Excise Duty they had no other alternative left open to them except to call on their workpeople to share the burden of the bad and difficult times through which the industry was passing and to consent to a wage cut in their earnings.

The workpeople refused to agree to any reduction in their earnings. They stated (1) that they obtained the increase granted to them in the shape of dearness allowances in their pre-war wages as the result of several hard and bitter struggles during which they lost very heavily owing to loss of wages for the periods for which they were on strike; (2) that the present rates of wages received by them were insufficient to provide for a decent standard of living; and (3) that the Millowners ought to hold an enquiry with a view to effecting a decrease in the costs of production by retrenchment in other directions. Labour leaders, after consulting the workpeople, offered to meet the millowners half way by agreeing to follow the example of Lancashire and to work shorter hours with a view to lessening the evils of over-production. The millowners contended that if the working hours were reduced by one day's work in a week the wages of the workmen would be reduced by 16½ per cent. instead of by 11½ per cent. as proposed by the owners; and that the proposal for going on short time was not feasible in view of the fact that the cost of production would go up by five-eighths of an anna per lb. of cloth which would only result in still further increasing the prices of cloth and making it more difficult to sell the products of the mills in the home market against competitive Japanese goods. The millowners therefore adhered to their decision to cut wages and the men went out on strike.

As is usual with strikes in India, no warning was given of the threatened strike. 33,249 workpeople from 15 mills suddenly downed tools on the 15th September and by the 2nd of October there was a complete stoppage of work in all the mills in the city. The two cotton mills at Kurla, employing a total number of 4,600 workpeople and which are usually the last to be affected by a strike in the Bombay mills were also compelled to close down on the 6th October. The total number of workpeople involved in the general strike therefore amounted to 151,986.

His Excellency the Governor of Bombay took a considerable interest in the progress of the strike and he did his utmost not only to prevent the strike but also to bring it to an early termination once it had started. Several meetings were arranged between the owners and the representatives of the men, and His Excellency received frequent deputations from time to time from both parties with a view to formulating some basis for a compromise. Several discussions also took place on the subject in the Legislative Assembly and in the Bombay Legisla-

tive Council. The only point on which there appeared to be a general unanimity was the immediate suspension of the Excise Duty. His Excellency the Governor and the Government of Bombay made several representations to the Government of India to suspend the duty and the Press in India constantly demanded its total abolition. Both the parties to the dispute remained quite firm in the respective standpoints which they had taken up and the strike dragged on till the end of November, when, at length His Excellency the Viceroy, suspended the collection of the Excise Duty with effect from the 1st December 1925 by Special Ordinance.

In view of the repeated assurances given by the Bombay Millowners' Association that the old rates of wages would be restored in the event of the Excise Duty being removed, the strike virtually ended as soon as the Ordinance was published. The mills started their engines from the 3rd December onwards according as sufficient numbers of workpeople offered themselves for employment; but the strike cannot be considered to have terminated on that date in view of the almost complete exodus of up-country workers to their homes. On the 7th December only 44,584 or nearly 30 per cent. of the workpeople had returned to work and on the 15th December 88,388 or nearly 60 per cent. The total number of working days lost as a result of the strike amounted to nearly eleven millions. If the average daily earnings of all workpeople in the mills in Bombay City be taken as Re. 1-4-2 according to the figure published by the Bombay Labour Office in its second Report on an Enquiry into Wages and Hours of Labour in the Cotton Mill Industry in the Bombay Presidency in

August 1923, the workpeople lost 139 lakhs of rupees in wages during this strike.

When the Bombay Millowners' Association published their first notice in July 1925 intimating the proposed cut in wages with effect from the 1st September 1925, several Labour leaders in Bombay City combined themselves into a Committee under the name of "The Bombay Textile Workers' Deputation." On the actual outbreak of the strike this Committee renamed itself "The Committee of Assistance to the Textile Workers" with Mr N. M. Joshi, M.L.A., as Chairman and Mr. R. K. Bakhale, as Secretary. The Committee consisted of representatives of almost all Trade Union and labour organisations in Bombay City. The most important work done by the Committee was the organisation of Relief Work. A Relief Fund was opened and relief was given in the form of rations of grain and free passages to their homes to all cotton mill workers who asked for assistance. Eighteen relief centres were established in different parts of Bombay City and Kurla. The total number of people to whom rations were supplied during the whole period of the strike amounted to 184,038 and the number of days for which rations were supplied amounted to nearly a quarter of a million. The actual number of different individuals who received assistance amounted to over 20,000. The total sum contributed to this Relief Fund amounted to Rs. 42,582-3-10, out of which the International Federation of Trade Union at Amsterdam gave Rs. 24,836-8-5 in seven separate instalments amounting to £ 1,885 and the International Federation of Textile Workers' Associations, London, subscribed Rs. 8,416 in three instalments.

## CONCILIATION AND ARBITRATION.

Of recent years much attention has been paid to the settlement of industrial disputes. The baffling character of such disputes is that they are so often sporadic, breaking out without warning, grievances being formulated after striking instead of before. When such strikes occur there is no organised body of workers with whom to negotiate. The Government of Bengal took the leading part and in March 1921 appointed a committee which laid stress on the value of Works Committees and favoured the institution of Conciliation Courts to deal with disputes in public utility services. It also

favoured the appointment of a panel on which the Local Government could draw when constituting a Board to enquire into any dispute. The Bombay Government, which had already explored the ground informally, appointed a similar committee in November 1921, which reported in February 1922. As this Committee surveyed the position in some detail, and its report constitutes the most recent contribution to the discussion, its recommendations are summarised below because they reflect the existing situation and are applicable with modifications to suit local conditions, to most industrial centres in India.

## SUMMARY OF THE REPORT OF THE INDUSTRIAL DISPUTES COMMITTEE.

**The Industrial Situation.**—Industry in the Bombay Presidency is mainly confined to the three centres of Bombay, Ahmedabad and Sholapur with a factory population of some 200,000, 55,000 and 20,000, respectively.

Of the workers of Ahmedabad and Sholapur, 44,000 and 20,000, respectively, are dependent on the textile trade. Those in Bombay may be divided into—

- (1) Textile operatives.
- (2) Transportation service workers (including Railways and Docks).

- (3) Gas and electric light workers, municipal employees, Mint and Government Press workers, customs, postal, telegraph and telephone employees and inferior Government employees generally.

**The Operatives.**—The general body of this working population was accurately described by Mr. C. N. Wadia, O.I.E., in 1919, as "agriculturists first and agriculturists last." They come to Bombay—as a rule without their families—and work till they have funds enough to return to their villages. In the textile trade and amongst the general labourers almost all the

operatives, except the "jobbers" and gangmen are of this migratory class. These remarks apply with almost equal force to the industrial population of Ahmedabad and Sholapur. In the workshop and in semi-clerical employment where skill or some education is required, there is however being formed a more permanent class of workmen who can almost speak of Bombay as their home. The standard of literacy is exceedingly low, not more than five per cent. of the operatives class being able to read and write their own vernaculars.

**Characteristics of Strikes.**—Certain characteristics are common to most of these strikes :—

- (a) The frequency of the strike without notice.
- (b) The absence of any clearly-defined grievance before striking.
- (c) The multiplicity and sometimes the extravagance of the claims put forward after the strike has begun.
- (d) The absence of any effective organisation (except perhaps at Ahmedabad) to formulate the claims of the operatives and to secure respect for any settlement which may be made.
- (e) The increasing solidarity of employers and employed and the capacity of the operatives to remain on strike for considerable periods despite the lack of any visible organisation.

**The Prevention of Strikes.**—Amongst the employers of labour there are strong organisations and the present tendency is for them to become more and more representative; but employers' associations have not yet evolved any standard scales of wages and individual employers are usually ignorant of how their rates compare with the wages given by others. The uncorrelated raising of wages in one factory is almost invariably seized upon as a grievance in other factories of the same class, and instances of strikes caused in this way are within the memory of all. The attempts made to standardise wages on a definite principle have hitherto been largely ineffective.

**Trade Unions.**—Amongst this heterogeneous labour force, there have in Bombay and Ahmedabad, gradually developed the beginnings of a Trade Union movement. In most cases the Unions are little more than strike committees consisting of a few officers and perhaps a few paying members around whom the rest rally in times of trouble. After work is resumed the union dwindles, and in most cases disappears. According to data published by the Labour office, Bombay, in the *Labour Gazette*, the number and membership of trade unions known to be actually in existence in the Bombay Presidency for the quarter ending September 1924 were as follows:—Bombay City and Island 8 unions with a membership of 21,659; Ahmedabad 7 unions with a membership of 17,200; and in other parts of the Presidency 6 unions with 8,383 members. The totals for the Pre-Idency were, therefore, 21 unions with 47,242 members in September 1924 as compared with 19 unions and 41,646 members in September 1923.

The evolution of any means of preventing or adjusting strikes and trade disputes in such a floating and illiterate body, lacking any homogeneity, is exceedingly difficult and we put forward such recommendations as we make with full recognition of their indecisive character. In the forefront of these recommendations we place a wise and statesmanlike attitude towards the nascent Trade Union movement.

We are fully aware that the early days of a Trade Union movement are often full of difficulty. Strike committees arise calling themselves Trade Unions and demanding the privileges of Trade Unions without any means of discharging the responsibilities thereof. Sympathetic friends unconnected with the industry or any industry, and consequently knowing nothing of the special difficulties involved, spring into notoriety. Strike leaders appear claiming the right to bargain but with no power to make the bargain respected. But these are the growing pains of Trade Unionism; it is far better to treat than to inflame them. We therefore express the very sincere hope that there will be, neither on the part of the state, nor of industry, any hostility to the free evolution of the Trade Union movement.

As soon as a genuine Trade Union organisation emerges it should be officially recognised as the channel of communication between employers and employed. We are strongly in favour of the compulsory registration of Trade Unions under a broad and generous Act. Such registration should ensure at least strict adherence to the elements essential to any substantial association of a definite code of rules, regular office bearers properly elected and an accurate register of subscribing members. But we are strongly opposed to conferring on Trade Unions any special privileges outside the ordinary law of the land or, on the other hand, any special responsibilities.

Most of our witnesses have agreed that Works Committees promise to discount that absence of personal relationship between operatives and employers, which is inevitable in large factories owing to the numbers of the men employed. We also agree that they may have an educative value among the operatives themselves.

**Welfare Work.**—Next to Works Committees we place the large group of humanistic activities known as Welfare Work. Here we wish to make an explanation. We were greatly impressed by the evidence which declined to accept the term "Welfare" as accurately defining these energies and classed them as "efficiency" work because they had such a direct reaction on the physical contentment and efficiency of the operatives, that economically they justified the expenditure thereon.

**The Settlement of Industrial Disputes.**—So far we have devoted our attention to a consideration of the means which will contribute to the prevention of industrial disputes; it remains to suggest the methods of settlement, when such disputes either develop irreconcilable differences between capital and labour or else become a menace to the community.

There are some who hold that the State has no right to intervene in industrial disputes. To that position we cannot subscribe.

But we are agreed that no outside agency, and in particular the agency of the State, should be used until all other means have been employed and failed, or unless it is invited by one or other of the parties to the dispute, or unless the situation is such that peace, order and good government are prejudiced. If such conditions should arise, then there should be formed an Industrial Court of Inquiry, to be followed, if necessary, by an Industrial Court of Conciliation. We deliberately place the function of inquiry first and separate from the role of conciliation, for we desire to avoid the facile opportunism which seeks to patch up an industrial dispute by proposing a compromise between the views of the two parties without going down to the economic principles which are at stake.

**Constitution of the Court.**—The constitution of the Court should be as follows :—

- (a) A chairman selected by the members of the Court from a panel maintained in the Labour Office;
- (b) Three members representing the employers in the industry concerned;
- (c) Three members representing the operatives in the industry concerned.

A bare majority of our number is of opinion that the public should not be represented on

a Court dealing with an industrial dispute, but should be represented when the Court is inquiring into a dispute affecting a Government Department or a public utility company or corporation. Whilst we are divided on this point, we are unanimous in the conclusion, that when a Government Department, or public utility company, or corporation is concerned in an industrial dispute demanding the constitution of an Industrial Court the general public should be represented in equal proportion to the parties directly concerned. The constitution of such a Court would then be :—

- (i) A chairman chosen from the panel.
- (ii) Three representatives of the Government Department, or public utility company or corporation concerned.
- (iii) Three representatives of the operatives.
- (iv) Three representatives of the general public.

The special reasons which have induced us to recommend the representation of the general public in such cases, are that the whole cost of any increase in wages is at once passed on to the public either in increased charges for an essential public service or else in a diminished revenue to the State, which is taxation in another form. We recommend that the representatives of the general public should be selected from the panel of Chairmen.

## TRADE DISPUTES LEGISLATION.

The valuable suggestions made by the Committee have been considered both by the Government of Bombay and by the Government of India. On the 14th March 1923, the Hon. Sir Maurice Hayward, Home Member of the Bombay Government, made a statement in the Bombay Legislative Council to the effect that details were being worked out by the Government of Bombay in connexion with the drafting of a Bill to give effect to the recommendations of the Committee, and that, as soon as Government were satisfied on these points, legislation would be introduced in the Local Council as early as possible after the sanction of the Government of India had been obtained. The big strike which occurred in the Bombay Cotton Mills on the question of the Bonus Dispute at the beginning of the year 1924, precipitated affairs and the Government of Bombay decided to introduce a Bill in the Local Council to provide legislation on this subject in the second session of the Council which met at Poona in July 1924. In accordance with this decision the Government of Bombay drafted a Bill for this purpose and this was published in the *Bombay Government Gazette* of the 30th May 1924. The Bill was a simple one and was meant in the first instance to cover manual and clerical employment. Persons working in the capacity of members of His Majesty's forces and Government servants were excluded. The main object of the Bill was the appointment of a Court of Enquiry to which any trade dispute that either existed or was apprehended could be referred to on the motion of the Governor in Council. The function of such courts was to enquire into the causes and circumstances of each such trade dispute and to make reports, interim or final,

as the Court thought fit. The proceedings of these Courts of Enquiry were to be conducted either in public or in private as might be determined by a particular court. A second object of the Bill was to make provision for Voluntary Arbitration. Where a trade dispute existed or was apprehended the Governor in Council was to be empowered (1) to take such steps as might seem expedient for the purpose of enabling the parties to a dispute to meet together with a view to the amicable settlement of the dispute, or, if both parties consent, (2) to refer the matter for settlement to the arbitration of one or more persons appointed by him; or (3) refer the matter for settlement to a Board of Arbitration consisting of one or more persons nominated by or on behalf of the employers concerned, an equal number by or on behalf of the employees concerned, and an independent chairman to be nominated by the Governor-in-Council. Panels were to be constituted from which the members of such Boards could be nominated from time to time.

In July 1924, the Government of India informed the Government of Bombay that as they considered that this subject was one for All-India legislation, the Government of India were themselves preparing a Bill for early introduction in the Legislative Assembly and that the Local Government should not introduce the Bill which it contemplated doing in its own Council.

The Government of India prepared a Bill to make Provision for Enabling the Investigation and Settlement of Trade Disputes and this was published in August 1924. This Bill may be

considered as being very wide and comprehensive in scope and extent. It covers all workmen including employees of the Government of India and of any Local Government. An important distinction is made between the general body of workmen by dividing these into employees in Public Utility Services and other employees. In the case of public utility services and in those services specially notified as such by the Governor-General in Council, it is provided that it shall not be lawful for any employer to declare or enforce a lockout or for any workman to take part in a strike on account of any dispute unless due notice of the proposed lockout or strike has been sent to the prescribed officer. Such strikes or lockouts are not permitted until the expiry of thirty days after notice has been served in cases where no order has been made for reference of the dispute to a Board and until the expiry of ninety days after notice has been served in cases where such an order has been made or until the expiry of seven days after the publication of a report by a board whichever of the two dates may be earlier.

There is no separate provision in the Bill for Courts of Enquiry, Board of Arbitration or for Conciliation. The functions of these two

separate institutions in Industrial Disputes legislation are vested in the Government of India Bill with one body which is to be called the Board of Investigation and Conciliation. The members of these Boards are to be selected from permanent panels of (1) representatives of employers, (2) representative of employees, and (3) persons to be appointed as Chairmen. The Government of India and each Local Government are to construct their own panels. The functions of these Boards are to endeavour to bring about a settlement of any dispute by a thorough investigation of the circumstances and causes of each dispute. The Government of India do not appear to be inclined to present this Bill to the Legislative Assembly just at present. No official declaration in connexion with this matter has been published but a special remark made by His Excellency the Viceroy in his speech at the annual meeting of the Associated Chamber of Commerce of India and Ceylon at Calcutta is significant. His Excellency said: "The question of providing means of conciliation in trade disputes has been thoroughly explored, but it would be premature to legislate on this question until the Trades Union Bill has become law."

### TRADE UNION LEGISLATION.

On the 1st March 1921, Mr. N. M. Joshi moved the following resolution regarding the Registration of Trade Unions in the Legislative Assembly:—

"This Assembly recommends to the Governor-General in Council that he should take steps to introduce, at an early date in the Indian Legislature such legislation as may be necessary for the registration of trade unions and for the protection of trade unionists and trade union officials from civil and criminal liability for bona fide trade union activities."

The Government of India accepted this Resolution after amending it in the following form:—

"This Assembly recommends to the Governor-General in Council that it should take steps to introduce as soon as practicable, in the Indian Legislature, such legislation as may be necessary for the registration of trade unions and for the protection of trade unions."

In September 1921, the Government of India asked all Local Governments to address all public bodies, employers' and workers' associations and prominent persons within their respective territories to furnish their views, firstly, on the principle of such legislation, and, secondly, on the objects aimed at in similar legislation with particular reference to (1) Compulsory or optional registration; (2) the extent to which objects should be specified; (3) recognition of strikes; (4) the extent to which the domestic affairs of trade unions should be brought under the law; (5) recognition of political objects; (6) recognition of picketing; (7) age qualification; (8) protection of Trade Unions from Civil and Criminal Liability; (9) management of Unions; and (10) Trustees and Trust Funds.

The Government of India after examining the views of the Local Governments and the replies received from various bodies and persons prepared a Bill to Provide for the Registration of Trade Unions and in certain respects to Define the Law Relating to Registered Trade Unions in British India. This Bill has been circulated to the Local Governments for the purpose of obtaining the views of public bodies and employers' and employees' associations before it is introduced in the Legislative Assembly.

With regard to the question of registration, the Government of India are of opinion that optional registration affords the only sound basis for legislative action. The main anxiety of many of the advocates of compulsory registration appeared to be to place restrictions on trade unions, whereas the objects which Government have in mind is to grant to trade unions a position in the eyes of the law which shall be at once definite and privileged. Compulsion would necessarily involve penalties for evasion and as the penalisation of the Unions that did not register would be both unjust and unequitable it has been decided to confine the privileges which such legislation will allow to registered unions only. These privileges include a considerable measure of immunity from civil suits and criminal prosecutions directed against trade unions and other members. Officers and members of trade unions who induce workmen to break their contracts with their employers will be saved from being sued in the Civil Courts and protection will be afforded from criminal liability by amending the law relating to conspiracy.

No direct restrictions have been placed in the draft bill on the objects which a trade union may pursue but it will be left to the Registrar to refuse registration to an organisation which chooses to claim the title of a Trade Union without including in the sphere

of its activities *bona fide* trade union objects. The question of the inclusion of political objects among those upon which funds can be expended received careful consideration, and, following the great majority of the replies received, the Government of India decided to exclude such objects from the list of objects which Trade Unions would be able to draw up to define the scope of their activities. This, Government believe, will not prevent trade unions or their leaders from advocating political policies, but it will ensure that funds contributed primarily for trade union purposes are not expended on causes in which the bulk of the members have little interest.

The Bill makes adequate provision for safeguarding the rights and investments of members by ensuring (1) a regular audit of the

funds of registered unions, and (2) a proper and effective control of their own affairs by the workers themselves by making compulsory a proper representation of the members of such trade unions on their executive committees. As regards picketing, the Government of India have not seen the necessity of imposing any general restriction on picketing; and the Bill, therefore, does not make picketing, which may be confined to systematic persuasion, and which does not degenerate into intimidation, illegal.

This Bill was introduced in the Simla Session of the Legislative Assembly on the 31st August 1925, and was referred to a Select Committee. It is expected that the Bill will be reconsidered at the Delhi Sessions of the Legislative Assembly early in 1926.

## WORKMEN'S COMPENSATION.

The Workmen's Compensation Act of 1923 received the assent of the Governor-General on the 5th March 1923. The Act extends to the whole of British India including British Baluchistan and the Sonthal Parganas and came into force on the first day of July 1924. It contains two distinct parts Chapter II which lies outside the general scheme for compensation, contains provisions modifying the ordinary law in respect of employers' liability and making it easier for injured workmen to sue their employers for damages in the Civil Courts. These clauses apply only to workmen, who come under the workmen's compensation provisions, so that, although they omit the limit to damages which governs their counterpart in England, they are not likely to be much used. Ten classes of workmen are covered by the bill. Some of these, such as members of fire brigades, telegraph and telephone linesmen, sewage workers and tramwaymen, are small, and as the definition of seaman is limited to those employed on certain inland vessels, only a very small proportion of Indian seamen will benefit by the bill. The five important classes are the workers in factories, mines, docks and on railways, practically all of whom are included, and those engaged in certain types of building work, notably the construction of industrial and commercial buildings, and any other buildings which run to more than one storey. The most important classes excluded altogether are agricultural workers and domestic servants. Non-manual labourers getting more than Rs. 300 a month are excluded, except on the railways. Power is taken to include other hazardous occupations by notification from time to time. Compensation is to be given, as in the English Act, for personal injury by accident arising out of and in the course of employment. It is also to be given for diseases in certain cases. The provisions for diseases have been so framed that if a certain class of workman contracts a scheduled disease, it will usually be extremely difficult for the employer to defeat a claim for compensation. On the other hand, other workmen will find it equally difficult to get compensation for disease, as they will have to prove that the disease arises "solely and directly" from the employment. The diseases scheduled at present are anthrax, lead poisoning and phosphorus poisoning, but the list is made capable of extension.

**Scales.**—The scales for compensation are more generous in every way than those originally suggested by Government; they are based on the unanimous recommendation of a Committee which met in June. Adults (i.e., persons over 15) and minors are distinguished throughout and compensation is subject to upper limits in every case. For death the relatives receive 30 months' wages of the deceased workman, subject to a maximum of Rs. 2,500 if he was an adult. For a minor who is killed, the compensation payable is the fixed sum of Rs. 200. If a workman is completely disabled for life, he gets 42 months' wages if he is an adult and 84 months' wages if he is a minor, subject in each case to a maximum of Rs. 3,500. If he sustains permanent injuries that do not completely disable him, he gets proportions of the above sums, and for certain clearly recognizable injuries, like the loss of limb, those proportions are specific. Thus a workman, who lost his right arm below the elbow would receive 60 per cent. of the sums specified above, subject to a maximum of Rs. 2,100. If his pay was Rs. 30 monthly, the sum would come to Rs. 756. All these payments are lump sums. Of much greater importance are the provisions for the minor and more common injuries. Statistics based on experience of industry generally in other countries indicate that 50 per cent. of injuries from accidents cause disablement for not more than ten days, 44 per cent. cause disablement lasting more than 10 days, but ultimately disappearing, 5 per cent. result in permanent injuries and 1 per cent. end fatally. A large proportion of cases will be excluded by the provision that no compensation is to be paid on account of the first ten days of disablement. The great majority of the remaining cases will fall under the scale for temporary disablement. The rate of payment for temporary disablement is half wages for adults and two-thirds wages for minors, subject to a maximum of seven years, and for minors, two-thirds wages or whole monthly wages after they have attained the age of 15 years, subject in each case to a maximum amount of Rs. 30, and to a maximum period of 5 years. This maximum of 5 years is not of great importance, as experience shows that the number of such cases which last more than six months is insignificant. During the first six months of these payments they can only be commuted

to a lump sum if both parties agree; after payments have gone on for six months, either party can apply for commutation. In its treatment of the difficult question of dependents the Indian bill allows only husbands and wives, parents and minor children to claim compensation, and it makes the compensation a fixed sum independent of the number of those relations. The administration of the Act and the settlement of disputes is entrusted to special Commissioners, with a very simple procedure wide powers and restricted opportunities for appeals.

Only two Provinces have so far appointed full-time Commissioners. In Bengal, Mr. M. H. B. Lethbridge, I.C.S., is the Commissioner for Workmen's Compensation; and in the Bombay Presidency, Mr. N. M. Patwardhan, Barrister-at-Law, has been appointed a full-time Commissioner with an immediate jurisdiction extending over Bombay City, the Bombay Suburban District, the Districts of Ahmedabad, Broach, Surat, Khandesh and Sholapur and the whole of the B. B. & C. I. Railway line coming within the Bombay Presidency. In the Madras Presidency, the Labour Commissioner is also the Commissioner for workmen's compensation; and in the Punjab, the Chief Inspector of factories is responsible for the administration of the Act. In the other Provinces and in the Districts of Bengal and Bombay which are not under the jurisdiction of the Provincial full-time Commissioners, the District Magistrates and Subordinate Judges have been appointed ex-officio Commissioners.

In the first annual report of the working of the Workmen's Compensation Act in the Bombay Presidency including Sind, which relates to the period July-December 1924, 65 applications were filed of which 8 related to fatal accidents, 10 to permanent disablement and 6 to temporary disablement. The remaining 41 related to distribution of deposits only, of these 65 applications filed, 2 were summarily dismissed, 49 were

admitted by the opposite parties and the rest were contested applications of which 2 were wholly allowed, 5 allowed in part and 5 dismissed. 22 agreements were filed, of which 20 were for payment of compensation for permanent disablement, the remaining 2 being for temporary disablement. The total number of accidents reported amounted to 646 among adults, of which 38 resulted in death, 26 in permanent disablement and 582 in temporary disablement. In respect of all these accidents Rs. 34,551-9-10 were paid for compensation of which Rs. 25,072-8-0 were paid for fatal accidents, Rs. 6,359-13-0 for permanent disablement and Rs. 3,119-4-10 for temporary disablement. There were only 2 accidents among minors, of which one resulted in death and the other in permanent disablement. Rs. 200 being paid for compensation in respect of the fatal accident. Under diseases there was only 1 accident resulting in death for which no compensation was paid.

During the first six months of the operation of the Act in Bengal, the number of cases instituted under the regulations has been very small. Only one application was made for contested claims but the claim was promptly paid. There were no proceedings for review or commutation. 26 deposits were received totalling Rs. 22,642-2-0, out of which Rs. 11,840-10-0 were awarded to dependants before the close of the year. 17 memoranda of agreement were presented for registration, of which 8 were registered, 7 refused (on technical grounds) and 2 were pending. The total amount paid in compensation during the 6 months amounted to Rs. 32,692.

A significant point regarding the administration of the Act in Bombay is that although over 50 cases were disputed before the Commissioner with the appearance of legal men on either side there was not a single instance where an appeal was preferred to the High Court against the decisions arrived at by Mr. Patwardhan.

## WAGES IN AGRICULTURE.

There is much discussion, with no very definite conclusions, as to whether wages have kept pace with the cost of living. Conditions vary so markedly between Province and Province that it is difficult to give exact figures. Different Provincial Governments publish, from time to time, the results of Quinquennial Censuses into the wages of labourers mainly in agriculture. The Labour Office of the Government of Bombay published a Report in 1924 of an Enquiry into the Wages in Agriculture which gave the average daily earnings of three classes of agricultural labour, *viz.*, skilled labour, ordinary labour, and field labour, in each of the 26 districts of the Bombay Presidency, separately for urban areas and rural areas, and for each of 23 years from 1900 to 1922. The figures for 1923 and 1924 have been published in the General Administration Reports of the Bombay Presidency. The wages prevailing in other provinces for similar types of labour do not compare unfavourably with wages in the Bombay Presidency for any particular year for which a comparison is made. This statement requires

an important qualification. It is not meant that the money amounts actually paid are similar. The rates of wages in different provinces vary according to the extent of their industrialisation and money wages in Provinces which are mainly agricultural are on a lower level than the money wages in Provinces which are highly industrialised, *i.e.*, in Bombay and Bengal. But there is no doubt whatever that wages have risen markedly in all parts of India during the last ten years and that the general condition of the Indian labourer has improved. The construction of a real wage index number is not always indicative of the general material condition of any group of workers. The utility of such an index number is only confined to a particular comparison with any given date, and provided always that the two sets of figures showing money wages and the cost of living at two particular dates are accurately compiled, the real wage index number at the later date as compared with the condition of the workman at the former date gives an accurate reading of the position of his purchasing power in comparison

with that date. Indian publicists constantly aver that the condition of the Indian labourer to-day is worse than ever it was before. The true fact is that since wages and prices are both variables, "real wages" being a function of two variables, could only remain at the same level, if the two factors vary proportionately. But this does not happen and wage changes always lag behind price changes. When prices rise real wages rise only slowly to the original level, and when prices fall real wages fall slowly. Consequently the labourer is sometimes better off and sometimes worse off. Comparison of conditions in India to-day with the pre-war year show that during this particular period the condition of the Indian labourers has undoubtedly improved. This is amply proved by the figures given below showing the index numbers of daily average wages of skilled labourers, ordinary labourers and field labourers, for urban areas and for rural areas for the Bombay Presidency.

*Agricultural Wages (Nominal).*

Index Numbers for the Bombay Presidency (including Sind) 1913=100.

Year.	Urban Areas.			Rural Areas.		
	Field labour.	Ordinary labour.	Skilled labour.	Field labour.	Ordinary labour.	Skilled labour.
1921 ..	179	184	180	159	148	166
1922 ..	189	192	195	170	162	179
1923 ..	200	200	196	171	171	187
1924 ..	195	196	209	176	181	191

The construction of accurate real wage figures to correspond with the index numbers of nominal wages given above is not possible on account of the inapplicability of any general cost of living index number for a particular group of workers in a particular centre to the Presidency as a whole. But it is possible, however, to calculate the rise or fall in the purchasing power of agricultural labourers in terms of a cost of living index constructed by taking the averages of the prices of 23 commodities and articles in most common use from all districts in the Presidency.

*Agricultural Wages (Real).*

Real Wage Index Numbers for Bombay Presidency.

Year.	Urban Areas.			Rural Areas.		
	Field labour.	Ordinary labour.	Skilled labour.	Field labour.	Ordinary labour.	Skilled labour.
1921 ..	102	110	104	90	84	93
1922 ..	105	112	109	94	80	102
1923 ..	108	110	123	128	124	127
1924 ..	111	115	125	123	130	134

**In the Cotton Mill Industry.**—An enquiry was held by the Labour Office of the Government of Bombay into Wages and Hours of Labour in the Cotton Mill Industry for August 1923 which covered a total number of 251,219 workpeople in 186 mills in the Bombay Presidency and in the States within its territorial limits. The important results of this enquiry were (1) a decline in the number of children employed owing to more rigorous factory inspection under the new Factory Act, (2) an absenteeism figure as high as 10·4 per cent. for all work-people; 9·2 per cent. for men; 14·7 per cent. for women; 98 per cent. for time workers; and 11·2 per cent. for piece-workers; (3) the average monthly earnings per head in August 1923 as compared with May 1921 were at the same level in Bombay, slightly over in Ahmedabad and lower in Sholapur, Baroda State and Other Centres in the Presidency; (4) the potential monthly earnings for all work-people in the Presidency would have amounted

to Rs. 32-1-0 per head per month had all work-people worked for a full working month of 27 days at the rates of average daily earnings which prevailed in August 1923—the difference between this and the actual monthly earnings amounting to Rs. 3-8-0 or 12 per cent.; (5) the total Wages Bill in the cotton mill industry in August 1923 amounted to Rs. 72,22,000 for the number of workpeople covered in the enquiry; (6) the average hours of labour per day amounted to 10 hours and 5 minutes for men, 9 hours and 35 minutes for women and 5 hours for half timers or children; (7) the number of holidays recommended in the Bombay Mills by the Millowners' Association during the year 1923 amounted to 57; and (8) except in Sholapur no bonuses were paid for service in the year 1923.

The following table shows the daily average earnings, per capita, of workpeople in different occupations classified according to age and sex groups:—

\* By "Big Lads" is generally meant boys between the ages of 15 and 18 but the term also includes men who are not considered as sufficiently bodied to be employed as men.

† Children are workers, boys and girls, more than 12 years and under 15 years of age.

## OFFICIAL ORGANISATION.

When the importance of the labour movement forced itself on the attention of the Government it was found necessary to establish an organisation to deal with it. There was created with the Government of India a Labour Bureau, which collects information on Labour conditions, keeps in touch with Labour organisations in other countries, and systematically gathers statistics regarding strikes, lock-outs, wages and cost of living. Several of the Local Governments have set up special machinery for dealing with Labour issues, and there are Labour officers with the Governments of Bengal, Madras and Burma whilst the Bombay Government, on the advice of the Informal committee whose recommendations have been mentioned above, constituted a special Labour Office in the Secretariat.

In a resolution of Government in the Home Department, dated 29th April 1921, the functions of the Labour Office in Bombay were set out as follows :—

(i) **LABOUR STATISTICS AND INTELLIGENCE.**—These relate to the conditions under which labour works and include information relating to the cost of living, wages, hours of labour, family budgets, strikes and lock-outs, and similar matters;

(ii) **INDUSTRIAL DISPUTES.**—As experience and knowledge are gained and the activities of the Labour Office develop, it will promote the settlement of industrial disputes when these arise; and

(iii) **LEGISLATION AND OTHER MATTERS RELATING TO LABOUR.**—The Labour Office will advise Government from time to time as regards necessary new legislation or the amendment of existing laws. The Labour Office publishes a monthly journal entitled the *Labour*

*Gazette* which is a journal for the use of all interested in obtaining prompt and accurate information on matters specially affecting labour in India and abroad. The address of the Labour Office is:—SECRETARIAT, BOMBAY.

**Director**—Mr. G. Findlay Shirras, M.A., F.S.S. (Hony.), J.P., I.S.S., M.L.C.

**Acting Director**—Mr. J. F. Gainings, Barr-at-Law, J. P.

**Investigators**—Mr. S. R. Deshpande, B.A., B.Litt (Oxford); Mr. N. A. Meherbani, B.A.; Mr. B. L. Umarvadia, B.A.

### LABOUR ASSOCIATIONS.

#### ALL-INDIA TRADE UNION CONGRESS.

**Chairman**—Mr. D. R. Thengdi, Engineer, Nagpur (C. P.)

**Secretaries**—Mr. F. J. Ginnwala, C/o Messrs. Rustomji and Ginnwala, 5, Lutherfield Street, Fort, Bombay; Mr. N. C. Sen, 98, Beltolla Road, Kallghat, Calcutta.

#### CENTRAL LABOUR BOARD FOR BOMBAY.

**President**—F. J. Ginnwala, B.A.

123, Esplanade Road, Fort, Bombay.

**Secretary**—S. H. Jhabwalla, B.A.,

123, Esplanade Road, Fort, Bombay.

The names and addresses of the officials of other trade unions in the Bombay Presidency are published regularly every quarter by the Labour Office in the *Labour Gazette*.

## Domestic Servants.

The relationship of master to servant in India is a subject to which attention is frequently directed in the Press by complaints about the alleged deterioration of domestic servants and the hardships to which employers are subjected by the boycotting action of discharged servants. The remedy most commonly propounded for misbehaviour on the part of servants is registration with a view to checking the use of false testimonials, or "chits," and to enabling masters to obtain certain information as to the character of the persons they employ. This mode of procedure is of German origin, for the old Prussian Servants' Ordinances (*Gesindeordnungen*) were supplemented in 1854 by a law, applying only to agricultural labourers and domestic servants, which punishes breach of contract, and since then various State laws dealing with domestic servants have been passed in Germany. The conditions are not, however, analogous for the servant keeping class in India is proportionately larger than in Europe, as also is the number of servants kept by each individual.

The first attempt in the East to deal with the problem by legislation was made in Ceylon. The act dealing with the registration of domestic servants in that Colony is comprised in Ordinance No. 28 of 1871. It extends to all classes of domestic servants, hired by the month or receiving monthly wages, and the word "servant" means and includes head and under-servants, female servants, cooks, coachman, horsekeepers and house and garden coolies. The Act came into operation in 1871 and empowered the Governor to appoint for the whole of the Island or for any town or district, to which the Ordinance is made applicable, a registrar of domestic servants, who is to be under the general supervision and control of the Inspector-General of Police. A registry is kept by the registrar of all domestic servants employed within his town or district, and he has to enter therein the names of all the servants, the capacities in which they are employed at the time of such registration, the dates of their several engagements and such memorandum of their previous services or antecedents as they may desire to have recorded in the register. But the registrar must, previous to his entering all these details, satisfy himself as to the credibility of the statements made to him. Any person, who may not have been a domestic servant before, but who is desirous of entering domestic service, has to submit an application to the registrar, and if the registrar is satisfied that there are reasonable grounds to believe that the applicant is a fit and proper person to enter domestic service he shall enter his name in the register, recording what he has been able to learn respecting the person's antecedents together with the names of any persons who are willing to certify as to his respectability. If the applicant is unable to produce satisfactory or sufficient evidence as to his fitness for domestic service, the registrar may grant him "provisional" registration, to be thereafter converted into "confirmed" registration according to the result of his subsequent service. If the registrar is satisfied that the applicant is not a fit and proper person he should withhold registration altogether, but in such a case he must report his refusal to register to the Inspector-General of Police.

Every person whose name has been registered in the general registry is given a pocket register containing the full particulars of the record made in the general registry. No person can engage a servant who fails to produce his pocket register or whose pocket register does not record the termination of his last previous service, if any. On engaging a servant the master has to enter forthwith in the pocket register the date and capacity in which such servant is engaged and cause the servant to attend personally at the registrar's office to have such entry inserted in the general registry. Similarly, in case the master discharges a servant he must insert in the pocket register the date and cause of his discharge and the character of the servant. Provided that if for any reason he be unwilling to give the servant a character or to state the cause of his discharge he may decline to do so. But in such a case he must furnish to the registrar in writing his reasons for so refusing. If the servant on dismissal fails to produce his pocket register the master must notify that fact to the registrar. Whenever any fresh entry is made in the pocket register the servant is bound to attend the registrar's office to have such an entry recorded in the general registry. Every servant whose name is registered shall, if he subsequently enters service in any place not under the operation of the Ordinance, attend personally at the nearest police station on his entering or leaving such service and produce his pocket register to the principal officer of police at such station in order to enable the police officer to record the commencement or termination of the service. The police officer has then to communicate it to the registrar of the town or district in which such servant was originally registered.

Various penalties of fine as well as of imprisonment are imposed for violation of any of the acts required to be done or duties imposed by the Act on the various persons mentioned below. As respects masters if they fail to fulfil any of the duties imposed on them by the Act they expose themselves to a liability of their being fined to the extent of Rs. 20. Similarly a servant, who fails to fulfil any of the duties imposed on him by the Act is liable to pay a fine not exceeding Rs. 20. But in case he gives any false information to the registrar or to any other person on matters in which he is required by this Ordinance to give information, he is liable to a fine not exceeding Rs. 50 or to imprisonment, with or without hard labour, not exceeding 3 months. A fee of 25 cents is charged to the master on engaging a new servant, a like fee of 25 cents is charged to the servant on his provisional registration, or on registration being confirmed, or for registration of previous service or antecedents. But in case of loss or destruction of the pocket register the servant has to pay one rupee for the issue of a duplicate pocket register.

A similar Ordinance (No. 17 of 1914) has been introduced in the Straits Settlements, where its operation has been limited to such local areas as may be declared by the Governor in Council, and its application within such areas has been restricted to the class of householders who are expected to desire the benefit of the provisions.

## Routes between India and Europe.

The Indian port for the direct journey to and from Europe is Bombay. There are ordinarily five lines of steamers by which the journey to and from the West via Bombay can be performed, either by sea all the way, or—and in some cases only—by sea part of the way and by rail across Europe. They are the P. & O., the Anchor Line, the City and Hall Line, the Lloyd Triestino and the British India line. The Natal line steamers are available for Western passages only, the steamers sailing round the Cape on their Eastward voyages. There are ordinarily other services between Calcutta and

the West, by steamers sailing round Ceylon, and several lines connect Colombo with Europe. Of the latter the Orient, the Messageries Maritimes, the Bibby Lines N. Y. K., Australian Commonwealth, and Royal Dutch Lines are the chief besides the P. & O. The Bibby and Henderson services extend to Rangoon. The new railway between India and Ceylon greatly increases the importance of the Colombo route for Southern India. The shortest time between London and Bombay is 15 days via Marseilles. The following are the fares which are convertible at approximately current rates of exchange:—

### Peninsular and Oriental S. N. Co.

FARES FROM BOMBAY OR KARACHI.		1st Saloon.			2nd Saloon.	
		A Rate. £	B Rate. £	C Rate. £	A Rate. £	B Rate. £
Free passages (single and return) are granted between Karachi and Bombay by British India Steamer.						
To Plymouth or London by sea, Single .. ..		96	80	70	60	54

To „ Malta or Gibraltar, Single .. ..		86	76	66	58	52
„ „ Return .. ..		150	133	115	101	91
To London from Calcutta .. ..		70	..	..	56	..

By the **British India S. N. Co.**, fares to London by sea from Bombay or Madras are:—single 1st saloon £66; 2nd saloon £52. Return £116 and £91. Bombay to Marseilles £80, and 2nd saloon £48. Return: £105 and £84.

By the **Anchor Line** fares to Liverpool from Bombay or Karachi are:—1st saloon £60 single and £105 return. To Marseilles:—£56 and (return from Liverpool) £101.

By **Ellerman's "City" and "Hall" Lines** fares from Bombay or Karachi to Liverpool, 1st saloon are:—

Single £84, return £112.  
2nd saloon single £48, return £84.  
From Bombay or Karachi to Marseilles, 1st saloon single £60, return £104.  
2nd saloon single £45, return £81.  
Calcutta to London.  
1st saloon single £68, return £119.  
2nd saloon single £52, return £91.

By **Bibby Line** fares from Rangoon to London.

1st saloon single £76.  
1st saloon return £132.  
Rangoon to Marseilles, 1st saloon single £68.

Rangoon to Marseilles, 1st saloon return £120.

The **Bibby Line** fares from Colombo are as follows:—

Colombo Marseilles single £58.  
Colombo Marseilles return £101.  
Colombo London single £66.  
Colombo London return £115.  
Colombo Marseilles returning from Liverpool, or, London returning from Marseilles £100.  
The **Bibby Line** steamers carry 1st class passengers only.

By **Henderson Line** fares from Rangoon to Liverpool, 1st saloon are:—single £65, return (available for 4 months) £100, (available for 2 years) £117.

By **Lloyd Triestino Line** fares from Bombay to Brindisi, Venice or Trieste are:—1st class £62, 2nd class £52. Return rates available for 2 years at one and three-fourth fares.

The **Lloyd Triestino** in conjunction with the **Marittima Italiana** are now running in addition to the above a fortnightly service between Bombay, Naples and Genoa, fares as above.

## INDIAN TRAIN SERVICE.

The distances and railway fares from Bombay to the principal centres of other parts of India are as follow :—

	Miles.	1st Class.	2nd Class.
		Rs. a.	Rs. a.

Lahore, <i>via</i> Delhi .. .. .	1,162	142 10	71 5

## THE SUEZ CANAL.

At the General Meeting of the Suez Canal Company, held in June, 1925, the Chairman said that the results of the financial year 1924 fully confirmed the optimistic forecast made a year ago. Pursuing its gradual development, the Canal traffic gave proof of an activity hitherto unknown and, the tonnage passing through, 10 per cent. greater than that of the preceding year, exceeded by one-fourth the 1913 tonnage. To the increased receipts from the traffic, there had again to be added the additional value of the receipts from the financial department.

**Increase in Dividend.**—Thus, the profits of the financial year amply exceeded those of the previous year, and permitted the board of directors to contemplate a new and important increase of the dividend. They consequently proposed to fix at 327·18s. the gross revenue per capital share which, on the basis of the taxes in force at present, would correspond to a net revenue of 265s.

The general maritime traffic of 1924 consisted of 5,122 passages, representing a net tonnage of 25,109,882. It thus exceeded by 2,379,720 the tonnage of 1923. The commercial navigation reached 23,828,615 tons net. As regards the traffic in ballast, it amounted to 2,306,776 tons, representing 9·3 per cent. of the whole traffic of the Canal.

The development of the Canal traffic had been again accentuated since the commencement of the present financial year. For the first quarter the net tonnage exceeded by 1,166,000 that of the corresponding period of 1924, and the receipts from the traffic showed an increased value of 7,580,000f.

**Improvement Programme.**—The 1921 improvement programme was in full swing. The preparatory dry embankment work undertaken between the 20th and 30th kilometre, in view of widening to 60 meters, was completed during the course of last year; the dredging

work was then immediately commenced, and over a length of 800 meters, commencing from the 20th kilometre, the widening had already been handed over to the Traffic Department to be utilized as a supplementary station. The further improvement dredging work had likewise been commenced at the El Gulsir bends.

According to the present outlook, the completion of the 1921 programme did not appear to be all a matter of urgency. In these circumstances it would be possible for them, at least during the next few years, to carry out the dredging work by availing themselves of the services of the staff and the plant at the disposal of the company without the necessity, consequently, of making appeal to the shareholders.

**Transit and Navigation.**—The tonnage passing through the canal in 1925 exceeded the previous year's record total by 1,652,053 net, as will be seen from the following comparative figures (in net tons) :—

	1925	1924
Vessels with cargo ..	24,180,240	22,803,106
Vessels in ballast ..	2,581,695	2,306,776
	26,761,935	25,109,882

Contrary to the previous year's experience, the shipping movement was more active during the first half of 1925, during which important increases were recorded for each month, while in the second half-year two months were better and three worse than the corresponding periods of 1924. In fact, the latter part of the past year reduced by 327,590 tons the increase of 1,979,643 recorded for the first six months. The heaviest movement occurred in March 1925, the total tonnage of 2,667,396 dealt with during that period exceeding the monthly average over the whole year by 440,000. The average tonnage per vessel was 5,014 net (as against 4,902 net for 1924).

**Improvement Schemes.**—It was announced in 1914 that from and after January 1st, 1915, the maximum draught of water allowed to ships going through the Suez Canal would be increased by 1 ft., making it 30 ft. English.

The maximum permissible draught of ships using the Canal was 24' 4" feet in 1870; in 1890 ships drawing 25' 4" feet could make the passage; and during the following 24 years the increase has been at the average rate of about 1 foot every six years, thus bringing the maximum draught authorized to 29 feet.

The scheme of improvement adopted by the Company on the recommendation of the International Consultative Committee of Works, the British representatives on which are Sir William Matthews and Mr. Anthony Lister, is a comprehensive one, and the details suggest that it will meet the needs of the big ship.

**A 40 feet Channel.**—The declared policy of the Canal Company in regard to the deepening of the Canal is to offer a slightly greater depth of water than that available in ports east of Suez. It is claimed that, with the exception of Sydney, there is no eastern port which at low tide has a greater depth of water than that now provided in the Canal throughout the full length of nearly 105 miles. In any case the work in hand should meet the needs of any ship likely to be built for the eastern trade during the next few years.

When the Canal was opened in 1869, the width was 72 feet and the depth about 28 feet 2 inches. In June, 1913, the width at a depth of 32 feet 8 inches had been increased to a minimum of

147 feet 6 inches over a length of about 85 miles, and to a width of 328 feet over a distance of about 20 miles. The latest scheme makes provision for a depth of 40 feet throughout and for a widening up to 196 feet 8 inches in the south section, and the cutting of an appropriate number of sidings in the north and central sections, where a minimum width of 147 feet 6 inches is believed to be sufficient for the requirements of the immediate future.

The work of enlarging the capacity of the Canal presents no special difficulty on the engineering side. A good deal of sand is occasionally driven into the channel at Port Said during storms, but a remedy for this will be found in extension of the west breakwater by about 2,700 yards at a cost of over £8,000,000. The construction of this extension, which has been in hand for the past two years, is making satisfactory progress. The Suez Roads are being adequately dredged in accordance with an agreement between the Egyptian Government and the Company.

Almost up to the end of 1915 the works for extending the jetty to the west of Port Said, works of capital importance for the protection of the entry to the Canal, were pushed on uninterruptedly. In November, however, for want of hydraulic lime, the manufacture of artificial rocks for this jetty was interrupted. The submarine foundations in stone and rubble of the new jetty were, as a matter of fact, completed to a length of 2,500 metres; the protective blocks were laid for 1,040 metres, and cemented for over 800 metres. The protection of the Channel is thus secured, and there is no need for any apprehension as to its future.

## Travel in India.

Thirty years ago, a tour in India was possible only to the wealthy, the leisured and those who had friends in the country. The cost of the journey was very high, the methods of transportation were very slow; and the facilities for travel were so indifferent that he was a bold man who consigned himself to the mercies of the country without a sheet of letters of introduction. Now the mail which is posted in London on Thursday night, reaches Bombay in 14 days, and the passenger can travel by the same route and with the same speed as the mail. A dozen lines have covered the sea route between Europe and India and Ceylon with a plexus of regular services. The Indian Railways provide facilities on the trunk lines unsurpassed by the *trains-de-lux* of Europe, and the Indian hotel has grown into a really comfortable caravan-serai.

In the touring season, which extends from November to March, there is the attraction of a perfect climate. It is never very hot; in the North indeed it is really cool, it is always fine and fresh and bracing. If there is one country in the world to which that elusive term applies, here we have at the season when the tourist arrives the real "Indian summer." Then there is its infinite variety. India is in no sense a nation and never will be. Its peoples are wide as the Poles asunder, each has its own art, its own architecture, its own customs and its own civilisation. A certain superficial resemblance runs through each; beneath lies a never-ending variety which age cannot wither nor custom stale.

**The Grand Tour.**—People coming to India for the first time so often ask:—"Where shall I go?" Well, wherever else the tourist may go whatever else he should leave out, he should

omit nothing on the Grand Tour. It is the foolish custom nowadays to sneer at those who follow the beaten tracks, but the visitor who shuns any part of the orthodox journey across India misses what nothing else can repay. Bombay is by far the most convenient point of departure, for here "the world end steamers wait," here is one of the finest cities in the British Empire, and here the traveller can best complete his outfit and arrangements. From Bombay stretch northwards the two great trunk lines of India. One, the **Bombay Baroda & Central India Railway**, leads through the pleasant garden of Gujarat to Ahmedabad, the ancient Moslem capital of the Province containing fine examples of Mahomedans and Jain architecture; thence to Abu for the famous Jain temples of Dilwara, and on to Ajmere, Jaipur and Agra. The other by the **Great Indian Peninsula Railway** carries the tourist over the Western Ghats by a superb mountain railway to Gwalior, whose rock fortress rises like a giant battleship from the plain, and so on to Agra. Of the glories of the Taj Mahal, Agra Fort, and the deserted city of Fatehpur Sikri it were supererogatory to speak. Another easy stage leads to Delhi that amazing collection of cities, dominated by the little Ridge where British valour kept the mutinous hordes at bay, and finally drove them from the city by a feat of arms unsurpassed in history. Then from Delhi the East Indian line leads comfortably to Benares, Lucknow and Calcutta with the opportunity of an excursion to Cawnpore, if the spirit moves.

The great charm of the Grand Tour is that it reveals the best that India can show. This route has the additional advantage that it fits in with any digressions which the time and purse of the traveller may permit. No one who can spare the time should fail to push northwards from Delhi to Peshawar, where the flower of the army keeps watch and ward over the Khyber, and up the dread Pass to the eyrie where the fort of Ali Masjid bars the way to all invaders. Calcutta is the best starting point for Darjeeling, though unfortunately the magnificent mountain panorama visible from there is often obscured at this season by mists. Then from Calcutta two alternatives open. A fine service of mail steamers leads to Burma, and one of the unforgettable memories of the East is a voyage down the Irrawaddy from Bhamo or Mandalay to Prome. Again, either direct from Calcutta, or *via* Burma, is an easy route to Madras and by way of Madura and Trichinopoly, with their peerless Hindu temples, back to Bombay, or on through Tuticorin to Colombo. But indeed the possibilities of expanding this tour are endless. Bombay is the best centre for the rock temples of Elephanta, Kenheri, Karli, Ellora and Ajanta. Calcutta is only a short distance from Puri the one Indian temple where there is no caste, and perhaps the most remarkable Hindu temple in the country. From Calcutta also start the river steamers which tread the steamy plains of Bengal and run to the tea gardens of Assam.

### SPECIMEN TOURS.

A number of specimen tours in India are given below. They are taken from one of Messrs. Thos. Cook & Son's publications, from which firm further information may be obtained. The traveller will also find he can obtain assistance from the principal Shipping Agents and Railway Companies, or from Messrs. Cox & Co., Messrs. Grindlay & Co., and Lloyds Bank:

	1st Class.	2nd Class Rail, 1st Class Steamer.
<b>FROM BOMBAY TO CALCUTTA.</b>		
<i>Via the North-West Provinces to Calcutta (including side trip from Calcutta to Darjeeling).</i>	Rs. a.	Rs. a.

## The New Capital.

The transfer of the capital of India from Calcutta to Delhi was announced at the Delhi Durbar on December 12, 1911. It had long been recognised as necessary, in the interests of the whole of India, to de-provincialise the Government of India, but this ideal was unattainable as long as the Government of India was located in one Province, and in the capital of that Province—the seat of the Bengal Government—for several months in every year. It was also desirable to free the Bengal Government from the close proximity of the Government of India which had been to the constant disadvantage of that Province. To achieve these two objects the removal of the capital from Calcutta was essential: its disadvantages had been recognised as long ago as 1868, when Sir Henry Maine advocated the change. Various places had been discussed as possible capitals, but Delhi was by common consent the best of them all. Its central position and situation as a railway junction, added to its historical associations, told in its favour; and, as Lord Crewe said in his despatch on the subject, "to the races of India, for whom the legends and records of the past are charged with so intense a meaning, this resumption by the Paramount Power of the seat of venerable Empire should at once enforce the continuity and promise the permanency of British sovereign rule over the length and breadth of the country."

The foundation stone of the new capital were laid by the King Emperor on December 16, 1911, the finally selected site being on the eastern slopes of the hills to the south of Delhi, on the fringe of the tract occupied by the Delhis of the past. The land chosen is free from liability to flood, has a natural drainage, and is not manworn. It is not cumbered with monuments and tombs needing reverent treatment, and the site is near the present centre of the town of Delhi. A Committee consisting of Surgn.-General Sir C. P. Lukis, Mr. H. T. Keeling, O.S.I., A.M.I.C.E., and Major J. C. Robertson, I.M.S., was appointed to consider the comparative healthiness of the site and of an alternative one to the North of the existing city. Their report, dated 4th March, 1913, states that "the Committee, after giving full consideration to the various points discussed in the above note, is bound to advise the Government of India that no doubt can exist as to the superior healthiness of the southern site, the medical and sanitary advantages of which are overwhelming when compared with those of the northern site."

**The Town Plan and Architecture.**—A report by a Town-Planning Committee, with a plan of the lay-out, was dated 20th March, 1913. Work was begun in accordance with it and its main lines have been followed throughout. The central point of interest in the lay-out, which gives the motif of the whole, is Government House, and two large blocks of Secretariats. This Government centre has been given a position at Raisina hill near the centre of the new city. Sir Edwin Lutyens is the architect for Government House and Mr. Edward Baker for the Secretariats. The former building will

cost approximately Rs. 140 lakhs and the latter groups some Rs. 124 lakhs. To the east of the forum, and below it, will be a spacious forecourt defined by trees and linked on to the great main avenue or parkway which leads to Indrapat. Across this main axis will run an avenue to the railway station. Other roads run in different directions from the entrance to the forum. The axis running north-east towards the Jama Masjid will form the principal business approach to the present city. At the railway station a place will be laid out around which will be grouped the administrative and municipal offices, the banks, the shops and the hotels. The main roads or avenues range from 78 feet to 150 feet in width with the exception of the main avenue east of the Secretariat buildings where a parkway width of 1,175 feet has been allowed. The principal avenues in addition to the main avenues are those running at right angles to the main east to west axis.

For a temporary capital, for the use of the Government of India during the period of the building of the new capital an area was selected along the Allpur Road, between the existing civil station of Delhi and the Ridge. The architecture and method of construction are similar to those adopted in the exhibition buildings at Allahabad in 1910; but the buildings will outlast the transitional period for which they are intended. They will subsequently be an asset of some value.

In October, 1912, by proclamation, there was constituted an administrative enclave of Delhi under a Chief Commissioner. This enclave was entirely taken from the Delhi district of the Punjab and its total area is 573 square miles. On the basis of the Census of 1911, the population of the area originally included in the Province was 3,98,289 and of the new area 14,552, or a total of 4,12,821. The population of the Municipal town of Delhi was 2,29,144. The plans of the New Capital allow for a population within it of 70,000. Its present population is approximately 40,000. Sites have been allotted for forty Ruling Princes and Chiefs to build houses for their own occupation during their visits to the New City.

There was, as regards architecture, a prolonged "battle of the styles" over Delhi. Finally, to use the language of the architect, it has been their aim "to express, within the limit of the medium and of the powers of its users, the ideal and the fact of British rule in India, of which the New Delhi must ever be the monument." The inspiration of the designs is manifestly Western, as is that of British rule, but they combine with it distinctive Indian features without doing violence to the principles of structural fitness and artistic unity.

**Cost of the Scheme.**—It was at first tentatively estimated that the cost of the new capital would be four million sterling and that sum was given in the original despatch of the Government of India on the subject. Various factors have since then increased the cost, the chief of these being the immense rise in prices since the war, and the Legislative Assembly were informed by Government on 23rd March

1921, that the revised estimates then amounted to 1,807 lakhs of rupees. This amount includes allowances for building new Legislative Chambers and Hostels for Members of the Indian Legislature, which were not allowed for in the earlier estimates. The New Capital Enquiry Committee, in its report published in January, 1923, estimated the total expenditure at Rs. 1,292 lakhs including Rs. 42 lakhs for loss by Exchange. This figure still stands.

The Project Estimate contains certain items such as land, residences, water supply, electric light and power, and irrigation on which recoveries in the form of rate or taxes will, in addition to meeting current expenditure, partially at any rate cover the interest on the capital outlay whilst there are other items on which some return on account of the sale of leases, general taxes and indirect receipts may be expected.

**Progress of the work.**—The construction of New Delhi has made satisfactory progress, having regard to the curtailment of the Budget allotment, in consequence of the war and the return of officers and other establishments to their civil work has made possible a considerable speeding up of constructional operations provided money can be provided to pay for them. The Secretariats are so far advanced that there were transferred to them from Calcutta in October, 1924, the offices of the Accountant-General, Central Revenues, and the headquarters of the Royal Air Force in India were also housed in them in the winters of 1924-25 and 1925-26. The residential buildings for Government officers and staff of various grades have been completed and the Engineers hope to have the Secretariats and Parliament house ready for occupation in 1925 and Government House in 1926. Whether the latter will be completed by the date given is unofficially regarded as doubtful.

**Opinion of the Legislature.**—Considerable discussion regarding the new works took place in the Assembly in 1921. The following unofficial resolution was carried:—"This Assembly recommends to the Governor-General in Council that in the interests of economy and of general convenience alike the execution of the programme of New Delhi works may be expedited and the necessary funds provided or raised so that the Secretariat and Legislative buildings and connected works including residences may be completed as early as practicable."

A non-official Member in the Legislative Assembly on 28th September, 1921, at Simla, moved a recommendation to Government "to appoint a Committee to inquire into the possibility of establishing a permanent Capital of India in a place possessing salubrious and temperate climate throughout the year." This proposal was ridiculed by several of his non-official colleagues and was eventually rejected without a division.

H.R.H. the Duke of Connaught, on 12th February, 1921, laid the foundation stone of a large group of parliamentary buildings on a site close to the south-east of the Secretariats. The buildings will be an imposing pile circular in shape, consisting in the main of three horse shoe-shaped Chambers for the Chamber of

Princes, Council of State and Legislative Assembly respectively and surmounted by a large dome over a Central Library connecting all three Chambers.

**All-India War Memorial.**—H. R. H. the Duke of Connaught on 10th February, 1921, laid the foundation-stone of an All-India War Memorial at the southern end of the Central Vista. The place chosen is a fine position in the centre of the circular Princes' Park.

The Memorial will take the form of a triumphal arch spanning Kingsway, the avenue running down the centre of the Vista. It will generally be similar to the Arc de Triomphe in Paris, but will be simpler in a way which will probably increase its grandeur and dignity. The monument will reach a height of 160 feet and the inner height of the arch will be 87 feet 6 inches and its breadth 70 feet. Over the arch on both fronts will appear in capital letters the single word INDIA and this will be flanked on each side by the initials MCM (i.e., 1900) whilst immediately below them on the left-hand will be the initials XIV (i.e., 14) and on the opposite side the figures XIX (i.e., 19). Above the Arch will be a circular stone bowl 11½ feet in diameter. This is intended to be filled with burning oil on great anniversaries and other occasions so that there will be a shining fire by night and a column of smoke by day. The memorial is solely Indian in purpose and will bear the names of Indian regiments only.

**Educational Institutions.**—It was proposed during 1914 that a higher college for Chiefs should be established at Delhi and in this connexion a conference of Chiefs and Political Officers was held at Delhi at which the Viceroy presided. The proposal is still under consideration. To implement it would require a capital outlay of Rs. 12½ lakhs.

The Government of India further in the Spring session of their Legislature in 1922 introduced and carried a Bill for the establishment of a unitary, teaching and residential university of Delhi, the buildings for which would be erected in the new capital. It is intended to provide a local university on the model recommended for Dacca University by the Calcutta University Commission.

The provision of funds for the complete realisation of the university must be a matter of time and it was, therefore, decided to commence work with the existing colleges in their present buildings and to permit them gradually to modify their organisation. Dr. Hari Singh Gour, M.L.A.—now Sir H.S. Gour—was in 1922 appointed first Vice-Chancellor of the new university and the initial work of organisation was quickly effected by the Executive Council. Unfortunately the inability of the Government of India to allot considerable funds was a severe handicap. It was hoped that H. E. the Viceroy would be able to lay the foundation-stone of the university buildings in November, 1922, but this proved impracticable. The site for the new buildings required has not yet been settled. Government and the University Authorities are examining this point in consultation, particularly with reference to the question whether to build in the new capital or to utilise buildings that may become available elsewhere.

## Freemasonry in India.

In 1728 a dispensation was granted by the Grand Lodge of England to Geo. Pomfrett, Esq., authorising him to "open a new Lodge in Bengal." Of this personage nothing further is known but under Capt. Farwinter, who in the following year succeeded him as Provincial Grand Master of India, Lodge was established in 1730, which in the Engraved Lists is distinguished by the arms of the East India Company, and is described as "No. 72 at Bengal in the East Indies." The next Provincial Grand Masters were James Dawson and Zech. Gee, who held office in 1740; after whom came the Hon. Roger Drake, appointed 10th April 1755. The last named was Governor of Calcutta at the time of the attack made on the settlement by Surajah Dowlah in 1756. Drake missed the horrors of the Black Hole by escaping and was accused of deserting his post, but, though present at the retaking of Calcutta by Admiral Watson and Clive, it is improbable that he resumed the duties of his masonic office after the calamity that befell the settlement.

The minutes of the Grand Lodge inform us that William Mackett, Provincial Grand Master of Calcutta, was present at the meeting of that body, November 17th, 1760, and we learn on the same authority that at the request of the "Lodges in the East Indies" Mr. Cullin Smith was appointed P. G. M. in 1762. At this period it was the custom in Bengal "to elect the Provincial Grand Master annually by the majority of the votes of the members present, from amongst those who passed through the different offices of the (Prov.) Grand Lodge and who had served as Dep. Prov. Grand Master." This annual election as soon as notified to the Grand Lodge of England was confirmed by the Grand Master without its being thought an infringement of his prerogative. In accordance with this practice, Samuel Middleton was elected (P. G. M. circa) in 1767; but in passing it may be briefly observed that a few years previously a kind of roving commission was granted by Earl Ferrars in 1762-64 to John Bluvitt, Commander of the "Admiral Watson," Indiaman "for East India where no other Provincial Lodge is to be found." Middleton's election was confirmed October 31st, 1768, and, as the dispensation forwarded by the Grand Secretary was looked upon as abrogating the practice of annual elections, he accordingly held the office of D. G. M. Unfortunately the records of the P. G. L. date back only to 1774, and thus much valuable information is lost to us. This Grand Lodge continued working until 1792 when it ceased to meet. It seems that the officers were selected from only two Lodges much to the dissatisfaction of the other Lodges, and resulted in most of the dissatisfied bodies seceding and attaching themselves to the Athol of Ancient Grand Lodge. In 1813 at the Union both the Ancients and Moderns in Calcutta combined and gave their allegiance to the United Grand Lodge of England and have since been working peaceably under the Provincial Grand Lodge of Bengal which was revived in that year and in 1840 created a District Grand Lodge.

**Madras.**—The earliest Lodge in Southern India (No. 222) was established in Madras in 1752. Three others were also established about 1766.

In the same year Capt. Edmund Pascal was appointed P. G. M. for Madras and its Dependencies and in the following year another Lodge was established at Fort St. George. In 1768 the Athol (or Ancients) invaded this District and in 1782 established a Provincial Grand Lodge and both these Provincial Grand Bodies continued working peaceably side by side until the union. Indeed, though not generally known, these two Grand Bodies made an attempt at coalition long before any such movement was made by their parent bodies, the Grand Lodge of England, and the Ancient Grand Lodge, and Malden in his History of Freemasonry in Madras states that in a great measure they succeeded. At the Union in 1813 all the bodies in Madras gave their allegiance to the United Grand Lodge. One event worthy of note was the initiation in 1776 at Trichinopoly of the eldest son of the Nawab of Arcot, Undat-ul-Amari, who in his reply to the congratulations of the Grand Lodge of England stated "he considered the title of English Mason as one of the most honourable that he possessed." This document is now stored in the archives of the United Grand Lodge.

**Bombay.**—Two Lodges were established in this Presidency during the 17th century, Nos. 234 at Bombay in 1758 and 569 in Surat in 1798, both of which were carried on the lists until the union when they disappeared. A Provincial Grand Master, James Todd, was appointed but there is no record that he exercised his functions and his name drops out of the Freemasons' Calendar in 1799. In 1801 an Athol Warrant was granted (No. 322) to the 78th foot which was engaged in the Maratha War under Sir Arthur Wellesley. In 1818 Lord Morla was asked to constitute a Lodge to be known by the name of St. Andrew by eight Masons residing there and also to grant a dispensation for holding a Provincial Grand Lodge for the purpose of making the Hon. Mountstuart a Mason, he having expressed a wish to that effect. The Petitioners further requested "that his name might be inserted in the body of the warrant, authorising them to instal him after being duly passed and raised a Deputy Grand Master of the Deccan." Of the reply to this application no copy has been preserved. Lodge Benevolence was established in Bombay in 1822.

In 1823 a Military Lodge "Orion-in-the-West" was formed in the Bombay Artillery and installed at Poona as No. 15 of the Coast of Coromandel. It seems from Lane's records that in 1830 it was discovered that this Lodge was not on the records of the United Grand Lodge of England. A Warrant was subsequently issued bearing date 19th July 1833. According to the early proceedings of this Lodge, members were examined in the Third Degree and passed to the chair in the Fourth Degree for which a fee of three gold mohurs was charged. In the following year a second Lodge was established at Poona by the Provincial Grand Lodge of Bengal which however left no trace of its existence. In 1825 the civilian element of "Orion" seceded and formed the "Lodge of Hope" also at Poona No. 802.

Here "Orion" unrecognized at home, aided in the secession of some of its members, who

obtained a warrant, on the recommendation of the parent Lodge, from the Grand Lodge of England. Two years later it was discovered that no notification of the existence of "Orion-in-the-West" had reached England, nor had any fees been received, although these including quarterages had been paid into the Provincial Grand Lodge, Coast of Coromandel. It was further ascertained that in granting a warrant for a Bombay Lodge the Provincial Grand Master of Coromandel had exceeded his powers. Ultimately a new warrant No. 598 was granted as already stated in 1833. Lodge "Perseverance" was started in Bombay No. 818 in 1828. Up to this time the jurisdiction of the Grand Lodge of England in India had not been invaded; but in 1838 Dr. James Burnes was appointed by the Grand Lodge of Scotland, F. G. M. of Western India and its Dependencies. No Provincial Grand Lodge however was formed until 1st January 1838. A second Scottish Province of Eastern India was started which on the retirement of the Marquis of Tweedale was absorbed within the jurisdiction of Dr. Burnes, who in 1846 became Provincial Grand Master for all India (including Aden) but with the proviso, that this appointment was not to act in restraint of any future sub-division of the Presidencies. Burnes may be best described as being in 1836, in ecclesiastical phrase as a Provincial Grand Master "in partibus infidelium" for whatever Lodges then existed throughout the length and breadth of India were strangers to Scottish Masonry. But the times were propitious. There was no English Provincial Grand Lodge in Bombay and the Chevalier Burnes, whom nature had endowed with all the qualities requisite for Masonic Administration, soon got to work and presented such attractions to Scottish Freemasonry that the strange sight was witnessed or English Masons deserting their mother Lodges, to such an extent that these fell into abeyance, in order to give support to Lodges newly constituted under the Grand Lodge of Scotland. In one case, indeed, a Lodge "Perseverance" under England went over bodily to Scotland, with its name, jewels, furniture, and belongings, and the charge was accepted by Scotland. This Lodge still exists in Bombay and now bears No. 338 on the Register of Scotland. From this period, therefore, Scottish Masonry flourished, and English Masonry declined until the year 1848 when a Lodge St. George No. 807 on the Rolls of the Grand Lodge of England was again formed at Bombay, and for some years was the solitary representative of English Masonry in the Province. In 1844 Burns established a Lodge "Rising Star" at Bombay for the admission of Indian gentlemen the result of which is seen at the present day. Thus the seed planted at Trichinopoly in 1776 by the initiation of Andat-ul-Amari has borne fruit, resulting in the initiation of thousands of Indian gentlemen of all castes and creeds, and which has gone far to establishing that mutual trust between West and East, a distinguishing characteristic of Speculative Freemasonry. A Provincial Grand Lodge was re-established in Bombay in 1860, and converted into a District Grand Lodge in 1871.

**The Grand Lodge of England.**—All three Constitutions of the United Kingdom, the United Grand Lodge of England, the Grand Lodge of Ireland and the Grand Lodge of Scotland hold jurisdiction in India. By far the largest is the first: the next largest is the third and the number

of Lodges under Ireland is as yet small. The Grand Lodge of England divides its rule under Five District Grand Masters independent of each other and directly subordinate to the Grand Master of England by whom they are appointed.

#### Bengal.

- 83 Lodges. Rt. Wor. Bro. Hon'ble Sir William James Reid, K.C.I.E., C.S.I., I.O.S.; Dy. D. G. M. C. D. Stewart; Assist. D. G. M. D. C. Banerjee.

#### Madras.

- 83 Lodges. A. Y. G. Campbell, C.I.E., C.B.E., V.D., I.C.S.

#### Bombay.

- 47 Lodges. Rt. W. Bro. H. E. Sir L. O. Wilson, P.C., G.C.I.E., C.M.G., D.S.O., P.G.D. (Eng.), District Grand Master.

#### Punjab.

- 35 Lodges. Rt. W. Bro. C. A. Barron, C.S.I., C.I.E., C.V.O., I.C.S., District Grand Master.

#### Burma.

- 16 Lodges. Rt. W. Bro. James McKenna, C.I.E., District Grand Master.

**The Grand Lodge of Scotland** exercises its rule through a Grand Master of all Scottish Freemasonry in India, who is elected by the Brethren subject to confirmation by the Grand Master Mason of Scotland. Mr. H. P. Gibbs, A.M.I.E.E., etc., J.P., is the present incumbent of the office, and controls 71 Lodges. Under him the several districts are in charge of the following Grand Superintendents:—

- |                        |                            |
|------------------------|----------------------------|
| Genl. Sir Claud Jacob. | G. Supdt., Northern India. |
| Col. C. E. Luard       | Central                    |
| Major A. E. Andrews    | Southern                   |
| H. T. Acton            | Eastern                    |

The Grand Secretary is R. W. Bro. Arthur W. S. Wise, J.P., 17, Murzban Road, Fort, Bombay.

**The Grand Lodge of Ireland** granted a warrant to establish a Lodge at Kurnal in 1837, but it was short lived. An attempt was made in 1869 to establish a Lodge in Bombay, but on the representation of the Grand Secretary of England, to the Deputy Grand Secretary of Ireland that it would be objectionable to create a third masonic jurisdiction in the Province, there being two already, viz., English and Scottish, the Grand Lodge of Ireland declined to grant the warrant. In 1911, however, a warrant was sanctioned for the establishment of Lodge "St. Patrick" and since that year two other Lodges have sprung into being.

**The Grand Lodge of Ireland** has no District Grand Master in India at present, the Lodges corresponding direct with the Grand Lodge in Dublin. There are ten Lodges, 4 in Calcutta, 3 in Ceylon and 3 in Bombay.

**Royal Arch Masonry.**—Under England, the District Grand Master in any District is nearly always created also Grand Superintendent, his Deputy as Second and another Companion as Third Principal.

Under Ireland there is no local jurisdiction and under Scotland the office is elective subject to confirmation.

The five English Districts are constituted as under:—

*Bengal.*

- 29 Chapters. Grand Supdt. Hon. Sir William James Reid, K.C.I.E., C.S.I.

*Madras.*

- 17 Chapters. A. Y. G. Campbell, C.I.E., C.B.E., V.D., I.C.S.

*Bombay.*

- 23 Chapters. M. Ex. Comp. Major General H. A. V. Cummins, C.B., O.M.G., Grand Superintendent.

*Punjab.*

- 21 Chapters. Most Ex. Compn. C. A. Barron, C.S.I., C.I.E., C.V.O., I.C.S., Grand Superintendent.

*Burma.*

- 6 Chapters. James McKenna, C.I.E., Grand Superintendent.

**Royal Arch Masonry** under Scotland has a separate constitution to Craft Freemasonry. The District Grand Chapter of India is at present ruled by M. E. Camp. The Hon. Justice A. M. Kajji under whom there are about 30 Chapters in India. The Grand Secretary of all Scottish Freemasonry in India is also District Grand Scribe E. of Scottish R. A. Masonry.

There is one Irish Chapter in Calcutta.

**Mark Masonry.**—Under England, Mark Masonry is worked under the Grand Mark Lodge of England and Wales, and divided into separate Districts; but in most cases the District Grand Master is also District Grand Mark Master.

*Bengal.*

- 30 Lodges. C. D. Stewart, D. G. M.

*Bombay.*

- 17 Lodges. Rt. W. Bro. R. A. Spence, District Grand Master.

*Madras.*

- 13 Lodges. A. Y. G. Campbell, C.I.E., C.B.E., V.D., I.C.S., District Grand Master.

*Punjab.*

- 15 Lodges. Rt. W. Bro. Lt.-Col. G. T. Davys, O.B.E., District Grand Master.

*Burma.*

- 6 Lodges. Rt. W. Bro. Arthur Blake, District Grand Master.

The Mark degree is incorporated with the Royal arch degree in Irish Chapters. Mark degree is worked in some S. O. Lodges, but mostly in R. A. Chapters, in which the Excellent R.A.M. and other degrees can be obtained. S. O. Chapters insist upon candidates being Mark Master Masons before exaltation. Mark degree in Craft Lodges is conferred by the Rt. Wor. Master in S. O. Craft does not recognise the ceremony of Rt. W. Mark Master. This is confined strictly to Chapters. Each Chapter has a Lodge of M. M. M. working under its charter. Separate charters for Mark Lodges are only issued by the G. Chapter of Scotland.

**Other Degrees.**—There are many side degrees worked in India, of the Ancient and Accepted Rite, no degree higher than the 18° is worked in India under England, but under Scotland the 30° is worked. The Knight Templar Degree is also worked in several places under both English and Scottish jurisdiction. There are fourteen 18th Degree Chapters working in India.

Roman Eagle Conclave No. 43, Bombay.

St. Mary's Commandery No. 43, Bombay.

R. A. Mariner, 72, 514 and 662, Bombay.

R. A. Mariner, 61, 81, 82 and 106, Madras.

R. A. Mariner, 98, 193, 219, 279 and 429, Punjab.

Secret Monitor, 14, 21, 36, 37, 40 and 42, Madras.

**Benevolent Associations.**—Each District works its own benevolent arrangements which include the Relief of Distressed Masons, educational provision for the children of Masons and maintenance provision for widows in poor circumstances.

All information will be given to persons entitled by the District Grand Secretary in each District. The names and addresses of District Grand Secretaries are given below:—

*D. G. S., Bengal.*

G. H. Davis, 19, Park Street, Calcutta.

*D. G. S., Bombay.*

Khan Bahadur Palanji N. Davar, P.D.G.W., Kodak House, Fort, Bombay.

*D. G. S., Burma.*

E. Meyer, D.G.S., E.C., Rangoon.

*D. G. S., Madras.*

S. T. Srinivasa Gopala Chari, Freemasons' Hall, Egmore, Madras.

*D. G. S., Punjab.*

Jas. J. Evans, P.D.G.W., Freemasons' Hall, Lahore.

**Scottish Constitution.**—For information regarding the Benevolent Funds application should be made to Arthur W. S. Wise, J.P., 17, Murrban Road, Bombay.

## Scientific Surveys.

**Botanical Survey.**—The Botanical Survey Department of the Government of India is under the control of a Director, who is assisted by three other officers. They are engaged in the examination and identification of plants and the study of flora. The Director is also in charge of the cinchona plantations in Burma.

In connection with the general question of post-war industrial policy, the Government of India decided in 1916 that every effort should be made to extend the area under cinchona in India, and deputed Colonel A. T. Gage, late Director of Botanical Survey of India, to explore land suitable for cinchona cultivation. As a result of his recommendations made in 1918 large areas in the Tavoy District of Burma were reserved for cinchona cultivation, and the first plantations were started there in 1920. A programme was adopted for planting 500 acres annually which would produce 90,000 lbs. per annum from 1928 onwards. Owing unfortunately to excessive rainfall in 1921-22 this plantation was entirely washed away, and the Tavoy scheme had to be abandoned. A fresh area was selected, however, in the Mergui District of Burma, and plantations were started there in 1922. The cultivation of cinchona is reported to be progressing satisfactorily in this area.

At the instance of the Retrenchment Committee the area to be planted during the first four years has been limited to 250 acres per annum, which will give an annual outturn of more than 45,000 lbs. from 1930. The Governments of Bengal and Madras are also at the instance of the Government of India extending their cinchona plantations, and it is proposed that Bengal should continue its sequence of planting 200 acres every year with cinchona, Madras 230 acres and the Government of India 250 acres annually. The total estimated outturn from this area is 1,20,000 lbs. as against a total Indian consumption of 1,60,000 lbs.

The actual demand for the drug in India is difficult to estimate. Eight million cases of malaria fever go to the hospitals and dispensaries every year. If each of these is treated with 110 grains of quinine, which may be taken as the minimum for the cure of a paroxysm, the demand for hospital and dispensary treatments alone would be 125,000 pounds a year. Patients do not get as much of the drug as they ought, because the cost of quinine is prohibitive. It is estimated that there are 100,000,000 sufferers from malaria who do not attend the hospitals. The potential demand is therefore somewhere between 125,000 pounds and 1,500,000 pounds. When the Italian Government, in 1903, made quinine a State industry and cheapened its retail price consumption in that country enormously increased and malaria mortality was reduced from 15,000 to 3,000 a year. The Public Health Commissioner with the Government of India says in a recent report that "it may be said that there is no question of the effective treatment of malaria in India until consumption of quinine approximates 500,000 pounds."

**Geological Survey.**—The ultimate aim of the Geological Survey of India is the preparation of a geological map of India upon the accuracy of which the solution of most geological prob-

lems ultimately depends. Maps accompany the reports on the various areas in the publications of the Department and a large amount of information is made available to the public. Such maps represent pioneer work which enables prospectors and mining engineers to cut short their preliminary investigations and to start where the Geological Survey has left off. During the preparation of the geological map and the general survey of the country mineral deposits of importance are frequently discovered. Such discoveries are published without delay and every endeavour is made to induce private firms to take up the exploitation of the mineral discovered. Collections of minerals, rocks and fossils are accumulated and exhibited in the public galleries of the Indian Museum, situated in the capital of Bengal. Some of the most interesting and scientifically valuable additions to the collections in recent years have been the remains of anthropoid apes of great age discovered at different places in the Siwalik Mountain chain. These mountains are a comparatively low range running parallel with the Himalayas for a great distance and at a short distance from them. They are in fact a huge bank of detritus washed down during the ages from the Himalayas. They are believed to have covered up in the course of their formation such a quantity of palæolithic remains as exists nowhere else in the world. The discoveries of skeletons and fossils hitherto made have been the result of washaways after heavy rains or of other accidental circumstances and there exists no organisation or systematised method for either prosecuting discovery or collecting what chance brings to light. The Geological Survey also undertakes the examination and identification, without fee, of any minerals, rocks and fossils sent in by private observers. The publications of the Survey include the *Memoirs, Records and Palæontologia Indica*.

**Zoological Survey.**—A scheme for the formation of a Zoological Survey on the basis of the Zoological and Anthropological Section of the Indian Museum, Calcutta, came into force in July, 1916. The proposals as sanctioned by the Secretary of State mainly are as follows:—The headquarters of the Survey will be the Indian Museum. The scheme regarding the Zoological Survey entails the breaking up of the organisation now known as the Zoological and Anthropological Section of the Indian Museum into two parts, one of which will become a Government department under the title of the Zoological Survey of India, and will be primarily concerned with zoological investigation and exercise such advisory functions as may be assigned to it by Government, while the other part will remain as the office of the Trustees of the Indian Museum and will be organised for the present on the lines laid down in the existing by-laws of the Museum. It will be the duty of the Zoological Survey to act as guardians of the standard zoological collection of the Indian Empire, and as such to give every assistance in their power both to officials and to others, in the identification of zoological specimens submitted to them, arranging, if requested to do so, to send collections to specialists abroad for identification in cases in which no specialist is available in India. The Director of the Survey was

Dr. Anandale until April, 1924, when he died—within a month of receiving the honour of Fellowship of the Royal Society. Dr. Balmi Prasad was appointed Acting President in his place and continued in that capacity until July last, when Major R. B. Sewell, I.M.S., M.A., F.A.S.B., F.L.S., F.Z.S., was made President.

**Mammal Survey.**—The Survey was instituted in the year 1912 with the object of making as complete a study as possible of the occurrence and distribution of Mammals in India, Burma and Ceylon, and with the further object of supplementing the collection of Indian Mammals at the Bombay Natural History Society's Museum and at the British Museum as well as at the Natural History Museums in India, the primary object of the Survey being the furtherance of our knowledge of Indian Mammalian Fauna. Up to 1891 Naturalists in India had to rely for information on Dr. Jerdon's "Mammals of India" published in 1874. In 1884 R. A. Sterndale published his *Natural History of Indian Mammals* a purely popular work which did not add much to Jerdon's book. In 1881 a memorial prepared by Dr. Slater, Hon. Secretary to the Zoological Society and signed by Darwin, Hooker, Huxley, and other well known scientists, was presented to the Secretary of State for India. The memorial recommended that a series of Volumes dealing with the Fauna of India should be prepared and Dr. Blanford should be appointed its Editor. The memorial resulted in the publication in 1888-1890 of the Volume on Mammals in the "Fauna of British India" Series and since 1891 this volume has been the standard work on *Indian Mammals*. Blanford's book was however based on the information then available and the shortcomings of the book have been revealed in the light of more recent research. Further knowledge in regard to distribution and classification and the discovery of new species have rendered Blanford practically obsolete.

To remedy this defect, at the instigation of the authorities of the British Museum, the Bombay Natural History Society decided to institute what is now known as the Mammal Survey, Mr. W. S. Millard, then Hon. Secretary of that Society, issued in an appeal to its members to enable the Society to engage the services of trained European collectors so as to make a systematic collection of the mammals of India, Burma and Ceylon. The response to the appeal resulted in over a lakh of rupees being raised between 1911 and 1920, partly by subscriptions from the Society's members, contributions from Indian Princes, and grants from the Indian Government, the Government of Burma, Ceylon, Malay States, and the Provincial Governments. Subscriptions were also received from a few Learned Societies and Institutions in England and America. By the outbreak of the war the Survey had been carried on over large areas of the country, the districts covered being—In Western India a portion of Sind, the whole of Gujarat, Kutch and Kathiawar; the Southern Maharatta country and Kanara in Southern India; in Coorg and Mysore; in the centre large tracts of the Central Provinces and some districts of Bengal and Behar; in Northern India the Society's collectors had worked over Kumaun, Darjeeling and Sikkim and the Bhutan Duars. In Burma, collections were made along the Chindwin river, in Central Burma

and in the Shan States, Pegu and a portion of Tenneserim. The whole of Ceylon was also systematically surveyed.

The material, which up to the outbreak of War comprised some 17,000 specimens, was forwarded to the British Museum where the collections were scientifically worked out by the late Mr. R. C. Wroughton, formerly Inspector General of Forests, Mr. Oldfield Thomas, F.R.S., Curator of Mammals at the British Museum, Mr. Martin C. Hinton and others. The results of their researches were published in a series of scientific papers in the Journal of the Bombay Natural History Society. The enormous mass of material then collected resulted in the discovery of large numbers of new forms and species and by increasing our knowledge of the distribution of Indian Mammalia has enabled the revision of Blanford's Mammalia to be undertaken and early in 1921 the Secretary of State for India commissioned Mr. R. C. Wroughton, since deceased, and Mr. M. C. Hinton to undertake the work.

When demobilization rendered it possible the work of the Survey which had been in abeyance during the war was resumed and a collector, Mr. C. Primrose, was sent to Assam and the Mergui Archipelago and Mr. Oldfield Thomas has written very appreciatively of his work among those islands. Mr. Primrose then began working inland but owing to the impracticability of continuing his work in Burma during the monsoon, he was transferred to Gwalior where H. H. the Maharaja kindly accorded permission to work in his territories.

After working a portion of the Eastern Ghats the next move was to the Kangra District in the North-West Himalayas and then on to the Punjab Salt Range. Two other collectors worked in Southern India. Permission was once more obtained from the Nepal Government for a collector to resume the Survey work in that country. The work in Nepal was brought to a successful close early this year with a representative collection of interesting mammals and birds.

The Survey now has only one collector who is collecting in the foot hills of Himalayas and the Pindari Valley.

**The Board of Scientific Advice.**—This Board in accordance with a recommendation of the Income Retrenchment Committee is in abeyance. It consisted of the heads of the Meteorological, Geological, Botanical, Forest and Survey Departments, representatives of the Agricultural and Civil Veterinary Departments, and other scientific authorities whose special attainments may be useful. It was established in 1902 to co-ordinate official scientific inquiry, to ensure that research work is distributed to the best advantage, and to advise the Government of India in prosecuting practical research into those questions of economic or applied science on the solution of which the agricultural and industrial development of the country so largely depends. The programmes of investigation of the various departments were annually submitted to the Board for discussion and arrangement, and an annual report was published on the work done.

The Secretary to the Government of India (Department of Revenue and Agriculture)

was *ex-officio* President of the Board, which included the Director-General of Observatories, the Director of the Zoological Survey, the Surveyor-General of India, the Principal, Punjab Veterinary College, the Director of the Indian Institute of Science, the Inspector-General of Forests, the Agricultural Adviser to the Government of India, the Director of the Geological Survey, the Director-General, Indian Medical Service, the Secretary to the Government of India, Public Works Department, and the Director of the Botanical Survey of India who was Secretary to the Board of Scientific Advice.

The Universities Conference, representing all Indian Universities, which met in Simla last summer, recommended the revival of the Board.

**The Indian Research Fund.**—The progress of this Fund and its Association like the Board of Scientific Advice, has seriously been affected by the policy of retrenchment enforced in pursuance of the recommendations of the Inchaape Committee. Scientific research work is rapidly developing in India. In 1911 the sum of 5 lakhs (£33,000) out of the surplus opium revenue was set aside as an endowment for research into epidemic diseases in connection with the Central Research Institute at Kasauli. It was hoped that this sum might be largely augmented by private subscriptions. An Indian Research Fund Association was constituted, and a good deal of work was undertaken. Its objects were defined as "the prosecution and assistance of research, the propagation of knowledge and experimental measures generally in connection with the causation mode of spread and prevention of communicable diseases." Fresh investigations into kala azar and cholera were inaugurated, and an officer was deputed at the expense of the Fund to study yellow fever in the regions where it is endemic, with a view to taking steps to prevent its introduction into India. A further grant of 6 lakhs (£40,000) was made to the Central Research Fund from the opium surplus of 1911-12. It was decided to devote to research and anti-malarial projects 5 lakhs (£33,000) a year from Imperial revenue commencing in 1913-14. A new periodical "The Indian Journal of Medical Research," was instituted in 1918 for publication four times annually, as the official organ of the Research Fund. The journal was designed to deal with every branch of research directly or indirectly connected with medical and sanitary science, and form a record of what was being done in India for the advance of this work. In 1922 it was decided to devote the capital funds at the disposal of the Association to the erection of an Imperial Medical Research Institute and to the formation of a fund for its endowments. In the same year valuable results were achieved by Dr. Nishi Kanta De, working in Calcutta on the chemistry of drugs used in treatment of leprosy and on the chemistry of the blood of lepers and resistant animals. The treatment of cancer, of influenza, of pneumonia, the histology and pathology of deficiency diseases and special problems concerning Indian caliculi, kala azar, the action of quinine in malaria treatment were among the particular subjects of investigations specially dealt with by various research experts in 1922.

**Survey of India.**—The work of the Survey of India Department falls under various heads, namely, the trigonometrical survey, topographical and forest surveys, special surveys and explorations, and map production. Cadastral surveys are now carried out by the Provincial Land Records and Settlement Departments.

In 1904 attention was drawn to the defective state of the **topographical survey maps**, and a Committee was appointed to report on the subject. To overtake the arrears of revisional survey and to secure that the map of India should be brought up to date and revised at proper intervals, they recommended a considerable increase of establishment and an increased expenditure of Rs. 2,10,000 a year for the next 25 years. They also made recommendations for altering the size and improving the quality of the maps. After further inquiry the Government of India decided that a scale of 1 inch to the mile would ordinarily be sufficient, reserved forests and special areas being surveyed on the scale of 2 inches to the mile, and the  $\frac{1}{2}$ -inch scale employed for waste and barren tracts. The work of the Department has in recent years greatly been hampered by the general need for retrenchment in expenditure. On the other hand, its organisation has lately been improved by the creation of a new North-West Frontier Circle, under a separate Superintendent, this being the addition of a fourth Circle to the three already existing for all India and Burma.

**Indian Science Congress.**—The Indian Science Congress was founded largely owing to the efforts of Dr. J. L. Simonsen and Dr. Sunder Lal Hora, D.Sc., Officiating Superintendent of the Zoological Survey of India, the present Honorary General Secretaries of the Congress. The Asiatic Society of Bengal undertakes the management of the Congress finances and publishes annually the proceedings of the Congress. The objects are (1) to encourage research and to make the results generally known among science workers in India, (2) to give opportunities for personal intercourse and scientific companionship and thus to overcome to some extent one of the chief drawbacks in the life of workers in science in India, (3) to promote public interest in science; for this end the Congress is held at different centres annually, and evening lectures open to the public form an important part of the proceedings of each Congress.

The Congress, which is progressive and vigorous, meets in January each year, the proceedings last for six days. The Head of the Local Government is Patron of the Congress; the Congress session is opened by a Presidential Address delivered by the President for the year. The President is chosen annually, the different sections being represented in turn. The sections are (1) Agriculture, (2) Physics and Mathematics, (3) Chemistry and Applied Botany, (4) Zoology and Ethnography, (5) Botany, (6) Geology, (7) Medical Research; when the sections meet separately each section is presided over by its own President also chosen annually. The mornings are devoted to the reading and discussion of the papers, the afternoons to social functions and visits to places of interests, in the evenings public lectures are delivered.

# Posts and Telegraphs.

## POST OFFICE.

The control of the Posts and Telegraphs of India is vested in an officer designated Director-General of Posts and Telegraphs who works in subordination to the Government of India in the Department of Industries and Labour. The superior staff of the Direction, in addition to the Director-General himself, consists on the postal side of two Deputy Directors-General (who are officers of the rank of Postmaster-General), and six Assistant Directors-General (whose status is similar to that of Deputy Postmasters-General).

For postal purposes, the Indian Empire is divided into nine circles as shown below, each of the first eight is in charge of a Postmaster-General and the Sind and Baluchistan Circle is controlled by a Deputy Postmaster-General:—Bengal and Assam, Bihar and Orissa, Bombay, Burma, Central, Madras, Punjab and North-West Frontier, United Provinces and Sind and Baluchistan. The Central Circle comprises roughly the Central Provinces and the Central India and Rajputana Agencies.

The Postmasters-General are responsible to the Director-General for the whole of the postal arrangements in their respective circles, with the exception of those connected with the conveyance of mails by railways and inland steamers which are entrusted to three officers bearing the designation of Deputy Postmaster-General, Railway Mail Service. All the Postmasters-General are provided with Personal Assistants, while those in charge of the largest circles are also assisted by Deputy Postmasters-General. The nine Postal Circles and the jurisdictions of the three Deputy Postmasters-General, Railway Mail Service, are divided into Divisions, each in charge of a Superintendent of Post Offices or Railway Mail Service as the case may be and each Superintendent is assisted by a certain number of officials styled inspectors.

Generally there is a head post office at the head-quarters of each revenue district and other post offices in the same district are usually subordinate to the head office for purposes of accounts. The Postmasters of the Calcutta, Bombay, and Madras General Post Offices

and of the larger of the other head post offices are directly under the Postmaster-General. The Presidency Postmasters, indeed, have one or more Superintendents subordinate to them. When the duties of the Postmaster of a head office become so onerous that he is unable to perform them fully himself, a Deputy Postmaster is appointed to relieve him of some of them, and if still further relief is required, one or more Assistant Postmasters are employed. The more important of the offices subordinate to the head office are designated sub-offices and are usually established only in towns of some importance. Sub-offices transact all classes of postal business with the public, submit accounts to the head offices to which they are subordinate, incorporating therein the accounts of their branch offices, and frequently have direct dealings with Government local sub-treasuries. The officer in charge of such an office works it either single-handed or with the assistance of one or more clerks according to the amount of business.

Branch offices are small offices with limited functions ordinarily intended for villages, and are placed in charge either of departmental officers on small pay or of extraneous agents; such as school-masters, shopkeepers, landholders or cultivators who perform their postal duties in return for a small remuneration.

The audit work of the Post Office is entrusted to the Accountant-General, Posts and Telegraphs, who is an officer of the Finance Department of the Government of India and is not subordinate to the Director-General. The Accountant-General is assisted by Deputy Accountants-General, all of whom, with the necessary staff of clerks, perform at separate headquarters the actual audit work of a certain number of postal circles.

In accordance with an arrangement which has been in force since 1883, a large number of sub-post offices and a few head offices perform telegraph work in addition to their postal work and are known by the name of combined offices. The policy is to increase telegraph facilities everywhere and especially in towns by opening a number of cheap telegraph offices working under the control of the Post Office.

The Inland Tariff (which is applicable to Ceylon and Portuguese India except as indicated below) is as follows:—

	When the postage is prepaid.	When the postage is wholly unpaid.	When the postage is insufficiently prepaid.
<i>Letters.</i>	<i>Anna.</i>		
Not exceeding two and a half tolas ..	1	} Double the prepaid rate (chargeable on delivery).	} Double the deficiency (chargeable on delivery).
Every additional two and a half tolas or part of that weight .. .. .	1		
<i>Book and pattern packets.</i>			
Every 5 tolas or part of that weight ..	1		

## Postcards.

Single	..	..	..	½ anna.
Reply	..	..	..	1 "

(The postage on cards of private manufacture must be prepaid in full.)

## Parcels (prepayment compulsory).

(a) Parcels not exceeding 440 tolas in weight:—

	Rs. a.
Not exceeding 20 tolas .. ..	0 2
Exceeding 20 tolas but not exceeding 40 tolas .. ..	0 3
For every additional 40 tolas or part of that weight .. ..	3 annas.

(b) Parcels exceeding 440 tolas in weight:—

Exceeding 440 tolas but not exceeding 480 tolas .. ..	Rs. 3 0
4 annas for every additional 40 tolas or fraction thereof up to 800 tolas.	

Registration is compulsory in the case of parcels weighing over 440 tolas.

These rates are not applicable to parcels for Portuguese India.

In the case of parcels for Ceylon a registration fee of 2 annas is chargeable on each parcel in addition to the rates shown above.

## Registration fee. Rs. a.

For each letter, postcard, book or pattern packet, or parcel to be registered 0 2

## Ordinary Money Order fees.

On any sum not exceeding Rs. 10 ..	0 2
On any sum exceeding Rs. 10 but not exceeding Rs. 25 .. ..	0 4
On any sum exceeding Rs. 25 up to Rs. 600 .. ..	0 4

for each complete sum of Rs. 25, and 4 annas for the remainder; provided that, if the remainder does not exceed Rs. 10, the charge for it shall be only 2 annas.

**Telegraphic money order fees.**—The same as the fees for ordinary money orders plus a telegraph charge calculated at the rates for inland telegrams for the actual number of words used in the telegram advising the remittance, according as the telegram is to be sent as an "Express" or as an "Ordinary" message.

In the case of Ceylon the telegraph charge is calculated at the rates shown below:—

**Express.**—Rs. 2 for the first 12 words and 3 annas for each additional word.

**Ordinary.**—Rs. 1 for the first 12 words and 2 annas for each additional word. Telegraphic money orders cannot be sent to Portuguese India.

**Value-payable fees.**—These are calculated on the amount specified for remittance to the sender and are the same as the fees for ordinary money orders.

**Insurance fees.**—For every Rs. 100 of insured value 2 annas.

As regards Portuguese India see Foreign Tariff.

**Acknowledgment fee.**—For each registered article 1 anna.

**The Foreign Tariff** (which is not applicable to Ceylon or to Portuguese India except in res-

pect of insurance fees for parcels and parcel postage) is as follows:—

## Letters.

To Great Britain and Northern Ireland and other British Possessions and Egypt, including the Sudan. } 2 annas for the first ounce and 1½ annas for each additional ounce or part of that weight.

To other countries, colonies or places. } 3 annas for the first ounce and 1½ annas for every additional ounce or part of that weight.

Postcards Single .. ..	1½ annas.
.. Reply .. ..	3 annas.

**Printed Papers.**—½ anna for every 2 ounces or part of that weight.

**Business Papers.**—For a packet not exceeding 12 ounces in weight .. 3 annas.

For every additional 2 ounces or part of that weight .. .. ½ anna.

**Samples.**—1 anna for first 4 ounces and ½ anna per 2 ounces thereafter.

## Parcels.

(i) Parcel not exceeding 20 lbs. in weight and addressed to Great Britain and Northern Ireland are forwarded as mails to the British Post Office, the rates of postage applicable to such parcels being as follows:—

## Via Gibraltar

For a parcel—	Rs. a. p.
Not over 3 lbs. .. ..	1 8 0
Over 3 lbs., but not over 7 lbs. ..	2 12 0
.. 7 .. .. 11 ..	3 15 0
.. 11 .. .. 20 ..	6 6 0

These parcels are delivered by the post office and the postage paid carries them to destination.

(ii)—Parcels which exceed 11 lbs. but which do not exceed 50 lbs. (the maximum allowed) in weight are forwarded from India through the medium of the P. & O.S.N. Co., and are delivered at destination under arrangements made by that Company. The postage charge applicable to such parcels is twelve annas for each pound, or fraction of a pound. The parcels are delivered free of charge within a radius of one mile from the Company's Head Office in London; if addressed to any place beyond that radius, carrier's charges are levied from the addressees on delivery. Parcels thus forwarded through the P. & O. S.N. Co. cannot be insured during transit beyond India, but must, if they contain coin, etc., be insured during transit in India. No acknowledgment of delivery can be obtained in respect of these parcels, nor can such parcels be transmitted to Great Britain and Northern Ireland under the value-payable system.

**Money Orders.**—To countries on which money orders have to be drawn in rupee currency, the rates of commission are the same as in the case of inland money orders.

To countries on which money orders have to be drawn in sterling, the rates are as follows:—

	Rs. a.
On any sum not exceeding £1	0 3
" " exceeding £1 but not exceeding £2	0 5
" " " £2 " " £3	0 8
" " " £3 " " £4	0 10
" " " £4 " " £5	0 12
" " " £5 .. .. .	0 12

for each complete sum of £5 and 12 annas for the remainder, provided that if the remainder does not exceed £1, the charge for it shall be 3 annas; if it does not exceed £2, the charge for it shall be 5 annas; if it does not exceed £3, the charge for it shall be 8 annas; and if it does not exceed £4, the charge for it shall be 10 annas.

**Insurance fees (for registered letters and parcels only)**

*For insurance of letters and parcels to Mauritius and British Somaliland and of parcels to Portuguese India, the Seychelles and Zanzibar—*

Where the value insured does not exceed Rs. 200 ..	5
For every additional Rs. 200 or fraction thereof .. ..	5

*For insurance of letters and parcels to Great Britain and Northern Ireland and to British Possessions and Foreign countries other than those mentioned above and for insurance of letters to the Seychelles and Zanzibar.—*

Where the value insured does not exceed £12 .. ..	Annas 5
For every additional £12 or fraction thereof .. ..	5

**Acknowledgment fee.**—3 annas for each registered article.

**Magnitude of business in Post Office.**—

At the close of 1923-24 there were 105,880 postal officials, 19,491 post offices, and 155,460 miles of mail lines. During the year, 1,209 million articles, including 45½ million registered articles were posted; stamps worth Rs. 55 millions were sold for postal purposes; over 32½ million money orders of the total value of Rs. 813 millions were issued, a sum of Rs. 255 millions was collected from tradesmen and others on V. P. articles; over 5½ million insured articles valued at 1,533 millions of rupees were handled. Customs duty, aggregating over 7 million rupees was realised on parcels and letters from abroad, pensions amounting to Rs. 17½ millions were paid to Indian Military pensioners and 18,147 lbs. of quinine were sold to the public. On the 31st March 1924, there were 2,089,314 Savings Bank accounts with a total balance of Rs. 247½ millions and 43,019 Postal Life Insurance policies with an aggregate assurance of Rs. 73½ millions.

## TELEGRAPH DEPARTMENT.

**Telegraphs.**—Up to 1912 the telegraph system in India was administered as a separate department by an officer designated Director-General of Telegraphs who worked in subordination to the Government of India in the Department of Commerce and Industry. In that year it was decided to vest the control of Posts and Telegraphs in a single officer as an experimental measure with a view to the eventual amalgamation of the two Departments.

In pursuance of this policy an experimental amalgamation of the two services was introduced in the Bombay and Central Circles from the 1st July 1912. The fundamental principles of this scheme which followed closely the system in force in the United Kingdom and several other European countries were that the traffic and engineering work of the Telegraph Department should be separated, the former branch of work in each Circle being transferred to the Postmaster-General assisted by a Deputy Postmaster-General and a suitable number of attached officers and the engineering branch being controlled by a Director of Telegraphs in charge of the two Circles. Subordinate to this officer there were several Divisional Superintendents who were assisted by a number of attached officers.

In 1914 the complete amalgamation of the two Departments was sanctioned by the Secretary of State and introduced from 1st April. The superior staff of the Direction, in addition to the Director-General himself, consists on the engineering side of a Chief Engineer, Telegraphs,

with two Dy. Chief Engineers. For traffic work there is a Deputy Director-General, with an Assistant and an Assistant Director-General. On the 27th March 1920 a Controller of Telegraph Traffic was appointed to assist the Deputy Director-General in the inspection of offices and in controlling telegraph traffic. In the Circles the scheme which has been introduced follows closely on the lines of the experimental one referred to above. For telegraph engineering purposes India is divided up into five Circles, each in charge of a Director. For Burma special arrangements were considered necessary and the engineering work is in charge of the Postmaster-General who is a Telegraph officer specially selected for the purpose. These six Circles are divided into twenty-one Divisions each of which is in charge of a Divisional Engineer. On the 1st July 1922 Sind and Baluchistan circle was formed with its headquarters at Karachi. This circle is in charge of a Deputy Postmaster-General. On the 31st March 1924 there were 7 Circles and 20 Divisions.

The telegraph traffic work is under the control of the Postmasters-General, each of whom is assisted by a Deputy Postmaster-General and a suitable staff of attached officers.

The audit work of the Telegraph Department is, like that of the Post Office, entrusted to the Accountant-General, Posts and Telegraphs assisted by a staff of Deputy and Assistant Accountants-General.

**Inland Telegrams and Tariff.**—Telegrams sent to or received from places in India or Ceylon are classed as Inland telegrams. The tariff for inland telegrams is as follows:—

For delivery in India.		For delivery in Ceylon.	
Private and State.		Private and State.	
Ex-press.	Ordinary.	Ex-press.	Ordinary.
Rs. a.	Rs. a.	Rs. a.	Rs. a.
Minimum charge, 1	8	0	12
Each additional word over 12..	0	2	0
	1	0	8
	0	2	0

The address is charged for.

**Additional charges.**

Minimum for reply-paid telegram .. .. .	Minimum charge for an ordinary telegram.
Acknowledgment of receipt .. .. .	
Multiple telegrams, each 100 words or less .. .. .	.. .. . 4 annas.
Collation .. .. .	.. One quarter of charge for telegram.

For acceptance of an Express telegram during the hours when an office is closed.	If both the offices of origin and destination are closed .. .. .	2
	If only one of the offices is closed .. .. .	1
	If the telegram has to pass through a closed intermediate office an additional fee in respect of each such office .. .. .	1
	Rs.	
Signalling by flag or semaphore to or from ships—per telegram .. .. .	The usual inland charge plus a fixed fee of 8 annas.	
Boat hire .. .. .	Amount actually necessary.	
Copies of telegrams; each 100 words or less .. .. .	.. .. . 4 annas.	

For delivery in India.		For delivery in Ceylon.	
Press.		Press.	
Ex-press.	Ordinary.	Ex-press.	Ordinary.
Rs. a.	Rs. a.	Rs. a.	Rs. a.
Minimum charge ..	1	0	8
Each additional 6 words over 48 in respect of India, each additional four words over 32 in respect of Ceylon..	0	2	0
	0	1	0
	2	0	2

The address is free.

**Foreign Tariff.**—The charges for foreign telegrams vary with the countries to which they are addressed. The rates per word for private and state telegrams to countries in Europe are as follows:—

State	Ordinary.	Deferred.	British.
Govt.	Red.	Tish.	

All countries	In Rs.	a.	Rs.	a.	Rs.	a.	Rs.	a.
Europe (except Denmark, France, Portugal, Russia and Turkey) via Eastern ..	3	12	1	4	0	10	0	10
Do. via Indo ..	3	12	1	4	0	10	—	—

Daily letter-telegram to Great Britain and Ireland via Eastern are accepted at one-fourth the rate for ordinary telegrams, subject to a minimum of 20 words per telegram including the indication DLT.

**Radio-Telegrams.**—For radio-telegrams addressed to ships at sea from offices in India or Burma and transmitted via the coast stations at Bombay, Calcutta, Karachi, Madras, Port Blair or Rangoon the charge is eleven annas per word in nearly all cases. Full particulars are given in Section XXII of the Post and Telegraph Guide.

**Growth of Telegraphs.**—At the end of 1897-98 there were 50,305 miles of line and 155,088 miles of wire and cable, as compared with 461,592 wire including cable and 93,054 line including cable miles, respectively, on the 31st March 1925. The numbers of departmental telegraph offices were 267 and 165 (including 5 Coast Radio offices, respectively) while the number of telegraph offices worked by the Post Office rose from 1,634 to 3,555. The increase in the number of paid telegrams dealt with is shown by the following figures:—

		1897-98.	1924-25.
Inland ..	Private ..	4,107,270	15,394,094
	State ..	860,382	1,104,590
	Press ..	35,910	459,134
Foreign ..	Private ..	735,679	2,315,686
	State ..	9,896	32,415
	Press ..	5,278	86,731
		5,754,415	19,342,600

The outturn of the workshops during 1923-24 represented a total value of Rs. 16,60,258. At the end of the year the total staff numbered 13,770. The total capital expenditure up to the close of 1923-24 amounted to Rs. 20,86,50,004. The deficit for the year was Rs. 2,93,734.

**Wireless.**—The total number of Departmental wireless stations open at the end of 1924-25 was twenty-three, viz., Allahabad, Bombay, Calcutta, Delhi, Diamond Island, Jutogh, Karachi, Lahore, Madras (3 stations), Mhow, Nagpur, Peshawar, Poona, Port Blair, Quetta, Rangoon (3 stations), Sandheads (two pilot-vessels), and Secunderabad, of which only Port Blair books telegrams direct from the public.

The new duplex high-speed service between Rangoon and Madras continued to work satisfactorily, the Baudot system being employed generally for this circuit.

**Telephones.**—On the 31st March 1924 the number of telephone exchanges established by the Department was 231 with 12,007 straight line connections and 1,624 extension telephones. Of these exchanges, 91 were worked departmentally. The number of telephone exchanges established by Telephone Companies was 14 with 25,222 connections.

## Sanitation.

The history of the sanitary departments in India goes back for about fifty years. During that period great improvements have been effected in the sanitary condition of the towns, though much remains to be done; but the progress of rural sanitation which involves the health of the great bulk of the population has been slow, and incommensurate with the thought and labour bestowed on the subject. "The reason lies in the apathy of the people and the tenacity with which they cling to domestic customs injurious to health. While the inhabitants of the plains of India are on the whole distinguished for personal cleanliness, the sense of public cleanliness has ever been wanting. Great improvements have been effected in many places; but the village house is still often ill-ventilated and over-populated; the village site dirty, crowded with cattle, choked with rank vegetation, and poisoned by stagnant pools; and the village tanks polluted, and used indiscriminately for bathing, cooking and drinking. That the way to improvement lies through the education of the people has always been recognised."

Of recent years the pace has been speeded up as education progressed, education developed, and funds were available. In a resolution issued in May 23rd, 1914, the Government of India summarised the position at that time, and laid down the general lines of advance. This resolution (*Gazette of India*, May 25th, 1914) should be studied by all who wish to understand the attitude of the Government of India towards sanitation prior to the passing of the Reform Act of 1919. It will be found summarised in the Indian Year Book of 1922 (page 475 *et seq.*) and earlier editions. One of the greatest changes effected by the Reform Act of 1919 was the transfer of sanitation to the provinces making it a subject directly responsible to local control through Ministers. It is too early yet to attempt to indicate the effects of this change. In the official report of

sanitary work in India during the year 1921-22 the general position is indicated by the Public Health Commissioner with the Government of India, in the following terms: "There is unfortunately little reason to suppose that the transfer of Sanitation to popular control will usher in the millennium at an early date. When all allowances are made for financial stringency, it cannot be said that the Reformed Provincial Governments have thrown themselves enthusiastically into the struggle with disease. The daily press, however, shows that popular interest in the problems of sanitation is slowly increasing, which of itself is a good thing. One of the encouraging features of the period has been the increasing number of local associations who are taking part in sanitary work. Voluntary agencies have multiplied, and private generosity both in money and service increases." The next annual report by the same official note is made that the death rate for British India in 1922 was 24·02 against a quinquennial mean of 38·42. This mean was high because of the influenza epidemic in 1918, but in 1922 there were 1½ million fewer deaths than in 1921. The report continues, "It cannot be too strongly impressed on the Indian public that there is no reason why this economy in life should not continue and be improved on. Life, for which health is a prime necessity, is purchasable, and is the greatest asset any nation may acquire. . . . In order to open the eyes of the public a campaign of enlightenment is essential. . . . Perhaps the most urgent requirement of India to-day, when Indian politicians desire to create a strong nation, is the appointment of a Commission to inquire into the actual health conditions of the people and to make definite recommendations on the measures necessary to secure a reasonable standard of health. . . . The saving of life in 1922 was in large measure accidental and due to conditions over which man has no control."

Province.	Birth Rates (per mille).		Death Rates (per mille).

**Chief Diseases.**—There are three main classes of fatal disease: specific fevers, diseases affecting the abdominal organs, and lung diseases. Intestinal and skin parasites, ulcers and other indication of scurvy widely prevail. The table below shows the number of deaths from each of the principal diseases and from all other causes in British India and death-rates per 1,000:—

Province.	Cholera.	Small-pox	Plague.	Fevers.	Dysentery and Diarrhoea.	Respiratory Diseases.	All other causes.
Delhi ..	6 .01	22 .04	191 .38	6,725 13.43	369 .73	3,947 7.88	1,212 2.48

1921-22 ..	121,679 .50	40,836 .17	77,615 .32	3,689,086 15.28	177,852 .74	290,633 1.20	1,402,491 5.81

Taking India as a whole, the Public Health Commissioner reported, the year during 1922, experienced fairly normal seasonal climatic conditions for the second year in succession, which might well be reflected in morbidity and mortality statistics. Except in Madras and Bombay there was a reduction of deaths in all provinces compared with the quinquennial mean. Compared with 1921, there were slight increases of deaths in Delhi, Bihar and Orissa, Madras and Lower Burma.

Birth registration is notoriously defective and the registration of female births probably suffers more than that of males. Births exceeded deaths in all areas except Coorg.

The general figures are regarded as indicating that the population in the absence of conditions favourable to epidemics responded steadily to the improvement in conditions consequent upon two successive good seasons.

Statistics from only a few Indian States are received by the Public Health Commissioner and it is evident from them that much requires to be done in the States to improve registration. Thus, Mysore returns a birth-rate of 17.91 and a death rate of 14.52 (despite epidemic prevalence of small-pox, plague, malaria and relapsing fever).

The Public Health Commissioner reports that deaths during the first year of life were 23.2 per cent. of the total deaths against 20.8 in the preceding year. "Infant mortality is a sensitive index of the health conditions, especially as regards sanitation, under which the people live: it is these conditions which require attention if any real influence on infant mortality and on the health of the nation is to be exercised. . . . In British India as a whole 48.8 per cent. of the infantile deaths occurred during the first month of life. . . . Nearly one-third of the infantile deaths occur in the first week. Mortality at this period is associated more than at any other time with maternal conditions, which in their turn are inseparably connected with the nature of the environment and the liability to contagion."

As regards general mortality and particularly that from malaria, the Public Health Commissioner in his annual report quotes with approval the following opinion by Dr. Pais:—"Malaria impresses not only physical marks but above all physical degeneration on the race it smites. Distrust towards works of a social character, diminished will-power, diminished liking for work, restricted vision towards all the phenomena of life, are special characteristics of those

with chronic malaria and of the peoples who have long suffered from the infection." Dr. Bentley, who has made an expert study of malaria in various parts of the world and has in recent years specially devoted himself to it in India, gives reason for considering that in Bengal alone there are every year 28,300,000 cases of malaria requiring treatment. If this estimate be applied to the whole of India the number of cases requiring treatment throughout the land would be about 100,000,000.

The known results of vaccination in the prevention of small-pox are an indication of the facility with which mortality can be prevented when the people accept with comparative readiness the scientific advice given them in health matters, as they do in regard to this measure. Had the average mortality from small-pox during the decade 1868-1877 pertained in the last quinquennium the average annual mortality during the latter period from this cause alone would have been 248,712 instead of the recorded figure of 82,338.

### THE HEALTH OF THE ARMY.

**British.**—The average strength of European Troops, Regulars and Territorials, in India during 1923 was 63,139 as compared with 60,166 in 1922. The following table shows the main facts as regards the health:—

Period.	Average strength.	Admissions.	Deaths.	Invalids sent home.	Average constantly sick.
1910-14average .. ..	69,440	39,389	303	488	2,094·57
1915-16average .. ..	66,199	58,367	583	1,080	3,277·53
1920.. .. .	57,332	61,429	385	2,314	3,488·08
1921.. .. .	58,681	60,515	408	749	3,070·04
1922.. .. .	60,166	37,836	284	714	1,902·32
1923.. .. .	63,139	37,505	237	979	1,793·31

Period.	Ratio per 1,000 of strength.				Average period of illness of each soldier calculated on average strength.	Average duration of each case of sickness.
	Admissions.	Deaths.	Invalids sent home.	Average constantly sick.		
1910-14average .. ..	567·2	4·51	7·03	30·13	*10·00	*19·39
1915-16average .. ..	881·7	8·81	29·91	49·51	18·07	20·50
1920.. .. .	1,071·5	6·72	40·36	60·84	22·27	20·78
1921.. .. .	1,031·3	6·95	12·76	52·32	19·10	18·52
1922.. .. .	628·9	4·72	11·87	31·62	11·54	18·35
1923.. .. .	595·4	3·75	15·51	28·40	10·37	17·41

\* Worked out on quinquennium aggregates.

The main feature of the tables is the progressive rise in the general sick rates that occurred during and after the Great War, followed by a sudden drop in 1922. The fall has become still more marked during 1923. The causes of the deterioration in the health of the troops during the post-war years leading to an admission rate of 1,071·5 in 1920 have been fully discussed in previous reports. The improvement that set in during 1922, when the admission rate was 628·9, has been continued during the year under review, and the admission rate has now been reduced to 595·4, or very little higher than the pre-war rate of 567·2 in the quinquennium 1910-14. But for a severe epidemic of Malaria in the Northern Command the figure for 1923 would have been approximately the same as that 1910-14. The death rate in 1923 was the second lowest on record being only 3·75 per 1,000 of strength, as compared with 6·95 in 1921 and 4·72 in 1922. (The lowest on record is 3·26 in 1913.)

The invaliding rate, based on comparatively

small figures, was 15·5 in 1923 as compared with 11·87 in the preceding year, a rise of 3·13 per 1,000. The average constantly sick rate for 1923 establishes a record, being 28·4 per 1,000 as against 31·62 in 1922 and 30·13 in the quinquennium 1910-14. The very satisfactory fall both in the average constantly sick and in the death-rate may be taken as an indication of the advance in methods of treatment that has recently taken place. This is still further emphasized by the "average duration of each case of sickness," which has fallen to 17·41 days as compared with 18·35 in 1922 and 19·32 in the quinquennium 1910-14. The "average period of illness of each soldier calculated on the average strength" which for the quinquennium 1910-14 stood at 10·00 days per soldier, was 10·37 in 1923 as against 11·54 in 1922 and 22·27 in 1920. The general effect of the tables is to demonstrate that the health of the British Army in India has at last returned to the level at which it stood in the years immediately preceding the Great War.

**Indian.**—The average strength of Indian troops excluding those on field service and in stations outside India (but not excluding those at Aden and Bushire) was 143,234 in 1923, as compared with 147,840 in 1922.

The following table gives the actuals and ratios of sickness, deaths, and invaliding for the quinquennial periods 1910-14 and 1915-19 and for the years 1920 to 1923 inclusive:—

Period.	Average strength.	Admissions.	Deaths.	Invalids.	Average constantly sick.	Ratio per 1,000 of strength.			
						Admissions.	Deaths.	Invalids.	Average constantly sick.
1910-14 (average)	130,261	71,213	573	699	2,662	544·6*	4·39*	5·4*	20·7*
1915-19 (average) ..	204,298	161,028	3,435	4,824	7,792	788·2	16·81	23·6	38·1
1920.. ..	216,445	164,984	2,124	4,564	9,265	762·3	9·81	21·1	42·8
1921.. ..	175,384	119,215	1,782	3,638	6,031	679·7	10·16	20·7	34·4
1922.. ..	147,840	77,468	1,014	2,659	3,639	524·0	6·86	18·0	24·6
1923.. ..	143,234	66,847	856	2,328	2,955	466·7	5·98	16·3	20·63

\* Worked out on quinquennial aggregates.

The bad effects of the War on the health of the troops have now passed away and the admission ratio for 1923 was only 466·7 per 1,000 being a decrease of 57·3 per 1,000 as compared with 1922 and constituting a record. The ratio of average constantly sick is also a record being 20·63 per 1,000 as compared with 24·6 per 1,000 in 1922 and 20·7 per 1,000 in the quinquennial

period 1910-14. The ratios per 1,000 of deaths and invaliding were 598 and 18·3, respectively as compared with 6·86 and 18·0 in 1922. It is difficult to resist the conclusion that thimarked improvement in the health statistics of the Indian Army is due to the introduction of the Station Hospital system in 1918 and to its growing efficiency.

### MORTALITY FROM WILD ANIMALS.

The total number of persons killed by wild animals in British India during 1924 amounted to 2,587, as against 3,605 in the previous year. Tigers were responsible for 1,174 deaths, leopards for 406, wolves for 419, bears for 82, elephants for 41, and hyenas for 19. Deaths were highest from tigers and leopards in Madras, from wolves

in the United Provinces, from bears in Bihar and Orissa, and from elephants in Assam. Of the 446 deaths from "other animals," about 53 are assigned to wild pig and 213 to crocodiles and alligators. The highest number of deaths from all wild animals occurred in Madras (41), the United Provinces, Bihar and Orissa and the

Central Provinces and Berar coming next in order. The mortality in the majority of the provinces was less than in the previous year, but in Bombay and Burma it was slightly greater.

**Snake Bite.**—Deaths from snake bite fell from 19,990 to 19,867. Decreases occurred in Madras, Bombay, Burma and the United Provinces, but Bengal, the Punjab, Bihar and Orissa, the Central Provinces and Berar and Assam have reported increases.

**Animals Destroyed.**—During the year under

review 21,032 wild animals were reported to have been destroyed, of which 1,706 were tigers, 5,202 leopards, 2,799 bears and 1,743 wolves. A sum of Rs. 1,71,170 was paid in rewards, against Rs. 1,65,367 in the previous year. The statistics of the number of snakes destroyed have been discontinued in Burma. In the other provinces the number destroyed increased from 42,911 to 47,106, and the rewards paid for their destruction were Rs. 1,403 as against Rs. 817 in the previous year.

## MEDICAL INSTITUTIONS.

There were 3,535 States-public, local fund and private aided civil hospitals and dispensaries at the end of 1922; during 1923 the number increased by 99 giving a total of 3,634 at the end of the year.

The total number of patients treated increased from 36,876,222 in 1922 to 38,059,386 in 1923. The increase was noticeable in Delhi, Bihar and Orissa, Punjab, Burma, Bombay, Madras and Baluchistan. The number of operations also increased by 44,036, viz., 1,194,964 in 1923 against 1,50,628 in 1922.

**Medical Colleges.**—There are seven medical colleges (Bombay, Madras, Calcutta, Belgachia, Lahore, Telhi and Lucknow). There are also 18 medical schools. There is an X-ray institution at Duhra-Dun.

**Pasteur Institutes.**—There were Pasteur Institutes for anti-rabic treatment at Kasauli

(Punjab), Coonoor (Madras), Shillong (Assam) and Rangoon (Burma).

**Lunatic Asylums.**—The treatment of lunatics at asylums prevails on a comparatively small scale; but the asylum population is steadily increasing. The number of asylums in 1923 was 22. The number of patients admitted was 2,136 in 1923 against 2,106 in 1922. The total asylum population of the year was 9,640.

**Lepor Asylums.**—There are many leper asylums among which may be mentioned the Madras Government Leper Asylum, the Matunga Leper Home, Bombay, the Trivandrum State Leper Asylum and the Calcutta Leper Asylum. There are also many asylums or homes, frequently under some sort of Government supervision, including about 50 asylums of the Mission to Lepers.

## LEPROSY IN INDIA.

It is exceedingly difficult to give anything approaching an accurate estimate of the total number of lepers in the Indian Empire to-day. The census figures of 1921 give the total as 102,513, as against 109,094 in 1911. But it is doubtful if this figure represents anything more than the more advanced cases and possibly a majority of this number are the begging and pauper lepers who are seen all over the country. Dr. E. Muir, the Leprosy Research Worker at the Calcutta School of Tropical Medicine says that "we think that it would not be amper estimate to put down the number of lepers in India somewhere between a half and one million."

**Treatment.**—In a recent article on this subject by the Secretary to the Mission to Lepers the position is summed up as follows:—

"Voluntary segregation is the right thing to

encourage for those who will segregate themselves and receive treatment. Compulsory segregation is the course to follow in the case of those who persist in mixing with the healthy population and thus spreading the disease, as is the case with pauper and begging lepers. The extension of the use of the latest treatments is most important. Special leper clinics should be established by Government in suitable centres and the treatment provided free. And, lastly, an educational campaign should be commenced as soon as possible, and information about the disease itself—how it is spread and how to diagnose it, also the benefits of segregation and the efficacy of the latest treatments—spread all over the country. The situation was never more hopeful, and a wisely directed campaign against the disease would be certain to end in the stamping out of the disease in the whole of India."

## BRITISH EMPIRE LEPROSY RELIEF ASSOCIATION. (Indian Council.)

Early in the year 1924, the British Empire Leprosy Relief Association was constituted in England, with H.R.H. The Prince of Wales as Patron, the Viscount Chelmsford as Chairman of the General Committee and H.E. the Viceroy of India as one of the Vice-Presidents. Following its formation and in view of the good results being obtained from the newest treatment of leprosy, H.E. the Viceroy felt

that the time was auspicious for the inauguration and carrying on of an earnest campaign with the object of ultimately stamping out leprosy from India.

His Excellency invited certain gentlemen representing various interests to form an Indian Council of the Association, which he formally inaugurated at a public meeting in Delhi on the 27th January 1925.

His Excellency is its President and the Hon'ble Sir Charles Innes, K.C.S.I., C.I.E., I.C.S., and the Hon'ble Sir Henry Moncreiff Smith, Kt., C.I.E., I.C.S., as Chairman, respectively, of the General and Executive Committees. Sardar Saheb Balwant Singh Puri is the Honorary Secretary of the Association.

A sum of about 19 lakhs of rupees has so far been collected for the work of the Association and the Executive Committee has framed for

the conduct of the campaign against leprosy proposals which provide for—

- (1) Research,
- (2) Training of doctors invited from the different provinces in the special treatment of leprosy, and
- (3) Propaganda,

and for the improvement of the conditions of leper asylums situated in the various provinces.

## CHILD WELFARE MOVEMENT.

Amongst the most pressing problems of India's health is that presented by the appalling infant mortality. It has been calculated that every year no fewer than 2 million Indian babies die, while many others survive only to grow weak and feeble from unhygienic surroundings during infancy. A noteworthy feature has been the further progress of the infant welfare movement, which owes much to the All-India Maternity and Child Welfare League initiated by Lady Chelmsford and also to the Indian Red Cross Society, which aims at gradually establishing a network of child welfare centres in most of the larger towns in India. The institution of an all India Baby Week, an undertaking to which Her Excellency the Countess of Reading has devoted great and successful enthusiasm has also given a stimulus to the work and promises to be an important perennial aid to its progress. In all the great centres of population, work is now being done for the training of midwives, for the instruction of mothers and for the care of babies. Training centres for Indian and Anglo-Indian women have been opened in order to spread the elements of infantile hygiene to other parts of India. Most hopeful sign of all, Indian ladies are beginning to interest themselves in this work in large numbers. But such is the magnitude of the field, that consistent and widespread effort on a scale hitherto impossible must be undertaken, if any appreciable reduction is to be made in the appalling mortality of young children. The admirable work done year by year by the National Association for supplying Female Medical Aid to the Women of India is recognised by the Government of India, which subsidises this organisation with a grant of Rs. 3,70,000 a year for the maintenance of the Women's Medical Service of India.

**Centres of Activity.**—The Child Welfare Directory gives the following list of places where the movement is already at work:

**Bombay.**—The centre of much active and enthusiastic welfare work; the Lady Willington Maternity Homes near the people's chawls being unique of their kind in India. The Bombay Infant Welfare Society founded by Lady Lloyd has already established 8 Infant Welfare Centres where prenatal, maternity and child welfare work is being carried on.

**Poona.**—The work carried out by the Seva Sadan Society of Poona deserves special mention in this connection. Child welfare centres have been established in several places throughout the Presidency and are in charge of Public

Health Nurses trained by the Seva Sadan Society. Certain of these Child Welfare centres are subsidised by the Bombay Branch of the Red Cross.

**Surat.**—The Henderson Ophthalmic Scheme for treating Ophthalmia Neonatorum and stemming "the enormous amount of preventable and curable blindness that is laying its shadow over the health, happiness and usefulness of this great portion of our Empire."

**Bijapur.**—Mr. Henderson, I.C.S., has now started the same beneficent work for blind babies as in Surat.

**Delhi.**—Work was started in 1914 by two lady health visitors brought out from England by the Government of India. Their salaries are now met by the Delhi Municipality, a substantial grant being paid towards them by Government; three infant welfare centres have been established and a comprehensive scheme for the training and supervision of indigenous *daies* is carried on. A training school for health visitors and midwife supervisors has been established in connection with this scheme and is financed by the Lady Chelmsford League. The Secretary of this school from whom all particulars may be obtained is Mrs. Young, M.B., 1 Ludlow Castle Road, Delhi.

**Madras.**—Under the Provincial branch of the Lady Chelmsford League and the Red Cross Society a number of Infant Welfare Centres have been opened in the City, also a school for training health visitors under Mrs. Chinappi, M.B., the Medical Superintendent of the Co-operative Midwives Scheme, by means of which trained midwives are provided for the City and much antenatal, maternity and infant welfare work is carried on. There are also local centres of both the Red Cross and the Lady Chelmsford League in the Madras mofussil.

**Punjab.**—The Punjab Branch of the Lady Chelmsford League was founded in 1921 and has established an Infant Welfare Centre and a school for training health visitors in Lahore under two health visitors brought from England. Its object is to establish child welfare centres with a trained health visitor in charge in each district.

**United Provinces.**—Infant Welfare centres exist in the following places:—Agra, Allahabad, Bareilly, Cawnpore, Dehra Dun, Gonda, Ghazipur, Lucknow. Other places are so taking up the work, and decrease in infant mortality is noted as a result of the work in many places.

*Bengal.*—Work is undertaken by the Corporation of Calcutta, and by the Indian Red Cross Society in that town. The latter body is now also financing a Health School for the training of workers. A centre at *Tilghur* financed by Thos. Duff & Co., Ltd., cares for the infants of the operatives in the Jute Mills. A flourishing centre exists at *Dacca* where excellent work is being done.

*Sind.*—Karachi has two trained Health Visitors as well as 8 nurses, and there is a large amount of maternity work. Hyderabad is noted specially for its work among indigenous midwives.

*Central Provinces.*—In Nagpur city the work is being carried on by the Municipality very successfully. The Red Cross has also opened a centre in Civil Lines.

*Rajputana.*—Ajmer is the only centre at present.

*N. W. F. P.*—Dera Ismail Khan has a flourishing work, much appreciated by the people. Peshawar centre has had to be closed for want of a suitable worker.

*Baluchistan.*—A centre was established in Quetta in 1922, and has done steady work.

*Central India.*—Indore has a centre financed by the Red Cross Society.

*Bangalore.*—Has an enthusiastic Committee with two Health Centres.

*Indian States.*—The following have undertaken definite Child Welfare work, while trained midwives are employed in a number of others. Kolhapur, Baroda, Jaipur.

So far all the schemes have devoted their attention to combating the prejudices of the mothers in respect of new-born children. In a land of so many languages and superstitions progress will necessarily be slow and India has yet to decide whether she will work intensively and try to rear a few well developed children as far as adolescence or extensively attempt to bring a large number of infants through the first critical months, only to have them perish at a later stage from the many ills that childhood is heir to in a land of great poverty, under-nourishment, epidemics and famine. In Western lands the Child Welfare Movement has no more marked characteristic than its inability to stop expanding. Its ramifications know no bounds. Its inevitable corollaries are endless, and like the banyan tree it will no doubt in India also develop innumerable fresh roots, medical supervision, dental clinics, better housing, open air playgrounds, etc., etc. But these are not yet. Its preliminary task is to educate the mothers of India to the enormity of allowing two million babies to perish every year and to convince them of the equally important fact that a high death rate always spells also a high demergerate of sickly, under-developed, incompetent citizens.

## INDIAN RED CROSS SOCIETY.

When the war first broke out, what is generally termed Red Cross work was undertaken in India and Mesopotamia by the St. John Ambulance Association and by a number of provincial organisations working on independent lines. From August 1916, the central work was taken over by the Indian Branch of the Joint War Committee of the Order of St. John of Jerusalem and the British Red Cross Society. The final report of that Committee shows that up to June 1920 its total receipts amounted to Rs. 1,77,55,16 of which some 17 lakhs had been contributed by the British Red Cross Society. It had spent about 67 lakhs in Mesopotamia, nine lakhs on the Afghan War and Waziristan Expedition; in Mesopotamia and India combined it had spent on Red Cross objects in about 117 lakhs.

It closed its career in June 1920 under the following circumstances. In the summer of 1919, an invitation had been received to join the International League of Red Cross Societies, having for its object the extension of Red Cross work in the sphere of purely civil activity. Though theretwas then no formally constituted Red Cross Society in India, the invitation was accepted, thus giving India a distinct position in a world wide League of humanitarian societies. A Bill to constitute an Indian Red Cross Society was introduced by Sir Claude Hill in the Imperial Legislative Council in March 1920, and duly passed into law as Act XV of 1920. This

Act handed over the balance of the Joint War Committee to the new Society, and authorised it not only to direct the utilization for war purposes of the capital funds at its disposal but also to devote the interest, as far as possible, for civil purposes. The Act allows the constitution of autonomous provincial societies affiliated to the main Society, and it is with these branches that the task lies of organising and stimulating the new civil activities of the Red Cross throughout India. In the end of 1924, nineteen such branches were in existence and the formation of five more was under contemplation.

The objects on which the funds of the Society may be spent are—

1. The care of the sick and wounded men of His Majesty's Forces, whether still on the active list or demobilised.
2. The care of those suffering from Tuberculosis, having regard in the first place to soldiers and sailors, whether they have contracted the disease on active service or not.
3. Child welfare.
4. Work parties to provide the necessary garments, etc., for hospitals and health institutions in need of them.
5. Assistance required in all branches of nursing, health and welfare work, ancillary to any organisations which have or may come into being in India and which are recognised by the Society.

## 6. Home Service Ambulance Work.

7. Provision of comforts and assistance to members of His Majesty's Forces, whether on the active list or demobilised.

The Society has five grades of subscribing Members, namely, Honorary Vice-Presidents, Patrons, Vice-Patrons, Members and Associate Members. Their respective subscriptions are Rs. 10,000, Rs. 5,000, Rs. 1,000, Rs. 12 annually or a consolidated payment of Rs. 150 and anything between Rs. 1 and Rs. 5 annually or consolidated payment of Rs. 50.

**Constitution.**—His Excellency the Viceroy is President of the Society. The Managing Body ordinarily consists of a Chairman to be nominated by the President and 25 members of the Society of whom 12 are the Vice-Presidents nominated by Provincial or State Branches; 8 elected by the Society at the Annual General Meeting from among the members of the Society and 5 nominated by the President.

The present Chairman of the Managing Body is the Hon'ble Sir Henry Moncrieff Smith, Kt., C.I.E., I.C.S., and the Organising Secretary Colonel Bhola Nauth, C.I.E., I.M.S. (Retd.).

**Finances.**—The operations of the Joint War Committee were brought to a close in June 1920 with a capital investment of the face value of Rs. 56,38,000 and Rs. 8,01,500-8-6 in floating and fixed deposit accounts. The Society has since invested further funds in various securities and its finances in the end of December, 1924, stood at a capital investment of the face value of Rs. 66,44,005-0-0 and a sum of Rs. 78,801-5-6 in fixed and floating accounts. The income derived from the capital of the society, (which is 3½ lakhs at present) after providing for certain liabilities of the Central Society, is distributable under the Act to the Provincial Branches in proportion to their contributions to the Central "Our Day" Fund. A sum of Rs. 2,60,230 was distributed to the Provincial Branches under this arrangement during the year 1924.

### ST. JOHN AMBULANCE ASSOCIATION, (Indian Council.)

The St. John Ambulance Association was founded in 1877, by the Order of the Hospital of St. John of Jerusalem in England, and has for its objects:—

(a) The instruction of persons in rendering First Aid in cases of accident or sudden illness and in the transport of the sick and injured;

(b) The instruction of persons in the elementary principles and practice of nursing, and also of hygiene and sanitation, especially of a sick room;

(c) The manufacture, and distribution by sale or presentation, of ambulance material, and the formation of ambulance depots in mines, factories, and other centres of industry and traffic;

(d) The Organisation of Ambulance Corps, Invalid Transport Corps, and Nursing Corps;

(e) And generally the promotion of instruction and carrying out of works for the relief of suffering of the sick and injured in peace and war independently of class, nationality, or denomination.

An Indian Council of the Association was constituted in 1910. It has since issued 1,06,327 certificates of proficiency in First Aid, Home Nursing, Home Hygiene and Sanitation and 4,917 tokens such as Vouchers, Medallions,

Labels and Pendants for special proficiency in those subjects. The object of the Association is not to rival, but to aid, the medical man, and the subject matter of instruction given at the classes qualifies the pupil to adopt such measures as may be advantageous pending the doctor's arrival, or during the intervals between his visits.

In 1924 the Indian Council spent Rs. 29,751-10-6 in furthering its objects and closed the year with Govt. securities of the face value of Rs. 85,075 and a cash balance of Rs. 1,476-12-6. The Association has five grades of members, namely, Patrons, Honorary Councillors, Life Members, Annual Members and Annual Associates. Their respective subscriptions are Rs. 1,000, Rs. 500, Rs. 100, Rs. 5, and Rs. 2.

Their Excellencies Lord and Lady Reading and Field-Marshal Sir William Birdwood as President, Lady President and Chairman, respectively, with 17 members formed the Indian Council in 1924. The general business of the Indian Council is conducted by an Executive Committee with the Hon'ble Sir Henry Moncrieff Smith, Kt., C.I.E., I.C.S., as Chairman, and Colonel Bhola Nauth, C.I.E., I.M.S. (Retd.), as General Secretary.

### LUNACY AND ASYLUMS IN INDIA.

The accommodation for mentally afflicted persons in British India is, like that for those afflicted bodily, very inadequate. In the Native States, the condition of affairs as regards the provision of institutions for the care and

treatment of the insane, is still worse as no Asylums exist there at all, so that those whose melody is such as to render their freedom a public menace, are for the most part confined in the local jails.

According to the Census Reports of 1911 out of a total population of 315,156,396 (India and Burma), there are 81,006 persons insane making a proportion of insane to sane of 5 per every 10,000.

In the United Kingdom the proportion of insane to sane is roughly 40 per 10,000, while

In New Zealand it is as much as 45 per 10,000. In reviewing these figures it must be borne in mind that those of the United Kingdom and New Zealand include the "feeble-minded," an item that is not included in the figures for British India.

INDIA.

Provinces, States and Agencies.	General population.			Insane population.		
	Male.	Female.	Total.	Male.	Female.	Total.
Provinces under British Administration.	124,872,691	119,393,851	244,267,542	42,064	25,094	68,158
States and Agencies ..	36,465,244	34,423,610	70,888,854	7,979	4,869	12,848
Total for all India ..	161,338,935	153,817,461	315,156,396	50,043	30,963	81,006

For the care of the 81,006 insanies of India and Burma, there exists accommodation in Asylums for roughly 8,000, hence only one person in ten out of the total insane population of the country, can be afforded accommodation in the institutions that exist especially for their care and treatment.

The following table gives the number of Lunatic Asylums in each province during 1922,

the total population of such institutions in each province and the number discharged, cured and died.

The number of asylums has not changed.

There has been a decrease in the admissions and re-admissions during the year largely accounted for by the decrease in the admissions of military insanies.

Province.	Number of Asylums.	Admitted and readmitted during year.	Total Asylum Population.			Discharged cured.	Died.	Daily average strength.	Daily average sick.	Criminal Lunatic.	
			Males.	Fe-males.	Total.

Figures for 1922 are not available.

The administration of Asylums is under the direct control of the Provincial administrative Medical Officers. In the case of the so-called "Central" Asylums, that is to say, the Asylums at Madras, North Yeravda (Bombay Presidency), Lahore (Punjab), Agra (United Provinces of Agra and Oudh), Berhampore (Bengal), and Rangoon (Burma) as well as the Asylum at Ranchi the charge of the institution is in the hands of a whole-time medical officer who is termed the "Superintendent". He is usually, but by no means always, a trained alienist. The remaining Asylums are in the charge of the Civil Surgeon of the locality in which they happen to be situated. Not one of the existing Asylums in British India can be said to be up-to-date as regards construction, organisation, staffing or equipment. In every instance, even including the new Asylum for Burma which is now under construction in Rangoon, the custodial aspect of the Institution has received the greatest amount of consideration with the result that only a very little attention has been paid to all that goes towards the remedial requirements of the institution. It will probably take some years yet to obtain in India proper recognition of the fact that an Asylum for persons suffering

from mental diseases should be a "hospital" in every sense of the term, hence its main raison d'être is to treat and to cure, and that every other consideration must be made secondary to this fundamental concept. Indeed, in almost every country in the world which makes any pretension to be regarded as civilised, the term "Asylum" has now been abolished for all institutions dedicated to the care and treatment of the insane. Owing to the lack of interest in Psychiatry and all that this term generally connotes in Europe and America, the nomenclature that is still followed in the classification of mental diseases renders all official returns that are supposed to deal with the types of insanity occurring in the various Asylums in India, comparatively worthless. Even were a less obsolete classification of the varieties of mental diseases introduced it would not be possible in the existing absence of properly trained alienists to render information that would be of any great statistical value from a psychiatric stand-point.

The following table shows the classification of the types of insanity recorded in the reports published by every Province in India in the year 1919:

*The principal types of insanity treated during the year 1922 in the Lunatic Asylums, in the Provinces of—*

	Bengal.	Assam.	Bihar & Orissa.	United Provinces.	Bombay.	Madras.	Punjab.	Central Provinces.	Burma.	Total.
Idiocy .. ..	56	4	4	62	54	84	84	18	23	..
Mania .. ..	381	254	169	563	753	412	438	268	439	..
Melancholia .. ..	295	203	32	163	357	155	175	94	320	..
Mental Stupor .. ..	7	..	17	41	30	43	2	..	29	..
Delusional Insanity .. ..	75	9	21	50	148	82	40	13	73	..
Insanity caused by <i>Oanthis indica</i> or its preparations .. ..	173	71	4	225	131	106	139	2	4	..
Dementia .. ..	82	1	175	189	265	254	85	26	107	..

It will be seen from the foregoing that the largest number of cases in the Asylums are shown as "Mania" and "Melancholia." These terms "Mania" and "Melancholia" are now-a-days regarded as obsolete. For purposes of comparison of the terms that are nowadays employed to distinguish psychopathic states with those that are still permitted to hold good in India the following extract has been made from a recent report published by the Union of South Africa:—

Infection Psychoses.  
Exhaustion Psychoses.

Intoxication Psychoses.  
Thyrogenous Psychoses.  
Dementia Præcox.  
Dementia Paralytica.  
Organic Dementias.  
Involution Psychoses.  
Manic-depressive Psychosis.  
Paranoia.  
Epileptic Psychoses.  
Psychogenic Neurosis.  
Constitutional Psychopathic State.  
Psychopathic Personalities.  
Defective Mental Development.

As regards the incidence of insanity among the various races of India as well as the incidence of insanity in relation to occupation no really reliable information is obtainable in view of the comparative paucity of cases in proportion to the general population that come under observation. On the other the incidence by age is shown fairly well in the Census Report of 1911 to be as follows:

## INDIA.

AGE.	Insane.		Distribution of the insane by age per 10,000 of each sex.	
	Male.	Female.	Male.	Female.
<b>YEARS</b>				
0-5 .. .. .	508	427	102	139
5-10 .. .. .	2,715	1,750	547	568
10-15 .. .. .	4,131	2,896	833	876
15-20 .. .. .	4,663	3,165	940	1,028
20-25 .. .. .	5,543	3,392	1,118	1,095
25-30 .. .. .	6,298	3,120	1,270	1,013

55-60 .. .. .	1,187	915	239	297
60-65 .. .. .	1,478	1,325	567	795
65-70 .. .. .	486	371		
70 and over age unspecified .. ..	853	751		
	446	174		
<b>Total for all India .. ..</b>	<b>50,043</b>	<b>30,963</b>	<b>....</b>	<b>....</b>

A further result of the general apathy, both official and non-official towards matters pertaining to psychiatry, the subject of "feeble mindedness" has not yet come to be recognised as one that has any practical bearing on the welfare of the state as a whole with the result that there is no official institution for the care and education of feeble-minded children.

As regards the relation of insanity to crime, and more especially as regards the confinement of criminal insanes in jails, the report of the re-

cent Commission of Enquiry into the subject of Indian Jails (published in 1920) contains some valuable suggestions. As things are the ideas both as regards the theory and the practice of dealing with insanity and crime in India, embodied in the existing legislation can only be described as archaic.

(See also "Insanity in India" by Colonel G. F. W. Ewens, I.M.S., and "Lunacy in India" by Major A. W. Overbeck-Wright, M.D., D.P.M., I.M.S.)

## The Women's Medical Service for India.

This Service is included in the National Association for supplying medical aid by women to the women of India, generally known as the Countess of Dufferin's Fund and is administered by the Executive Committee and Council of that Fund. The Government of India has so far allotted the sum of £25,000 per annum towards its maintenance. The present sanctioned cadre is forty-four first class medical women, with a training reserve of 8 women graduates in medicine of Indian Universities. Recruitment of the service is made (a) in India by a medical sub-committee of the Council which includes the Director-General, Indian Medical Service, the Honorary Secretary to the Council and the Chief Medical Officer, Women's Medical Service; (b) in England, by a sub-committee, including a medical man and two medical women conversant with conditions in India. These sub-committees perform the duties of a medical board examining candidates for physical fitness, and for return to duty after invaliding.

The Council determines what proportions of the members of the Service is to be recruited in England and in India respectively. In the original constitution of the Service, duly qualified medical women who are in the service of, or who have rendered approved service to, the Countess of Dufferin's Fund, are to have the first claim to appointment, and thereafter special consideration is to be paid to the claims of candidates who have qualified in local institutions and of those who are natives of India.

**Qualifications.**—The qualifications are that the candidate must be (a) a British subject resident in the United Kingdom or in a British Colony or in British India, or a person resident in any territory of any Native Prince or Chief under the suzerainty of His Majesty exercised through the Governor-General of India or through any Governor or other officer subordinate to the Governor-General of India. (b) Must be between the ages of twenty-four and thirty at entry. (c) She must be a first-class medical woman, i.e., she must possess a medical qualification registrable in the United Kingdom under the Medical Act, or an Indian or Colonial qualification registrable in the United Kingdom under that Act: but this condition does not apply at the original constitution of the Service to medical women in charge of hospitals who, in the opinion of the Council, are of proved experience and ability. (d) The candidate must produce a certificate of health and character. But the Council reserves the power to promote to the service ladies not possessing the above qualifications, but who have shown marked capacity. Members of the Service are required to engage for duty anywhere in India. After one year of probation has been satisfactorily passed their appointments are confirmed. The services of officers may be lent to Local or Municipal bodies, or to special institutions, which may be responsible for whole or part of the pay.

**Pay.**—The rates of pay are as follows:—

1st to 4th	3rd year	Rs.	450 per month.
4th to 6th	"	"	500 "
7th to 9th	"	"	550 "
10th to 12th	"	"	600 "
13th to 15th	"	"	650 "
16th to 18th	"	"	700 "
19th to 21st	"	"	750 "
22nd to 24th	"	"	800 "
25th and after	"	"	850 "

also an overseas allowance of Rs. 100 per month to those below 12 years' service and Rs. 150 per month to those of 12 years' service and over. But no member can be confirmed in the 500-rupee grade unless she has passed an examination in such vernacular as the Provincial Committee shall prescribe. In addition furnished quarters are provided free of rent; or a house rent allowance to be determined by the Provincial Committee may be granted in lieu of it.

**Officers of the Service** are permitted to engage in private practice provided it does not interfere with their official duties, and the Provincial Committee has the power to determine whether such duties are thus interfered with. Except in very special cases retirement is compulsory at the age of fifty-five. An officer whose appointment is not confirmed, or who is dismissed, is granted an allowance sufficient to pay her passage to England.

**Leave Rules.**—(a) Casual Leave, which is occasional leave on full pay for a few days, and is not supposed to interrupt duty. (b) Leave on average pay is granted up to 2-11 of an officer's period on duty, according to Fundamental Rules. More than eight months' leave on average pay is not granted at one time. (c) Study leave may also be granted up to twelve months during the whole service. An allowance of 12 sh. per day is granted in addition to  $\frac{1}{2}$  average pay during study leave. (d) Sick leave, up to a maximum of two years. (e) Extraordinary leave at any time at the discretion of the Executive Committee. When on sick leave the allowances are half the average monthly pay of the six months presence on duty immediately preceding the taking of the leave. There are no allowances during extraordinary leave. A doctor appointed in England receives a sum of £100 to cover her passage and incidental expenses. There are also allowances to cover the cost of journeys by rail and road.

There is also a Provident Fund, each member contributing monthly thereto ten per cent. of her salary, the Association contributing an equal amount, and each subscriber's account being granted interest on the amount standing to credit at the rate of 4 per cent. per annum, "or at such rate as the Council can invest without risk to the funds of the Association."

The officer loses her contributions if she resigns (except on account of ill-health) before completing five years' service, or in the event of dismissal. On retirement after approved service the sum which has accumulated to the credit of the subscriber is handed over to her.

**Lady Hardinge Medical College and Hospital.**—The Lady Hardinge Medical College was opened by Lord Hardinge on the 17th February 1916. It is a residential Medical College staffed entirely by women, and was founded to commemorate the visit to Delhi, in 1911, of the Queen Empress. Lady Hardinge took the initiative in raising funds by public subscription to meet the cost of buildings and equipment. Thirty lakhs of rupees, in all, have been given for these purposes, mostly by the Ruling Princes and Chiefs of India. After Lady Hardinge's death in 1914, it was suggested by Her Imperial Majesty Queen Mary that the institution should serve as a memorial to its founder, and be called by her name.

The Governing Body includes the Director-General, Indian Medical Service, the Chief Commissioner of Delhi, the Chief Engineer, Delhi Province, the Educational Commissioner with the Government of India, the Chief Medical Officer, Women's Medical Service, a representative elected by the All-India Association of Medical Women and the Surgeon to H. E. the Viceroy. The Honorary Secretary, who is also a member of the Governing Body, is the Deputy Secretary in the Department of Education, Health and Lands. The Deputy Accountant-General, Central Revenue, acts as Honorary Treasurer.

The College and Hospital, together with separate hostels for 100 Medical students and 70 nurses and residences for the medical and teaching staff, occupy a site of 55 acres in New Delhi (Raisina) within easy reach of the old city. The grounds are enclosed and adequate provision is made for the seclusion of both students and patients from outside observation. Strict observance of purdah cannot, however, be guaranteed in the case of students. As the hospital patients are all women or children, it is, for example, necessary that students should, in their final year, attend a brief course of instruction on men patients at the Civil Hospital, Delhi. The College buildings contain a Library, Museum, Lecture Rooms, Laboratories and offices. Hostels are provided for Hindu, Moslem, Sikh

and Christian students. The hospital is a fine modern building with accommodation for 200 in-patients and a commodious out-patients' department. The College and Hospital are supported by a grant of Rs. 3,11,000 from the Government of India, supplemented by grants from Provincial Governments and Indian States. Students are prepared for the Intermediate Science Examination, and the M.B., B.S. degree of the Punjab University, with which the College is affiliated.

#### SENIOR STAFF.

*Principal and Professor of Midwifery and Gynecology*—Miss G. J. Campbell, M.D., Ch. B. (Glas.), Women's Medical Service.

*Vice-Principal and Professor of Surgery*—Miss E. Piel, M.B., B.S. (Lond.), W.M.S.

*Professor of Medicine*—Miss R. Scutt, M.B., B.S. (Lond.), D.T.M. & H. (Eng.), W.M.S.

*Professor of Ophthalmology*—Miss R. Roulston, M.B., Ch. B. (Glas.), D.O. (Oxon.), W.M.S.

*Professor of Pathology*—Mrs. F. B. Livingstone, M.B., Ch. B., D. P.H. (St. Andrews), W.M.S.

*Professor of Anatomy*—Miss J. Maclean, M.B., Ch. B. (Edin.), W.M.S.

*Professor of Physiology*—Miss M. S. Macdonald, M.B., Ch. B. (Liverpool), W.M.S.

*Lecturer in Physics and Mathematics, and Superintendent of the Science Department*—Miss J. H. Ross, M.A., B. Sc. (Glas.)

*Lecturer in Chemistry*—Miss Soshella Ram, M.A. (Cantab.)

*Lecturer in Biology*—Miss C. C. Burt, B. Sc. (Edin.)

*Lecturer in English*—Mrs. Sharp, Hon. Mod. Litt. Hum. (Oxon.)

*Bursar and Warden*—Miss M. W. Jesson, M.A. (Cantab.)

Attached to the Hospital there are: (1) a Training School for Nurses, and (2) a Training School for Dispensers. All particulars as to admission and training may be obtained in the case of (1) from the Nursing-Superintendent, Lady Hardinge Medical College Hospital, Delhi, and in the case of (2) from the Lecturer on Pharmacy, at the same address.

#### THE COUNTESS OF

#### DUFFERIN'S FUND.

The National Association for Supplying Medical Aid by Women to the women of India was founded by the Countess of Dufferin in 1886, the object being to open women's hospitals and women's wards in existing hospitals; to train women doctors, nurses and midwives in India; and to bring these out when necessary from Europe. An endowment fund of about 6 lakhs was obtained by public subscription. In addition Branches were formed in each Province, each Branch having its own funds and each having a number of Local Committees and Zenana Hospitals affiliated to it.

The Central Fund gives grants-in-aid to several Provincial Branches; it gives Scholarships to a number of women students at the Medical schools of Bombay, Calcutta, Madras and Delhi; it gives post-graduate scholarships for study in the United Kingdom. It has in the past brought from England a certain number of European medical women. It has assisted by grants-in-aid the building of a number of zenana hospitals in different parts of India. It has affiliated to it 13 Provincial Branches and a number of Local Committees,

The Government of India subsidize the Countess of Dufferin's Fund to the extent of Rs. 3,70,000 per annum to maintain a Women's Medical Service for India—this service consists of 44 officers, with a training reserve of 8 doctors and a Junior service of 12 assistant surgeons. Medical women either British or Indian holding registrable British qualifications are eligible for the senior service.

The President is H.E. the Countess of Reading, O.I., G.B.E., The Hon. Secretary is Lt.-Colonel Norman Walker, I.M.S., and the Secretary, Dr. A. C. Scott, O.M.O., W.M.S.

The Victoria Memorial Scholarships Fund was organised by Lady Curzon in 1903, in order to secure a certain amount of improvement in the practising dais of India. A sum of about 6½ lakhs was obtained by public subscription, and centres were organised in each Province to carry out the objects of the Fund. Over 2,000 midwives have been trained in addition to large numbers who have been partially trained. Of late years the Fund has done much to pave the way for the registration and supervision of indigenous dais. It has also done much propaganda work.

## LADY READING WOMEN OF INDIA FUND.

The Lady Reading Women of India Fund was collected by H. E. the Countess of Reading with the object of assisting the most necessitous of the existing funds and establishing an Indian Nursing Association. The Fund has been used to send suitable Indian nurses to England for post-graduate training with the intention that they should return and take up administrative nursing posts in India. It is supplying training for Indian Ladies as Nurses at various centres. It has also been used to build, equip and endow a first class hospital of 60 beds for Indian women and children in Simla (the Lady Reading Hospital), and to build a nursing hostel in Delhi for Indian nurses.

**Amalgamation of Administration.**—At a

general meeting held in Simla in July 1923 it was decided that the administration of the Funds for the physical welfare of Indian women under the Presidency of the Viceroy's wife should be administered by a single committee and with identical rules. These funds are the Countess of Dufferin's Fund, Women's Medical Service for India, Victoria Memorial Scholarship Fund, Lady Chelmsford All-India Maternity League and Lady Reading Women of India Fund. The President of the Amalgamated Committee is H. E. the Countess of Reading and the Hon. and Joint Secretaries are respectively Lt.-Col. Norman Walker, I.M.S., Surgeon to the Viceroy and Dr. A. C. Scott, W.M.S. The Hon. Treasurer is Sir Frederic Gauntlett.

## NURSING.

Whilst India cannot show the complete chain of efficiently-nursed hospitals which exists in England, there has been a great development of skilled nursing of recent years. This activity is principally centred in the Bengal, Madras, and Bombay Presidencies, where the chief hospitals in the Presidency towns are well nursed, and where large private staffs are maintained, available to the general public on payment of a prescribed scale of fees. These hospitals also act as training institutions, and turn out a yearly supply of fully trained nurses, both to meet their own demands and those of outside institutions and private agencies. In this way the supply of trained nurses, English, Anglo-Indian and Indian, is being steadily increased. In Bombay the organisation has gone a step farther, through the establishment of the Bombay Presidency Nursing Association, c/o St. George's Hospital, Bombay. This is composed of representatives of the various Nursing Associations in charge of individual hospitals, and works under the Government. The principle on which the relations of this Association with the Local Associations is governed is that there shall be central examination and control combined with complete individual autonomy in administration.

**State Registration of Nurses** for all India is much required. A meeting was held in Bombay in 1923 when Nurses from the Presidency met to discuss the question. It is desired that India should have its own State Register as in the United Kingdom, South Africa, New Zealand, Australia, Canada and Burma, and that the curricula and examinations should be brought into line with these countries. Government has proposed to establish a Provincial Register preparatory to an All-India Register.

**Nursing Bodies.**—The Secretary of the Calcutta Hospital Nurses' Institution is Mr. A. R.

Nicholson, Allahabad Bank Building, Calcutta. The names and addresses of the other Nursing bodies in Calcutta are Lady Minto's Indian Nursing Association (Bengal Branch), 4, Hungerford Street, Lady Rogers' Hostel for Indian Nurses, 144, Russa Road. South; Nurses' Academy, 6, Suburban Hospital Road; and Nurses' Bureau, 37, McLeod Street. In Madras there is the General Hospital, with a staff of 62 nurses, the Government Maternity Hospital, the Caste and Gosha Hospital at Kilpauk, the Royapetta Hospital and the Ophthalmic Hospital, also the Lady Amphilhill Nurses' Institute and the South Indian Nursing Association (now amalgamated). President, Her Excellency Lady Goschen. The Association has under its management—*The Lady Amphilhill Nurses' Institute*, Western Castlet, Mount Road, Madras. Fully trained and experienced nurses for all cases of illness both among Europeans and Indians, always available. *The Lady Willington Nursing Home*, Western Castlet, Mount Road, Madras, and *Nilgiri Nursing and Convalescent Home*, Ootacamund, for Medical, Surgical and Maternity cases. The Nilgiri Nursing Home affords admirable facilities for convalescents.

**Bombay Presidency.**—The Bombay Presidency was amongst the first in India to realise the value of nursing in connection with hospital work. The first steps were taken on the initiative of Mr. L. R. W. Forrest at St. George's Hospital, Bombay, where a regular nursing cadre for the hospital was established together with a small staff of nurses for private cases. This was followed by a similar movement at the J. J. and Allied Hospitals and afterwards spread to other hospitals in the Presidency. Ultimately, the Government laid down a definite principle with regard to the financial aid which they would give to such institutions, agreeing to contribute a sum equal to that

raised from private sources. Afterwards, as the work grew, it was decided by Government that each nursing association attached to a hospital should have a definite constitution and consequently these bodies have all been registered as Associations under Act 21 of 1880. By degrees substantial endowments have been built up, although the Associations are still largely dependent upon annual subscriptions towards the maintenance of their work. The Associations are as follows :—

**St. George's Hospital Nursing Association.**  
Hon. Secretary: F. B. Thornely, Esq.,  
Bombay.

**Jamsetji Jijibhoy Hospital Nursing Association,** Bombay. Hon. Secretary: Dr. M. V. Mehta, F.R.C.P.

**Goculdas Tejpal Hospital Nursing Association.** Secretary: J. P. Brander, Esq.,  
I.O.S., Old Custom House, Bombay.

**Cama Hospital Nursing Association,** Bombay. Hon. Secretary: H. C. B. Mitchell, Esq.,

**Sassoon Hospital Nursing Association,** Poona. Hon. Secretary: A. C. Wild, Esq.,  
I.O.S.

**Karachi Civil Hospital Nursing Association,** Karachi. Hon. Secretary: Gidumal Jatechand.

**Nasik Civil Hospital Nursing Association.**  
Hon. Secretary: Civil Surgeon, Nasik.

**Ahmedabad and Lely Memorial Nursing Association,** Ahmedabad. Hon. Secretary: Civil Surgeon, Ahmedabad.

**Bijapur Civil Hospital Nursing Association.**  
Hon. Secretary: Civil Surgeon, Bijapur.

**Dharwar Civil Hospital Nursing Association.** Hon. Secretary: Civil Surgeon, Dharwar.

**Prince of Wales Nursing Association,** Aden.  
Hon. Secretary: E. Somerville Murray, Esq., Aden.

**Kanara Nursing Association,** Karwar. Hon. Secretary: D. S. Dhawe, Esq., Karwar.

**Victory Nursing Association,** Sholapur.  
Hon. Secretary: Civil Surgeon, Sholapur.

**Byramjee Jeejibhoy Hospital Nursing Association,** Matheran. Hon. Secretary: Lt.-Col. B. B. Paymaster, I.M.S.

**Ahmednagar Civil Hospital Nursing Association,** Ahmednagar. Hon. Secretary: Civil Surgeon.

After further experience it was felt that it is undesirable to have a considerable number of detached and independent nursing associations, training and certifying nurses, without any common standard of entrance examination, or certification. It was therefore decided to establish the Bombay Presidency Nursing Association which came into existence in the year 1910.

The principle on which the Bombay Presidency Nursing Association works is a central system of examination, certification, registration and

control. It is now the only nursing, examining, registering and certifying body in the Bombay Presidency. At the same time, the local associations retain entire charge of their local funds excepting Provident funds which have been transferred to the Central fund, and also entire control of the nurses when they are in their employment. Proposals are now before Government for absorbing the personnel of the local associations into a Presidency Nursing Association. This will not however affect the individuality of local associations which will continue to control their own funds and to exercise control over local establishments, subject in the latter case to such limitations as a revision of the nature in question will require.

The Association commenced its operations on the 1st April 1911. The institutions recognized under the by-laws for the training of nurses at present are—St. George's Hospital, J.J. Hospital, Cama and Albless Hospital, Bai Motilal Hospital, Bombay; Huttesing and Premabai Civil Hospital, Ahmedabad; Civil Hospital, Belgaum; Morarbhai Vrijbhukhandas Hospital; Surat; Karachi Civil Hospital, Karachi; Sassoon Hospital, Poona; State General Hospital, Baroda; King Edward Memorial Hospital, Sholapur; and the following for the training of Midwives: M. V. Hospital, Civil Hospital, Surat; Victoria Jubilee and King Edward VII Hospital, Ahmedabad; Bai Motilebal Hospital, J. J. Hospital, Cama and Albless Hospital, Bombay; Dufferin Hospital, Karachi; Sassoon Hospital, St. Margaret's Hospital, King Edward Memorial Hospital, Poona; Civil Hospital, Belgaum; Dufferin Hospital, Sholapur; Vadia Maternity Homes, Supari Bag, Parel, Bombay; Civil Hospital, Ahmedabad.

Provision for retiring allowances is made for all members on the basis of a Provident Fund, and a Nursing Reserve has been established for employment in emergencies such as war, pestilence or public danger or calamity.

Address—The Secretary, Bombay Presidency Nursing Association, Secretariat, Bombay.

**Lady Minto's Indian Nursing Association.**—In 1906 this Association was inaugurated, replacing the Punjab and Up-country Nursing Association for Europeans in India, which Society, established in 1892, had accomplished much useful work in this country. Owing, however, to lack of funds it was found impossible to continue its administration and to carry out the expansion of the work so urgently called for. The name of the helpers identified with the premier Association to whom the public must ever be indebted are the Hon. Lady Lyttleton, Lady Helen Munro Ferguson and Mrs. Cottrell, while Mrs. Sheppard, by her indefatigable efforts, is truly entitled to be regarded as the pioneer of a trained nursing system throughout the greater part of India. The late Lady Curzon worked energetically to provide an enlarged Nursing organisation, but mainly owing to financial reasons, she was unable before she left India to bring the scheme to fruition. The Home Committee of the existing Association, recognising the need for expansion, consented to take over the present Association and approached Lady Minto before she left England in 1906 for co-

operation towards this project, and after much consideration and discussion with the Government of India, Lieut.-Governors and Commissioners of Provinces, the present Association was established. An appeal by Lady Minto, addressed to the public both in England and India, was responded to most generously, and sufficient funds were collected to form an endowment fund, which has in spite of fluctuations increased a little with time. The assistance of a Government grant is much valued, as it enables Homes for the Sisters to be kept up in six Provinces in India and in Burma. At the request of the Home Committee the enlarged Association was renamed the "Lady Minto's Indian Nursing Association."

The duties of the Home Committee are, as before, largely concerned in dispatching—as required—suitably trained and carefully selected Nurses for service on the staff of the Association in India. Thus, Europeans who are members of this Association are enabled to obtain skilled nursing at moderate charges on a sliding scale of fees determined by the income of each patient. The boon of obtaining good nursing at moderate terms is much appreciated, the rates of subscriptions being really an insurance against illness.

Her Majesty the Queen is a Patron of the Association. Her Excellency the Countess of Reading is President of the Central Committee in India.

Hon. Secretary: Lt.-Colonel T. N. Walker, I.M.S.

Hon. Treasurer W. J. Litster, Esq., O.B.E., C.I.E.

Chief Lady Superintendent: Miss F. A. Hodgson. Address—Central Committee, L.M.I. N.A., Viceregal Lodge, Simla, or Delhi.

Hon. Secretary, Home Committee: Lt.-Col. Sir Warren R. Crooke-Lawless, C.B., C.I.E., O.B.E., LL.D., House Governor, Osborne, Isle of Wight.

Secretary, Home Committee: Miss M. E. Ray, R.R.C., 54, Ashburnham Mansions, Chelsea.

**Nurses' Organizations.**—The Association of Nursing Superintendents of India is now amalgamated with the Trained Nurses' Association of India, and has the one set of officers. The Trained Nurses' Association of India and the Association of Nursing Superintendents of India are not Associations to employ or to supply nurses, but are organizations with a membership wholly of nurses with the avowed objects of improving and unifying nursing education, promoting *esprit de corps* among nurses, and upholding the dignity and honour of the nursing profession. The Associations have a membership of 438, including nurses trained in ten or more different countries: Europeans, Americans, New Zealanders, Australians and Indians. The Association of Superintendents was started in 1905 as the Association of Nursing Superintendents of the United Provinces and the Punjab, but by the next year its membership had spread over the country to such an extent that the name was changed to include the whole of India. The Trained Nurses' Association was started in 1908, and a monthly Journal of Nursing began to be published by the two Associations in February, 1910. The Associations are affiliated with the international Council of Nurses.

President: Mrs. G. D. Franklin, 33, Rajpur Road, Delhi.

Hon. Secretary and Treasurer: Miss C. F. Slater, Convent of St. Mary, Panch Howda, Poona City.

## THE WOMAN SUFFRAGE MOVEMENT.

Within the abnormally short period of eight years the Woman Suffrage movement has risen in India, swept through the country sympathetically and achieved the political enfranchisement of women in six of its most progressive Provinces and in four Indian States.

Three fundamental causes have led to this remarkable success: first, the deep veneration that is given by the Hindu and Muhammadan religions to the feminine aspect of life equally with the masculine as shown by the importance of goddesses, by the necessity for the presence of the wife at all ceremonies performed by a Brahman, by the idea of the sacred mystery of womanhood implied by the purdah, and by the general veneration of motherhood. Secondly, the time was psychological, for a new era was beginning for the Indian people by the introduction of a Scheme of Reforms in Indian government which was planned to give a basis of representative government on a much extended scale. The door was being opened to complete Self-government but only men were being invited to enter through it, although women compose half the people of the country

and it had been by the joint efforts of men and women that the agitation for reform in the government had been made. The men and women of India were too awakened and too just to allow this injustice to remain unredressed. Thirdly, the long and strenuous agitation for the vote by women in Britain and America and their recent victories had brought vividly to the consciousness of all educated Indian men and women the whole question of the inclusion of women in public life, and it was also a national and international necessity that Indian women should be given as high a status as women in other parts of the Empire.

Though the Municipal franchise had been granted to the women of the Bombay and Madras Presidencies over fifteen years ago it was so limited in numbers that it did not make a large impact on women's consciousness and indeed no protest was made when it was suddenly withdrawn from Madras women some years later. Over 1,700 women are qualified to vote for the Bombay Corporation and a fair percentage of these have polled at each election, and similarly in other Municipalities in that Presidency women have exercised their

vote responsibly and intelligently. Since 1922 twenty-two women have become Municipal Councillors and members of Local Government Boards, four of whom were elected by Bombay City voters, the others having been nominated.

It was owing to the rise of the political agitation for Home Rule between 1914 and 1917 that women began to wake up to their position of exclusion by British law from any share in representative government. The internment of one of their own sex, Mrs. Besant, stimulated political activity and political self-consciousness amongst women to a very great extent. The moment for the ripe public expression of their feelings came when the Secretary of State for India came to India to investigate and study Indian affairs at first hand in 1917.

During the Hon. E. S. Montagu's visit only one Women's Deputation waited on him but it was representative of womanhood in all parts of India, and it brought to his notice the various reforms which women were specially desirous of recommending the Government to carry out.

The first claim for women suffrage for Indian women was made in the Address presented to Mr. Montagu at this historic All-India Women's Deputation which waited upon him in Madras on the 18th December 1917. The section referring to enfranchisement merits full quotation:

"Our interests, as one half of the people, are directly affected by the demand in the united (Hindu-Muslim Reform) scheme (I. 3) that 'the Members of the Councils should be elected directly by the people on as broad a franchise as possible,' and in the Memorandum (3) that 'the franchise should be broadened and extended directly to the people.' We pray that, when such a franchise is being drawn up, women may be recognized as 'people,' and that it may be worded in such terms as will not disqualify our sex, but allow our women the same opportunities of representation as our men. In agreeing with the demand of the abovementioned Memorandum that 'a full measure of Local Self-Government should be immediately granted,' we request that it shall include the representation of our women, a policy that has been admittedly successful for the past twenty years in Local Self-Government elsewhere in the British Empire. The precedent for including women in modern Indian political life has been a marked feature of the Indian National Congress, in which since its inception women have voted and been delegates and speakers, and which this year finds its climax in the election of a woman as its President. Thus the voice of India approves of its women being considered responsible and acknowledged citizens; and we urgently claim that, in the drawing up of all provisions regarding representation, our sex shall not be made a disqualification for the exercise of the franchise or for service in public life."

The year 1919 was devoted to converting the Government forces to the justice and expediency of Indian Woman Suffrage, but this proved a more difficult matter. It was a disappointment first that though the Secretary of State had given a sympathetic reply to the All-India Women's Deputation, yet when the Scheme of Reforms, drawn up by him and Lord Chelmsford as the outcome of his visit to India,

was published no mention of women was made, though the widening of the electorate was one of the reforms suggested. When the Southborough Franchise Committee was formed to investigate the suggestions regarding the franchise in this Scheme, the women suffragists took every means to bring to the notice of the Committee all the evidence which showed the need for, and the country's support of the inclusion of women in the new franchise.

After the introduction of the Government of India Bill into Parliament in July 1919, a number of Indian deputations proceeded to London to give evidence before the Joint Select Committee of Members of both Houses of Parliament which had been appointed to place the Reforms on a workable basis. Mrs. Annie Besant, Mrs. Sarojini Naidu and Mrs. and Miss Herabai Tata were the women who were heard by the Committee in support of the extension of the franchise to women in India.

The House of Commons decided that the question was one for Indians to answer for themselves and while retaining the sex disqualification in the Reform Bill they framed the Electoral Rules in such terms that if any Provincial Legislative Council should decide by a Resolution in favour of women's franchise, women should be put on the electoral register of that Province. This was the only provision regarding franchise matters which might be changed before a 10 years' time limit. Until after that period women are ineligible for election as Legislative Councillors.

Travancore, a very progressive Indian State, was the first to grant the Legislative vote to women at the close of 1920, and it was promptly followed by the Indian State of Jhalawar. In the first session of the Legislative Councils in 1921 it is gratifying to record that a motion was tabled by Dewan Bahadur Krishnan Nair of Malabar that he would bring forward a Resolution in the Madras Legislative Council to remove the disqualification of sex existing in regard to the Legislative Council franchise. During the month that must legally intervene between the tabling of a Woman Suffrage motion and its introduction for Debate the Madras women under the leadership of the Women's Indian Association carried on all forms of public propaganda and canvassed the important members of the Council. The Debate took place on April 1st and after a short discussion, in which it was evident that opposition came only from the Muhammadan members, the debate itself became only an accumulation of appreciation of womanhood and an expression of faith in its future. When the division was taken, it resulted in the Resolution being carried by a majority of 34. Madras has thus the honour of being the first Province in British India to enfranchise its women, and it has done so ungrudgingly and unhesitatingly and in the broad spirit of the equality of the sexes, as it grants the vote to women on the same terms as it has been granted to men.

Mr. Trivedi brought forward a Woman Suffrage Resolution in the Bombay Legislative Council during the same session, but some irregularity in its wording caused it to be pronounced out of order. In June that subject was

tabled again and championed by Rao Sahab Harilal Desai of Ahmedabad, Deputy President of the Council. As in Madras the intervening month was filled with suffrage activity by the women of the Presidency and was remarkable for a large joint meeting of Bombay city women at which 19 Women's Societies took part, and for a suffrage meeting of Marathi and Gujarati women in Poona when over 800 women showed the greatest enthusiasm for the movement.

The Bombay Council Debate on Woman Suffrage took three days and the subject was very fully discussed by over 40 members. The result was satisfactory to the suffragists, the voting being 52 in favour, 25 against and 12 neutral. Thus Madras and Bombay Presidencies gave the lead to the other Provinces. In September, 1922, Mr. S. M. Bose, in the Bengal Council, moved a Woman Suffrage Resolution, which was debated for three days but finally defeated by 56 to 37 votes, a bloc of 40 Muhammadan members voting solidly against it. This year (September 1925) the Bengal Council passed the Suffrage Resolution by a vote of 54 to 38.

Mr. Devaki Prasad Sinha's similar Resolution in the Behar and Orissa Legislative Council was defeated by only a 10 votes' majority.

These Debates proved so educational to their respective Provinces that Behar Province has since granted qualified women the Municipal vote, and women have also been included as voters in the new Calcutta Corporation Act.

In February, 1923, a world suffrage record was made by the unanimous vote of the United Provinces Legislative Council in favour of Woman Suffrage.

The new Reform Bill for Burma has included the grant of woman suffrage to the qualified Burmese women, and further made provision for their election as Councillors if the Council passes a Resolution desiring their admission and if that Resolution is approved of by the Governor.

In April, 1922, the Mysore Legislative Council unanimously passed the Woman Suffrage Resolution. The vote for the Representative Assembly of Mysore was granted to women in October, 1922. The vote for Mysore Legislative Franchise was granted to the Mysore women by H. H. The Maharaja and His Privy Council in June 1923. In October, 1924, Assam Provincial Council granted Woman Suffrage for its Province by 26 to 8. It also has been the first Province to pass a Resolution in favour of allowing women to enter the Council as members.

There is little doubt that it will be only a few years at most before all the provinces of India will have granted woman suffrage, and the right to vote will advance the interests of women immensely along the lines of education, health, housing, morality and social customs.

The Indian Native States of Travancore, Cochin and Rajkot are the only places in India where the sex disqualification has been completely removed from the statute book. These have allowed women the right to stand for election for the Legislative Council as well as the right to vote for it, and two women have been elected to the newly formed Representative Council of Rajkot. The year 1925 has been noteworthy for the appointment of the first

woman Minister to Government. Mrs. Poonew Lukhose became a member of the Travancore Legislative Council on taking the position of State Darbar Physician. She is Minister for Health to the State. Cochin State has nominated Mrs. Madhavi Amma as a member of its first Legislative Council.

In British India by the terms of the Reform Bill the Councils have no power to alter the disqualification of sex which remains against the rights to stand as candidates for election to the Councils. This can only be changed by the vote of the British Parliament, and the gaining of this right remains as a further objective of the women suffragists. Many large, influential meetings have been held claiming the right of women to entry of the Legislatures. A deputation of women about this subject waited on the Madras Governor and their claims were supported by him and by his Government. The Imperial Legislative Assembly and the Council of State have been accorded the power to grant women the franchise for their assemblies also by resolution, but only for those provinces which already have granted women the Legislative franchise. The Legislative Assembly has passed by a large majority a Resolution granting the Assembly franchise to the women of such Provinces. Accordingly in November 1923, women in India voted for the first time for the elections of both Provincial Legislative Councillors and members of the Legislative Assembly. The number of women who voted in the large cities was surprisingly large in Bombay and Madras Presidencies and comprised women of all castes and communities.

The number of women enfranchised by the grant of the vote throughout India will not be more than a million under the present qualifications. Property and not literacy is the basis of the franchise, though the grant of the vote to every graduate of seven years' standing ensures that the best educated women of the country as well as those who have to shoulder the largest property responsibilities will be those who rightly will be the legislating influence on behalf of womanhood. As regards the custom of purdah prevailing in parts of India special provisions have been made in Municipal voting for purdah recording stations for purdah women in which a woman is returning officer and this has been found quite satisfactory and will be adopted also where desired in connection with Legislative Council elections.

Though the Women's Indian Association is the only defined Suffrage Society almost all other women's organisations have combined in special efforts for the gaining of municipal and legislative rights and the following ladies have identified themselves specially with the movement: Lady D. Tata, Lady A. Bose, Lady T. Sadasaivalar, the Begum of Cambay, Mrs. Sarojini Naidu, Mrs. Jaiji Jehangir Petit, Mrs. Tata, Mrs. Wadia, Mrs. Jinarajadasa, Mrs. A. Besant, Mrs. M. E. Cousins, Mrs. Sriranganamma, Mrs. Chandrasekhara Iyer, Miss Sorabji, Mrs. Khedkar, Dr. Mistry, Dr. Muthulakshmi Ammal, Mrs. Palmer, Mrs. Sarajadevi Choudhuri, Mrs. Kumudini Banu, Mrs. K. N. Roy, Lady Shafi, Mrs. Hassan Imam, Miss S. B. Das, Mrs. Rustomji Faridoonji, Mrs. B. Rama Rao, Mrs. Deep Narain Singh, etc.

## Warrant of Precedence.

A new Warrant of Precedence for India in supersession of the notification published on February 10, 1899, which has been approved by His Majesty the King Emperor of India, was published in 1922. Henceforth the following table will be observed with respect to the rank and precedence of persons named, as under:—

1. Governor-General and Viceroy of India.
2. Governors of Provinces within their respective charges.
3. Governors of Madras, Bombay and Bengal.
4. Commander-in-Chief in India.
5. Governors of the United Provinces, Punjab, Behar and Burma.
6. Governors of the Central Provinces and Assam.
7. Chief Justice of Bengal.
8. Bishop of Calcutta, Metropolitan of India.
9. Members of the Governor-General's Executive Council.
10. Commander-in-Chief of His Majesty's Naval Forces in the East Indies.
11. President of the Council of State.
12. President of the Legislative Assembly.
13. Chief Justice of a High Court other than that of Bengal.
14. Bishops of Madras and Bombay.
15. Agents to the Governor-General in Rajputana, Central India and Baluchistan, Chief Commissioner of the North-West Frontier Province, Members of Executive Councils and Ministers of Governors and Lieutenant-Governors, Political Resident in the Persian Gulf, Residents at Hyderabad and in Mysore, and Commissioner in Sind,—within their respective charges.
16. Chief of the General Staff; Chief Commissioner of Railways; General Officer Commanding Northern, Southern, Eastern and Western Commands, and Officers of the rank of General.
17. Members of the Executive Councils and Ministers in Madras, Bombay and Bengal.
18. Members of the Executive Councils and Ministers, United Provinces, Punjab, Burma and Behar.
19. Agents to the Governor-General in Rajputana, Central India and Baluchistan; Chief Commissioner of the North-West Frontier Province; Political Resident in the Persian Gulf; and Residents at Hyderabad and in Mysore.
20. Members of the Executive Councils and Ministers, Central Provinces and Assam.
21. Presidents of Legislative Councils within their respective Provinces.
22. Chief Judges of Chief Courts; and Puisne Judges of High Courts.
23. Lieutenant-Generals.
24. Comptroller and Auditor-General; President of the Public Service Commission and President of the Railway Board.
25. Bishops of Lahore, Bangalore, Lucknow and Nagpur.
26. Members of the Railway Board, Railway Financial Commissioner; and Secretaries to the Government of India.
27. Additional Secretaries and Joint Secretaries to the Government of India; Commissioner in Sind; Financial Adviser, Military Finance; Judges of Chief Courts; and Members of the Central Board of Revenue.
28. Chief Commissioner of the Andamans and Chief Commissioner of Delhi,—within their respective charges; Chief Secretaries to the Governments of Madras, Bombay and Bengal; Agent to the Governor-General, Punjab States, when within the Punjab.
29. Bombay, and Income-tax Officers drawing the maximum pay of the time-scale; and Sub-Deputy Opium Agents.

1. The entries in the above table apply exclusively to the persons entered therein, and while regulating their relative precedence with each other, do not give them any precedence over members of the non-official community resident in India who shall take their place according to usage.

2. Officers in the above table will take precedence in order of the numbers of the entries. Those included in one number will take precedence *inter se* according to the date of entry into that number.

3. When an officer holds more than one position in the table he will be entitled to the highest position accorded to him.

4. Officers who are temporarily officiating in any number in the table will rank in that number below permanent incumbents.

5. All officers not mentioned in the above table, whose rank is regulated by comparison with rank in the army, to have the same rank with reference to civil servants as is enjoyed by military officers of equal grades.

6. All other persons who may not be mentioned in this table to take rank according to general usage, which is to be explained and determined by the Governor-General in Council in case any question shall arise. When the position of any such person is so determined and notified, it shall be entered in the table in *italics*, provided he holds an appointment in India.

7. Nothing in the foregoing rules to disturb the existing practice relating to precedence at the Courts of Indian States or on occasions of intercourse with Indians, and the Governor-General in Council to be empowered to make rules for such occasions in case any dispute shall arise.

8. The following will take courtesy rank as shown :—

Consuls-General, Immediately after article 37, which includes Colonels Commandant; Consuls, Immediately after article 40, which includes

Colonels; Vice-Consuls, Immediately after article 63, which includes Majors.

Consular officers de *carriere* will in their respective grades take precedence of consular officers who are not de *carriere*.

9. The following may be given, by courtesy, precedence as shown below, provided that they do not hold appointments in India :—

Peers according to their precedence in England; Knights of the Garter, the Thistle and St. Patrick; Privy Councillors; Members of the Council of the Secretary of State for India.—Immediately after Members of the Governor-General's Executive Council, article 9.

Baronets of England, Scotland, Ireland and the United Kingdom, according to date of Patents, Knights Grand Cross of the Bath; Knights Grand Commander of the Star of India; Knights Grand Cross of St. Michael and St. George; Knights Grand Commander of the Indian Empire; Knights Grand Cross of the Royal Victorian Order; Knights Grand Cross of the Order of the British Empire. Immediately after the Commissioner in Sind (Article 15); Knights Commander of the Bath; Knights Commander of the Star of India, Knights Commander of St. Michael and St. George; Knights Commander of the Indian Empire; Knights Commander of the Royal Victorian Order; Knights Commander of the Order of the British Empire; and Knights Bachelor.—Immediately after the Residents of the Second Class, Article 31.

10. All ladies, unless by virtue of holding an appointment themselves they are entitled to a higher position in the table, to take place according for the rank herein assigned to their respective husbands, with the exception of wives of Peers and of ladies having precedence in England independently of their husbands, and who are not in rank below the daughters of Barons; such ladies to take place according to their several ranks, with reference to such precedence in England, immediately after the wives of Members of the Governor-General's Executive Council.

# Indian Orders.

## The Star of India.

The Order of the Star of India was instituted by Queen Victoria in 1861; and enlarged in 1866, 1876, 1897, 1902, and 1911, and the dignity of Knight Grand Commander may be conferred on Princes or Chiefs of India, or upon British subjects for important and loyal service rendered to the Indian Empire; the second and third classes for services in the Indian Empire of not less than thirty years in the department of the Secretary of State for India. It consists of the Sovereign, a Grand Master (the Viceroy of India), the first class of forty-four Knights Grand Commanders (22 British and 22 Indian); the second class of one hundred Knights Commanders, and the third class of two hundred Companions, exclusive of Extra and Honorary Members, as well as certain additional Knights and Companions.

The Insignia are (i) the Collar of gold, composed of the lotus of India, of palm branches tied together in satire, of the united red and white rose, and in the centre an Imperial Crown; all enamelled in their proper colours and linked together by gold chains. (ii) The Star of a Knight Grand Commander is composed of rays of gold issuing from a centre, having thereon a star of five points in diamonds resting upon a light blue enamelled circular riband, tied at the ends and inscribed with the motto of the Order, *Heaven's Light our Guide*, also in diamonds. That of a Knight Commander is somewhat different, and is described below. (iii) The Badge, an onyx cameo having Her Majesty Queen Victoria's Royal Effigy thereon, set in a perforated and ornamental oval, containing the motto of the Order surmounted by a star of five points, all in diamonds. (iv) The Mantle of light blue satin lined with white, and fastened with a cordon of white silk with blue and silver tassels. On the left side a representation of the Star of the Order.

The ribbon of the Order (four inches wide for Knights Grand Commanders) is sky-blue, having a narrow white stripe towards either edge, and is worn from the right shoulder to the left side. A Knight Commander wears (a) around his neck a ribbon two inches in width, of the same colours and pattern as a Knight Grand Commander, and pendent therefrom a badge of a smaller size, (b) on his left breast a Star composed of rays of silver issuing from a gold centre, having thereon a silver star of five points resting upon a light blue enamelled circular ribbon, tied at the ends, inscribed with the motto of the Order in diamonds. A Companion wears from his left breast a badge of the same form as appointed for a Knight Commander, but of a smaller size pendent to a like ribbon of the breadth of one and a half inches. All insignia are returnable at death to the Central Chancery, or if the recipient was resident in India, to the Secretary of the Order at Calcutta.

**Sovereign of the Order:**—H. I. M. The King-Emperor.

**Grand Master of the Order:**—His Excellency the Viceroy and Governor-General of

India, the Right Honourable Lord Reading P.C., G.C.B., G.M.S.I., G.M.I.E., G.C.V.O.

**Officers of the Order:**—*Registrar:* Col. the Hon. Sir George Arthur Charles Orlonon, K.C.V.O., Secretary of the Central Chancery of the Orders of Knighthood, St. James' Palace, London, W.

*Secretary:* The Hon'ble Mr. J. P. Thompson, C.S.I., Secretary to the Government of India in the Foreign and Political Department.

### The Most Eminent Order of the Indian Empire.

This Order, instituted by H. M. Queen Victoria, Empress of India, Jan. 1st, 1878, and extended and enlarged in 1886, 1887, 1892, 1897, and 1902 is conferred for services rendered to the Indian Empire, and consists of the Sovereign, a Grand Master, thirty-two Knights Grand Commanders (of whom the Grand Master is first and principal), ninety-two Knights Commanders, and an indefinite number of Companions (not exceeding, without special statute, 20 nominations in any one year); also Extra and Honorary Members over and above the vacancies caused by promotion to a higher class of the Order, as well as certain Additional Knights and Companions appointed by special statute Jan. 1st, 1909, commemorative of the 50th Anniversary of the assumption of Crown Govt. in India.

The Insignia are: (i) The COLLAR of gold formed of elephants, lotus flowers, peacocks in their pride, and Indian roses, in the centre the Imperial Crown, the whole linked together with chains; (ii) The STAR of the Knight Grand Commander, comprised of five rays of silver, having a small ray of gold between each of them, the whole alternately plain and scaled, issuing from a gold centre, having thereon Her Majesty Queen Victoria's Royal Effigy, within a purple circle, edged and lettered gold, inscribed *Imperatrix Austriæ*; and surmounted by an Imperial Crown gold; (iii) The BADGE, consisting

of a rose, enamelled gules, barbed vert, and having in the centre Her Majesty Queen Victoria's Royal Effigy, within a purple circle, edged and lettered gold, inscribed *Imperatrix Austriæ*, surmounted by an Imperial Crown, also gold; (iv) The MANTLE is of Imperial purple satin, lined with and fastened by a cordon of white silk, with purple silk and gold tassels attached. On the left side a representation of the Star of the Order.

A Knight Commander wears: (a) around his neck a ribbon two inches in width, of the same colour (purple) and pattern as a Knight Grand Commander, pendent therefrom a badge of smaller size; (b) on his left breast a star, similar to that of the first class, but the rays of which are all of silver.

The above mentioned Insignia are returned at death to the Central Chancery, or if the Knight was resident in India to the Secretary of the Order at Calcutta.

A Companion wears from the left breast a badge (not returnable at death) of the same form as appointed for a Knight Commander, but of smaller size, pendent to a like ribbon of the breadth of one and a half inches.

**Sovereign of the Order:—H. I. M. The King-Emperor.**

**Grand Master of the Order:—H. E. the Viceroy, Lord Reading.**

**Officers of the Order:—The same as for the Order of the Star of India.**

H. H. Begum of Bhopal  
Lady Victoria Patricia Helena Ramsay  
Frances Charlotte, Lady Chelmsford  
Countess of Reading  
H. H. Maharani Sakhiya Raja Sahila Scindia  
Alijah Bahadur of Gwalior

**Distinctive Badges.**—An announcement was made at the Coronation Durbar in 1911, that a distinctive badge should be granted to present holders and future recipients of the titles of 'Diwan Bahadur', 'Sardar Bahadur', 'Khan Bahadur', 'Rai Bahadur', 'Rao Bahadur', 'Khan Sahib', 'Rai Sahib' and 'Rao Sahib'. Subsequently the following regulations in respect of these decorations were issued:—(1) The decoration to be worn by the holders of the titles above mentioned shall be a badge or medallion bearing the King's effigy crowned and the name of the title, both to be executed on a plaque or shield surrounded by a five-pointed star surmounted by the Imperial Crown, the plaque or shield being of silver gilt for the titles of Diwan, Sardar, Khan, Rai and Rao Bahadur, and of silver for the titles of Khan, Rai, and Rao Sahib. (2) The badge shall be worn suspended round the neck by a ribbon of one inch and a half in width, which for the titles of Diwan and Sardar Bahadur

shall be light blue with a dark blue border, for the titles of Khan, Rai and Rao Bahadur light red with a dark red border, and for the titles of Khan, Rai and Rao Sahib dark blue with light blue border.

A Press Note issued in November, 1914, states:—The Government of India have recently had under consideration the question of the position in which miniatures of Indian titles should be worn, and have decided that they should be worn on the left breast fastened by a brooch, and not suspended round the neck by a ribbon as prescribed in the case of the Badge itself. When the miniatures are worn in conjunction with other decorations, they should be placed immediately after the Kaisar-i-Hind Medal.

**Indian Distinguished Service Medal.**—This medal was instituted on June 25th, 1907, by an Army Order published in Simla as a reward for both commissioned and non-commissioned officers of the regular and other forces in India. It bears on the obverse the bust of King Edward VII. and on the reverse a laurel wreath encircling the words *For Distinguished Service*. The medal,  $1\frac{1}{2}$  inches in diameter, is ordered to be worn immediately to the right of all war medals suspended by a red ribbon  $1\frac{1}{2}$  in. wide, with blue edges  $\frac{1}{2}$  in. wide. This medal may be conferred by the Viceroy of India.

**Indian Order of Merit.**—This reward of valour was instituted by the H. E. I. Co. in 1837, to reward personal bravery without any reference to length of service or good conduct. It is divided into three classes and is awarded to native officers and men for distinguished conduct in the field. On the advancement from one class to another the star is surrendered to the Government, and the superior class substituted, but in the event of the death of the recipient his relatives retain the decoration. The order carries with it an increase of one-third in the pay of the recipient, and in the event of his death the allowance is continued to his widow for three years. The First Class consists of a star of eight points,  $1\frac{1}{2}$  in. in diameter, having in the centre a ground of dark blue enamel bearing crossed swords in gold, within a gold circle, and the inscription *Reward of Valour*, the whole being surmounted by two wreaths of laurel in gold. The Second Class star is of silver, with the wreaths of laurel in gold; and the Third Class entirely of silver.

The decoration is suspended from a simple loop and bar from a dark-blue ribbon  $1\frac{1}{2}$  in. in width with red edges, bearing a gold or silver buckle according to class.

**Order of British India.**—This order was instituted at the same time as the Order of Merit, to reward native commissioned officers for long and faithful service in the Indian Army. Since 1878, however, any person European or native, holding a commission in a native regiment, became eligible for admission to the Order without reference to creed or colour. The First Class consists of a gold eight-pointed radiated star  $1\frac{1}{2}$  in. in diameter. The centre is occupied by a lion statant gardant upon a ground of light-blue enamel, within a dark-blue band inscribed *Order of British India*, and encircled by two laurel wreaths of gold. A gold loop and ring are attached to the crown for suspension from a broad ornamental band  $\frac{1}{2}$  in. in diameter, through which the ribbon, once blue, now red, is passed for suspension from the neck. The Second Class is  $1\frac{1}{2}$  in. in diameter with dark-blue enamelled centre: there is no crown on this class, and the suspender is formed of an ornamental gold loop. The reverse is plain in both classes. The First Class carries with it the title *Sirdar Bahadur*, and an additional allowance of two rupees a day; and the Second the title of *Bahadur*, and an extra allowance of one rupee per day.

**Indian Meritorious Service Medal.**—This was instituted on July 27th, 1888, and on receipt of the medal the order states "a non-commissioned officer must surrender his Long Service and Good Conduct medal": but on being promoted to a commission he may retain the M. S. medal, but the annuity attached to it will cease. On the obverse is the diademed bust of Queen Victoria facing left, with a veil falling over the crown behind, encircled by the legend *Victoria Kaisar-i-Hind*. On the reverse is a wreath of lotus leaves enclosing a wreath of palm tied at the base, having a star beneath; between the two wreaths is the inscription for meritorious service. Within the palm wreath is the word *India*. The medal,  $1\frac{1}{2}$  in. in diameter, is suspended from a scroll by means of a red ribbon  $1\frac{1}{2}$  in. wide. The medals issued during the reigns of Queen Victoria's successors bear on the obverse their bust in profile with the legend altered to *EDWARDVS* or *GEORGIVS*.

## THE KAISAR-I-HIND MEDAL.

This decoration was instituted in 1900, the preamble to the Royal Warrant—which was amended in 1901 and 1912—being as follows:—“Whereas We, taking into Our Royal consideration that there do not exist adequate means whereby We can reward important and useful services rendered to Us in Our Indian Empire in the advancement of the public interests of Our said Empire, and taking also into consideration the ex-

pediency of distinguishing such services by some mark of Our Royal favour: Now for the purpose of attaining an end so desirable as that of thus distinguishing such services aforesaid, We have instituted and created, and by these presents for Us, Our Heirs and Successors, do institute and create a new Decoration.” The decoration is styled “The Kaisar-i-Hind Medal for Public Service in India” and consists of two classes.

The Medal is an oval shaped Badge or Decoration—in gold for the First Class and in silver for the Second Class—with the Royal Cypher on one side and on the reverse the words "Kaiser-i-Hind for Public Service in India;" it is suspended on the left breast by a dark blue ribbon.

### Recipients of the 1st Class.

- Abu Nasr Muhammad Yahia, Khan Bahadur  
 Abdus Samad Khan of Rampur  
 Achariyar, Diwan Bahadur Tirumalai Deak  
 Achariyar, Diwan Bahadur V. Krishna  
 Ayyangar Ramanuya

## THE VICTORIA CROSS.

The announcement, made at the Delhi Durbar in 1911, that in future Indians would be eligible for the Victoria Cross gave satisfaction which was increased during the War and afterwards by the award of that decoration to the following:—

**Subadar (then Sepoy) Khudadad Khan,** 129th Baluchis.—On 31st October 1914, at Hollebeke, Belgium, the British Officer in charge of the detachment having been wounded, and the other gun put out of action by a shell, Sepoy Khudadad, though himself wounded, remained working his gun until all the other five men of the gun detachment had been killed.

**Naick Darwan Sing Negi,** 1-39th Garhwal Rifles.—For great gallantry on the night of the 23rd-24th November 1914 near Festubert, France, when the Regiment was engaged in retaking and clearing the enemy out of our trenches, and, although wounded in two places in the head, and also in the arm, being one of the first to push round each successive traverse, in the face of severe fire from bombs and rifles at the closest range.

**Subadar (then Jamadar) Mir Dast,** 55th Coke's Rifles.—For most conspicuous bravery and great ability at Ypres on 26th April 1915, when he led his platoon with great gallantry during the attack, and afterwards collected various parties of the Regiment (when no British Officers were left) and kept them under his command until the retirement was ordered. Jamadar Mir Dast subsequently on this day displayed remarkable courage in helping to carry eight British and Indian Officers into safety, whilst exposed to very heavy fire.

**Rifleman Kulbir Thapa,** 2-3rd Gurkha Rifles.—For most conspicuous bravery during operations against the German trenches south of Maquisart. When himself wounded, on the 25th September 1915, he found a badly wounded soldier of the 2nd Leicestershire Regiment behind the first line German trench, and though urged by the British soldier to save himself, he remained with him all day and night. In the early morning of the 26th September, in misty weather, he brought him out through the German wire, and, leaving him in a place of comparative safety returned and brought in two wounded Gurkhas one after the other. He then went back in broad daylight for the British soldier and brought him in also, carrying him most of the way and being at most points under the enemy's fire.

**Havildar (then Lance-Naick) Lala,** 41st Dogras.—Finding a British Officer of another regiment lying close to the enemy he dragged him into a temporary shelter which he himself had made, and in which he had already bandaged four wounded men. After bandaging his wounds he heard calls from the Adjutant of his own Regiment who was lying in the open severely wounded. The

enemy were not more than one hundred yards distant, and it seemed certain death to go out in that direction, but Lance-Naick Lala insisted on going out to his Adjutant, and offered to crawl back with him on his back at once. When this was not permitted, he stripped off his own clothing to keep the wounded officer warmer and stayed with him till just before dark when he returned to the shelter. After dark he carried the first wounded officer back to the main trenches, and then, returning with a stretcher carried back his Adjutant. He set a magnificent example of courage and devotion to his officers.

**Sepoy Chatta Singh,** 9th Bhopal Infantry.—For most conspicuous bravery and devotion to duty in leaving cover to assist his Commanding Officer who was lying wounded and helpless in the open. Sepoy Chatta Singh bound up the officer's wound and then dug cover for him with his entrenching tool, being exposed all the time to very heavy rifle fire. For five hours until nightfall he remained beside the wounded officer shielding him with his own body on the exposed side. He then, under cover of darkness, went back for assistance, and brought the officer into safety.

**Naick Shahamad Khan,** 89th Punjabis.—For most conspicuous bravery. He was in charge of a machine-gun section in an exposed position in front of and covering a gap in our new line within 150 yards of the enemy's entrenched position. He beat off three counter-attacks, and worked his gun single-handed after all his men, except two belt-fillers, had become casualties. For three hours he held the gap under very heavy fire while it was being made secure. When his gun was knocked out by hostile fire he and his two belt-fillers held their ground with rifles till ordered to withdraw. With three men sent to assist him he then brought back his gun, ammunition, and one severely wounded man unable to walk. Finally, he himself returned and removed all remaining arms and equipment except two shot-rifles. But for his great gallantry and determination our line must have been penetrated by the enemy.

**Lance-Dafadar Govind Singh,** 28th Cavalry.—For most conspicuous bravery and devotion to duty in thrice volunteering to carry messages between the regiment and brigade headquarters, a distance of 14 miles over open ground which was under the observation and heavy fire of the enemy. He succeeded each time in delivering his message although on each occasion his horse was shot, and he was compelled to finish the journey on foot.

**Rifleman Karan Bahadur Rana,** 23rd Gurkha Rifles.—For conspicuous bravery and resource in action under adverse conditions, and utter contempt of danger during an attack. He with a few other men succeeded, under intense fire, in creeping forward with a Lewis gun in order to engage an enemy machine gun which had

caused severe casualties to officers and other ranks who had attempted to put it out of action. No. 1 of the Lewis gun party opened fire and was shot immediately. Without a moment's hesitation Karan Bahadur pushed the dead man off the gun, and in spite of bombs thrown at him and heavy fire from both flanks, he opened fire and knocked out the enemy machine gun crew. Then switching his fire on the enemy bombers and riflemen in front of him, he silenced their fire. He kept his gun in action, and showed the greatest coolness in removing defects which had twice prevented the gun from firing. He did magnificent work during the remainder of the day and when a withdrawal was ordered assisted with covering fire until the enemy was close to him. He displayed throughout a very high standard of valour and devotion to duty.

**Ressaldar Badlu Singh, 14th Lancers** attached 29th Lancers.—For most conspicuous bravery and self-sacrifice on the morning of the 23rd September 1918, when his squadron charged a strong enemy position on the west bank of the River Jordan, between the river and Kh. es Samariveh Village. On nearing the position Ressaldar Badlu Singh realised that the squadron was suffering casualties from a small hill on the left front occupied by machine guns and 200 infantry. Without the slightest hesitation he collected six other ranks and with the greatest dash and an entire disregard of danger charged and captured the position, thereby saving very heavy casualties

to the squadron. He was mortally wounded on the very top of the hill when capturing one of the machine guns single-handed, but all the machine guns and infantry had surrendered to him before he died. His valour and initiative were of the highest order.

**Rifleman Gobar Sing Negi, 2nd Battalion 39th Garhwal Rifles.**—For most conspicuous bravery on 10th March 1915 at Neuve Chapelle. During an attack on the German position he was one of a bayonet party with bombs who entered their main trench, and was the first man to go round each traverse, driving back the enemy until they were eventually forced to surrender. He was killed during this engagement.

**Sepoy Ishaw Singh, 28th Punjab.**—For devotion and bravery "quite beyond all praise" in Waziristan on 10th April, 1921. He received a severe gunshot wound in the chest while serving a Lewis gun, and when all the havildars had been killed or disabled he struggled to his feet, called to his assistance two men, and charged and recovered the gun, restoring it to action. He refused medical attention, insisting first on pointing out where the other wounded were and on carrying water to them. While the medical man was attending to these wounded he shielded him with his body and he submitted to medical attention himself only after he was exhausted through three hours' continual effort and by loss of blood.

## PASSPORT REGULATIONS.

### A.—British Subjects.

1. British Indian passports are only issued to British subjects and to British-protected persons.

2. The Indian Passport Regulations do not require persons to obtain passports before embarking from any port in British India, but as practically every other country requires travellers to be in possession of passports for landing, travellers are therefore advised to have passports before embarkation. Members of His Majesty's Naval, Military or Air Forces or of the Royal Indian Marine Service travelling on duty and members of the families of any such person when travelling to the United Kingdom on Military entitled passages need not have passports.

3. Passports are not required for journeys by sea from Bombay to British ports in India or to Burma or Ceylon; nor are passports required by British Indian subjects travelling to the Federated Malay States or the Straits Settlements, unless they propose to continue their journey onward.

4. As a passport is valid for five years, there is no objection to anyone applying for a passport weeks or even months in advance of the date of sailing, and much inconvenience will be avoided by early application. A notice of at least four days should be given for the preparation of a new passport and at least two days for an endorsement, renewal or visa.

5. In order to obtain a passport an application form, showing, among other things, the destination, route and reasons for the proposed journey, must be filled up by the applicant and certified by a Political Officer, Magistrate, Justice of the Peace, Police Officer not below the rank of Superintendent, or Notary Public resident in India. Copies of this form can be obtained from any District Magistrate, from the Commissioner of Police, Bombay, by post from the Passport Officer to the Government of Bombay, by personal application at the Passport Office, or from any of the leading Banking and Shipping Agents in Bombay. Two unmounted copies of the photograph of the applicant and a fee of Rs. 3 should be submitted with the application form. Fees are not accepted in stamps or by cheque.

6. The application form when filled up should either be posted with the photographs and fee to the Passport Officer to the Government of Bombay, or should be presented in person at the Passport Office, Bombay.

7. The Passport Office in Bombay is situated in the Civil Secretariat. The office is open from 11 a.m. to 4 p.m. daily, except on Saturdays when it closes at 1 p.m. and on Sundays and public holidays when it is not open at all.

8. The Passport Officer cannot issue passports outside the working hours shown above and the preparation of a passport takes time. Applicants, therefore, who postpone application to the last moment do so at their own risk.

#### Iraq.

9. Members of His Majesty's Naval, Military or Air Forces or of the Indian Forces in uniform, and *bona fide*, Muhammadan pilgrims travelling in organised parties and holding a pilgrim pass do not require passports for the journey to Iraq. All other travellers must be in possession of passports, which, except in the case of *bona fide* representatives of firms, will not be granted without the previous permission of the local authorities in Iraq. The Passport Officer will, on request, ask for this permission by post, or, if the applicant is prepared to defray the cost of a telegram by cable. Applicants must state clearly the nature of their business and give one or more references in Iraq to enable the local authorities to make inquiries regarding the *bona fides* of their visit.

10. Restrictions also exist on travel to various parts of the British Empire and to certain foreign countries. Amongst these may be mentioned Australia, Canada, Constantinople, Egypt, Gibraltar, Mohammedrah and Abadan, New Zealand, Palestine, Southern Rhodesia, Union of South Africa, South West Africa and the United States of America. The restrictions apply particularly to Indians. Detailed particulars with respect to each country will be supplied on application.

11. Passports for journeys to or through foreign countries require, after issue, the visa of the Consul concerned. Visas are, however, not necessary for Belgium, Denmark, France, Holland, Iceland, Italy, Liechtenstein, Norway, Spain, Sweden and Switzerland provided the names of these countries are entered on the passport.

12. Passports issued before the 1st December 1925 were valid for periods of two years only, whilst those issued after that date are valid for five years. All passports however may be renewed for periods of from one to five years at the option of the holder from the date of expiration but in no case can a passport be extended beyond ten years from the original date of issue. On expiration of that period, or, if at any time the space provided for visas is covered and the holder wishes to travel to countries for which fresh visas are required, a new passport must be obtained. Application for renewal must be made in the prescribed form copies of which may be had from any of the officers mentioned in paragraph 5 above. The fee for renewal is Re. 1 for each year, or portion of a year for which the passport is renewed.

13. A passport is valid only for the country or countries endorsed on it and fresh endorsements from a British Passport authority are not needed during the validity of the passport for subsequent journeys to these countries. Fresh endorsements may, however, be obtained on the passport for additional countries. Passports endorsed as valid for the British Empire are also available for travelling to territories under British protection or mandate, not however including Palestine, Iraq or Egypt for which countries the passport must be specifically endorsed. No fee is payable for an endorsement.

14. A lady on marriage or re-marriage requires a fresh passport.

15. In the case of a joint passport issued in favour of a husband and wife, the latter cannot travel alone on it, but should take out a fresh passport, surrendering the joint passport for cancellation of her name from it.

#### B.—Foreigners.

16. No foreigner can hold a British passport.

17. Foreigners proceeding direct to their own countries or to, or through, any other foreign countries or do not require a British visa on their passports. The nationals of the following countries do not require a British visa for travelling to the United Kingdom. (This concession also applies to certain nationals proceeding to certain British Dominions and Colonies and information on this point can be obtained from the Passport Officer).—Belgium, Denmark, France, Holland, Iceland, Italy, Liechtenstein, Norway, Spain, Sweden and Switzerland.

18. Foreigners who are subjects of the countries shown in the appendix below and who are travelling to a British territory for which a British visa is necessary should first obtain passports from their consular representatives and should then present them to the Passport Officer for visa, together with a written statement of the reasons for the journey. If the passport of a foreigner bears a British visa which terminates in India and the holder desires to undertake another journey to a territory under British jurisdiction, he should first obtain an endorsement from his consular representative and then present it to the Passport Officer for visa. There are three kinds of visas granted, viz., the Non-transit, Transit and Transshipment. Fees for these vary according to rates charged to British subjects by the foreign countries concerned.

19. Other foreigners should apply for Identity Certificates through the Commissioner of Police, Bombay, or, where such foreigners, reside in the mofussil, through the District Magistrate of the district in which they are residing. Two copies of the applicant's photograph should accompany the application. The fee for a Certificate of Identity is Re. 1-8-0.

20. The holder of a foreign passport who has obtained a visa granted by a British Passport Authority outside India for a destination which involves landing in, or passing through, India does not need a further visa from the authorities in India.

21. Copies of this notice can be had free of charge on application.

*Addresses of foreign consulates in Bombay with fees charged for visa on a British passport. The fees are subject to alteration according to the rates of exchange.*

## The School of Oriental Studies.

This School was established by Royal Charter in June 1916. The purposes of the School (as set out in the Charter) are to be a School of Oriental Studies in the University of London to give instruction in the languages of Eastern and African peoples, Ancient and Modern, and in the Literature, History, Religion, and Customs of those peoples, especially with a view to the needs of persons about to proceed to the East or to Africa for the pursuit of study and research, commerce or a profession, and to do all or any of such other things as the Governing Body of the School consider conducive or incidental thereto, having regard to the provision for those purposes which already exists elsewhere and in particular to the co-ordination of the work of the School with that of similar institutions both in Great Britain and in its Eastern and African Dominions and with the work of the University of London and its other Schools.

The School possesses noble and adequate buildings, in Finsbury Circus, provided for them by Government under the London Institution (Transfer) Act of 1912. The sum of £25,000 required for the alteration and extension of the buildings of the London Institution for the purposes of the School was voted by Parliament. The School buildings are quiet, although

they are in the heart of the City. The School provides teaching in more than forty languages. In a considerable proportion of the spoken languages instruction is given by teachers belonging to the countries where the languages in question are spoken, as it is the aim of the School to provide as far as possible both European and Oriental Lecturers in the principal languages included in the curriculum.

Courses on the History, Religions, and Customs of Oriental and African countries form a special feature in the teaching of the School. Inter-collegiate arrangements have been made with University College for instruction in Phonetics, modern phonetic methods being used to facilitate the acquirement of correct pronunciation. Inter-collegiate arrangements will also be made with the London School of Economics for instruction in the Sociology and Anthropology of the less civilised races.

Courses are also provided in Indian Law and the History of India, and arrangements are made from time to time for special courses of lectures to be given by distinguished orientalists not of the staff of the School.

*Patron, H. M. the King. Chairman of the Governing Body, Sir Harry L. Stephen, Director, Professor Sir E. Denison Ross, C.I.E., F.R.D.*

### Teaching Staff.

<i>Name.</i>	<i>Subjects.</i>	<i>Status.</i>

7. University Professor of Persian and Appointed Teacher.
8. University Professor of Sanskrit and Appointed Teacher.
9. University Professor of Swahili and other Bantu languages and Appointed Teacher.

**The Public Trustee of England is a Government Official created by Statute (Public Trustee Act, 1906), whereby the State acts as an executor or as a trustee under Wills, and as a trustee under Settlements, whether these instruments are new or old, and in other offices of an analogous character.**

The office has been a great success; in the seven years that it has been open the value of the trusts in course of administration have amounted, in round figures, to £50,000,000, while the estimated value of Wills lodged in the Department which have yet to mature is put at some £59,000,000, showing a total value of business of all kinds negotiated at £110,000,000.

**Fees chargeable.**—The office is now entirely self-supporting and is no charge upon the tax-payer. A provision of the Statute declares that the Office is to make no profit but to charge only such fees as may provide the working expenses and constitute a reserve fund against the liabilities assumed by the State for breach of trust. In accordance with this mutual principle the fees have already been reduced from their original scale, and the cash surplus of fees over expenses, regarded as the nucleus of a reserve fund for all contingencies, is now £14,585.

The main fees are of two kinds—a fee on capital and a fee on income. The fees on capital are taken in two instalments—an instalment of half taken at the beginning, and another instalment of half taken at the end of a trust—each instalment being calculated at the following rates:—

On the first £1,000, fifteen shillings per cent.

On the excess of £1,000 to £20,000, five shillings per cent.

On the excess of £20,000 to £50,000, two shillings and six pence per cent.

On the excess of £50,000, one shilling and three pence per cent. **The Fee on income** is one per cent. if, as is usual, the income be paid direct from its source to the person entitled, on any income in excess of £2,000 a year the fee is only  $\frac{1}{2}$  per cent. Where the income is paid through the Department then the fee is two per cent. up to £500 a year, and one per cent. on any excess of £500 a year, and  $\frac{1}{2}$  per cent. on income in excess of £2,000 a year. The fee on investment is  $\frac{1}{2}$  per cent.; the Public Trustee, out of this fee, paying the brokerage. There is power to vary these fees to meet the peculiar circumstances of special cases; but owing to the low range of the fees, and their mutual character the power of reduction is but seldom exercised, except perhaps in the case of large trusts.

The Department has been organised upon lines followed by commercial organisations. Forms are avoided wherever possible, the methods of the Office prescribing prompt attention to all matters within the day.

The particulars of any trust in which it is desired that the Public Trustee should act may be brought to his notice by letter or by personal interview, and upon his assent being obtained, his appointment should be effected in the ordinary way as in the case of private trustees. In the case of a Will about to be made, his appointment can be secured by the simple provision "I appoint the Public Trustee of

England as the executor and trustee of this my Will."

One of the forms of trusteeship which would appeal to English people residing in India is a scheme known as a "**Declaration of Trust.**" An official pamphlet explains that the Public Trustee's services have been requested by people who, either because of professional or business pre-occupation, or from want of experience in dealing with money matters, or from the disadvantages which might attach to Governmental, professional or business disabilities abroad, are not well placed to select and supervise their investments. It would appear that the services of the Department in this matter were first requisitioned by officers taking up appointments in India; and, following out their request for individual assistance, this scheme of trust came to be devised, and has been found to commend itself to the circumstances of a very large circle of persons similarly disadvantaged. A Declaration of Trust is an inexpensive form of trusteeship by virtue of which the owner practically retains full control over his capital. The property is made over to the Public Trustee either in the form of money to be invested or specific securities transferred into his name; and thereupon the Public Trustee executes a short "declaration" setting out that he holds the money invested or the securities in trust for the transferor. The result of this is that income, as it accrues, is paid to the owner or to any beneficiary as he may direct. A wide field of investment is permissible, as the trust provides that the funds may be invested as the owner may from time to time direct. As the pamphlet sets out interest at the rate of at least 4 per cent. is to be looked for under the scheme from investments of a non-speculative character. It should be understood that this form of trusteeship is not analogous to a bank deposit, where the return of the capital at par, given the solvency of the bank, is expected. Investments are selected with the greatest care in consultation with the owner, but it must be understood that the Public Trustee does not accept responsibility for any fluctuation of any of the investments chosen. The fees payable for this scheme of trusteeship, so far as the capital fees are concerned, are half those payable in the case of an ordinary settlement. The other fees are the same as the ordinary fees.

The appointment of the Public Trustee secures certain definite advantages inasmuch as he is by Act of Parliament a Corporation Sole; and thus it is said the Public Trustee never dies, so that the expense of appointment of other Trustees is permanently avoided. His integrity is guaranteed by the State, while the measure of his success would indicate that he is necessarily experienced and skilled in his duties.

Close personal attention is given by the Public Trustee and his senior officers to the details of every trust; and as regards the work of investment, a large organisation has been set up to give the best consideration not only to the selection of investments but to the duty of keeping them under frequent observation.

An Advisory Committee of men of recognised authority has, in the past year, been appointed by the Lord Chancellor to assist the Public Trustee by a quarterly review of the

An Advisory Committee of men recognised authority has, in the past year, been appointed by the said Chancellor to assist the Public Trustee by a quarterly review of the investments made. In the last Annual Report the Public Trustee speaks of having secured a return of £8-19-4 per cent. upon his trustee investments and a return of £4-10-1 per cent. upon his non-trustee investments.

The success of the Department would seem to show that there is a widespread public need in England for such an Office, and the energy and efficiency with which the Department has been constituted and conducted has been a great factor in commending it to the public. The State Guarantee is also doubtless a factor of great importance. A statutory rule provides that strict secrecy shall be observed in respect of all trusts administered in the Department.

The administration is subject to an audit by the Controller and Auditor-General (the Government Auditor), while the internal orga-

nisation has been built up upon the principle of a check and counter-check upon the administration.

An important section of the Statute gives the Public Trustee power to direct an audit and investigation of the condition and accounts of any trust.

Officials in India will doubtless tend to make an increasing use of the Department. As a Government Office, its stability will commend itself to them as a medium to safeguard their interests under Wills or Settlements which can be entirely relied upon, and free from the risks and expense attendant upon any other forms of trusteeship.

Further information upon details and copies of the official pamphlet, reports and rules, etc., can be obtained of the official agents to the Department, viz.:—Messrs. King, Hamilton & Co., Calcutta and in Bombay, Messrs. King, King & Co., whose head office is Messrs. Henry S. King & Co., 65, Cornhill, London, E. C.

### THE ADMINISTRATOR-GENERAL.

In India the functions of a Public Trustee are divided in each Province between two officials, the Administrator-General and the Official Trustee.

The office of Administrator-General was first constituted by Indian Act VII of 1849. There were several later enactments on the subject, all of which have ceased to be in force. The present law is to be found in Indian Act III of 1913, which contains the following provisions:—There are three Administrators-General in each of the Presidencies of Bengal, Madras, and Bombay. Their combined jurisdiction covers the whole of British India. The Administrator-General is entitled to letters of administration, when granted by a High Court, unless they are granted to the next of kin. In the other Courts he is entitled to letters in preference to a creditor, a legatee other than a universal legatee, or a friend of the deceased.

If any person who is not an Indian Christian, a Hindu, Mohammedan, Persian, Buddhist dies leaving within any Presidency assets exceeding the value of Rs. 1,000 and if no person to whom any Court would have jurisdiction to commit administration of such assets has, within one month from his death, applied in such Presidency for probate or letters of administration, the Administrator-General is required to apply for letters of administration. In case of apprehended danger of misappropriation, deterioration, or waste of assets left by the deceased in the towns of Calcutta, Madras, and Bombay, the High Courts may direct the Administrator-General to apply for letters of administration. He can also be required to collect and hold assets until a right of succession or administration is determined. Probate and letters of administration granted to an Administrator-General have effect throughout the Presidency but the High Court can direct that they have effect throughout one or more of the other Presidencies. A private executor or administrator may with the assent of the Administrator-General transfer the assets of the estate to the Administrator-General. There are provisions in the Act with regard to the revocation of grants and the distribution of assets.

When the assets do not exceed Rs. 1,000 in value, the Administrator-General may, when no probate or letters of administration have been granted, give a certificate to a person, claiming otherwise than as a creditor to be interested in such assets, entitling him to receive the assets. There is also power in certain events to give such certificate to a creditor. There is a further power to send the residue of the assets to the country of domicile of the deceased. The Government of India is required by the Act to make good all sums for which the Administrator-General would be personally liable if he had been a private administrator, except where the Administrator-General and his officers have in no way contributed to the liability.

Fees both on capital and on income are payable out of the estates taken charge of by the Administrator-General. The fees on capital vary from 3 per cent. on the gross value in the case of small estates to 2 per cent. in the case of large estates. The fees on income vary in the case of moveable property from 2 per cent. to 3 per cent., and in the case of immovable property from 3 per cent. to 5 per cent. When the Court has directed the Administrator-General to collect and hold the assets a fee of 1 per cent. on the value of the assets taken possession of, collected, realised, or sold is payable. A small fee is also payable in cases where the Administrator-General grants a certificate. The Administrator has power to reduce the fees to one-half.

**Official Trustee.**—The office of Official Trustee dates from the year 1843. By Indian Act XVII of that year the Supreme Court had power to appoint the Registrar or other officer of the Court to be a trustee, where there was no trustee willing to act. Act XVII of 1843 was repealed by Act XVII of 1864, which was in its turn repealed by Act II of 1913, which contains the present law on the subject. There are three Official Trustees. The Official Trustee of Bengal has powers in the greater part of India. The powers of the Official Trustee of Bombay extend to the Bombay Presidency and the Province of British Baluchistan; those of the Off-

cial Trustee of Madras extend to the Madras Presidency and the Province of Coorg. The Government can appoint Deputy Official Trustees.

An Official Trustee can (a) act as an ordinary trustee, (b) be appointed trustee by a Court of competent jurisdiction. He has, except as otherwise provided the same powers, duties, and liabilities as ordinary trustees. He may decline any trust. He may not accept any trust under any composition or scheme of arrangement for the benefit of creditors, nor of any estate known or believed by him to be insolvent. He cannot accept a trust for a religious purpose, or for the management or carrying on of any business. He cannot administer the estate of a deceased person unless he be sole executor and

sole trustee under the will. He cannot be appointed trustee along with any other person. With his consent he may be appointed trustee in the instrument making the trust, and he may accept a trust contained in a will. When property is subject to a trust, and there is no trustee within the jurisdiction willing or capable to act, the High Court may appoint the Official Trustee as trustee. He may also be appointed a trustee by the surviving or continuing trustees of a trust, and all persons beneficially interested therein.

As in the case of an Administrator-General, the Government of India is responsible for the acts or defaults of an Official Trustee. Fees are payable at rates fixed by the Government.

## The Fisheries of India.

The fisheries of India, potentially rich, as yet yield a mere fraction of what they could were they exploited in a fashion comparable with those of Europe, North America or Japan. The fishing industry, particularly the marine section, has certainly expanded considerably within the last 50 years concurrently with improvement in the methods of transport and increase in demand for fish, cured as well as fresh, from the growing populations of the great cities within reach of the seaboard. The caste system, however, exerts a blighting influence on progress; fishing and the fish trade are universally relegated to low caste men who alike from their want of education, the isolation caused by their work and caste, and their extreme conservatism, are among the most ignorant, suspicious and prejudiced of the population, extremely averse from amending the methods of their forefathers and almost universally without the financial resources requisite to the adoption of new methods, even when convinced of their value. Higher caste capitalists have hitherto fought shy of association with the low caste fishermen, and, except in the case of joint stock companies to engage in large operations on new lines, these capitalists cannot be counted upon to assist in the development of Indian fisheries. As in Japan, it appears that the general conditions of the industry are such that the initiative must necessarily be taken by Government in the uplift and education of the fishing community and in the introduction and testing of new and improved apparatus and methods.

The first local Government to lead the way was that of Madras, which in 1905 initiated an investigation of the industry, both marine and fresh-water, appointing Sir F. A. Nicholson to supervise operations. Bengal followed suit in 1906, and from these beginnings have sprung the local Fisheries Departments of Madras, Bengal and Behar and Orissa. Bombay, the remaining seaboard province, has comparatively small fresh-water interests compared with Madras and Bengal, and as it happens that her marine fisheries are favoured with good harbours and the most enterprising race of seafishermen in India, there was less urgent need for State help in the industry. Fisheries there were a subject of Government solicitude for five years after the war but they finally ceased

to receive any attention after the abolition in 1924 of the short lived Department of Industries to which this subject was allotted.

### Madras.

The Madras coast line of 1,750 miles is margined by a shallow-water area within the 100 fathom line of 40,000 sq. miles; outside of a mere fringe inshore, this vast expanse of fishable water lies idle and unproductive. The surf-swept East Coast is singularly deficient in harbours whereon fishing fleets can be based, and so from Ganjam to Negapatam, the unsinkable catamaran, composed of logs tied side by side, is the only possible seagoing fishing craft. Its limitations circumscribe the fishing power of its owners and consequently these men are poor, and the produce of their best efforts meagre compared with what it would be if better and larger boats were available and possible. The West coast is more favoured. From September till April weather conditions are good enough to permit even dugout canoes to fish daily. The people of this coast are fond of fish and, no difficulty is found in beaching canoes and boats throughout this season. The fishing population is a large one. The 1921 Census gave 66,684 adults as subsisting on fishing industries in Malabar and South Kanara, a small number after all considering the immense wealth of these seas. The chief fishes are sardines, mackerel, catfishes and jewfishes (kora or gul); the two first overshadow all others. So greatly in excess of food requirements are the catches of sardines that every year large quantities are turned into oil and manure. The 1924-25 season was a failure and only 2,000 tons of oil and 4,000 tons of guano were manufactured as against 7,250 tons of oil and 22,500 tons of guano in the previous year. Fishing outside the 5 fathom line is little in evidence save by Bombay boats (Ratnagiri) which are engaged in drift netting for bonito, seer and other medium-sized fishes. These strangers are enterprising fishers and bring large catches into Malpe and Mangalore and other convenient centres; the material is largely cured for export.

**Fish Curing** is practised extensively everywhere on the Madras coasts; its present success is due primarily to Dr. Francis Day who, after an investigation during 1869-71 of the

fisheries of the whole of India, pressed for the grant to fishermen of duty-free salt for curing purposes within fenced enclosures. He advocated much else, but the time was not ripe and the salt concession was the sole tangible result of his long and honourable efforts. His salt suggestions were accepted by the Madras Government, and from 1882 a gradually increasing number of yards or bonded enclosures were opened at which salt is issued free of duty and often at rates below the local cost of the salt to Government. At present about 106 of such yards are scattered along the coast and over 55,000 tons of wet fish are annually cured therein. The total receipts on the administration of these yards for the year 1924-25 was Rs. 4,52,390 and expenditure Rs. 3,54,056. The credit balance on the year's working was therefore Rs. 98,334.

**The Pearl and Chank fisheries** in Palk Bay and the Gulf of Mannar are Government monopolies. After a lapse of over a quarter of a century the prospects of pearl fishery for a series of years on the Indian Coast appear promising. The results of inspection of pearl banks conducted during the year 1925 have shown that oysters have reached their maximum sizes on many of the banks and that their growth and condition are satisfactory in every way. The total number of oysters estimated on the banks are nearly 24 crores. On the Tholayiram par alone there are nearly 12 crores of mature oysters which will justify two or three large pearl fisheries in Tuticorin should the oysters continue and yield pearls of sufficient value. It is proposed to hold a fishery at Tuticorin early in 1926. Chanks or conches (*Turbinella pinnum*) are handsome porcelain white shells of great thickness and considerable size, much in demand in Bengal, particularly Dacca, where the industry centres, for manufacture into bangles. The chank fisheries which are the department's main source of revenue suffered a serious reduction on account of the pearl fishery in Ceylon during March and April 1925. All chank fishing during this period which is the best chank season had to be suspended as the divers left India in a body for the much more remunerative and less arduous pearl fishery operations in Ceylon. But the scarcity of chank shells in the market due to the pearl fishery and the consequent high prices are expected to some extent make good the loss. The net profit for 1924-25 was therefore only Rs. 3,844.

**The Inland Fisheries** of Madras compare unfavourably with those of Bengal. Many of the rivers dry up in the hot season and few of the many thousands of irrigation tanks throughout the province hold water for more than 6 to 9 months. As a consequence inland fisheries are badly organized and few men devote themselves to fishing as their sole, or even main, occupation. The custom is to neglect or ignore the fishery value of these streams and tanks so long as they are full of water: only when the streams shrink to pools and the tanks to puddles do the owners or lessees of the fishing rights turn out to catch fish. The result is a dearth of fish throughout the greater part of the year, a glut for a few days, and often much waste in consequence. The chief fresh-water fishes of economic importance are the murrel,

notable for its virtue of living for considerable period out of water, various carps, and catfishes, the hilsa (in East Coast rivers only), and the catla. In the Nilgiris, the Rainbow trout has been acclimatised and thrives well. The Government working in conjunction with the Nilgiri Game Association maintain a hatchery at Avalanche, where quantities of fry are hatched and reared for the replenishment of the streams of the plateau. The net profits on Inland fishery in 1924-25 were Rs. 11,379.

**The Madras Department of Fisheries.** As Government attention has been given in Madras over a longer period to the improvement of fisheries, and a larger staff concentrated upon the problems involved than elsewhere, this Presidency has now the proud position of knowing that her fisheries and collateral industries are better organized and more progressive than those in other provinces. The credit for the wonderful success which has been achieved and the still greater promise of the future, is due in large measure to the wise and cautious plans of Sir F. A. Nicholson, who from 1905 to 1918 had the guidance of affairs entrusted to him. In 1905 he was appointed on special duty to investigate existing conditions and future potentialities; in 1907, a permanent status was given by the creation of a fisheries bureau and this in turn has developed into a separate Department of Government which till August 1923 was being administered by Mr. James Hornell, F.L.S., as Director, and is now controlled by his successor, Dr. B. Sundara Raj, M.A., Ph.D. The higher staff consists of a Superintendent of Pearl and Chank Fisheries, two Assistant Directors and a Cannery Superintendent. These are respectively in charge of (a) the departmental fisheries (pearling, chanks beche-de-mer, etc.); (b) the co-operative and socio-economic side of the Department's operations; (c) inland pisciculture, and (d) the experimental and demonstrational fish cannery at Chaliyam in South Malabar. Other officers have charge respectively of sections dealing with education and industrial work, which include a Training Institute for village teachers, fish-curing yards, and oil and guano factories. All the public fishcuring yards till now under the control of the Salt and Abkari Department have passed into the charge of the Fisheries Department. It is now possible to introduce the better methods of cure and improved hygiene which the Department has been striving to popularise in all the yards. Due to the transfer of the yards the Fisheries Department has a large ramified staff of yard officers (Salt-Sub Inspectors) Petty Yard Officers and peons in almost every large fishing village on the coast. Besides the direct work of issuing salt for curing, the Department will now set itself to train these officers into expert advisers in curing methods and marketing fish, social workers for the inculcation of thrift, co-operative and progressive ideas and new industries and lastly as trained observers for recording and reporting on various biological questions connected with fish and fisheries and collecting statistics regarding the value and quantity of sea fish caught and landed.

The activities of the Department are so varied and far-reaching that it is difficult even to enumerate them in the space available

much less to give details. So far its most notable industrial successes have been the reform of manufacturing processes in the fish-oil trade, the creation of a fishguano industry, the establishment of a fish cannery and the development of canned goods other than sardines, which alone had been canned previously in Malabar, and the opening of an oyster farm conducted under hygienic conditions. (For details see the Bulletins of the Department issued from the Government Press, Madras) seventeen volumes have been issued to date and the eighteenth volume is in press. All this work has been carried on under serious handicap for want of suitable accommodation for the research staff; prior to the war, proposals were elaborated for head-quarters buildings in Madras comprising laboratories, experimental hatcheries, and a large public aquarium; postponed owing to war conditions but subsequently abandoned. In Madras the Department controls a small public aquarium, deservedly popular as the first and only one on the Asiatic mainland.

Fishing rights in the large irrigation tanks were transferred from Government to local authorities many years ago; these tanks are now being reacquired by Government in order that they may be restocked periodically by the Department; the results so far have shown a profit on the operations. To breed the necessary fry, three fish farms are in operation, and the construction of three more is in progress. In these the chief fish bred are the Gourami, obtained from Java, the Murrel and *Etrophus suratensis*, which has the excellent attribute of thriving and breeding as well in brackish as in fresh water; all three protect their eggs while developing a useful habit; both the Gourami and *Etrophus* are largely vegetarian in diet. A further activity is represented by the breeding of small fishes specially addicted to feed upon the aquatic larvae of mosquitoes. These are supplied in thousands to municipalities and other local authorities at a nominal price, for introduction into mosquito-haunted sheets of water; these anti-malarial operations have proved most successful in those places where the local authorities have given proper attention to the direction given. The educational work of the Department is becoming one of its most important branches whether it being specially training teachers for schools in fishing villages, in training men in the technology of curing, canning and oil manufacture; in co-operative propaganda and in the supply of zoological specimens for the use of college classes and museums. The last named has filled a long-felt want and is contributing materially to the advancement of the study of zoology throughout India; there is now no need to obtain specimens from Europe.

The development of deep-sea fishing is engaging the attention of Government; splendid trawl grounds are indicated off Cape Comorin extending over an area of some 4,000 sq. miles; other promising areas are known elsewhere, but so far the limiting factors are the lack of cold storage accommodation at any port in the Presidency and the want of a deep-water harbour in the south, where steam-trawlers can discharge direct into store. An experiment in deep sea fishing made recently with the help of a motor launch and Danish

Soin net failed due to the unsuitability of the launch employed. The proposal for the purchase of an up-to-date and well-equipped trawler to serve the many requirements of the department such as economic salt transport to the west coast fish curing yards now entrusted to contractors with the consequent heavy cost, pearl bank inspection, the duties connected with the conduct of the pearl fishing in addition to the exploitation of deep-sea fishing and organised fishery research, has received the approval of Government.

**Welfare Work**—A remarkable feature in the work of the Madras Fisheries Department is the energy which it devotes to the improvement of the condition of the fisherfolk. On Sir Frederick Nicholson's initiative the department has always recognized the duty of spreading among them education and the habits of thrift, temperance and co-operation. The work has been specially successful on the west coast. The number of fishermen's co-operative societies in 1924-25 was 56. These societies it is reported worked satisfactorily, allowance being made for the inexperience and illiteracy of the members. But the formation and working of co-operative societies are not the only social activity among these fishermen. There is a vigorous temperance society at Mangalore. The Collector of South Kanara has granted sites for the construction of village halls for the fishermen in two villages and the fishermen have themselves collected Rs. 3,000 for the building. In another village, Kizhur, the fishermen have already completed a building in which they hold meetings while one elementary school carries on its work in the same building. In Madras itself at Nadukuppam a temperance organisation has got to work with the assistance of the Fisheries Department. To promote the education of fishermen a training institution was opened in the middle of 1918 at Calicut to train teachers to work in elementary schools for the fisher-folk. The pupil teachers under training are familiarised with the work carried on in the fishery stations at Tanur and Chaliyam. They are given practical instructions in fishing, a boat having been purchased for the purpose. By the end of June 1925, 32 schools for the fisherfolk were being maintained by the department on the west coast with a total of 2,450 pupils. In some places the villagers themselves started the schools and then handed them over to the department. In other places schools were opened by the department at the request of the fishermen. Local men are appointed as honorary managers of schools.

### Bengal & Bihar & Orissa.

The fishing value of this extensive deltaic region lies primarily in the enormous area occupied by inland waters—rivers, creeks, jheels, and swamps,—to say nothing of paddy fields and tanks. These swarm with fish and, as the Hindu population are free to a large extent from the aversion to a fish-diet which is widely prevalent among the better castes in the south, the demand for fish is enormous. Rice and fish are indeed the principal mainstays of the population and not less than 80 per cent. of the people consume fish as a regular item of diet. It is calculated that 1.6 per cent. of the

population is engaged in fishing and its connected trades, a percentage that rises to 2.8 in the Presidency, Rajshahi, and Dacca Divisions. 644,000 persons in Bengal subsist by fishing with 324,000 maintained by the sale of fish, and this in spite of the fact that fishing is not considered an honourable profession. As a fresh-water fisherman the Bengali is most ingenious, his traps and other devices exceedingly clever and effective—in many cases too effective—so eager is he for immediate profit, however meagre this may be. The greatest inland fishery is that of the hilsa (*Clupea tilapia*) which annually migrates from the sea in innumerable multitudes to seek spawning grounds far up the branches of the Ganges and the other great rivers. Other valued and abundant fishes are the rohu (*Labeo rohita*) and the katla (*Catla catla*), mrigela (*Cirrius dan nelgela*), prawns and shrimps abound everywhere. Of important fishes taken in the lower reaches of the rivers and in the great network of creeks spread throughout the Sunderbans, the bekti (*Late calatifer*) and the mullets are the most esteemed; apart from these estuarine fish the most valuable sea-fishes are the mango-fishes (*Polynemus*), pomfrets. The sea-fisheries are as yet little exploited, the fishermen of Orissa, where alone coastal fishing is of any local importance, having no sea craft save catamarans of inferior design and construction.

Following the inquiry begun in 1906 by Sir K. G. Gupta, an investigation of the steam trawl potentialities of the head of the Bay of Bengal was undertaken, the trawler *Golden Crown* being employed for the purpose. The results showed that there are extensive areas suitable for trawling and capable of yielding large quantities of high class fish. Much attention was devoted during these trawl cruises to the acquisition of increased knowledge of the marine fauna, the results being published in the Records and Memoirs of the Indian Museum. For various reasons, the chief perhaps being the hostility of vested interests, the lack of cold storage facilities and the loss of time involved by the trawler having to bring her catches to Calcutta instead of sending them by a swift tender, the experiment was financially a failure and was dropped. With ever-increasing demand for fish in Calcutta and the concurrent rise in prices, the prospects of remunerative steam-trawling are now much more steam-trawling companies being floated in the immediate future. The trade is a difficult one to organize and without a rare combination of technical fishery knowledge and far-sighted and comprehensive organization the danger run by the investing public will be considerable. Originally one Fisheries Department served the needs of the two provinces of Bengal and Bihar and Orissa. Separation was effected in after which fisheries in Bengal were administered by the Director of Agriculture. The Bengal Fishery Department was abolished under retrenchment in 1923. In Bihar and Orissa, Fisheries form a section of the Department of Industries.

Government has ordered that the Bengal Fisheries Department be reconstituted on an improved basis as soon as funds permit. A Bengal Fisheries Department has of necessity a more limited scope for its activities than in

the case of Madras. Practically no coastal minor industries exist, neither do the natural conditions lead us to suppose that any can be created without extreme difficulty, and in the absence of a great trawl industry which alone might be able to call into existence factories devoted to the uplift of the general utilization of fish by-products. Apart from this, much can be done by its officers for the uplift of the general fishing population with a view to free them from the tyranny of the mahajans (fish contractors and middle men) and enable them to put more capital into their business and to conduct it co-operatively. This is necessarily extremely slow work, but the old Department made a beginning and once a few societies can be made successful, the news of the benefits conferred on the members will constitute the best possible form of propaganda. The temporary abolition of the Bengal Fisheries Department was regretted by many and it is hoped that it will soon be revived. The fishery wealth of Bengal is enormous and nothing but good can come of intensive investigation and propaganda.

Fresh-water mussels are used extensively at Dacca in the manufacture of cheap pearl buttons and in many cases pearls also are found in the mussels which the pearl dealers gather and sell in the various parts of India. The Dacca bangle factories carry on an important local industry of very ancient standing; their material is almost entirely obtained from the South Indian and Ceylon chank fisheries already alluded to.

### Bombay.

Whereas Bengal's fisheries are at present confined principally to inland waters, those of Bombay are concerned, save in Sind, almost entirely with the exploitation of the wealth of the sea. Bombay is favoured with a coast line abounding with excellent harbours for fishing craft, a fair-weather season lasting for some seven months, and a fishing population more alive to their opportunities and more daring than those of the sister Presidencies. Bombay sea-fisheries are of very great importance financially as well as economically and, though there is less necessity for a special department to develop marine industries, there is ample scope for most useful work in improving curing methods, in introducing canning, and in the development of minor marine industries particularly those connected with the utilization of by products. With this end in view the Director of Industries administered the subject of "Fisheries" from 1918 and had for a time two officers in the Department engaged upon fishery investigation and development. A steam trawler was bought for work in Bombay waters in 1920 and began work in May 1921 off Bombay. The experiment continued until March, 1922, and the trawler was subsequently sold to the Government of Burma. At the outset the results seemed promising, but the experiment as a whole showed that the cost of maintaining a trawler of the type used could not be met by sales of fish at current market rates. Cold storage has since been installed at the principal fish market in Bombay, but for a trawler special facilities are needed also for rapid coaling, supplying ice and stores, and for

unloading catches. More than this a change is needed in the medieval conditions under which the local fish market is conducted and there is much to be done in popularising little known species of edible fish, such as karel, pain, tambusa, and particularly the ray or skate which formed on the average 25 per cent. of the total catch but which is so little esteemed locally that it sold on the average at the rate of 100 lbs. for a rupee.

Owing to retrenchment the appointments of Fisheries officers have been abolished and subsequently the whole Department of Industries was closed down.

The more important sea-fish are pomfrets, soles and sea-perches among which are included the valuable Jew-fishes (*Sciæna* spp.) often attaining a very large size and notable as the chief source of "fish-maws" or "sounds," largely exported from Bombay for eventual manufacture into isinglass. The finest of Bombay fishing boats hail from the coast between Bassoin and Surat. These boats are beautifully constructed, attain a considerable size, and are capable of keeping the sea for weeks together. In the season they fish principally off the Kutch and Kathiawar coasts and in the mouth of the Gulf of Cambay. Their main method of fishing is by means of huge anchored stow nets, which are left down for several hours and hauled at the turn of the tide. The chief catches are bombil (Bombay ducks), pomfrets and Jew-fishes. The first named are dried in the sun after being strung through the mouth upon lines stretched between upright posts. South of Bombay the fishermen of Ratnasiri and Rajapur make use of another and lighter class of fishing boat, specially designed for use in drift-net fishing. Fine hauls of bonito seer (a large form of mackerel) and allied fishes are often made during the season from September to January and later of shark and rayfish. For the latter specially large and powerful nets are employed. For part of the fair season, when fishing is not usually remunerative, many of the larger Bombay fishing boats are employed as small coasters, a fact which shows how large they run in size.

In Sind considerable sea-fishing is carried on in the neighbourhood of Karachi chiefly for large and coarse fish, as shark, rays and Jew-fishes. The edible oyster trade of Karachi was once extensive, the creeks of the Indus producing a species of oyster superior to that found in Bombay and Madras backwaters and estuaries. Unrestricted exploitation of beds of limited extent inflicted great harm, and now, when various salutary restrictions are imposed, the beds are slow to respond. Occasionally large deposits of the window-pane oyster (*Placuna placenta*) are found in the Indus creeks and as these produce seed pearls in abundance, Government leased the beds to the highest bidder. The pearls are largely exported to China for use in medicine. Considerable fisheries exist in the River Indus, chiefly for the fish known as palla, which are annually leased out by Government for about Rs. 20,000.

In the Gulf of Kutch two pearl fisheries exist, one for the true pearl oyster, the other for the window-pane oyster. The former is carried on by His Highness the Maharaja of Jamnagar, the other partly by this Prince

and partly by the administration of His Highness the Maharaja Gaekwar of Baroda. The latter industry owes its local existence to the enterprise of the Baroda Government which in 1905 obtained the services on deputation of Mr. J. Hornell, formerly Director of Fisheries in Madras, for the purpose of examining the Marine potentialities of the Baroda territory in Kathiawar. One of the consequences was the discovery of large deposits of pearl-bearing window-pane oysters, until then unknown; of late years these beds have produced annually from Rs. 15,000 to Rs. 25,000 in revenue, perhaps the best example we have in India of the profitable nature of well-directed scientific enquiry into fishery problems. The Baroda Government, continuing their enlightened interest in the fishery developments, have had two officers trained in the Madras Fisheries Department and now employ them in development work on the Baroda coast.

Experiments in canning are now in progress at one of the chief fishing centres on the Southern Kathiawar coast and already promise considerable success particularly with regard to pomfrets.

### Burma.

The exclusive right of fishing throughout the province of Burma belongs by custom of the country to Government, and the Burma Fisheries Act provides for the protection of this right and for conceding the enjoyment of it to the people subject to certain restrictions for the conservation of the fish. The work of the fisherfolk, involving as it does the taking of life, is generally viewed with disfavour by the Burman Buddhists. In certain tracts this attitude is intensified where the proportion of the fisherfolk is not only small but their economic conditions are more or less demoralised. Though fishing is generally denounced by Burman Buddhists, yet they consume the fish. The usual argument of the consumers is that they have not taken the life of the fish and therefore have committed no sin. Where fishing is the principal means of livelihood of the majority as in the Delta Districts, religious scruples tend to disappear.

REVENUE.—The economic value of any industry or tract of country can, to some extent, be gauged by the revenue it yields. The fisheries yield a substantial revenue (about one-eighth of the total land revenue), and therefore they are one of the most important sources of national wealth. There are two methods of catching fish, namely by nets in the rivers and seas and by traps in leased fisheries. The fishery revenue demand from net licenses amounts to over three lakhs while that from the leased fisheries amounts to more than 40 lakhs. Of the net licenses the greatest revenue comes from Mergui District where not only is the Pearl-ling industry carried on, but leases for collecting green snails and sea slugs are issued. Open lakes, pools of water and small rivers are classed as leased fisheries and are leased by Government to the highest and best bidder at public auction. Here the Irrawaddy Division equals in importance the rest of the province, and of the five districts in the Irrawaddy Division, Mazha District alone yields as much as half of the whole division. Maubin District therefore stands easily first in respect of fishery revenue, and out of the total collected in any year from the whole

province, this district alone contributes at least a quarter.

The Delta consists of a series of saucer-shaped islands, many of which have embankments round the greater part of them along the north, east and west; in the hollows of these islands most of the fish come into spawn, and with the floods which overflow the embankment during October the young fry come down-country from Upper Burma.

The principal kinds of fish caught in nets on the sea-coast are (1) Kakkuyan, (2) Kathabauung, and (3) Kathahmyin. These are generally made into salt fish which fetch Rs. 2 to Rs. 3 per viss. The creek and fresh water fish from fisheries are generally ngakhu, ngayan and ngagy. Most of them are sold fresh, but some are converted into salt fish. The fish caught in the rivers are generally ngathalauk, ngagyin, and ngamyinyin, the preadaceous fish.

Fees for net licenses are charged according to the size of the nets. Fisheries which consist of lakes, pools and streams are put up to auction, but as no Burman fisherman has ever been known to keep a proper system of accounts, he seldom or never can gauge the real worth of the fisheries; this coupled with his impulsive nature frequently results in his bids at auction exceeding the value of the fisheries; several fishermen have thus not only brought ruin on themselves but also on their surties who have not infrequently been sold up. Until these fisheries are brought under some settlement system for revenue assessment, bona fide fisherman must suffer from time to time. Moreover, the local authorities demand more than adequate securities and the furnishing as well as the verifying of these securities invariably mean much unnecessary expenditure of time and money both to the fisherfolk and to the Government staff. With a view to ameliorate uneconomic conditions by rendering the provisions of security easier, as well as to facilitate collection Government recently introduced what is known as the group system whereby the value of the fisheries is fixed at a reasonable rental, and, instead of an individual system of furnishing security, the groups hold themselves severally responsible. In order to enable the poorest of the actual workers to reap the benefit of their labours, nothing short of a co-operative system would be of any avail; this co-operative system has been tried in Tharrawaddy District with some success, by this system every fisherman employed in a fishery becomes a partner in the business and no non-fisherman can ever sweat the bona fide fisherman, poor though he be. The group system, though an improvement on the individual system of bidding and furnishing securities does not do away with the sweating system. With the gradual introduction of the co-operative system, which is an urgent necessity in the Delta District, the poorest fisherman of every fishing village and hamlet, after gradual and systematic training will, in course of time, be able, not only to reap the full benefit of their labours, but also by mutual control and aid to develop into a more useful and contented peasantry. Fishery leases for three to five years, are now being granted instead of leases for only one year and fisherman obtaining the long-term leases have begun to realise the need of impro-

ving the fisheries by clearing the streams and pools of that Burma pest—the water hyacinth—and other weeds.

The principal articles of manufacture are ngapi (fish-paste) and salt-fish; the manufacturing methods are primitive and with more industrial education and capital, these could be considerably improved.

### The Punjab.

The Rules and Regulations under the Fish-ries Acts are now applicable to 16 districts of the Province, and it is hoped to bring another four or five districts under the rules within the next year or so. Apart from the rules which are drafted primarily in the interest of the fish and fisheries, and to improve the lot of the fishermen castes, the Department has made a good many experiments with the breeding of indigenous fish and studying their life histories. Murrel (*Ophiocephalidae*) have been successfully bred in the tanks in Madhopur, and the fry sent out to stock waters in Lahore, Gurdaspur, and even as far a field as Attock.

The Department has lately constructed very large carp tanks in the Gujranwala District, having taken over the old bed of the Chenab Canal for the purpose. Here some 800 brood fish are being kept and experiments tried. The result, if successful, will, in the near future, have far-reaching effects throughout the Province. Though the upper reaches of the Beas River are now very thoroughly stocked with brown trout, and anglers are reporting splendid sport, the Department has had very little success in the smaller streams of the Kangra Valley, where trout fry and ova have been planted for many years. This is mainly due to the number of channels that are taken off from these streams for the irrigation of fields, leaving very little water in the streams during the hot weather months. The Uhl River, which rises in Chota Banghal and flows through Mandi State (the site of the Mandi Hydro-electric scheme) is now also pretty well stocked with brown trout.

Fishermen are being encouraged to start co-operative societies. Two such have been started recently, and one, at least, has done fairly well, having supplied fish to the hill stations of Dalhousie and Dharmasala. It is hoped that their example will be followed by others and a spirit of thrift and co-operation be instilled in fishermen in the near future.

### Travancore.

This State has affiliated Fisheries to the Department of Agriculture and with the help of two officers trained in Madras, the Department has already accomplished a notable amount of development work. Special attention has been given to the regulation of fisheries in backwaters to the establishment of co-operative societies among the fishing community and to the introduction of improved methods of sardine oil and guano production. Useful work has been done by one of the officers in elucidating the life-histories of the more valuable food fishes and prawns.

## The Forests.

Even in the earliest days of the British occupation the destruction of the forests in many parts of India indicated the necessity for a strong forest policy, but whether or not our earlier administrators realized the importance of the forests to the physical and economic welfare of the country, the fact remains that little or nothing was done. The year 1855 marked the commencement of a new era in the history of forestry in India, for it was then that Lord Dalhousie laid down a definite and far-sighted forest policy. Further progress was delayed for a time by the Mutiny, but from 1860 onwards forest organization was rapidly extended to the other provinces. The earlier years of forest administration were beset with difficulties, which is not surprising considering that the Department was charged with the unpopular duty of protecting the heritage of Nature from the rapacity of mankind, a duty which naturally roused the antagonism of the agricultural population of India. Exploration, demarcation and settlement, followed by efforts to introduce protection and some form of regular management, were the first duties of the Forest Department. Work on these lines, which is not yet completed in the more backward parts of the country, has been pursued steadily from the commencement, and in consequence large tracts of forest have been saved from ruin and are gradually being brought under efficient management. Whatever may have been the opinions held in some quarters half a century ago as to the need for a policy such as that expressed in Lord Dalhousie's memorable enunciation of 1855, there is no longer any doubt that results have amply justified the steps taken, and that in her forests India now possesses a property of constantly increasing value, the future importance of which it is hardly possible to over-estimate.

**Types of Forest.**—More than one-fifth of the total area of British India (including the Shan States) is under the control of the Forest Department. These areas are classified as reserved, protected or unclassed State forests. In the reserved forests rights of user in favour of individuals and the public are carefully recorded and limited at settlement while the boundaries are defined and demarcated; in the protected forests the record of rights is not so complete, the accrual of rights after settlement not being prohibited, and the boundaries are not always demarcated; while in the unclassified forests no systematic management is attempted, and as a rule the control amounts to nothing more than the collection of revenue until the areas are taken up for cultivation or are converted into reserved or protected forests. The total forest area of British India (including the Shan States) on 31st March 1924 was 228,850 square miles, or 20·8 of the total area. This was classed as follows: Reserved 108,449, Protected 7,931, Unclassed State 117,470.

Throughout this vast forest area, scattered over the length and breadth of India from the Himalayan snows to Cape Comorin and from

the arid Juniper tracts of Baluchistan to the eastern limits of the Shan States, there is, as may be imagined, an infinite variety in the types of forest vegetation, depending on variations of climate and soil and on other local factors. Broadly speaking, the following main types of forest may be distinguished:—

(1) Arid-country forests, extending over Sind, a considerable portion of Rajputana, part of Baluchistan and the south of the Punjab, in dry tracts where the rainfall is less than 20 inches. The number of species is few, the most important tree being the babul or kikar (*Acacia arabica*), which however in the driest regions exists only by the aid of river inundations.

(2) Deciduous forests, in which most of the trees are leafless for a portion of the year. These forests, which extend over large areas in the sub-Himalayan tract, the Peninsula of India and Burma, are among the most important, comprising as they do the greater part of the teak and sal forests.

(3) Evergreen forests.—These occur in regions of very heavy rainfall, such as the west coast of the Peninsula, the eastern sub-Himalayan tract, and the moister parts of Burma and are characterized by the great variety and luxuriance of their vegetation.

(4) Hill forests.—In these the vegetation varies considerably according to elevation and rainfall. In the Eastern Himalaya, Assam and Burma, the hill forests are characterized by various oaks, magnolias and laurels, while in Assam and Burma the Khasia pine (*Pinus khasya*) grows gregariously at elevations of 3,000 to 7,000 feet. In the North-Western Himalaya the chief timber tree is the deodar (*Cedrus deodara*), which occurs most commonly at elevations of 6,000 to 8,000 feet, and in association with oaks or blue pine (*Pinus excelsa*); towards its upper limit the deodar merges into very large areas of spruce and silver fir, while below it are found extensive forests of the long-needed pine (*Pinus longifolia*) which is tapped for resin.

(5) Littoral forests.—These occur on the sea coast and along tidal creeks. The most characteristic trees belong to the mangrove family (*Rhizophoraceae*). Behind the mangrove belt is an important type of forest occasionally inundated by high tides, in which the most valuable species is the "sundri" (*Heritiera fomes*).

**Forest Policy.**—The general policy of the Government of India in relation to forests was definitely laid down in 1904 by the classification of the areas under the control of the Department into four broad classes, namely:—

(a) Forests the preservation of which is essential on climatic or physical grounds. These are usually situated in hilly country, where the retention of forest growth is of vital importance on account of its influence on the storage of the rainfall and on the prevention of erosions and sudden floods.

(b) Forests which afford a supply of valuable timbers for commercial purposes, such, for example, as the teak forests of Burma, the sal forests of Northern, Central, and North-Eastern India, and the deodar and pine forests of the North-Western Himalaya.

(c) Minor forests, containing somewhat inferior kinds of timber, and managed for the production of wood, fodder, grazing and other produce for local consumption; these forests are of great importance in agricultural districts.

(d) Pasture lands.—These are not "forests" in the generally understood sense of the term, but grazing grounds managed by the Forest Department merely as a matter of convenience.

These four classes of forest are not always sharply divided from each other, and one and the same tract may to a certain extent be managed with more than one object.

**Administration.**—The forest business of the Government of India is carried out in the Department of Education, Health and Lands. The Inspector-General of Forests is the head of the Forest Department and is the technical adviser to the Government of India in forest matters. Under the Constitution of 1919, Forests were made a transferred subject in Bombay and Burma, where they had long been administered by the Provincial Governments, and in 1924 the Reforms Inquiry Committee presided over by the Hon. Sir Alexander Muddiman, Home Member of the Government of India, recommended that they be transferred in other provinces now unless any local Government on examination of the position can make out a convincing case against the transfer in its own province.

**Territorial charges.**—The various provinces are divided into one or more Forest Circles; each in charge of a Conservator of Forests; provinces containing three or more circles also have a Chief Conservator who is the head of the Department for his province. Circles are divided into a number of Forest Divisions, in charge of members of the Imperial or Provincial Forest Service; these Divisions in most cases correspond to civil districts. Each Division contains a number of Ranges in charge of junior members of the Provincial Service or of Forest Rangers or Deputy Rangers; heavy Divisions are also sometimes divided into Subdivisions. The Ranges are further subdivided into a number of beats or protective charges held by Forest Guards or in some cases by Foresters.

**Non-territorial charges.**—Apart from territorial charges there are various important posts of a non-territorial nature connected with Forest Research and Education, the preparation of Forest Working Plans, and other special duties.

**The Forest Service.**—The Forest Service comprises three branches:—

(1) The Indian (Imperial) Service with a sanctioned total personnel of 399 officers consisting of the Inspector-General of Forests, Chief Conservators, Conservators, Deputy and Assistant Conservators. Of these 358 are to be recruited direct to the service and the balance obtained by promotion from the Pro-

vincial Forest Service. The officers of this service are recruited as probationers:—

- (a) by direct appointment in the United Kingdom and India; and
- (b) by promotion from the Provincial Forest Service in India.

Recruitment in the United Kingdom and in India of candidates nominated for direct appointment is carried out under regulations laid down by the Secretary of State for India and the Government of India, respectively. Candidates for direct appointment in the United Kingdom are required to have obtained a degree with honours in some branch of Natural Science in a University of England, Wales or Ireland, or have passed the final B.Sc. examination in Pure Science in one of the Universities of Scotland. A degree in Applied Science is not considered as fulfilling these conditions. Candidates are required to produce evidence that they have a fair knowledge of either German or French. Weight is attached to the possession of a diploma or degree in Forestry.

Candidates for direct appointment in India are required to possess an Honours or a first class degree in Science or an M.Sc. degree of any class of a University incorporated by law in India.

Probationers are at present trained at a University possessing a forest school approved by the Secretary of State (Oxford, Cambridge and Edinburgh at present), this training being supplemented by a practical course, partly on the continent of Europe.

The process of Indianisation is steadily proceeding, as may be judged from the fact that out of a total of 7 probationers recruited in 1924, four were Indians. In addition, two more Indians, who were fully trained, were appointed on probation. The strength of the directly recruited cadre is according to the latest official return 314, while 19 probationers are under control in Great Britain.

(2) **The Indian Forest Engineering Service.**—This service was created in 1919 and at present consists of 17 Forest Engineers.

(3) **The Provincial Service.**—Formerly it consisted of Extra Deputy and Extra Assistant Conservators of Forests. All Extra Deputy Conservators who were considered to be fully qualified to hold a major charge were transferred to the Imperial Forest Service in 1920. Except for five unpromoted officers the class of Extra Deputy Conservators has been abolished and the service now consists of Extra Assistant Conservators only. The fixation of the strength of the personnel of the service rests with the local Governments.

Officers of this service are eligible for promotion to 12½ per cent. of the posts in the Indian Forest Service, such promotion being made by local Governments. These officers are recruited and trained in India, their recruitment being a matter for the local Governments. A certain number of posts in this service are filled by the promotion of specially promising Rangers. A two years' course of training for the Provincial Service is conducted by the Government of India at the Forest Research Institute and College, Dehra Dun, and it is open to local Governments

on payment of prescribed fees to depute candidates to undergo that course provided they are qualified for admission under the rules governing the course.

(4) The Subordinate Service, consisting of Forest Rangers (about 840), Deputy Rangers (about 900), Foresters (about 2,000) and Forest Guards (about 11,500). The Rangers are at present trained at three different centres—the Forest College at Dehra Dun (for provinces other than Burma, the Central Provinces and Madras), the Burma Forest School at Pynmana (for Burma), and the Madras Forest College at Coimbatore (for Madras and the Central Provinces). These three institutions were established in 1878, 1898 and 1912 respectively. The training of subordinates below the rank of Ranger is carried out in various local forest schools and training classes.

**Research.**—For the first fifty years of the existence of the Forest Department in India no attempt was made to organize the conduct of forest research, and thus to co-ordinate and elaborate the scientific knowledge so necessary to successful economic working. A commencement in organized forest research was at last made in 1908 by the establishment, at the instance of Sir Sainthill Hardley-Wilmot, then Inspector-General of Forests, of a Forest Research Institute at Dehra Dun. The Forest Research Institute, which is under the administrative control of the Inspector-General of Forests, is in the charge of a President. There are five main branches of research, namely Silviculture, Forest Botany, Forest Economic Products, Entomology and Chemistry, each branch being in charge of a research officer. In addition specialists are appointed temporarily when necessary and are attached to the Institute to carry out investigations in subjects of particular economic importance. Thus a paper pulp expert has been employed for some time to investigate possible new sources of paper-making materials of which the forests of India contain abundant supplies. Besides this, there are the Seasoning, the Timber Testing, and the Wood Preservation experts engaged temporarily on short term contracts. Indian Assistants have been appointed under them to receive the necessary technical training and experience in these subjects, with the object of eventually taking the place of experts if and when properly qualified.

Since 1906 research work has been prosecuted energetically so much so that in 1920 a new scheme was sanctioned for the expansion of the staff and site of the Institute. Since then new land has been acquired, on which new buildings are being built for accommodating the various expanded branches and the new machinery obtained from the United Kingdom. As a result of this and the employment of specialists in Seasoning, Timber Testing and Wood Preservation steady progress is being made in the investigations which should ultimately lead to the fuller and better utilization of the raw products produced by Indian forests.

**Forest Products.**—Forest produce is divided into two main heads—(1) Major produce, that is timber and firewood, and (2) Minor produce, comprising all other products such as

bamboos, leaves, fruits, fibres, grass, gums, resins, barks, animal and mineral products, etc. The average annual outturn of timber and fuel from all sources during the quinquennium ended 31st March 1924 the latest date for which statistics are available, was 38,08,40,000 cubic feet against an average of 30,72,00,000 cubic feet per annum attained in the preceding quinquennium. The highest figure ever attained under this head occurred in 1921-22, when a total of 38,13,88,000 c.ft. was reached, the year 1923-24 coming next with 35,36,90,000 c.ft. The figures for 1921-22 and 1923-24 represent respectively 2.3 and 2.4 c.ft. per acre of all classes of forests. For reserved forests only the yield in 1923-24 was 3.7 c.ft. per acre as compared with 3.3 c.ft. per acre in 1918-19, the last year of the last preceding quinquennium. The year 1921-22 was marked by a phenomenal output of teak in Burma, viz., 600,000 tons (30,000,000 cubic feet), which was more than 74 per cent. above the average annual output of the preceding quinquennium. With the output of teak for the year the revenue in Burma soared to Rs. 2,21,16,786 and the surplus to Rs. 1,30,33,892. The total outturn for the five years amounted to 2,476,849 tons, an increase of 751,000 tons, or 44 per cent. over the output in the preceding quinquennium.

The figures for the last quinquennium show that in 1923-24 the ratio of timber extracted by Government agency to that removed by purchasers was 5 to 29 compared with a ratio of 5 to 27 in 1919-20. During the period the outturn removed by Government agency rose by 41 per cent. whilst that removed by purchasers increased by 19 per cent. Timber and fuel to the value of Rs. 11,140 lakhs and minor products, including bamboos and grass, valued at Rs. 375 lakhs were removed by purchasers during the period. For the quinquennium 1918-19 the figures were Rs. 10,190 lakhs and Rs. 355 lakhs respectively.

Reviewing the figures of outturn, Government in a report issued in October 1925 says, "The results on the whole, considering the general trade depression, are most satisfactory and point to more intensive working of the forests and to better exploitation."

**Forest Industries.**—The important role which the forests of a country play in its general commercial welfare and in providing employment for its population is not always fully recognized. Fifteen years ago it was estimated that in Germany work in the forests provided employment for 1,000,000 persons while 3,000,000 persons, earning £30,000,000 a year, were employed in working up the raw material yielded by the forests. If accurate estimates were available for India, they would no doubt show that apart from the jungle population which is directly dependent on the forests and the large numbers of wood-cutters, sawyers, carters, carriers, raftmen and others working in and near them, employment on an excessive scale is provided to persons engaged in working up the raw products. Among these latter may be mentioned carpenters, wheelwrights, coopers, boat-builders, tanners, rope-makers, lac-manufacturers, basket-makers, and many other classes of skilled labourers. The Indian census shows over a million people and their dependents so employed in British India and nearly a further half million in Native

States, but these are probably below the actuals, as much forest labour is not whole-time labour, devoting seven or eight months in the year to forest work and the rest to agriculture. With the opening up of the forests, the extension of systematic working, the wider use of known products, and the possible discovery of new products, a steady and extensive development

of industries dependent on the forests of India may be confidently anticipated in the future.

**Financial Results.**—The steady growth of forest revenue, expenditure and surplus during the past 50 years is shown in the following statement, which gives annual averages for quinquennial periods:—

*Financial Results of Forest Administration in British India from 1864-65 to 1923-24 (in lakhs of rupees).*

Quinquennial period.	Gross revenue (average per annum).	(Expenditure average per annum).	Surplus (average per annum).	Percentage of surplus to gross revenue.
	Lakhs.	Lakhs.	Lakhs.	Lakhs.
1864-65 to 1868-69 .. .. .	27.4	23.8	13.6	36.4
1869-70 to 1873-74 .. .. .	56.3	39.3	17.0	30.2
1874-75 to 1878-79 .. .. .	66.6	45.8	20.8	31.2
1879-80 to 1883-84 .. .. .	88.2	56.1	32.1	36.4
1884-85 to 1888-89 .. .. .	116.7	74.3	42.4	36.2
1889-90 to 1893-94 .. .. .	159.5	86.0	73.5	46.1
1894-95 to 1898-99 .. .. .	177.2	93.0	79.2	44.7
1899-1900 to 1903-04 .. .. .	196.6	112.7	83.9	42.7
1904-05 to 1908-09 .. .. .	257.0	141.0	116.0	45.1
1909-10 to 1913-14 .. .. .	296.0	163.7	132.3	44.7
1914-15 to 1918-19 .. .. .	371.3	211.1	160.2	43.1
1919-20 to 1923-24 .. .. .	551.7	367.1	184.6	33.6

The gross revenue and surplus were Rs. 468.2 lakhs and Rs. 179.4 lakhs in 1918-19 and Rs. 544.9 lakhs and Rs. 195.6 lakhs in 1923-24 respectively. The surplus rose from Rs. 1,79,42,726 in 1918-19 to Rs. 2,19,12,540 in 1919-20, but during the next three years it steadily decreased, rising again to Rs. 1,84,60,547 during the last year of the quinquennium. The surplus in 1923-24 represents an average of 2.1 annas per acre of all classes of forest against 1.8 annas in 1918-19. The total surplus rose from Rs. 1,79,42,726 in 1918-19 to Rs. 1,95,60,943 in 1923-24. Government, reviewing the figures, state, "Financially, the Forest Department has had during the quinquennium to undergo a severe strain, even since the slump set in following on the short lived post-war boom in trade. But development solely with a view to increase the resources and earning capacity of the forests has never been lost sight of. Judging by the perceptible improvement in the general financial results all round, it is confidently expected that the improvements initiated in this quinquennial period will produce much better results when the slump ends."

**Prospects.**—The past work of the Forest Department has already borne fruit, not only in a steady rise of revenue but also in the improved condition of the forests resulting from careful protection and tending. Much has been done in the way of opening up the forests to regular exploitation; but there is still room for enormous development in this respect, for there are extensive areas of valuable forest as yet almost untouched, and these represent a vast capital locked up and not only lying idle but even deteriorating. Perhaps the two most pressing needs at present are the introduction of improved sylvicultural systems and the extension of roads and other export works to facilitate and cheapen extraction. These two must proceed simultaneously, since they are inter-dependent, for it is obvious that timber and other produce can be extracted far more economically if it is available in large quantities

within a limited radius than if it is scattered in small quantities over large tracts of country; indeed this question must often decide whether extraction is possible or not. Sylviculture teaches us how to effect this concentration and is therefore the bed-rock on which future results, financial and otherwise, must rest; it is of little avail to seek and develop new markets for timbers and other products if these cannot be produced in regular and sufficient quantities and extracted at a reasonable cost.

**Forest Products: Exploitation.**—The exploitation by the Forest Department, as a Commercial Department on business lines, of the great timber forests which are among the most valuable natural assets of the country, continues to attract the special attention of the various local Governments. In Madras, for instance, the working of the Forest panchayat system, whereby the increased knowledge of the difficulties of forest administration which the villager obtains when he has a voice in forest management is bringing home to him an understanding of the necessity for that administration. A further important step taken in regard to forest exploitation was the recruitment of a Chief Forest Engineer and a Logging Engineer from America. In Burma the work under way in the Government Timber Depot at Rangoon proves to be of great value to Government from the point of view of revenue and of considerable importance to the public from the point of view of industrial development. Research work on the seasoning of timbers has been started and results which promise to be of great value have already been obtained. Experimental work on the manufacture of furniture and in other similar directions are expected to give a value to a number of different timbers which are at present more or less unknown. The Myitmakha River Training Works started in 1905, which have since then been continued for the sale of Government teak timber, are of more than departmental interest. These works have also proved of

\* Excludes Delhi Province and the British Pargana of Manpur (Central India).

† Unclassified state forests or 'public forest lands,' as they are often called, include in many provinces all unoccupied waste, often entirely devoid of trees. So the statistics do not necessarily represent the wooded area.

‡ Including receipts under the following heads of the sums stated against them—Imperial (Rs. 29,551), Imperial Forest College (Rs. 1,67,389), (Rs. 7,76,642), Forest Survey (Rs. 95,944).

§ Including expenditure under the following heads of the sums stated against them—Imperial (Rs. 1,44,439), Imperial Forest College (Rs. 1,14,938), Imperial Forest College.

¶ Including deficits under the following heads of the sums stated against them—Imperial (Rs. 1,14,938), Imperial Forest College (Rs. —5,08,303), Forest Surveys (Rs. —95,944).

great value to local people inasmuch as they have led to the reclamation of a very considerable amount of land which was previously too low lying and swampy to be fit for cultivation. In the United Provinces, the institution of the Government Sawmill and Turnery, the Government Central Wood Working Institute and the Resin Distillery have led to important results. These, and many other examples which could be quoted, go to show that local Governments are fully alive to the importance of exploiting their forest resources to the fullest possible extent for the benefit of the country.

**Agencies.**—An agency has been established in India by the Government of India for the sale of Government timber and it is at present held

by Messrs. Martin & Co., Calcutta. The Government of India have also appointed Messrs. W. W. Howard Bros., London, as their agents in England for the sale of Indian timbers. Local Governments, and the Andamans especially, make full use of these two agencies for the sale of their woods and the London agency has in addition been the direct means of bringing to the notice of outside countries the immense possibilities of India's wealth in this direction.

**Bibliography.**—A large number of bulletins and other publications has been issued by the Forest Research Institute, and of these a list can be obtained from the Superintendent, Government Printing, India, Calcutta.

## RUBBER CULTIVATION.

The most important rubber-yielding tree found growing naturally in the Forests of India is *Ficus elastica*, a very large tree of the outer Himalayas from Nepal eastwards, in Assam, the Khasia Hills and Upper Burma. It has also been cultivated in Assam in the Charduar plantation in the Tezpur Sub-Division, as also in the Kulai plantation of the Gauhati Sub-Division in the Kamrup Division. There are also a number of other rubber-yielding trees found in the Indian and Burman forests from which rubber can be collected on terms quoted by Government. Attempts have been made to cultivate Para, Ceara and Castilleja in various parts of India and Burma. In India proper the chief attempts were made on the west coast, about 180 acres being planted from 1908 onward at Gersoppa. Similar attempts have been made in Madras; but at present Para rubber is being grown as a commercial product rather in Burma than the rest of India.

The production of rubber in India is confined to Assam, Burma, and the Madras Presidency.

The number of rubber plantations in 1923 mainly in Southern India and Burma, was 972 covering an area of 198,758 acres, as against 1,080, with an area of 191,267 acres, in 1922. New lands planted with rubber in the estates during 1923 amounted to 4,244 acres, and the area of

old cultivation abandoned to 1,424 acres, showing a net increase of 2,820 acres, and raising the total under rubber to 128,787 acres. Of this area only 74,371 acres were tapped. Of the total area under cultivation 49 per cent. was in Burma, 32 per cent. in Travancore, 9 per cent. in Madras, and 7 per cent. in Cochin.

The total production during 1923 is reported as 14,469,428 lb. as against 11,912,950 lb. in 1922. The yield per acre of tapped area was 222 lb. as against 209 lb. in 1922 in Cochin; 202, as against 208 lb. in Travancore; 193, as against 194 lb. in Burma; and 162, as against 160 lb. in Madras.

There was a general increase in the total production, especially in Travancore, Burma, and Madras. The total stock of dry rubber held on Dec. 31, 1923, was estimated at 4,691,156 lb. as compared with 3,688,533 lb. at the end of 1922. The exports of rubber by sea from British India to foreign countries during 1923-24 amounted to 15,000,000 lb. showing an increase of 23 per cent. as compared with the preceding year.

**Bibliography.**—For fuller details see "Dictionary of the Economic Products of India" and the abridged edition of the same published in 1908 under the title "The Commercial products of India" by Sir George Watts; and the "Commercial Guide to the Forest Economic Products of India" by R. S. Pearson, published by the Government Press, Calcutta, 1912.

## MATCH FACTORIES.

Imports of matches before the war averaged (for the two years 1912-13, 1913-14) 14½ million gross. This figure has been falling during the past three years and in 1923-24 was about 11½ million gross, valued at Rs. 1,45,92,000.

**Indian timbers for matches.**—In an article on the Indian match industry which appeared in the *Indian Agriculturist* the woods of the following species are said to be employed in Burma for match splints: *Bombax insignis*, *B. malabaricum* (stimul), *Anthocephalus Cadamba* (kadamb), *Sarcocaulis cordatus*, *Spondias mangifera* (amra), and *Beghiardita epicata* (palash). These woods are not the best for the

purpose, but are those most easily procurable. There are other kinds of white wood, such as poplar, pine, willow, and alder, in abundant quantities, but they are difficult to extract and transport and are therefore costly.

The attempts to manufacture matches in India have not hitherto been attended with great success, but recently two well-equipped factories have been started in Burma which give promise of good results. One of these is in Rangoon and is owned by Chinese; the other is at Mandalay, and is under European management. Still more recently a Swedish match company has started operations at Amherst outside Bombay.

## PAPER MAKING.

There are five large paper mills in the country working on up-to-date Western lines, viz., at Titagarh, Kankinara and Raniganj in Bengal, the Upper India Couper Mills at Lucknow and the Reay Mill at Poona. There are also two smaller mills at Bombay and Surat which make only country paper, and there are one or two other mills which recently were not working. The five large mills have a large Government connection, as the greater part of Government orders for paper is placed in India.

During the past year an interesting experimental paper-making plant has been installed at the Government of India Forest Research Institute at Dehra Dun. Specially designed to incorporate a new system patented by Mr. Raitt, Cellulose Expert to the Government of India, the object of this plant is to test the various paper-making fibres which are available over vast forest and hill areas in India and Burma, and thus encourage the establishment of pulp and paper mills on a commercial scale.

After many delays the Carnatic Paper Mills Company commenced operations at Rajahmundry, on the Godavari river, during the year, and it is estimated that the daily output will be ten tons of pulp and five tons of paper made from bamboos and paddy straw. In Southern India the Sri Minakshi Paper Mills, established many years ago as a small concern in Travancore State, appears to have taken a new lease of life and has ordered a new plant capable of turning out fifteen tons of paper per day, whilst in Assam a new company has been formed and is said to be waiting for the arrival of its plant. At Chittagong a new plant for manufacturing paper pulp from bamboos has commenced operations whilst another company has obtained a comprehensive concession for Bhabbar grass, in the Punjab and is erecting a factory near the headworks of the Western Jumna Canal, about 200 miles from Lahore.

The possibility of utilising the dense growths of bamboo in the hinterland of Cuttack has again been under consideration during the year, and the project has been investigated afresh by Mr. Raitt on behalf of the Government of Bihar and Orissa. Mr. Raitt estimates that in this area alone there is sufficient raw material for an output of 10,000 tons of paper pulp per annum.

**Raw Materials.**—The existence of the local industry depends chiefly on the supply of Sabal grass which on account of unfavourable seasons sometimes yields short crops. It is of great importance, therefore, to look for materials according to a constant outturn, and various reports have been published on the available paper-making materials. Considerable attention has been devoted to Bamboo, since 1875 when it was found that this plant—of which there are four chief varieties in India—yielded a fibrous paper stock which made a quality of paper superior to esparto grass and at a considerably less cost. It was at that time estimated that one acre of bamboo would yield 10 tons of dried stems equivalent to 6 tons of merchantable cellulose. In 1905 Mr. R. W. Sindall was invited by Government to visit Burma with a view of enquiring into the possibility of manu-

facturing paper pulp. His report on the subject appeared in March 1906. He made numerous experiments with bamboo and woods of Burma and laid down lines along which further enquiry should be made. Subsequently Mr. W. Raitt, a pulp expert, was engaged at the Forest Research Institute in conducting tests on the treatment of bamboos by the soda and sulphate processes, the treatment of bamboo before boiling, with remarks on the utilisation of nodes and internodes. His results were embodied in the "Report on the investigation of Bamboo or Production of Paper-pulp," published in 1911. Mr. R. S. Pearson of the Forest Service, Dehra Dun, as the outcome of enquiries made throughout India published in 1912 a note on the Utilization of Bamboo for the manufacture of Paper-pulp. The yield per acre from bamboo is larger than that of grasses usually used for paper. The cost of working into pulp has been estimated to yield a product cheaper than imported unbleached spruce sulphite and unbleached sabal grass pulp. In 1915 Mr. Dhruva Sumanas published a pamphlet, *Dendrocalamus Strictus Bamboo of the Dangs*, as the result of investigations carried on in Bansda State.

In a paper read before the Royal Society of Arts in 1921 Mr. Raitt gave an answer to the question: "What India can do to fill the gap in the world's shortage of paper?" He said that he thought it was "a modest estimate to say that from bamboo, taking only that which is available under possible manufacturing conditions, Burma, Bengal and South West India could produce ten million tons of pulp per annum, and Assam from Savannah grasses three million. India could therefore produce pulp for the whole world."

The leading Indian paper grass for the last thirty years has been the bhal, bhabar, or sabal grass of Northern India. It is a perennial grass plentiful in drier tracts from Chota Nagpur and Rajmahal to Nepal and Garhwal. The Calcutta mills draw their supplies from Sahibganj, Chota Nagpur and the Nepal Terai. The quantity annually exported from Sahibganj is between three to four lakhs of maunds. The cutting in these districts is said to commence in October when the plants are six or seven feet high. Sabal grass yields from 36·6 to 45·5 per cent. of bleached cellulose. A report by Mr. R. S. Pearson, Forest Economist, Dehra Dun, on the use of elephant grasses in Assam was issued in 1919. The most important species of grass found in the areas in which investigation has been made are Khagra (*Saccharum spontaneum*) and Batta (*Saccharum narenga*), with patches of Nal (*Phragmites karka*) on the more swampy ground. Hand samples of the above grasses were sent to England to be tested on a laboratory scale, while several tons were sent to an Indian paper mill to be made into paper. The results were satisfactory and proved that a very fair quality of paper can be produced from these grasses at a relatively low price. Small samples of such paper can be obtained by persons interested in these grasses from the Forest Economist, Forest Research Institute, Dehra Dun, who can also supply further details.

## The Press.

The newspaper Press in India is an essentially English institution and was introduced soon after the task of organising the administration was seriously taken in hand by the English in Bengal. In 1773 was passed the Regulating Act creating the Governor-Generalship and the Supreme Court in Bengal and within seven years at the end of the same decade, the first newspaper was started in Calcutta by an Englishman in January 1780. Exactly a century and a third has elapsed since, not a very long period certainly, a period almost measured by the life of a single newspaper, *The Times*, which came into existence only five years later in 1785; but then the period of British supremacy is not much longer, having commenced at Plassey, only twenty-three years earlier. Bombay followed Calcutta closely, and Madras did not lag much behind. In 1789 the first Bombay newspaper appeared, *The Bombay Herald*, followed next year by *The Bombay Courier*, a paper now represented by *The Times of India* with which it was amalgamated in 1861. In Bombay the advent of the press may be said to have followed the British occupation of the island much more later than was the case in Calcutta. In Calcutta the English were on suzerainty before Plassey, but in Bombay they were absolute masters after 1665, and it is somewhat strange that no Englishman should have thought of starting a newspaper during all those hundred and twenty-five years before the actual advent of *The Herald*.

The first newspaper was called *The Bengal Gazette* which is better known from the name of its founder as *Hicky's Gazette* or *Journal*. Hicky like most pioneers had to suffer for his enterprising spirit, though the fault was entirely his own, as he made his paper a medium of publishing gross scandal, and he and his journal disappeared from public view in 1782. Several journals rapidly followed Hicky's, though they did not fortunately copy its bad example. *The Indian Gazette* had a career of over half a century, when in 1833 it was merged into the *Bengal Harkara*, which came into existence only a little later, and both are now represented by *The Indian Daily News* with which they were amalgamated in 1866. No fewer than five papers followed in as many years, the *Bengal Gazette* of 1780, and one of these, *The Calcutta Gazette*, started in February 1784, under the avowed patronage of Government, flourishes still as the official gazette of the Bengal Government.

In 1821 a syndicate of European merchants and officials commenced the publication of *John Bull in the East*, a daily paper which was intended to reflect Tory opinion in India and set an example to the Press generally in the matter of moderation and restraint. The name of this journal was altered to *The Englishman* by the famous Stocqueler in 1836.

From its commencement the press was jealously watched by the authorities, who put serious restraints upon its independence and pursued a policy of discouragement and

rigorous control. Government objected to news of apparently the most trivial character affecting its servants. From 1791 to 1799 several editors were deported to Europe without trial and on short notice, whilst several more were censured and had to apologise. At the commencement of the rule of Wellesley Government promulgated stringent rules for the public press and instituted an official censor to whom everything was to be submitted before publication, the penalty for offending against these rules to be immediate deportation. These regulations continued in force till the time of the Marquis of Hastings who in 1818 abolished the censorship and substituted milder rules.

This change proved beneficial to the status of the press, for henceforward self-respecting and able men began slowly but steadily to join the ranks of journalism, which had till then been considered a low profession. Silk Buckingham, one of the ablest and best known of Anglo-Indian journalists of those days, availed himself of this comparative freedom to criticise the authorities, and under the short administration of Adam, a civilian who temporarily occupied Hastings' place, he was deported under rules specially passed. But Lord Amherst and still more Lord William Bentinck were persons of broad and liberal views, and under them the press was left practically free, though there existed certain regulations which were not enforced, though Lord Clare, who was Governor of Bombay from 1831 to 1835, once strongly but in vain urged the latter to enforce them. Metcalfe who succeeded for a brief period Bentinck, removed even these regulations, and brought about what is called the emancipation of the press in India in 1835, which was the beginning of a new era in the history of the Indian press. Among papers that came into being, was the *Bombay Times* which was started towards the close of 1838 by the leading merchants of Bombay, and which in 1861 changed its name to the *Times of India*. *The Bombay Gazette*, founded in 1791, ceased publication in 1914.

The liberal spirit in which Lord Hastings had begun to deal with the press led not only to the improvement in the tone and status of the Anglo-Indian press, but also to the rise of the Native or Indian Press. The first newspaper in any Indian language was the *Samachar Darpan* started by the famous Serampore Missionaries Ward, Carey and Marshman in 1818 in Bengali, and it received encouragement from Hastings who allowed it to circulate through the post office at one-fourth the usual rates. This was followed in 1822 by a purely native paper in Bombay called the *Bombay Samachar* which still exists, and thus was laid the foundation of the Native Indian Press which at the present day is by far the largest part of the press in India, numbering over 650 papers.

From 1835 to the Mutiny the press spread to other cities like Delhi, Agra, Gwalior, and even Lahore, whereas formerly it was chiefly confined to the Presidency towns. During

the Mutiny its freedom had to be temporarily controlled by the Gagging Act which Canning passed in June 1857 on account of the license of a very few papers, and owing still more to the fears of its circulating intelligence which might be prejudicial to public interests. The Act was passed only for a year at the end of which the press was once more free.

On India passing to the Crown in 1858, an era of prosperity and progress opened for the whole country in which the press participated. There were 19 Anglo-Indian papers at the beginning of this period in 1858 and 25 Native papers and the circulation of all was very small. The number of the former did not show a great rise in the next generation, but the rise in

influence and also circulation was satisfactory. Famous journalists like Robert Knight, James Maclean and Hurris Mookerji flourished in this generation. The *Civil and Military Gazette* was originally published in Simla as a weekly paper, the first issue being dated June 22nd, 1872. Prior to and in the days of the Mutiny the most famous paper in Northern India was the *Mofussil*, originally published at Meerut, but afterwards at Agra and then at Ambala. After a lively existence for a few years in Simla the *Civil and Military Gazette* acquired and incorporated the *Mofussil*, and in 1876 the office of the paper was transferred from Simla to Lahore, and the *Gazette* began to be published daily.

### INDIAN PRESS LAW.

Before 1835 all printing of books and papers was subject to licence by the Governor-General in Council, and the licences were issued or refused at the discretion of Government. Act XI of 1835 repealed the old Regulations and merely required registration of the printer and made a few minor requirements. That Act was replaced in 1867 by the present Press and Registration of Books Act, and, except for an Act which was in force for one year during the Mutiny, there was no further legislation directly affecting the Press until 1878 when the Vernacular Press Act was passed. That Act was repealed during the Viceroyalty of Lord Ripon in 1882. From that date until 1907 Government made no attempt to interfere directly with the liberty of the Press, the growth of sedition being dealt with in other ways by the passing in 1898 of section 124A of the Penal Code in its present form, which had been originally enacted in 1870, and by the introduction into the Penal Code of section 153A and into the Criminal Procedure Code of section 108. There were a certain number of prosecutions under those sections up to 1907, but the dissemination of sedition through the Press continued. In 1908 the Newspaper (Incitement to Offences) Act was passed which dealt with papers inciting to murder or to acts of violence. This Act failed to have the desired effect.

The Indian Press Act, 1910, was a measure of wider scope, the main object of which was to ensure that the Indian press generally should be kept within the limits of legitimate discussion.

The Act deals, not only with incitements to murder and acts of violence, but also with other specified classes of published matter, including any words or signs tending to seduce soldiers or sailors from their allegiance or duty, to bring into hatred or contempt the British Government, any Native Prince, or any section of His Majesty's subjects in India, or to intimidate public servants or private individuals.

The different sections of the Act have in view (i) Control over presses and means of publication; (ii) control over publishers of newspapers; (iii) control over the importation into British India and the transmission by the post of objectionable matter; (iv) the suppression of seditious or objectionable newspapers, books, or other documents wherever found.

**Repeal of Press Legislation.**—By the autumn of 1917 the Government of India had begun to consider the desirability of modifying at least one section of the Press Act to which great exception had been taken on account of the wide powers that it gave. Finally, after more than once consulting Local Governments, a Committee was appointed in February 1921 after a debate in the Legislative Assembly, to examine the Press and Registration of Books Act, 1867, and the Indian Press Act, 1910, and report what modifications were required in the existing law. That Committee made an unanimous report in July 1921, recommending:—

(1) The Press Act should be repealed.  
(2) The Newspapers Incitements to Offences Act should be repealed.

(3) The Press and Registration of Books Act and the Post Office Act should be amended where necessary to meet the conclusion noted below: (a) The name of the editor should be inscribed on every issue of a newspaper and the editor should be subject to the same liabilities as the printer and publisher, as regards criminal and civil responsibilities; (b) any person registering under the Press and Registration of Books Act should be a major as defined by the Indian Majority Act; (c) local Governments should retain the power of confiscating openly seditious leaflets, subject to the owner of the press or any other person aggrieved being able to protest before a court and challenge the seizure of such document, in which case the local Government ordering the confiscation should be called upon to prove the seditious character of the documents. The powers conferred by Sections 13 to 15 of the Press Act should be retained. Customs and Postal officers being empowered to seize seditious literature within the meaning of Section 124A of the I. P. C. subject to review on the part of the local Government and challenge by any persons interested in the courts; (e) any person challenging the orders of Government should do so in the local High Court; (f) the term of imprisonment prescribed in Sections 12, 13, 14 and 15 of the Press and Registration of Books Act should be reduced to six months; (g) the provisions of Section 16 of the Press Act should be reproduced in the Press and Registration of Books Act.

Effect was given to these recommendations during the year 1922.

**Press Association of India.**—At the end of 1915 this Association was formed in Bombay. According to the articles of constitution "Its objects shall be to protect the Press of the country by all lawful means from arbitrary laws and their administration, from all attempts of the Legislature to encroach on its liberty or of the executive authorities

to interfere with the free exercise of their calling by journalists and press proprietors, and for all other purposes of mutual help and protection which may be deemed advisable from time to time." Members pay a minimum subscription of Rs. 10 annually. The affairs of the Association are managed by a Council.

## Banking.

An event of great importance in the history of Indian banking was the formation on the 27th January 1921 of the Imperial Bank of India by amalgamation of the three Presidency Banks of Bengal, Bombay and Madras.

The idea of a Central Banking establishment for British India was mooted as early as 1880, and was the subject of a minute by Mr. James Wilson, when Finance Member, in 1889. Again, in 1897 Mr. Dickson, the well-known Secretary of the Bank of Bengal, submitted detailed proposals for an amalgamation of the three Presidency Banks. On various later occasions the matter was brought forward without result and it was discussed by the Chamberlain Commission on Indian Finance and Currency in 1913. The present scheme which has come to fruition was however the result of a *rapprochement* on the part of the Banks themselves as a result of the experience gained during the war and the realisation of the desirability of strengthening and extending the Banking system in India.

**The Presidency Banks:**—The history of the Presidency Banks in their relationship with Government falls into three well-defined stages. Prior to 1862 the Presidency Banks had the right of note issue, but were directly controlled by Government and the scope of their business was restricted by their charters. The second period was from 1862 to 1876. In 1862 the Banks were deprived of the right of note issue, though by their agreements of that year they were authorised to transact the paper currency business as agents of Government. As compensation for the loss of their right of issue, they were given the use of the Government balances and the management of the treasury work at the Presidency towns and at their branches. The old statutory limitations on their business were at the same time greatly relaxed, though the Government's power of control remained unchanged. In 1866 the agreements were revised and the paper currency business was removed from their control and placed under the direct management of Government. The third period dates from the Presidency Banks Act of 1876 by which nearly all the most important limitations of the earlier period were reimposed. Put very briefly, the principal restrictions imposed by this Act prohibited the Banks from conducting foreign exchange business, from borrowing or receiving deposits payable out of India, and from lending for a longer period than six months, or upon mortgage or on the security of immovable property or upon promissory notes bearing less than two independent names or upon goods, unless the goods of the title to them were deposited with the Bank as security. At the same time Government abandoned direct interference in the management, ceasing to appoint official directors and disposing of their shares in the Banks. The Banks no longer enjoyed the full use of the Government balances. Reserve Treasuries were constituted at the Presidency towns into which the surplus revenues were drawn and the balances left at the disposal of the Banks were strictly limited,

This system continued with only minor modifications until 1920. During the war, however, the policy was deliberately adopted of reducing the amount of the balances held in the Reserve Treasuries and leaving much larger balances with the Headquarters of the Presidency Banks in order to assist the money market.

**The Imperial Bank:**—Under the Imperial Bank of India Act (XLVII of 1920), the control of the Bank is entrusted to a Central Board of Governors with Local Boards at Calcutta, Bombay and Madras and such other places as the Central Board, with the previous sanction of the Governor-General in Council may determine. The Central Board of Governors consists of—

- (a) Managing Governors not exceeding two in number, appointed by the Governor-General in Council on recommendation by the Central Board;
- (b) the Presidents, Vice-Presidents and Secretaries of the Local Boards;
- (c) the Controller of the Currency, or other officer nominated by the Governor-General in Council; and
- (d) not more than four non-officials, nominated by the Governor-General in Council.

Representatives of any new Local Boards, which may be constituted, may be added at the discretion of the Central Board.

The Controller of the Currency and the Secretaries of the Local Boards are entitled to attend the meetings of the Central Board but not to vote under the agreement with Government. The Governor-General in Council is entitled to issue instructions to the Bank in respect of any matter which in his opinion vitally affects his financial policy or the safety of the Government balances, and if the Controller of the Currency or such other officer of Government as may be nominated by the Governor-General in Council to be a Governor of the Central Board shall give notice in writing to the Managing Governors that he considers that any action proposed to be taken by the Bank will be detrimental to the Government, as affecting the matters aforesaid, such action shall not be taken without the approval in writing of the Governor-General in Council. Under the Imperial Bank of India Act provision was made for the increase of the capital of the Bank. The capital of the three Presidency Banks consisted of 3½ crores of rupees in shares of Rs. 500 each, fully subscribed. The additional capital authorised was 7½ crores in shares of Rs. 500 each, of which Rs. 125 has been called up, making the present capital of the Bank Rs. 11½ crores, of which Rs. 5,62,50,000 has been paid up. The reserve fund of the Bank is Rs. 4,77,50,000 and the balance sheet of 30th June 1925 showed the Government Balance at Rs. 22,52,81,052. Other Deposits at Rs. 75,88,93,099 and Cash Rs. 35,82,92,251 with a percentage of cash to liabilities of 36·158,

**Class of Business:**—The Imperial Bank of India Act follows the Presidency Banks Act of 1876 in defining absolutely the class of business in which the Bank may engage, though the older limitations are modified in some minor points. It permits for the first time the constitution of a London Office and the borrowing of money in England for the purpose of the Bank's business upon the security of assets of the Bank, but not the opening of cash credits, keeping cash accounts or receiving deposits in London except from former customers of the Presidency Banks. The Act provides for an agreement between the Bank and the Secretary of State, and this agreement, which was signed on the 27th January 1921 and is for a period of ten years determinable thereafter by either party with one year's notice, provides, *inter alia*, for the following important matters:—

- (1) All the general banking business of the Government of India is to be carried out by the Imperial Bank.

- (2) The Bank will hold all the Treasury Balances at Headquarters and at its branches. This involves the abolition of the Reserve Treasury system.

- (3) Within five years the Bank undertakes to open 100 new branches of which the Government of India may determine the location of one in four. The branches and agencies of the three Presidency Banks prior to the date of amalgamation numbered 69, including the Colombo branch of the Bank of Madras. The Bank of Bengal had no branches prior to the proposal to transfer Government business to the Bank in 1861-62 but no less than 18 branches were established before 1868.

- (4) The management of the Public Debt will continue to be conducted by the Bank for specified remuneration.

In Schedule 1, Part 1, of the Act, the various descriptions of business which the Bank may transact are laid down, and in Part 2 it is expressly provided that the Bank shall not transact any kind of banking business other than that sanctioned in Part 1.

Briefly stated, the main classes of business sanctioned are :—

(1) Advancing money upon the security of :—

- (a) Stocks, &c., in which a trustee is authorised by Act to invest trust monies.
- (b) Securities issued by State aided Railways, notified by the Governor-General-in-Council.
- (c) Debentures, or other securities issued under Act, by, or on behalf of, a District Board.
- (d) Goods, or documents of title thereto, deposited with, or assigned to the Bank.
- (e) Accepted Bills of Exchange or Promissory Notes.
- (f) Fully paid shares and debentures of Companies with limited liability or immovable property or documents of title relating thereto, as collateral security where the original security is one of those specified in a, b, c, d and, if authorised by the Central Board, in e.

(2) With the sanction of the Local Government, advancing money to Courts of Wards upon security of estates in their charge.

(3) Drawing, accepting, discounting, buying and selling bills of exchange and other negotiable securities payable in India and Ceylon, and subject to the directions of the Governor-General in Council, the discounting, buying and selling of bills of exchange payable outside India for and from or to such Banks as may be approved.

(4) Investing the Banks' funds in the securities referred to in (1) a, b, c.

(5) Making Bank Post Bills and Letters of Credit payable in India and Ceylon.

(6) Buying and selling gold and silver.

(7) Receiving deposits.

(8) Receiving securities for safe custody.

(9) Selling such properties as may come into the Bank's possession in satisfaction of claims.

(10) Transacting agency business on commission.

(11) Acting as Administrator, for winding up estates.

(12) Drawing bills of exchange and granting letters of credit payable out of India for the use of principles in connection with (11) and also for private constituents for *bona fide* personal needs.

### Government Deposits.

The proportions which Government deposits have borne from time to time to the total Capital Reserve and deposit of the three Banks are shown below :—

*In Lakhs of Rupees.*

—			1 Capital.	2 Reserve.	3 Government deposits.	4 Other deposits.	Proportion of Government deposits to 1, 2, 3 & 4.

THE EXCHANGE BANKS.

The Banks carrying on Exchange business in India are merely branch agencies of Banks having their head offices in London, on the Continent, or in the Far East and the United States. Originally their business was confined almost exclusively to the financing of the external trade of India; but in recent years most of them, while continuing to finance this part of India's trade, have also taken an active part in the financing of the internal portion also at the places where their branches are situated.

At one time the Banks carried on their operations in India almost entirely with money borrowed elsewhere, principally in London—the home offices of the Banks attracting de-

posits for use in India by offering rates of interest much higher than the English Banks were able to quote. Within recent years however it has been discovered that it is possible to attract deposits in India on quite as favourable terms as can be done in London and a very large proportion of the financing done by the Exchange Banks is now carried through by means of money actually borrowed in India. No information is available as to how far each Bank has secured deposits in India, but the following statement published by the Director-General of Statistics in India shows how rapidly such deposits have grown in the aggregate within recent years.

## Exchange Banks' Investments.

Turning now to the question of the investment of the Banks' resources, so far as it concerns India, this to a great extent consists of the purchase of bills drawn against imports and exports to and from India.

The financing of the import trade originated and is carried through however for the most part by Branches outside India, the Indian Branches' share in the business consisting principally in collecting the amount of the bills at maturity and in furnishing their other branches with information as to the means and standing of the drawers of the bills, and it is as regards the export business that the Indian Branches are more immediately concerned. The Exchange Banks have practically a monopoly of the export finance in India and in view of the dimensions of the trade which has to be dealt with the Banks would under ordinary circumstances require to utilise a very large proportion of their resources in carrying through the business. They are able however by a system of rediscount in London to limit the employment of their own resources to a comparatively small figure in relation to the business they actually put through. No definite information can be secured as to the extent to which rediscounting in London is carried on but the following figures appearing in the balance sheets dated 31st December 1924 of the undenoted Banks will give some idea of this.

## LIABILITY ON BILLS OF EXCHANGE RE-DISCOUNTED AND STILL CURRENT.

£

Chartered Bank of India, Australia and China.	11,466,000
Eastern Bank, Ltd. . . . .	1,081,000
Hongkong and Shanghai Banking Corporation.	10,861,000
Mercantile Bank of India, Ltd. . . . .	3,991,000
National Bank of India, Ltd. . . . .	6,179,000
P. & O. Banking Corporation, Ltd. . . . .	15,462,000
	<u>49,040,000</u>

The above figures do not of course relate to re-discounts of Indian bills alone, as the Banks operate in other parts of the world also, but it may safely be inferred that bills drawn in India form a very large proportion of the whole.

The bills against exports are largely drawn at three months' sight and may either be "clean" or be accompanied by the documents relating to the goods in respect of which they are drawn. Most of them are drawn on well known firms at home or against credits opened by Banks or financial houses in England and bearing as they do an Exchange Bank endorsement they are readily taken up by the discount houses and Banks in London. Any bills purchased in India are sent home by the first possible Mail so that presuming they are rediscounted as soon as they reach London the Exchange Banks are able to secure the return of their money in about 16 or 17 days instead of having to wait for three months which would be the case if they were unable to rediscount. It must not be assumed however that all bills are rediscounted as soon as they reach London as at times it suits the Banks to hold up the bills in anticipation of a fall in the London discount rate while on occasions also the Banks prefer to hold the bills on their own account as an investment until maturity.

The Banks place themselves in funds in India for the purpose of purchasing export bills in a variety of ways of which the following are the principal:—

- (1) Proceeds of import bills as they mature.
- (2) Sale of drafts and telegraphic transfers payable in London and elsewhere out of India.
- (3) Purchase of Council Bills and Telegraphic Transfers payable in India from the Secretary of State.
- (4) Imports of bar gold and silver bullion.
- (5) Imports of sovereigns from London, Egypt or Australia.

The remaining business transacted by the Banks in India is of the usual nature and need not be given in detail.

An interesting event in Indian Banking history is the recent entry in the Banking field here of one of the English "Big Five." This has been brought about by the acquisition of the business of Cox & Co., by Lloyds Bank.

The following is a statement of the position of the various Exchange Banks carrying on business in India as at 31st December 1924 :—

*In Thousands of £.*

Name.	Capital.	Reserve.	Deposits.	Cash and Investments.
Chartered Bank of India, Australia & China, Ltd.	8,000	4,000	42,059	12,824

Banco Nacional Ultramarino	6,668	8,414	71,180	54,040

### JOINT STOCK BANKS.

Previous to 1906 there were few Banks of this description operating in India, and such as were then in existence were of comparatively small importance and had their business confined to a very restricted area. The rapid development of this class of Bank, which has been so marked a feature in Banking within recent years, really had its origin in Bombay and set in with the establishment of the Bank of India and the Indian Specie Bank in 1906. After that time there was a perfect stream of new flotations, and although many of the new Companies confined themselves to legitimate banking business, on the other hand a very large number engaged in other businesses in addition and can hardly be properly classed as Banks.

These Banks made very great strides during the first few years of their existence, but it was generally suspected in well informed circles that the business of many of the Banks was of a very speculative and unsafe character and it was a matter of no great surprise to many people when it became known that some of the Banks were in difficulties.

The first important failure to take place was that of the People's Bank of India and the loss of confidence caused by the failure of that Bank resulted in a very large number of other failures, the principal being that of the Indian Specie Bank.

Since those events of ten years ago, confidence has been largely restored. But in April 1923 the Alliance Bank of Simla suspended payment and is now in voluntary liquidation. The effect of the failure of this old established Bank might have been disastrous but for the prompt action of the Imperial Bank which dealt with the situation in close association with the Government of India. The Imperial Bank undertook to pay the depositors of the Alliance Bank 50 per cent. of the amounts due to them. A panic was averted and a critical period was passed through with little difficulty.

During 1923 the Tata Industrial Bank, which was established in 1918, was merged in the Central Bank of India.

The following shows the position of the better known existing Banks as it appears in the latest available Balance Sheets :—

*In Lakhs of Rupees.*

Name.	Capital.	Reserve.	Deposits.	Cash and Investments.

## INDIAN PRIVATE BANKERS AND SHROFFS.

Indian private Bankers and Shroffs flourished in India long before Joint Stock Banks were ever thought of, and it seems likely that they will continue to thrive for some very considerable time to come. The use of the word "Shroff" is usually associated with a person who charges usurious rates of interest to impecunious people, but this is hardly fair to the people known as "shroffs" in banking circles, as there is no doubt that the latter are of very real service to the business community and of very great assistance to Banks in India. Under present conditions the Banks in India can never hope to be able to get into sufficiently close touch with the affairs of the vast trading community in India to enable them to grant accommodation to more than a few of these traders direct, and it is in his capacity as middleman that the shroff proves of such great service. In this capacity also he brings a very considerable volume of business within the scope of the Presidency Banks Act, and enables the Presidency Banks to give accommodation which, without his assistance, the Banks would not be permitted to give. The shroff's position as an intermediary between the trading community and the Banks usually arises in something after the following manner. A shopkeeper in the bazaar, with limited means of his own, finds that, after using all his own money, he still requires say Rs. 25,000 to stock his shop suitably. He thereupon approaches the shroff, and the latter after very careful inquiries as to the shopkeeper's position grants the accommodation, if he is satisfied that the business is safe. The business, as a rule, is arranged through a hoondee broker, and in the case referred to the latter may probably approach about ten shroffs and secure accommodation from them to the extent of Rs. 2,500 each. A hoondee usually drawn at a currency of about 2 months is almost invariably taken by the shroffs in respect of such advances.

A stage is reached however when the demands on the shroffs are greater than they are able to meet out of their own money, and it is at this

point that the assistance of the Banks is called into requisition. The shroffs do this by taking a number of the bills they already hold to the Banks for discount under their endorsement, and the Banks accept such bills freely to an extent determined in each case by the standing of the shroff and the strength of the drawer. The extent to which any one shroff may grant accommodation in the bazaar is therefore dependent on two factors, viz., (1) the limit which he himself may think it advisable to place on his transactions, and (2) the extent to which the Banks are prepared to discount bills bearing his endorsement. The shroffs keep in very close touch with all the traders to whom they grant accommodation, and past experience has shown that the class of business above referred to is one of the safest the Banks can engage in.

The rates charged by the shroffs are usually based on the rates at which they in turn can discount the bills with the Banks and necessarily vary according to the standing of the borrower and with the season of the year. Generally speaking, however, a charge of two annas per cent. per mensem above the Bank's rate of discount, or  $1\frac{1}{2}\%$ , is a fair average rate charged in Bombay to a first class borrower. Rates in Calcutta and Madras are on a slightly higher scale due in a great measure to the fact that the competition among the shroffs for business is not so keen in these places as it is in Bombay.

The shroffs who engage in the class of business above described are principally Marwaries and Multanis having their Head Offices for the most part in Bikanir and Shikarpur, respectively, the business elsewhere than at the Head Offices being carried on by "Moonims" who have very wide powers.

It is not known to what extent native bankers and shroffs receive deposits and engage in exchange business throughout India, but there is no doubt that this is done to a very considerable extent.

## THE BANK RATE.

Formerly each Presidency Bank fixed its own Bank Rate, and the rates were not uniform. Now the Imperial Bank fixes the rate for the whole of India. The rate fixed represents the rate charged by the Banks on demand loans against Government securities only and advances on other securities or discounts are granted as

a rule at a slightly higher rate. Ordinarily such advances or discounts are granted at from one-half to one per cent. over the official rate; but this does not always apply and in the monsoon months, when the Bank rate is sometimes nominal, it often happens that such accommodation is granted at the official rate or even less.

The following statement shows the average constituted:—

Bank Rate since the Imperial Bank was

Year.					1st Half-year.	2nd Half-year.	Yearly average.
1921	..	..	..	..	6.038	5.108	5.573

1923	..	..	..	..	7.419	4.5	5.959
1924	..	..	..	..	8.05	5.315	6.682
1925	..	..	..	..	6.585	....	..

## BANKERS' CLEARING HOUSES.

The principal Clearing Houses in India are those of Calcutta, Bombay, Madras, Rangoon, Colombo and Karachi, and of these the first two are by far the most important. The members at these places consist of the Imperial Bank, most of the Exchange Banks and English Banking Agency firms, and a few of the better known of the local Joint Stock Banks. No Bank is entitled to claim to be a member as of right and any application for admission to a Clearing must be proposed and seconded by two members and be subject thereafter to ballot by the existing members.

The duties of settling Bank are undertaken by the Imperial Bank at each of the places mentioned and a representative of each member attends at the office of that Bank on each business day at the time fixed to deliver all cheques he may have negotiated on other members

and to receive in exchange all cheques drawn on him negotiated by the latter. After all the cheques have been received and delivered the representative of each Bank advises the settling Bank of the difference between his total receipts and deliveries and the settling Bank thereafter strikes a final balance to satisfy itself that the totals of the debtor balances agrees with the total of the creditor balances. The debtor Banks thereafter arrange to pay the amounts due by them to the settling Bank during the course of the day and the latter in turn arranges to pay on receipt of those amounts the balances due to the creditor Banks. In practice however all the members keep Bank accounts with the settling Bank so that the final balances are settled by cheques and book entries thus doing away with the necessity for cash in any form.

The figures for the Clearing Houses in India above referred to are given below :—

## Total amount of Cheques Cleared Annually.

*In lakhs of Rupees.*

## Life Insurance.

There are no publications from which a complete statistical survey of the various branches of insurance work in India can be obtained, but the official "Report on the working of Life Assurance Companies doing business in British India," published by the Government of India, (1924) gives much information in regard to the Life Assurance Companies subject to the provisions of the Indian Life Assurance Companies Act, 1912.

The oldest of the Indian Companies were established in Madras about 90 years ago: Bombay has none older than the Bombay Mutual, the Oriental and the Bombay Widows' Pension Fund which were established about 50 years ago. Life Assurance seems not to have been started in Bengal until much later, and it was not until 1906 that many Companies were established either in that Presidency or elsewhere in India. The year 1919 was marked by the formation of several new companies, more particularly in Bombay.

In his introductory note to the official publication already mentioned, Mr. H. G. W. Melkie, Actuary to the Government of India, dealing with the year 1924, says:—

The total amount of paid-up capital of the Indian companies was increased by over 1½ lakhs during the year and is now a little over 55 lakhs, over 17 lakhs of which has already been expended in preliminary and organization expenses, etc., and 6 lakhs of the balance has been earmarked to meet deficits disclosed at the time of the actual valuations of assets and liabilities.

The total sums assured remaining in force at the end of the year 1924 under ordinary life assurance policies issued by Indian companies is 42 crores. The new sums assured during the year were over 6½ crores. This new business is larger than in any previous year and is nearly four times as large as in 1916.

The average rate of annual premium payable under the policies issued by Indian companies is nearly  $\frac{1}{4}$  per cent. of the sum assured. The corresponding rate deducted from the returns to the British Board of Trade is lower, the difference being partly due to the fact that endowment assurances constitute a larger proportion of the policies issued by Indian than by British companies.

**Expenses.**—The expense ratio of the companies as a whole shows a distinct rise. This is partly due to the large increase in the amount of new business transacted but many companies undoubtedly conduct their business at a rate of expenditure higher than is provided for in the premiums charged and which, if not reduced, will eventually lead to insolvency. This is particularly the case with some of the companies established after 1910. In the following table the expense ratio is stated

separately for companies established in India before and subsequent to 1905:—

Year to which the accounts relate.	Ratio of expenses to premium income of Companies—		
	Established prior to 1905.	Of over 5 years' standing established after 1905.	Of not more than 5 years' standing.
1913 ..	18.1	35.4	49.6
1914 ..	17.3	31.8	72.4
1915 ..	16.7.	34.2	87.3
1916 ..	17.1	28.8	76.3
1917 ..	17.0	28.6	66.2
1918 ..	18.2	34.2	75.6
1919 ..	20.4	37.9	81.1
1920 ..	20.8	38.5	76.7
1921 ..	21.5	38.7	99.6
1922 ..	22.1	36.9	84.9
1923 ..	21.7	35.4	74.6
1924 ..	22.7	39.6	78.3

From an examination of the expense ratios of each different company it is found that although a few of the old companies have undesirably high expense ratios and a few of those established since 1905 have commendably small ratios, yet it is mainly amongst the latter that the undesirable high rates are noticeable.

Of the companies established in the past twenty years more than half are spending over 45 per cent. of their premium income. In this connection it may be pointed out that in the Industrial Assurance Companies Bill which was introduced in the British House of Lords in 1921, it was laid down that if the total expenditure, less certain undistributed profits, exceeded 40 per cent. of the premiums paid at weekly intervals and 25 per cent. of the other premiums paid in respect of industrial assurance business the Directors became jointly and severally liable to pay the excess to the company, and that if the expenditure exceeded these limits in any three consecutive years it would be a ground on which the Inspector-General could petition the court for the winding up of the company, without prejudice, however, to the liability of the Directors to make good the excess. Although this provision was not adopted when the Bill was finally passed into law in September 1923, it should receive the most serious consideration of extravagantly managed companies.

**Legislation.**—For some time past the Government of India were contemplating amendment of the existing Indian law relating to insurance companies in a comprehensive manner to cover other forms of insurance and among other things, generally to extend their control over insurance companies working in India. After a provisional draft Bill was

prepared, information was received of the appointment by the Board of Trade of a Departmental Committee to enquire and report what amendments are desirable in the English Assurance Act, 1909, in order to bring that Act into accord with present day requirements. Although it was considered advisable to defer action until the Government of India had an opportunity of seeing the report of the expert Committee they, on being informed that their draft Bill will not clash in principle with the recommendations of the Departmental Committee, published the Bill in the *Gazette of India* on the 20th June 1925. The Bill, after it was given wide publicity, through provincial governments and administrations inviting opinions thereon, was eventually introduced into the Central Legislature on the 25th of August 1925. As soon as the report of the Departmental Committee is received and the examination of the several opinions, which are being received, are finished, the Bill will be referred either to a Joint or Select Committee for further consideration before it is enacted into Law.

**Rates of Mortality.**—Up till now there has not been any unified effort on the part of the Indian companies to prepare a table of mortality applicable to the Indian lives assured in general. Of course the bigger companies have their own experience thoroughly investigated into, but the majority of the Indian companies have not their individual experience large enough to form the basis of a reliable mortality table and it is possibly desirable that a move be made by these smaller companies in the direction of a combined attempt being made to ascertain the mortality under each class of life assurance business transacted by them. During the past year the results of an investigation into the mortality of annuitants in Britain was published. It related to the twenty-one years from 1900 to 1920 but by carefully studying the improvement in the rates of mortality of the annuitants during that period it was possible to forecast the probable mortality of the future. This was found to be much lighter than the rate previously adopted by many companies. A similar investigation into the mortality of lives assured in Britain in 1924 and subsequent years is now being arranged by the Institute and the Faculty of Actuaries.

There is very little annuity business transacted in India which will provide experience suitable as the basis of a general annuity table, but for lives assured in Indian companies the mortality has been found to be approximately equal to the rates in the *Hm* (5) or *Om* (5) tables for lives 6 or 7 years older. In the Postal Insurance Scheme the mortality is much less than this.

In the population of India it is generally found that Parsis and Burmans experience a very light rate of mortality. In Madras it is lighter than in the Punjab which again exhibits a lighter rate than either Bengal, Bombay or the United Provinces. For Hindus the rate is lighter than for Mohammedans in Bengal, and about equal in Madras but heavier in Bombay, the United Provinces and in the

Punjab. For females the rate of mortality is less than for males in Madras and amongst Hindus in Bengal, Bombay and the United Provinces. In the Punjab and amongst Mohammedans in Bengal, Bombay and the United Provinces the female mortality is the heavier.

**Actuarial Valuations.**—Of the 53 existing Indian companies, 38 have submitted the results of actuarial valuation of their assets and liabilities. The majority have undergone valuation more than once, and altogether 90 valuation reports have been submitted by the companies now existing. The latest valuations disclosed a surplus in the case of 28 companies and deficit in 9 companies. In 4 cases the deficit was covered by the paid-up capital, thus proving solvency but precluding the payment of either bonus or dividend. In the remaining 5 cases it became necessary either to call up more capital or to alter the policy contracts. Thus only 15 companies out of a total of 53 have not undergone any actuarial valuation. Four of these transact business which is not readily susceptible of actuarial valuation and the remaining 11 have not yet reached the stage of having a valuation. The valuation reports of companies which have gone into liquidation are not included in the above number.

**Provident Insurance Societies.**—The essential difference between a life assurance company and a provident insurance society is that the company is subject to the Life Act and not to the Provident Insurance Societies Act, if, under assurances payable at death or on survival of any one life, it undertakes either to pay sums which in the aggregate exceed Rs. 500 or to receive premiums which in the aggregate exceed Rs. 25 in any one year where the period for which the premiums are payable is not limited, or which exceed Rs. 250 altogether where such period is limited. If, as may happen in the case of a dividing society, the sum assured payable at death is not fixed but may in certain contingencies exceed Rs. 500, the society is subject to the Life Act. The fact of either the sum assured or the premiums exceeding those limits under any form of insurance other than life assurance does not make the society subject to the Life Act.

Nineteen years ago there were about 1,200 societies in existence in India of the provident insurance society type. Now 33 only remain, 10 of which are proprietary and the rest mutual. The total paid-up capital of the proprietary societies is slightly over Rs. 56,000. The latest accounts received from the societies indicate that their total annual income is about 3 lakhs and their total funds amount to about 5½ lakhs. Thirteen of these societies either do ordinary life assurance business, or work on the dividing plan with a minimum guarantee, one is a widows' fund and another transacts sickness insurance business. These 15 societies could with advantage undergo actuarial valuation. The remaining 18 societies either work on the dividing plan without any minimum guarantee, or on the death call system, and are consequently not susceptible of actuarial

valuation. They, however, are mostly in a moribund state. Nine of the provident insurance societies transact other classes of business, mostly marriage insurance, in addition to life business.

**Indian Life Assurance Companies.**—The following list shows the Indian companies in existence in the several provinces of India arranged according to the year in which they were founded.

The names of mutual companies are printed in capitals.

Year when established	Madras Presidency.	Bombay Presidency.	Bengal Presidency.	Punjab.	United Provinces, Assam, Ajmer-Merwara, Central Provinces and Delhi.

**Post Office Insurance Fund.**—This was instituted by the Government of India for the benefit of the postal employees in 1883 but gradually admission to this Fund has been thrown open to almost all classes of Government servants who are employed on civil duties. On the 31st March 1924 there were 43,019 policies in force assuring a total sum of Rs. 7,80,61,507 including bonus additions. The life assurance fund on that date amounted to Rs. 2,19,67,705. The limit of assurance permissible under the rules of the Fund which was previously Rs. 4,000 has been raised to Rs. 10,000.

**British Colonial and Foreign Companies.**—There are at present 22 British and Colonial Life Offices which have a place of business in India. Of these 17 are constituted in Britain, 2 in Canada, 1 in Australia, 1 in

the Straits Settlements and 1 in Hongkong. Nearly all are partially exempt from the operation of the Indian Life Assurance Companies Act of 1912 on the ground that when it came into force, they were carrying on business in the United Kingdom in conformity with the provisions of the British Assurance Companies Act of 1909. The principal effects of the exemptions allowed to these British and Colonial companies are that they are freed from the necessity either of making a deposit with the Controller of the Currency or of making separate statements respecting their Indian business. Those granted exemptions are allowed to submit their accounts in the form prescribed by the British Assurance Companies Act of 1909. The Indian Life Act has to a great extent been enacted on the lines of the British Act.

The following table gives the list of non-Indian companies transacting life assurance business in India :—

Name of Company.	Year when established.	Head Office.	Other classes of Insurance business done. F = Fire; M = Marine. C = Capital redemption. S = Sickness and Accident. G = Fidelity Guarantee and Burglary, etc.						Percentage of Life Assurance premium income in the United Kingdom to total life assurance premium income.
Constituted in the United Kingdom.	1. Alliance ..	1824	London ..	F	M	C	S	G	98·4

**Amalgamations.**—The New York Life Insurance Company of America which formerly transacted business in India has transferred its Indian and British policies to the Sun Life Assurance Company of Canada under an agreement taking effect from 1st January 1922. The life assurance business of the China Mutual Insurance Company and the Shanghai Insurance Company both of Shanghai was also

transferred to the Sun Life Assurance Company of Canada in 1923. The rights of policyholders of these three Companies and the conditions of their policies are in no way affected by the amalgamations. These transferred companies have now no registered place of business in India and the actual transactions affecting the policy-holders are embodied in the accounts of the Sun Life Assurance Company.

\* This Company has, with effect from June 1922, been merged in the Royal London Mutual Insurance Society.

## The Railways.

The history of Indian Railways very closely reflects the financial vicissitudes of the country. Not for some time after the establishment of Railways in England was their construction in India contemplated, and then to test their applicability to Eastern conditions three experimental lines were sanctioned in 1845. These were from Calcutta to Raniganj (127 miles), the East Indian Railway; Bombay to Kalyan (33 miles), Great Indian Peninsula Railway; and Madras to Arkonam (39 miles), Madras Railway. Indian Railway building on a serious scale dates from Lord Dalhousie's great minute of 1853, wherein, after dwelling upon the great social, political and commercial advantages of connecting the chief cities by rail, he suggested a great scheme of trunk lines linking the Presidencies with each other and the inland regions with the principal ports. This reasoning commended itself to the Directors of the East India Company, and it was powerfully reinforced when, during the Mutiny, the barriers imposed on free communication were severely felt. As there was no private capital in India available for railway construction, English Companies, the interest on whose capital was guaranteed by the State, were formed for the purpose. By the end of 1859 contracts had been entered into with eight companies for the construction of 5,000 miles of line, involving a guaranteed capital of £52 millions. These companies were (1) the East Indian; (2) the Great Indian Peninsula; (3) the Madras; (4) the Bombay, Baroda and Central India; (5) the Eastern Bengal; (6) the Indian Branch, now the Oudh and Rohilkund State Railway; (7) the Sind, Punjab and Delhi, now merged in the North Western State Railway; (8) the Great Southern of India, now the South Indian Railway. The scheme laid the foundations of the Indian Railway system as it exists to-day.

### Early Disappointments.

The main principle in the formation of these companies was a Government guarantee on their capital, for this was the only condition on which investors would come forward. This guarantee was five per cent. coupled with the free grant of all the land required; in return the companies were required to share the surplus profits with the Government, after the guaranteed interest had been met; the interest charges were calculated at 22½ to the rupee; the Railways were to be sold to Government on fixed terms at the close of twenty-five years and the Government were to exercise close control over expenditure and working. The early results were disappointing. Whilst the Railways greatly increased the efficiency of the administration, the mobility of the troops, the trade of the country, and the movement of the population, they failed to make profits sufficient to meet the guaranteed interest. Some critics attributed this to the unnecessarily high standard of construction adopted, and to the engineers' ignorance of local conditions; the result was that by 1869 the deficit on the Railway budget was Rs. 18½ lakhs. Seeking for some more economical method of construction, the Government

secured sanction to the building of lines by direct State Agency, and funds were allotted for the purpose, the metre-gauge being adopted for cheapness. Funds soon lapsed and the money available had to be diverted to converting the Sind and Punjab lines from metre to broad-gauge for strategic reasons. Government had therefore again to resort to the system of guarantee, and the Indian Midland (1882-85), since absorbed by the Great Indian Peninsula; the Bengal-Nagpur (1883-87); the Southern Maratha (1882), and the Assam-Bengal (1891) were constructed under guarantees, but on easier terms than the first companies. Their total length was over 4,000 miles.

### Famine and Frontiers.

In 1879, embarrassed by famine and by the fall of the exchange value of the rupee, Government again endeavoured to enlist unaided private enterprise. Four companies were promoted:—the Nilgiri, the Delhi-Umballa-Kalka, the Bengal Central, and the Bengal North-Western. The first became bankrupt, the second and third received guarantees, and the Tirhut Railway had to be leased to the fourth. A step of even greater importance was taken when Native States were invited to undertake construction in their own territories, and the Nizam's Government guaranteed the interest on 330 miles of line in the State of Hyderabad. This was the first of the large system of Native State Railways. In the first period up to 1870, 4,255 miles were opened, of which all save 45 were on the broad-gauge; during the next ten years there were opened 4,239, making the total 8,494 (on the broad-gauge 6,562, the metre 1,865, and narrow 67). Then ensued a period of financial ease. It was broken by the fall in exchange and the costly lines built on the frontier. The Penjdeh incident, which brought Great Britain and Russia to the verge of war, necessitated the connection of our outposts at Quetta and Chaman with the main trunk lines. The sections through the desolate Harnai and Bolan Passes were enormously costly; it is said that they might have been ballasted with rupees; the long tunnel under the Kholak Pass added largely to this necessary, but unprofitable, outlay.

### Rebate Terms Established.

This induced the fourth period—the system of rebates. Instead of a gold subsidy, companies were offered a rebate on the gross earnings of the traffic interchanged with the main line, so that the dividend might rise to four per cent. but the rebate was limited to 20 per cent. of the gross earnings. Under these conditions, there were promoted the Ahmedabad-Prantel, the South Behar, and the Southern Punjab, although only in the case of the first were the terms strictly adhered to. The Barsi Light Railway, on the two feet six inches gauge, entered the field without any guarantee, and with rolling stock designed to illustrate the carrying power of this gauge. The rebates terms being found unattractive in view of the competition of 4 per cent. trustee stocks, they were revised in 1896 to provide for an

absolute guarantee of 8 per cent. with a share of surplus profits, or rebate up to the full extent of the main line's net earnings in supplement of their own net earnings, the total being limited to 3½ per cent. on the capital outlay. Under these terms, a considerable number of feeder line companies was promoted, though in none were the conditions arbitrarily exacted. As these terms did not at first attain their purpose, they were further revised, and in lieu was substituted an increase in the rate of guarantee from 8 to 8½ per cent. and of rebate from 3½ to 5 per cent. with equal division of surplus profits over 5 per cent. in both cases. At last, the requirements of the market were met, and there was for a time stood a mild boom in feeder railway construction and the stock of all the sound companies promoted stood at a substantial premium. Conditions changed after the war and the Acworth Committee so far from approving of this system, considered that the aim of the Government should be to reduce by amalgamation the number of existing companies and that it should only be in cases where the State cannot or will not provide adequate funds that private enterprise in this direction should be encouraged.

The existing Branch Line Companies have ceased for some time to raise additional capital for capital requirements. They have either obtained overdrafts from various Banks for this purpose at heavy rates of interest or issued debentures at special rates of interest (usually about 7 per cent.) or in several cases asked for money to be advanced to them by the Railway Board. So far, therefore, from reducing the amount that the Government of India have to raise in the open market, they were increasing the amount. For the above reasons, the Government of India have abolished this system and are now prepared themselves to find the capital required for the construction of extensions or branches to existing main line systems. They have also announced their readiness to consider the question of constructing branch or feeder lines which were not expected to be remunerative from the point of view of railway earnings upon a guarantee against loss from a Local Government or local authority which might desire to have such lines constructed for purely local reasons or on account of administrative advantages likely to accrue in particular areas. This proposal was put forward as affording a suitable method of reconciling the interests of the Central and the Local Governments and of providing for local bodies and for Local Governments a method of securing the construction of railways which may be required for purely local reasons and which, while not likely to prove remunerative on purely railway earnings, are likely to give such benefits to Local Governments and local bodies as will more than repay the amounts paid under the guarantee. Some such arrangements have already been made with Local Government, particularly in Burma and Madras.

#### Railway Profits Commence.

Meantime a much more important change was in progress. The gradual economic development of the country vastly increased the traffic, both passenger and goods. The falling in of the original contracts allowed Gov-

ernment to renew them on more favourable terms. The development of irrigation in the Punjab and Sind transformed the North-Western State Railway. Owing to the burden of maintaining the unprofitable Frontier lines, this was the Cinderella Railway in India—the scapegoat of the critics who protested against the unwisdom of constructing railways from borrowed capital. But with the completion of the Chenab and Jhelum Canals, the North-Western became one of the great grain lines of the world, choked with traffic at certain seasons of the year and making a large profit for the State. In 1900 the railways for the first time showed a small gain to the State. In succeeding years the net receipts grew rapidly. In the four years ended 1907-08 they averaged close upon £2 millions a year. In the following year there was a relapse. Bad harvests in India, accompanied by the monetary panic caused by the American financial crisis, led to a great falling off in receipts just when working expenses were rising, owing to the general increase in prices. Instead of a profit, there was a deficit of £1,240,000 in the railway accounts for 1908-09. But in the following year there was a reversion to a profit, and the net Railway gain has steadily increased. For the year ended March 1919 this gain amounted to £10,578,000. Although in a country like India, where the finances are mainly dependent upon the character of the monsoon, the railway revenue must fluctuate, there was no reason to anticipate a further deficit, but the net railway gain decreased to £3,767,000 in 1920-21 and there was an actual loss of £6,182,000 in 1921-22. As a result of the steps taken by the Railway Board, however, on the report of the Acworth Committee in 1921, this loss was changed into a gain of £813,000 in 1922-23 and this was further increased to a gain of £4,275,000 in 1923-24, and of £8,579,800 in 1924-25. Thanks to the separation of the Railway from the General Finances which is described later, and provided that the present railway policy is not influenced too much by political considerations, railways should continue to show a net yearly gain.

#### Contracts Revised.

One factor which helped to improve the financial position was the revision of the original contracts under which the guaranteed lines were constructed. The five per cent. dividend, guaranteed at 22½ per rupee, and the half-yearly settlements made these companies a drain on the State at a time when their stock was at a high premium. The first contract to fall in was the East Indian; the great line connecting Calcutta with Delhi and the Northern provinces. When the contract lapsed, the Government exercised their right of purchasing the line, paying the purchase-money in the form of terminable annuities, derived from revenue, carrying with them a sinking fund for the redemption of capital. The railway thus became a State line; but it was released to the Company which actually works it. Under these new conditions the East Indian Company brought to the State in the ten years ended 1909 after meeting all charges, including the payments on account of the terminable annuity by means of which the

purchase of the line was made, and interest on all capital outlay subsequent to the date of purchase, a clear profit of nearly ten millions. At the end of seventy-four years from 1880, when the annuity expires, the Government will come into receipt of a clear yearly income of upwards of £2,700,000, equivalent to the creation of a capital of sixty to seventy millions sterling. No other railway shows results quite equal to the East Indian, because, in addition to serving a rich country by an easy line, it possesses its own collieries and enjoys cheap coal. But with allowance for these factors, all the other guaranteed companies which have been acquired under similar conditions as their contracts expired, have proportionately swelled the revenue and assets of the State. It is difficult to estimate the amount which must be added to the capital debt of the Indian railways in order to counterbalance the loss during the period when the revenue did not meet the interest charges. According to one estimate it should be £50 millions. But even if that figure be taken, Government have a magnificent asset in their railway property.

#### Improving Open Lines.

These changes induced a corresponding change in Indian Railway policy. Up to 1900 the great work had been the provision of trunk lines. But with the completion of the Nagda-Muttra line, providing an alternative broad-gauge route from Bombay to Delhi through Eastern Rajputana, the trunk system was virtually complete. A direct broad gauge route from Bombay to Sind is needed, but chiefly for strategic purposes. The poor commercial prospects of the line and the opposition of the Rao of Cutch to any through line in his territories, keep this scheme in the background. There does not exist any through rail connection between India and Burma, although several routes have been surveyed; the mountainous character of the region to be traversed, and the easy means of communication with Burma by sea, rob this scheme of any living importance. Further survey work was undertaken between 1914 and 1920, the three routes to be surveyed being the coast route, the Manipur route, and the Hukong valley route. The metre-gauge systems of Northern and Southern India must also be connected and Karachi given direct broad-gauge connection with Delhi, a project that is now under investigation. But these works are subordinate to the necessity for bringing the open lines up to their traffic requirements and providing them with feeders. The sudden increase in the trade of India found the main lines totally unprepared. Costly works were necessary to double lines, improve the equipment, provide new and better yards and terminal facilities and to increase the rolling stock. Consequently the demands on the open lines have altogether overshadowed the provision of new lines. Even then the railway budget was found totally inadequate for the purpose, and a small Committee sat in London, under the chairmanship of Lord Inchcape, to consider ways and means. This Committee found that the amount which could be remuneratively spent on railway construction in India was limited only by the

capacity of the money market. They fixed the annual allotment at £12,000,000 a year. Even this reduced sum cannot always be provided.

#### Government Control.

As the original contracts carried a definite Government guarantee of interest, it was necessary for Government to exercise strong supervision and control over the expenditure during construction, and over management and expenditure after the lines were open for traffic. For these purposes a staff of Consulting Engineers was formed, and a whole system of checks and counterchecks established, leading up to the Railway Branch of the Public Works Department of the Government of India. As traffic developed, the Indian Railways outgrew this dry nursing, and when the original contracts expired, and the interests of Government and the Companies synchronised, it became not only vexatious but unnecessary. Accordingly in 1901-02 Mr. Thomas Robertson was deputed by the Secretary of State to examine the whole question of the organisation and working of the Indian Railways, and he recommended that the existing system should be replaced by a Railway Board, consisting of a Chairman and two members with a Secretary. The Board was formally constituted in March 1905. The Board is outside, but subordinate to the Government of India in which it is represented by the Department of Commerce and Industry. It prepares the railway programme of expenditure and considers the greater questions of policy and economy affecting all the lines. Its administrative duties include the construction of new lines by State agency, the carrying out of new works on open lines, the improvement of railway management with regard both to economy and public convenience, the arrangements for through traffic, the settlement of disputes between lines, the control and promotion of the staff on State lines, and the general supervision over the working and expenditure of the Company's lines. Two minor changes have taken place since the constitution of the Railway Board. In 1908, to meet the complaint that the Board was subjected to excessive control by the Department of Commerce and Industry, the powers of the Chairman were increased and he was given the status of a Secretary to Government with the right of independent access to the Viceroy; he usually sits in the Imperial Legislative Council as the representative of the Railway interest. In 1912 in consequence of complaints of the excessive interference of the Board with the Companies, an informal mission was undertaken by Lord Inchcape to reconcile differences. Various changes were introduced during the years 1912-1920 such as the modification of the rule that the President and members of the Railway Board should all be men of large experience in the working of railways due to the importance of financial and commercial considerations in connection with the control of Indian Railway policy. This decision was, however, revised in 1920 and an additional appointment of Financial Adviser to the Railway Board created instead. The question of the most suitable organisation was further fully examined by the Acworth Committee in 1921.

and a revised organisation which is described later was introduced from 1st April 1924.

#### Management.

The Railways managed by Companies have Boards of Directors in London. They are represented in India by an Agent, who has under him either a departmental organisation with a Traffic Manager, Chief Engineer, Locomotive and Carriage and Wagon Superintendent, Controller of Stores and Chief Auditor or a divisional organisation with a Chief Operating Superintendent, Chief Traffic Manager, Chief Engineer, Chief Mechanical Engineer, Controller of Stores and Chief Auditor. The State Railways are similarly organised.

#### Clearing House.

Proposals have several times been made for the establishment of a Clearing House but it was considered that this was not practicable. Conditions, however, have changed owing to the introduction of tabulating and sorting machines and a trial was started towards the end of 1925 on three railways to find out whether a Clearing House was possible or not in India. The work which would ordinarily be done by the Clearing House is done by the Audit Office of each Railway.

#### The Railway Conference.

In order to facilitate the adjustment of domestic questions, the Railway Conference was instituted in 1876. This Conference was consolidated into a permanent body in 1903 under the title of the Indian Railway Conference Association. It is under the direct control of the railways, it elects a President from amongst the members, and it has done much useful work.

The following statement brings out the more important features of the operation of Indian railways during the year 1924-25 together with similar information for the year 1923-24 :—

<i>Mileage open on the 31st March—</i>		1923-24.	1924-25.
1. Single line .. .. .	.. .. .	34,810.15	34,925.78
2. Double line or more .. .. .	.. .. .	3,228.37	3,344.03
3. Total route mileage .. .. .	.. .. .	38,038.52	38,269.78
4. Total track mileage .. .. .	.. .. .	50,984.68	51,472.85
<i>Capital and Revenue Earnings and Expenditure—</i>			
5. Total capital at charge including ferries and suspense on open line .. .. .	Rs.	7,17,93,02,000	7,33,37,38,000
6. Gross earnings .. .. .	.. .. .	1,07,79,66,000	1,14,75,20,000
7. Gross earnings per train mile .. .. .	.. .. .	6.78	7.01
8. Working expenses .. .. .	.. .. .	68,44,77,000	69,36,68,000
9. Working expenses per train mile .. .. .	.. .. .	4.31	4.24
10. Net earnings .. .. .	.. .. .	39,34,89,000	45,38,52,000*
11. Percentage of working expenses to gross earnings.	.. .. .	63.50	60.45
12. Percentage of net earnings on total capital outlay.	.. .. .	5.48	6.19
<i>Equipment—</i>			
13. Locomotives .. .. .	.. .. .	9,988	† 9,987
14. Passenger carriages .. .. .	.. .. .	* 20,068	* 20,577
15. Other passenger vehicles .. .. .	.. .. .	* 5,177	* 5,307
16. Goods stock .. .. .	.. .. .	† 214,011	† 221,260
<i>Passenger Traffic—</i>			
17. Number of passengers carried .. .. .	.. .. .	596,277,000	605,998,000
18. Passenger miles .. .. .	.. .. .	19,465,879,000	19,910,350,000
19. Average journey .. .. .	Miles.	34.3	34.5
20. Earnings from passengers carried .. .. .	Rs.	88,07,82,000	88,75,39,000
21. Average rate charged per passenger per mile .. .. .	Pies.	8.75	8.74
22. Total coaching earnings .. .. .	Rs.	44,05,26,000	44,90,60,000

\* Excluding departmental vehicles.  
† Excluding Railway service wagons;

‡ Excluding 7 motor compos.

#### The Indian Gauges.

The standard gauge for India is five feet six inches. When construction was started the broad-gauge school was strong, and it was thought advisable to have a broad-gauge in order to resist the influence of cyclones. But in 1870, when the State system was adopted it was decided to find a more economical gauge, for the open lines had cost £17,000 a mile. After much deliberation, the metre-gauge of 3 feet 3½ inches was adopted, because at that time the idea of adopting the metric system for India was in the air. The original intention was to make the metre-gauge lines provisional; they were to be converted into broad-gauge as soon as the traffic justified it; consequently they were built very light. But the traffic expanded with surprising rapidity, and it was found cheaper to improve the carrying power of the metre-gauge lines than to convert them to the broad-gauge. So, except in the Indus Valley, where the strategic situation demanded an unbroken gauge, the metre gauge lines were improved and they became a permanent feature in the railway system. Now there is a great metre-gauge system north of the Ganges connected with the Rajputana lines and Kathiawar. Another System in Southern India embracing the Southern Maratha and the South India Systems. These are not yet connected, but the necessary link from Khandwa by way of the Nizam's Hyderabad-Godavari Railway, cannot be long delayed. All the Burma lines are on the metre-gauge. Since the opening of the Barsi line, illustrating the capacity of the two feet six inch gauge; there has been developed a tendency to construct feeders on this rather than on the metre-gauge.

## Goods Traffic—

23. Number of tons carried .. .. .	98,078,000	106,582,000
24. Net ton miles .. .. .	18,827,873,000	21,208,691,000
25. Average haul .. .. .	258.6	273.4
26. Earnings from tonnage carried .. .. .	Rs. 60,28,13,000	68,44,68,000
27. Average rate charged for carrying a ton of goods one mile .. .. .	Pies. 6.15	6.00
28. Total goods earnings .. .. .	60,63,69,000	68,82,04,000
Number of employees .. .. .	720,754	740,854

\*\* Based on tons originating.

At the close of the year 1924-25 the total capital invested in railways was Rupees 7,33,37,38,000 represented by a property which in terms of route mileage amounted to 38,270 miles of railway. This property brought in to the owners a return of 6.10 per cent. on the capital at charge. Similar figures for the railways owned by the State are:—

	Rs.
Total capital at charge ..	6,52,03,26,000
Total route mileage ..	27,325
Return on capital outlay ..	5.92

After providing for interest, annuity and other similar charges the working of the State-owned railways resulted in a net gain of Rs. 12,88,98,000 as compared with a net gain of Rs. 6,41,26,000 in the previous year. This result was largely due to an increase in gross earnings of Rs. 66.7 lakhs with an increase of only Rs. 76 lakhs in working expenses with the result that the percentage on gross earnings dropped from 64.58 per cent. to 61.53 per cent.

**Railway Board Reorganised.**—The machinery by which the Government of India controls the railways of the country has been frequently under review in the past. The basis of the system which was superseded in April 1924 was evolved in 1904 as a result of the investigations of Mr. Robertson and the Railway Board was established in the following year. Some of the difficulties involved in the constitution of a controlling authority for the railways of India may be realised from a study of the "Notes on the Relation of the Government to Railways in India" printed as an appendix to the Railway Administration report for 1922-23. These notes bring out the great diversity of conditions prevailing which involve the Railway Department in the exercise of the functions of—

(a) the directly controlling authority of the three State-worked systems aggregating 15,414 miles in 1925,

(b) the representative of the predominant owning partner in systems aggregating 27,325 miles,

(c) the guarantor of many of the smaller companies, and

(d) the statutory authority over all railways in India.

Moreover in all questions relating to railways or extra municipal tramways in which Provincial Governments are concerned, the Railway Department is called upon to watch the interests of the Central Government and is frequently asked to advise the Local Governments. Its duties do not end there. The future development of railways depends largely on the Government of India and the Railway Department is therefore

called upon to plan out schemes of development, to investigate and survey new lines and to arrange for financing their construction. The statement of the varied responsibilities of the Government of India in regard to railways might be extended almost indefinitely. It will perhaps be sufficient to mention only the complications that may and do arise owing to the very considerable railway mileage in Indian States. In the exercise of all these functions the Railway Department is a Department of the Government of India, its policy must be in accord with the policy of the Government as a whole and every decision must be made with that consideration in mind. The evolution of a satisfactory authority for the administration of these varied functions has proved extremely difficult and the question was one of those referred to the Railway Committee (1920-21) presided over by Sir William Acworth who expressed the unanimous opinion that material changes were necessary in the constitution of the Railway Board. Amongst their recommendations they advised the early appointment of a Chief Commissioner of Railways whose first duty should be to prepare a definite scheme for the reorganisation of the Railway Department and Mr. C. D. M. Hindley, formerly Agent of the East Indian Railway and Chairman of the Calcutta Port Trust, was appointed Chief Commissioner on November 1st, 1922.

The principal constitutional change involved in this appointment is that the Chief Commissioner who takes the place of the President of the Railway Board is solely responsible under the Government of India—for arriving at decisions on technical matters and for advising the Government of India on matters of railway policy and is not, as was the President, subject to be out-voted and over-ruled by his colleagues on the Board. The detailed re-organisation of the Railway Board in accordance with the Chief Commissioner's proposals required careful consideration but one of the most important of his recommendations namely the appointment of a Financial Commissioner was considered of particular urgency and the Secretary of State's sanction was therefore obtained to the appointment of Mr. G. G. Sim, C.I.E., I.C.S., who joined the Board on April 1st, 1923. While in the person of the Chief Engineer the Railway Board has always had available the technical advice of a senior Civil Engineer in Mechanical Engineering questions it has had to depend on outside assistance. The disadvantages of this arrangement have become increasingly evident and it was therefore decided with effect from November 1st, 1922, to create the new appointment of Chief Mechanical Engineer with the Railway Board.

In the new organisation adopted from the 1st of April 1924, the Board consists of a Chief Commissioner, a Financial Commissioner and two Members, one of whom deals more particularly with traffic and establishment questions while the other deals with technical questions relating to civil and mechanical engineering.

Under the members are four Directors for

- (1) Traffic.
- (2) Mechanical Engineering.
- (3) Civil Engineering.
- (4) Establishment.

These Directors are executive officers and heads of branches and have the power to decide questions which do not affect the policy of the Board.

Working under the Directors are Deputy Directors of Traffic, Stores, Projects, Way and Works and Establishment and an Assistant Director, Technical, in charge of the Drawing Branch. In addition a Deputy Director in charge of statistics has been appointed.

The Deputy Directors are immediately in charge of branches dealing with definite phases of the working. The Traffic Branch deals with both the operating and commercial sides of traffic working; the Stores Branch deals mainly with the calling for tenders and placing of orders for all classes of rolling stock and generally with the supply of stores and materials. In the Project Branch are considered all questions of new construction and developments while the Way and Works Branch deals with all works on the open line. In the Establishment Branch all questions relating to personnel on railways, such as scales of pay, recruitment, leave rules, etc., the training of the staff, Local Advisory Councils, medical arrangements, Indian Workmen's Compensation Act, etc., are dealt with. The Statistics Branch is responsible for collecting statistical information required by all branches and at the same time receives monthly statements furnished by railways and circulates comparative abstracts with notes criticising the results attained on railways. This branch is also responsible for the issue of the Annual Report on Indian Railways by the Railway Board. As it has been found that the Deputy Director of Statistics has to spend a considerable portion of his time in routine work and in checking the correctness of the statistics furnished to the Board, it has been decided to appoint an Assistant Director of Statistics to assist him so that he can concentrate more on the use to be made of the statistics and on helping Railway Administrations with their own figures.

There is also a Secretary who is responsible for the general conduct of work in the department, for co-ordination between branches and in particular for the correct relations between the department and other departments of Government. He is assisted by an Assistant Secretary who was formerly called the Registrar.

Experience of the working of this organisation during 1924-25 brought out the fact that sufficient staff had not been provided on the financial side and when the Legislative Assembly agreed to the separation of the railway finances from the general finances of the country in September 1924, it was found necessary to appoint at once, with the sanction of the Secretary of State, a Deputy Director and an

Assistant Director of Finance, and in August 1925 the further appointment of a Director of Finance was also made.

During 1925, however, it has been found possible to make certain changes as a tentative measure under which the posts of Deputy Director Establishment, Deputy Director, Way and Works, Deputy Director, Traffic, Assistant Director, Technical, and Assistant Secretary have been held in abeyance or abolished and posts of Deputy Secretary, Technical Officer and Chief Superintendent created. The Deputy Secretary deals with part of the work formerly done by the Deputy Director Establishment and Assistant Secretary, the remainder of the Establishment work being transferred to the Finance branch of the Office while the Technical Officer acts as Secretary to the various technical Committees appointed by the Board and is in charge of the work formerly done by the Assistant Director, Terminal. The Chief Superintendent has taken over part of the work done by the Assistant Secretary and acts at the same time as Superintendent of one of the branches.

The question of transferring the supervision of railway accounts of State Railways from the Finance Department to the Railway Board has been under consideration for some time and in accordance with a resolution adopted, by the Legislative Assembly in September 1925, a start has been made with the transfer of the supervision of railway accounts on the East Indian Railway. At the same time a separate Audit Staff has been appointed reporting directly to the Auditor-General. If the revised procedure proves a success, it will probably be extended to other State Railways.

**State versus Company Management.**—The relative advantages and disadvantages of State and Company management of the railways owned by Government which comprise the great bulk of the railway mileage in India have been the subject of discussion in official circles and the public press for many years. In India the question is complicated by the fact that the more important companies have not in recent years been the owners of the railways which they manage and the headquarters of their Boards are in London. The subject was one, perhaps the most important, of the terms of reference of the Acworth Railway Committee. That Committee was, unfortunately, unable to make a unanimous recommendation on this point, their members being equally divided in favour of State management and Company management. They were, however, unanimous in recommending that the present system of management by Boards of Directors in London should not be extended beyond the terms of the existing contracts and this recommendation has met with general public acceptance. During the year 1922-23, the question was again referred to certain Local Governments and public bodies and opinions collected and discussed. The approaching termination of the East Indian Railway contract on 31st December 1924 and of that of the Great Indian Peninsula Railway on 30th June 1925 rendered an early decision on this question imperative. When the question was debated in the Legislative Assembly in February 1923, the non-official Indian Members were almost unani-

mously in favour of State management and indeed were able to carry a resolution recommending the placing of the East Indian Railway and the Great Indian Peninsula Railway under State management at the close of their present contracts. The Government of India, however, expressed themselves as being so convinced by the almost universal failure of this method in other countries that they proposed, while accepting the necessity for taking over the management of the East Indian Railway and the Great Indian Peninsula Railway to continue their efforts to devise a satisfactory form of Company domiciled in India to take these railways over eventually on a basis of real Company management. The position at the close of the year under review was that arrangements had been instituted for bringing both these railways under State management at the termination of their contracts.

**Separation of the Railway from the General Finances.**—The question of the separation of the railway from the general finances has been under consideration for some time and as a result of the recommendations of the Acworth Committee in 1921, the question was further examined by the Railway Finance Committee and the Legislative Assembly but it was decided to postpone a definite decision for the present.

The question was examined afresh in connection with the recommendation of the Retrenchment Committee in 1923, that the railways in India should be so worked as to yield an average return of at least 5½ per cent. on the capital at charge and it was decided that a suitable time had arrived when this separation could be carried out. A resolution was accordingly introduced in the Assembly on the 3rd March 1924, recommending to the Governor-General in Council:—  
“that in order to relieve the general budget from the violent fluctuations caused by the incorporation therein of the railway estimates and to enable the railway to carry out a continuous railway policy based on the necessity of making a definite return over a period of years to the State on the Capital expended on railways:—

(1) The railway finances shall be separated from the general finances of the country and the general revenues shall receive a definite annual contribution from railways which shall be the first charge on railway earnings.

(2) The contribution shall be a sum equal to five-sixths of 1 per cent. on the capital at charge of the railways (excluding capital contributed by Companies and Indian States and Capital expenditure on strategic Railways) at the end of the penultimate financial year plus one-fifth of any surplus profits remaining after payment of this fixed return, subject to the condition that if any year railway revenues are insufficient to provide the percentage of five-sixths of 1 per cent. on the capital at charges surplus profits in the next or subsequent years, will not be deemed to have accrued for purposes of division until such deficiency has been made good. From the contribution so fixed will be deducted the loss in working, and the interest on capital expenditure on strategic lines.

(3) Any surplus profits that exist after payment of these charges shall be available for the railway administration to be utilised in

(a) forming reserves for

(i) equalising dividends, that is to say, for securing the payment of the percentage contribution to the general revenues in lean years,

(ii) depreciation,

(iii) writing down and writing off capital,  
(b) the improvement of services rendered to the public,

(c) the reduction of rates.

(4) The railway administration shall be entitled, subject to such conditions as may be prescribed by the Government of India, to borrow temporarily from capital or from the reserves for the purpose of meeting expenditure for which there is no provision or insufficient provision in the revenue budget subject to the obligation to make repayment of borrowings out of the revenue budgets of subsequent years.

(5) In accordance with present practice the figures of gross receipts and expenditure of railways will be included in the Budget Statement. The proposed expenditure will, as at present, be placed before the Legislative Assembly in the form of a demand for grants and on a separate day or days among the days allotted for the discussion of the demands for grants the Member in charge of the Railways will make a general statement on railway accounts and working. Any reductions in the demand for grants for railways resulting from the votes of the Legislative Assembly will not ensure to general revenues, i.e., will not have the effect of increasing the fixed contribution for the year.

(6) The Railway Department will place the estimate of railway expenditure before the Central Advisory Council on some date prior to the date for the discussion of the demand for grants for railways.”

When introducing this resolution the Hon'ble Member for Commerce stated that it had been represented to him that there was a general feeling in the House that before the House was asked to commit itself to those proposals, it should be allowed to refer them to a committee of the House. He further stated that he had no objection to this course provided that the committee met rapidly. This was agreed to and members were appointed.

The committee met twice and considered the resolution but was not able within the time allowed to satisfy itself fully as to the effect of the proposals in the resolution on the control of the Assembly over railway finance and policy and as to the amount and form of contribution to be paid by the railways to general revenues. In the circumstances, the committee recommended that the consideration of the resolution be adjourned till the autumn session to allow the committee further time for examination. Government raised no objection to this proposal and it was agreed to by the Assembly.

The resolution was further examined by the Standing Finance Committee in September and as a result of the views expressed by the committee and in the Assembly certain modifications were introduced. The final resolution agreed to by the Assembly on September 20th, 1924, and accepted by Government differed from the original resolution in that the yearly contribution had been placed at 1 per cent. instead of 5/6th per cent. on the capital at charge and if the surplus remaining after this payment to

General Revenues should exceed 3 crores, only 1/3rd of the excess over 3 crores were to be transferred to the Railway Reserve and the remaining 2/3rd was to accrue to General Revenues. At the same time a Standing Finance Committee for Railways was to be constituted to examine the estimate of railways expenditure and the demand for grants, the programme revenue expenditure being shown under a depreciation fund. This committee was to consist of one nominated official member of the Legislative Assembly as Chairman and 11 members elected by the Legislative Assembly from that body. This would be in addition to the Central Advisory Council which will include the Members of the Standing Finance Committee and certain other official and non-official members from the Legislative Assembly and Council of State. These arrangements were to be subject to periodic revision but to be provisionally tried for at least 3 years. They would, however, only hold good as long as the E. I. Railway and the G. I. P. Railway and existing State Managed Railways remain under State management and if any contract for the transfer of any of the above to Company management was concluded against the advice of the Assembly, the Assembly would be at liberty to terminate the arrangements in this resolution.

The Assembly in an addendum recommended that the railway services and the Railway Board should be rapidly Indianised and that the stores for the State Managed Railways should be purchased through the organisation of the Indian Stores Department.

**Re-organisation problems.**—The growing complexity of railway administration in India and the evolution of new methods of controlling traffic have given a stimulus to the efforts of various railways to revise their organisations. The general direction in which this re-organisation is being considered is that of consolidation into one department of the operating or transportation work of the railway, including the provision of power. This system which is commonly known as the divisional system, was first adopted on the Great Indian Peninsula Railway during 1922-23 and entailed :—

- (a) the separation of the commercial and operative duties of the Traffic Department,
- (b) the separation of the mechanical and running duties of the Locomotive Department,
- (c) the fusion of the operative duties of the Traffic Department with the running duties of the Locomotive Department.

Under the new organisation there is now—

- (1) a Chief Transportation Superintendent in charge of all operating functions,
- (2) a Chief Traffic Manager in charge of the commercial side of the railway,
- (3) a Chief Mechanical Engineer in charge of the design and construction of rolling stock and of all repairs and renewals of rolling stock carried out in the central workshops.

This organisation is more or less similar to the divisional organisation found on most American Railways with the exception that the Engineering Department still works on a departmental basis. This, however, is being changed and the maintenance of Way and Works is being brought into the divisional organisation while new construction will still remain outside.

A somewhat similar organisation was introduced on the North-Western Railway from 1st

October 1924, except that it follows rather the organisation in force on the South African Railways where the railways are divided into a number of areas or divisions each under one chief officer and all reporting to the General Manager who is assisted by a number of principal officers in charge of definite phases of the working. A similar organisation was also introduced on the East Indian and Oudh and Rohilkhand Railways early in 1925.

**Revision of Railway statistics.**—A Committee consisting of one officer from the Traffic Department and one from the Audit Department of the North Western Railway was appointed in October 1922 to suggest alterations in the existing administrative statistics furnished by railways to the Railway Board and to bring them into line with present up-to-date practice. For many years after the first railways were opened, such statistics as were produced were primarily directed towards showing the return on capital invested, although commodity statistics were also prepared to some extent for trade purposes. It was only when comparisons between different railway systems came to be a matter of interest that statistics of actual working were found to be necessary and even then the tabulation and examination of these figures were directed primarily towards ascertaining the ultimate cost of transportation as a marketable commodity. The introduction of scientific methods of railway working in recent years, however, has shown that properly prepared statistics form a most valuable portion of the machinery whereby the railway management is able to improve efficiency in the details of working and effect economies in working costs.

The existing statistics are based on the report of a Committee which sat in 1880 to revise the form of the statistics. Considerable changes have been introduced since then, and certain individual railway administrations have made considerable progress in the introduction of modern railway statistics, but the Acworth Committee which sat in 1921 criticised the figures prepared and used for the purposes of the Railway Board as being out of date and not in conformity with present-day practice.

The main changes recommended by the Committee of 1922 and accepted by the Railway Board are :—

- (1) The introduction of monthly statistics in addition to the yearly statistics at present furnished to the Railway Board.

- (2) The classification of railways under three classes for statistical purposes.

The former change will ensure the supply of up-to-date information of the working of railways to the Railway Board and will enable railways to compare their own working with that of other railways month by month as is done in England and America. The second change will relieve the smaller railways of the necessity for compiling the detailed statistics which larger railways have to prepare.

Revised Statistics were introduced from 1st October 1923, on all railways and already their value has been proved as not only on railways able to compare their results with those obtained by other railways but the Railway Board is in possession of up-to-date figures of working of all railways. Starting from April 1924, the complete monthly statistics of all class I Railways

have been published on the lines of the monthly statements issued by the ministry of Transport for English Railways and are on sale to the public.

**Capital Expenditure.**—The outlay during the year 1924-25 was Rs. 15.50 crores, of which Rs. 13.47 crores represented expenditure incurred on State-owned lines.

Considerable progress has been made with the programme of new construction and although only 233 miles of new railway were opened for traffic during 1924-25, at the close of the year there were 1,201 miles under construction, representing a programme which when completed will result in an addition of some 2,285 miles to the present system.

**Trade review.**—The earnings of railways are dependent on the general prosperity of the

country which in the case of India is most easily measured by the agricultural position and the returns of foreign trade. Judged by the usual criteria, the year was a favourable one for trade generally and this is reflected in the past that the total earnings of all railways increased by nearly Rs. 7 crores, viz., from Rs. 107.80 crores to Rs. 114.75 crores.

**Earnings.**—Of the total earnings of Rs. 114.75 crores Rs. 38.78 crores or 33.78 per cent. were from passenger traffic and Rs. 86.83 crores or 58.24 per cent. from goods traffic. The earnings from passengers carried increased from Rs. 33.09 crores to Rs. 38.78 crores or 1.76 per cent. The following table shows the numbers of and earnings from passengers carried separately for each class for the 4 years previous to the war and for the last 5 years.

Year.					Number of passengers carried (in thousands).				
					1st class.	2nd class.	Inter class.	3rd class.	Season & vendors' tickets.
1910	..	..	..	..	778	2,962	11,033	332,462	24,341
1911	..	..	..	..	799	3,135	11,762	348,479	25,687
1912	..	..	..	..	796	3,223	10,833	375,567	26,810
1913-14	..	..	..	..	812	3,461	12,371	410,960	30,114
1920-21	..	..	..	..	1,148	7,129	11,750	490,280	48,939
1921-22	..	..	..	..	1,125	6,404	9,264	500,515	52,376
1922-23	..	..	..	..	917	5,183	8,129	502,776	55,665
1923-24	..	..	..	..	817	4,533	8,095	512,974	58,084

†1924-25	..	..	..	..	1,22.93	1,92.00	1,48.01	34,12.45	....

† Earnings from season and vendors' tickets included under separate classes.

§ Excludes Mayurbhanj and Parlakimedi Light Railways.

The numbers of, and earnings from, first and second class passengers carried still continue to decrease but inter class passenger traffic shows increases for the first time for some years. Third class passenger traffic continues to show

increases.

The following statement shows by commodities the number of tons of freight originating and the earnings from freight carried on Class 1, Railways during the last two years.

## Working Expenses.

Commodity.	1923-24.		1924-25.	
	Tons originating on Home line in Millions.	Rs. in crores.	Tons originating on Home line in Millions.	Rs. in crores.
(1) Coal and Coke .. .. .	14.07	8.22	16.39	9.17
(2) Railway Stores .. .. .	21.97	3.23	27.05	3.72
(3) Wheat .. .. .	1.76	2.75	2.55	4.08
(4) Rice in the husk and Rice not in the husk .. .. .	3.98	3.85	4.42	4.35
(5) Gram and pulse, Jowar and Bajra and other grains and Pulses .. .. .	3.54	5.48	3.99	6.06
(6) Marble and Stone .. .. .	2.16	0.78	2.65	0.77
(7) Metallic Ores .. .. .	2.02	1.05	2.32	1.12
(8) Salt .. .. .	1.12	1.43	1.66	2.22
(9) Wood, unwrought .. .. .	1.53	1.02	1.43	0.94
(10) Sugar, refined and unrefined .. .. .	0.56	1.22	0.70	1.64
(11) Oilseeds .. .. .	2.29	3.56	2.53	3.85
(12) Cotton, raw and manufactured .. .. .	1.49	5.69	1.50	5.76
(13) Jute, raw .. .. .	0.89	1.27	0.98	1.42
(14) Fodder .. .. .	0.77	0.80	0.83	0.82
(15) Fruits and Vegetables, fresh .. .. .	0.72	0.71	0.86	0.82
(16) Iron and steel, wrought .. .. .	0.78	1.58	0.88	1.87
(17) Kerosine oil .. .. .	0.76	1.67	0.89	1.79
(18) Cur, Jagree, molasses, etc. .. .. .	0.83	1.35	0.72	1.16
(19) Other Commodities .. .. .	10.70	13.01	11.87	13.56
Total .. .. .	72.54	58.47	84.02	64.92

The number of tons originating and the earnings for 1923-24 show a large increase as compared with the figures of the previous year.

The largest increases in the earnings were in those from wheat and coal and coke.

The working expenses of State railways increased from Rs. 61.05 crores in 1923-24 to Rs. 62.93 crores in 1924-25. The summary below shows the distribution of this expenditure between the various departments:—

Department.	Work.	Amount spent in	
		1923-24.	1924-25.
		Rs. in crores.	Rs. in crores.
Engineering .. .. .	Maintenance of way, works and stations .. .. .	12.28	13.04
Locomotive .. .. .	Maintenance and renewal of engines, cost of fuel and running stores and other expenses relating to provision of motive power .. .. .	21.73	21.31
Carriage and Wagon .. .. .	Maintenance and running of carriages and wagons .. .. .	7.99	8.92
Traffic .. .. .	Commercial and transportation sides of traffic working, i.e., booking of passengers and goods and arrangements for transport .. .. .	9.77	10.93
Agency and others .. .. .	Agent's office expenses, Audit, Stores, Medical and Police charges, etc. .. .. .	4.47	4.20
Ferry .. .. .	Steam boat expenses .. .. .	0.26	0.64
Difference between contribution to depreciation fund and the actual expenditure on renewals and replacements on Company-worked lines .. .. .	.....	....	1.83
Miscellaneous .. .. .	Law charges, compensation, contribution to Provident Fund, etc. .. .. .	4.74	2.79
Suspense & adjustments. ....	.....	—0.19	—0.43
Total .. .. .		61.05	62.93

After discounting the result of certain abnormal features in the year's finance such as the institution of a depreciation fund and the refund of customs duty which had been paid in previous years, the net result was that the year showed a betterment of Rs. 535 lakhs, the additional gross earnings of Rs. 667 lakhs having been earned at an increase of only Rs. 76 lakhs in working expenses.

**Open Mileage**—The total route mileage on March 31st, 1925, was 38,269·78 made up of—

Broad-gauge..	..	..	18,781·74 miles.
Metre-gauge..	..	..	15,765·23 „
Narrow-gauge	..	..	3,722·81 „

Under the new classification adopted for statistical purposes, this mileage is divided between the three classes of railways as follows:—

Class I	34,424·57 Miles = 89·95 per cent.
Class II	2,393·44 „ = 6·25 „
Class III	1,451·77 „ = 3·80 „

Class I includes all the 5'·6" gauge mileage, 13,680·40 miles or about 87 per cent. of the metre-gauge, and 1,962·43 or 52·7 per cent. of the narrow-gauges.

The State owned 27,324·82 miles or about 71 per cent. and directly managed 15,414 miles or about 40 per cent. of the total mileage open at the end of the year.

During the year 1924-25, 233·48 miles of new lines were opened for public traffic. Of this mileage, 231·61 miles belong to Class I, and 1·67 miles to Class III Railways.

**Additions to Equipment.**—During 1924-25 there were actually small reductions in number of locomotives on the line, although 137 broad-gauge and 18 metre-gauge locomotives were placed on the line due to the fact that the numbers scrapped were larger than the numbers renewed and added on capital account. Passenger carriages showed net additions of 366 on the broad-gauge and 153 on the metre-gauge and in the third class this resulted in a net addition of 33,445 seats on the broad-gauge and 11,825 seats on the metre-gauge.

The following table shows total figures of seating accommodation under the four classes:—

Class I Railways.	Number of seats in passenger carriages.			
	1st.	2nd.	Inter.	Third.
5'·6" ..	21,922	41,301	51,684	601,322
3'·3½" ..	10,021	12,947	9,878	327,556

The additions to the goods stock of Class I railways were 884 covered and 742 open broad-gauge and 798 covered and 18 open metre-gauge wagons.

**Purchase of Rolling Stock.**—The following table shows the value of rolling stock purchased by Indian Railways in 1924-25:—

	Value of imported materials.			Value of indigenous materials.	Total purchases, 1924-25.	Total purchases, 1923-24.
	Purchased direct.	Purchased through Indian firms.	Total imported materials.			
	Rs. crores.	Rs. crores.	Rs. crores.	Rs. crores.	Rs. crores.	Rs. crores.
Locomotive and spare parts	1·31	·06	1·37	·07	1·44	3·68

**The Opening of the Khyber Railway.**—The opening of the Khyber Railway on November the 2nd marks an interesting stage in the development of India's great railway system. Previously the railway stopped short at Jamrud a few miles from Peshawar on the Indian side of the Khyber Pass. This pass has been the main trade route to India from the north from the earliest days and most of the trade with far distant Central Asia still follows this route in picturesque caravans.

The question of extending the railway along the trade route was first considered in 1890 and since then three possible routes have been surveyed, namely, the Loi Shilman route, the Mulla-garhi Shilman route and the Khyber Pass route.

As a result of a survey rapidly made in 1919 by Colonel G. R. Hearn, C.I.E., D.S.O., R.E., it was decided to build a railway through the Khyber Pass on a new alignment and after considering the merits of a line built to a two feet gauge, a metre-gauge with rack and a 5'-6" gauge adhesion line it was finally decided that a 5'-6" gauge line should be adopted.

The total length of the Khyber Railway is 27.74 miles from Jamrud to the Afghanistan frontier. Although this line is only a short one yet the work entailed has been very heavy. Starting at a height of about 1,500' it rises to about 3,500' at Landi Kotal and then descends to a height of about 2,400' at Landi Khana.

The ruling grade for up trains to Landi Kotal is 1 in 33 compensated for curvature while that for down trains from Landi Khana is 1 in 25 also compensated.

The line passes through 32 tunnels with a total length of nearly 3 miles. There are in all ten stations excluding Jamrud and of these, three are reversing stations necessitated by the development of distance for reductions of gradient.

**Transfer of the East Indian and Great Indian Peninsula Railways to State Management.**—During 1925 the State took over the management of the E. I. Railway from the 1st January and of the G. I. P. Railway from the 1st July on the termination of the Companies' contracts with a few exceptions. All the employees of the Companies in India have also been taken over by the Government. Advantage has been taken of these two railways being taken over to transfer the working of the Delhi-Umballa-Kalka Railway from the East Indian Railway to the North-Western Railway from the 1st April, to amalgamate the Oudh and Rohilkhand Railway with the East Indian Railway from the 1st July and to transfer the working of the Jubulpore-Alahabad Section of the East Indian Railway to the Great Indian Peninsula Railway from the 1st October.

**Financial Results of Working.**—The total gross earnings of all railways in India during the year 1924-25 amounted to Rs. 114.75 crores as compared with 107.80 crores in 1923-24. These figures, however, include railways owned by Indian States and companies for which the Government of India has no direct financial responsibility. The figures of receipts and expenditure for railways with which the Government are directly concerned are as follows:—

	(Omitting 000.) 1924-25. Rs.
Traffic receipts from Government Railways .. .. .	1,01,04,56
Interest on Depreciation and Reserve Fund balances .. .. .	21,22
Government share of surplus profits from Subsidized Companies' railways .. .. .	30,16
<b>Total .. .. .</b>	<b>1,01,55,94</b>
<b>Rs.</b>	
Working expenses including depreciation .. .. .	62,90,78
Surplus profits paid to Companies .. .. .	1,42,28
Interest on Government debt .. .. .	21,27,30
Sinking Fund .. .. .	.....
Interest on capital contributed by Companies .. .. .	2,67,17
Land and subsidy to Companies .. .. .	3,09
Miscellaneous .. .. .	13,22
<b>Total charges .. .. .</b>	<b>88,43,84</b>
<b>Net gain .. .. .</b>	<b>13,12,10</b>
<b>Contribution from Railway to General Revenues .. .. .</b>	<b>6,76,97</b>
<b>Railway reserve .. .. .</b>	<b>6,35,13</b>

# Financial Results of Working.

609

After meeting all interest and annuity charges Government therefore received a net profit of 13·12 crores as against a profit of 6·47 crores in 1923-24. On the capital at charge of the State minus the net receipts, that is the gross receipts minus the working expenses, have in recent years given the following returns:—

	Percent.
1913-14 .. .. .	5·01
1921-22 .. .. .	2·64
1922-23 .. .. .	4·38
1923-24 .. .. .	5·24
1924-25 .. .. .	5·85

Up to date figures of the results of working of other countries are not available, but the following table compares the latest available figures of average receipts per ton mile of those countries which have published statistics of working later than 1919:—

	Receipts per ton mile. Pies.
United States of America 1924 .. .. .	6·00*
United Kingdom 1923 .. .. .	15·01
Japan 1923 .. .. .	7·41
Switzerland 1923 .. .. .	33·01

	Receipts, per ton mile Pies.
South Australia 1922 .. .. .	16·53
Canadian Railways 1924 .. .. .	5·39*
India 1924-25 .. .. .	6·00

\* Converted at \$ 4·80 = £ 1 and at Re. 1 = 1s. 6d

In the case of receipts per passenger mile the figures for United States of America and India are as follows:—

United States of America 1924. 15·90 pies
India 1924-25 .. .. . 3·74 ..

while in England the present fare charged per mile third class is 18 pies.

From the above it will be seen that railway transportation of freight in India is probably the cheapest in the world and still more so for passenger traffic.

An examination of the latest available figures of operating ratios of foreign countries brings out results not unfavourable to Indian Railways.

	Year.	Operating Ratio.
United States of America .. .. .	1924	75·37 per cent.
France—State Lines only .. .. .	1922	115
All Lines .. .. .	1922	88·51 " "
English Railways .. .. .	1924	89·01 " "
South African Railways .. .. .	1922-23	74·02 " "
Argentine Railways .. .. .	1921-22	85·20 " "
Canadian Railways .. .. .	1924	85·57 " "
India .. .. .	1922-23	69·09 " "
	1923-24	68·50 " "
	1924-25	60·45 " "

**Value of Railway Materials Purchased.**—The value of materials purchased by Indian railways in 1924-25 (excluding coal, coke, stone, bricks, lime, ballast, etc.) showed a decrease of Rs. 6·28 crores as compared with the value of materials purchased in 1923-24.

	Value of imported materials.			Value of indigenous materials.	Total purchases 1924-25.	Total purchases 1923-24.
	Purchased direct.	Purchased through Agents in India.	Total imported materials.			
	Rs. crores.	Rs. crores.	Rs. crores.	Rs. crores.	Rs. crores.	Rs. crores.
Rolling stock .. .. .	5·27	0·48	5·75	0·37	6·12	10·86
Tools and stores .. .. .	0·96	2·12	3·08	3·28	6·36	7·06
Permanent-way .. .. .	0·69	0·27	0·96	4·49	5·45	5·88
Electrical plant .. .. .	0·74	0·36	1·10	0·01	1·11	·89
Buildings and station materials and fencing .. .. .	0·22	0·23	0·45	0·16	0·61	·58
Bridge work .. .. .	0·43	0·03	0·46	0·05	0·51	·82
Workshop machinery .. .. .	0·34	0·11	0·45	..	0·45	·78
Engineer's plant .. .. .	0·11	0·10	0·21	0·01	0·22	·19
Total .. .. .	8·76	3·70	12·46	8·37	20·83	27·06

**Railway Collieries.**—Good progress was made during 1924-25 with the development of the Argada, Relligari Dairi and Bhurkunda collieries which are all in the South Karanpura

Coalfield. The out-put of railway owned collieries during 1924-25 was 2,033,468 tons out of a total of 6,594,875 tons consumed on railways.

**Stores Balances.**—Considerable progress was made during the year in reducing still further the stores balances and the balances on all railways at the end of 1924-25 amounted to Rs. 170.9 crores as compared with balances of Rs. 21.58 crores in 1923-24 and Rs. 23.19 crores in 1921-22. A special Stores Officer was also appointed by the Railway Board to investigate the stocks of stores and materials on State-worked railways with a view to deciding what are surplus to their present requirements, to arranging transfers between railway administrations of their surplus stocks and taking generally action for the reductions of stores balances.

**Number of Staff.**—The total number of railway employees at the end of the financial year 1924-25 was 740,854 as compared with 720,754 at the end of the previous year and with 749,680 at the end of 1922-23 since when there has been an increase in mileage of over 650 miles. Of the total employees 6,299 were Europeans, 11,965 Anglo-Indians, and 722,590 Indians. Similar figures for 1913-14 were 7,986 Europeans, 10,437 Anglo-Indians and 614,882 Indians.

Public interest in the question of the more extended employment of Indians in the higher grades of railway service has been maintained during the year, finding voice in the press and by interpellations in the Legislature. The Government of India have throughout maintained the attitude that every reasonable means should be

adopted to increase the number of Indians in the higher grades in so far as such increase is consistent with efficiency and economy and considerable progress has been made during the year with the scheme for the training of junior railway officers and of the senior subordinate staff on Indian railways. In this connection a Transportation School was opened at Chandausi on March 2nd 1925 and a series of classes have been held. It is intended to have eventually in each railway system a school at which the subordinate staff of all grades employed in train working will go through periodical courses. Chandausi as the central school will provide courses for junior officers, the more senior subordinate staff, and those likely to prove suitable for promotion to officers and will also take charge of the training of probationary officers. In the future it is possible to look forward to the development of the new school into something like a railway staff college where the science and business of railway working and management will be studied and taught to railway officers and staff.

**Fatalities and Injuries.**—During 1924-25, there was an increase of 127 in the number of persons killed and of 211 in the number of persons injured as compared with the figures of 1923-24. The total number of passengers killed and injured show increases of 46 and 40 respectively over the figures of last year but this is mainly due to the Harappa accident in which 107 passengers were killed and 88 injured.

The following table shows the numbers killed and injured separately under passengers, railway servants and others for 1924-25 as compared with 1923-24 :—

	Killed.		Injured.	
	1923-24.	1924-25.	1923-24.	1924-25.
<b>A. Passengers—</b>				
(1) Accidents to trains, rolling-stock, permanent-way, etc. . . . .	63	117	214	206
(2) Accidents caused by the movement of vehicles used exclusively on railways . . . .	300	295	1,038	1,085
(3) Accidents on Railway premises not due to Train accidents or to the movement of vehicles . . . . .	9	6	20	21
<b>B. Servants—</b>				
(1) Accidents to trains, rolling stock, permanent-way, etc. . . . .	21	36	374	168
(2) Accidents caused by the movement of vehicles used exclusively on railways . . . .	355	386	585	721
(3) Accidents on Railway premises not due to Train accidents or to the movement of vehicles . . . . .	41	44	161	600
<b>C. Others—</b>				
(1) Accidents to trains, rolling-stock, permanent-way, etc. . . . .	65	19	39	31
(2) Accidents caused by the movement of vehicles used exclusively on railways . . . .	1,945	2,016	678	764
(3) Accidents on Railway premises not due to Train accidents or to the movement of vehicles . . . . .	19	26	88	59
<b>Total . . . . .</b>	<b>2,818</b>	<b>2,944</b>	<b>3,447</b>	<b>3,658</b>

Of the total number of persons killed 1,665 were trespassers on the line and 262 committed suicide. Thus 1,927 or over 85 per cent. of the persons killed on railway premises were for causes over which the railways have no control.

**Local Advisory Committees.**—By July 1924 Local Advisory Committees had been formed on all Class I State Railways with the exception of the B. N. Ry. where definite proposals have now been put forward. A wide range of subjects was discussed at these meetings and particular attention was paid to such subjects as improvement of facilities for inter and third class passengers, increased facilities for merchants, timings of trains and running of through carriages, etc.

**Compensation for loss and damage to goods in transit.**—A great improvement was made during 1923-24 in reducing the amount paid in compensation for loss and damage to goods in transit, the total reduction on Class I Railways being Rs. 41 lakhs in 1923-24 and

Rs. 22 lakhs in 1924-25. The full effect of the measures taken on railways such as the reorganisation of the Watch and Ward Staff has not yet had time to take place and a further improvement is expected during the next year.

As a result of a resolution adopted in the Legislative Assembly in March 1922, a Committee was appointed to revise the existing risk note forms. The recommendations of this Committee, received in September 1922, involved considerable changes in the form of risk notes aiming chiefly at imposing on the railways the onus of proof in cases where losses appeared to be *prima facie* due to misconduct of railway staff. After obtaining the views of Local Governments, Railway Administrations and Chambers of Commerce on these recommendations, the revised forms were referred to the legal advisers of Government. Revised risk note forms A, B, D, G and H have been issued and have been notified as coming into force from 1st October 1924.

## THE CHIEF RAILWAYS IN INDIA.

The Assam-Bengal Railway, which is constructed on the metre gauge, starts from Chittagong and runs through Surma Valley across the North Cachar Hills into Assam. It is worked under a limited guarantee by a company.

Mileage open .. ..	1,049.09
Capital at charge .. ..	Rs. 20,52,81,000.
Net earnings .. ..	Rs. 64,02,000.
Earnings per cent. .. ..	3.02

### Bengal and North-Western.

The Bengal and North-Western Railway was constructed on the metre gauge system by a company without any Government assistance other than free land and was opened to traffic in 1885. The system was begun in 1874 as the Tirhut State Railway. In 1890 this line was leased by Government to the Bengal and North-Western Railway. Since then extensive additions have been made in both sections. It is connected with the Rajputana metre gauge system at Cawnpore and with the Eastern Bengal State Railway at Khatihari and the Oudh and Rohilkhand Railway at Benares.

Mileage open .. ..	2,065.79.
Capital at charge .. ..	Rs. 19,60,04,000.
Net earnings .. ..	Rs. 1,83,27,000.
Earnings per cent. .. ..	9.35.

### Bengal-Nagpur.

The Bengal-Nagpur Railway was commenced as a metre gauge from Nagpur to Chhatisgarh in the Central Provinces in 1887. A company was formed under a guarantee which took over the line, converted it to the broad gauge and extended it to Howrah, Cuttack and Katni. In 1901 a part of the East Coast State Railway from Cuttack to Vizagapatnam was transferred to it and in the same year

sanction was given for an extension to the coal fields and for a connection with the Branch or the East Indian Railway at Hariharpur.

Mileage open .. ..	2,954.46
Capital at charge .. ..	Rs. 64,15,82,000.
Net earnings .. ..	Rs. 2,97,81,000.
Earnings per cent. .. ..	4.64.

### Bombay Baroda.

The Bombay, Baroda and Central India Railway is one of the original guaranteed railways. It was commenced from Surat *via* Baroda to Ahmedabad, but was subsequently extended to Bombay. The original contract was terminable in 1880, but the period was extended to 1905; and then renewed under revised conditions. In 1885 the Rajputana Malwa metre gauge system of State railways was leased to the Company and has since been incorporated in it. On the opening of the Nagda-Muttra, giving broad gauge connection through Eastern Rajputana with Delhi the working was entrusted to this Company. On the acquisition of the Company in April 1907 the purchase price was fixed at £11,685,581.

Mileage open .. ..	5,896.97
Capital at charge .. ..	Rs. 70,11,58,000.
Net earnings .. ..	Rs. 5,62,85,000.
Earnings per cent. .. ..	8.03.

### Burma Railways.

The Burma Railway is an isolated line, and although various routes have been surveyed there is little prospect of its being connected with the Railway system of India in the near future. In reply to a question in the Imperial Legislative Council in 1919, Sir Arthur Anderson said:—"During 1914-15 extensive survey operations were carried out to ascertain the best alignment for a railway connection along the coast route between Chittagong and certain stations on the Burma Railways south of Man

delay. A rival route via the Hukong Valley between the northern section of the Assam-Bengal Railway and the section of the Burma Railways north of Mandalay was to have been surveyed during the following year but was postponed because of the war. It is now proposed to commence this survey during the coming cold weather, and on its completion, Government will have sufficient information to enable them to decide which route shall be adopted. Thus no arrangements for the construction of a line have yet been made nor has any concession been granted, but it is probable that the line selected will be built at the cost of Government and worked by one or other of the main lines which it will connect. It was commenced as a State Railway and transferred in 1896 to a Company under a guarantee.

Mileage open .. ..	1,795.10.
Capital at charge ..	Rs. 27,14,43,000.
Net earnings .. ..	Rs. 1,76,48,000.
Earnings per cent. ..	6.02.

#### Eastern Bengal.

The Eastern Bengal State Railway was promoted under the original form of guarantee and was constructed on the broad gauge. The first portion of the line running to Calcutta over the Ganges was opened in 1862. In 1874 sanction was granted for the construction on the metre gauge of the Northern Bengal State Railway, which ran from the north bank of the Ganges to the foot of the Himalayas on the way to Darjeeling. These two portions of the line were amalgamated in 1884 into one State Railway.

Mileage open .. ..	1,721.87.
Capital at charge ..	Rs. 44,83,25,000.
Net earnings .. ..	Rs. 1,81,23,000.
Earnings per cent. ..	4.25.

#### The East Indian.

The East Indian Railway is one of the three railways sanctioned for construction as experimental lines under the old form of guarantee. The first section from Howrah to Pandua was opened in 1854 and at the time of the Mutiny ran as far as Raniganj. It gives the only direct access to the port of Calcutta from Northern India and is consequently fed by all the large railway systems connected with it. In 1860 the Government purchased the line, paying the shareholders by annuities, but leased it again to the company to work under a contract which is terminable in 1919.

The contract was not terminated until January 1st, 1925, when the State took over the management.

Mileage open .. ..	2,796.68.
Capital at charge ..	Rs. 1,01,75,98,000.
Net earnings .. ..	Rs. 7,11,50,000.
Earnings per cent. ..	6.99.

#### Great Indian Peninsula.

The Great Indian Peninsula Railway is the earliest line undertaken in India. It was promoted by a Company under a guarantee of 5 per cent. and the first section from Bombay to Thana was open for traffic in 1853. Sanction was given for the extension of this line *via* Poona to Raichur, where it connects with the Madras Railway, and to Jubbulpore where it meets the East Indian Railway. The features

of the line is the passage of the Western Ghats, these sections being 15½ miles on the Bhoré Ghat and 9½ miles on the Thul Ghat which rise 1,181 and 972 feet. In 1900, the contract with the Government terminated and under an arrangement with the Indian Midland Railway that line was amalgamated and leased to a Company to work.

The contract was terminated on June 30th, 1925, when the State took over the management.

Mileage open .. ..	3,446.28.
Capital at charge ..	Rs. 1,04,87,08,000.
Net earnings .. ..	Rs. 6,39,86,000.
Earnings per cent. ..	7.42.

#### Madras Railway.

The Madras Railway was the third of the original railways constructed as experimental lines under the old form of guarantee. It was projected to run in a north-westerly direction in connection with the Great Indian Peninsula Railway and in a south-westerly direction to Calcutt. On the expiry of the contract in 1907 the line was amalgamated with the Southern Mahratta Railway Company, a system on the metre gauge built to meet the famine conditions in the Southern Mahratta Country and released to a large Company called the Madras and Southern Mahratta Railway Company. The mileage is 3,041.29.

Mileage open .. ..	3,041.29.
Capital at charge ..	Rs. 54,51,92,000.
Net earnings .. ..	Rs. 3,73,76,000.
Earnings per cent. ..	6.86.

#### The North-Western.

The North-Western State Railway began its existence at the Sind-Punjab-Delhi Railway, which was promoted by a Company under the original form of guarantee and extended to Delhi, Multan and Lahore and from Karachi to Kotri. The interval between Kotri and Multan was unbridged and the railway traffic was exchanged by a ferry service. In 1871-72 sanction was given for the connection of this by the Indus Valley State Railways and at the same time the Punjab Northern State Railway from Lahore towards Peshawar was begun. In 1886 the Sind-Punjab-Delhi Railway was acquired by the State and amalgamated with these two railways under the name of the North-Western State Railway. It is the longest railway in India under one administration.

Mileage open .. ..	5,828.25.
Capital at charge ..	Rs. 1,22,16,38,000.
Net earnings .. ..	Rs. 6,77,23,000.
Earnings per cent. ..	5.51.

#### Oudh and Rohilkhand.

Oudh and Rohilkhand Railway was another of the lines constructed under the original form of guarantee. It began from the north bank of the Ganges running through Rohilkhand as far as Saharanpur where it joins the North-Western State Railway. It was not until 1887 that the bridge over the Ganges was completed and connected with the East Indian Railway. To effect a connection between the metre gauge systems to the North and those to the South of the Ganges; a third rail was

laid between Bhuriwal and Cawnpore. The Company's contract expired in 1889 when the Railway was purchased by the State and has since been worked as a State Railway.

The working of this railway was amalgamated with that of the East Indian Railway from 1st July 1925.

Mileage open .. ..	1,620.56.
Capital at charge .. ..	Rs. 32,72,27,000.
Net earnings .. ..	Rs. 97.47,000.
Earnings per cent. .. ..	2.98

#### The South Indian.

The South Indian Railway was one of the original guaranteed railways. It was begun by the Great Southern India Railway Company as a broad-gauge line; but was converted after the seventies to the metre-gauge. This line has been extended and now serves the whole of the Southern India, south of the south-west line of the Madras Railway. Between Tuticorin and Ceylon a ferry service was for-

merly maintained, but a new and more direct route to Ceylon *via* Rameshwaram was opened at the beginning of 1914. As the original contract ended in 1907, a new contract was entered upon with the Company on the 1st of January 1908.

Mileage open .. ..	1,876.19
Capital at charge .. ..	Rs. 28,43,16,000
Net earnings .. ..	Rs. 2,48,07,000
Earnings per cent. .. ..	8.72

#### The Indian States.

The principal Indian State Railways are: the Nizam's, constructed by a company under a guarantee from the Hyderabad State; the Kathiawar system of railways, constructed by subscriptions, among the several Chiefs in Kathiawar; the Jodhpur and Bikaner Railways, constructed by the Jodhpur and Bikaner Chiefs; the system of railways in the Punjab, constructed by the Patiala, Jind, Maler Kotla, and Kashmir Chiefs; and the railways in Mysore, constructed by the Mysore State.

### PROGRAMME OF FUTURE CONSTRUCTION.

As a result of the decision to spend part of the Rs. 150 crores sanctioned by the Assembly on the construction of new lines promising an adequate return the Railway Board were engaged during 1923-24 in investigating the prospects of such projected railways and this investigation was continued during 1924-25. Future railway construction falls into 4 main groups:—

The development of railways in—

- (1) South India,
- (2) The Coal field area,
- (3) Burma, and
- (4) The rest of India.

(1) For many years it has been recognised that there was need for considerable railway extension in the Madras Presidency and after careful investigations it has been settled that certain projects, of which the following are the more important, should be undertaken and completed as early as possible:—

#### (a) Villupuram Trichinopoly Chord.

This line will form an alternative route between Madras and Trichinopoly and will afford such relief to the existing line as will defer the necessity of doubling it for many years. The new chord will be 100 miles in length and will open up and develop new and populous country.

#### (b) Shoranur Nilambur Railway.

This extension on the 5'-6" gauge will run through the Moplah country and is one of the most important measures necessary for the reconstruction of Malabar. The line will be 41 miles in length.

#### (c) Virudupatti-Tenkasi Railway.

This line will also open up new country and help to relieve congestion on the main line. It will be 76 miles in length.

(2) As regards the coal field area investigation has proved that good coal in large areas is available in the area lying between the East

Indian and Bengal Nagpur Railways running westward from the Jheria Coal fields as far as Katni in the Central Provinces. It is accordingly proposed to provide the following lines to serve as outlets towards the north and west of India:—

- (a) Daltonganj to Hutar .. 17 miles.
- (b) Hutar to Helsa .. 163 miles.
- (c) Hutar to Anuppur .. 188 miles.

#### (3) New Railways in Burma.

Burma presents an interesting study in the progress which results from railway construction and the history of the various lines which have been built shows invariably a rapid increase in financial returns after the first few years.

Certain aspects of the problem must, however, be borne in mind in order that the situation may be properly appreciated. Climatically the country may be divided into three main zones, the southern portion being hot and damp, the central portion hot and dry, and the northern portion cold and wet. This, however, is a generalization which requires qualification from the topographical point of view, for the country essentially consists of a number of parallel valleys running roughly north and south with ridges of rough hill country between them. These valleys support large paddy crops in the south and north and dry crops such as oilseeds and groundnuts in the central zone, while the hills are well forested and supply timber and other forest products besides affording opportunities for fruit culture. Speaking generally the development of Burma waits on population while one of the reasons for the sparseness of population is the difficulty of intercommunication and transport between the valleys.

The work of railway extension naturally falls into three main divisions. Firstly, there is the opening up of valleys which at present have no communications. Secondly, there is the provision of feeders, branches and loops within the area already served so as to cheapen the cost of bringing traffic to the main line. And thirdly, there is the question of connections with

India, China and Siam, each of which has its own special problems.

During the year under review the following sections of railway were opened:—

(a) *Moulmein Ye.*

43·08 miles of this line were opened for traffic during 1924-25 in addition to the 26·61 miles already being worked and the last section was opened in April 1925. This line will probably at some future date form part of the main route from Rangoon to Bangkok but it is at present an isolated branch line separated from the remainder of the system by the estuary of the Salween. It is being built under a guarantee from the Burma Government.

(b) *Pyinmana-Taungdwingyi.*

By March 31st, 1925 this line was opened for passenger and goods traffic as far as Dalangyun while the last section Dalangyun to Taungdwingyi was opened for goods traffic. This alignment forms part of one of the proposed routes for a possible Indo-Burma connection railway.

Various other branches are under construction including:—

(1) *Seggy-Ye-U.* 23·54 miles in length, is an extension of the Sagalng-Segyi branch and its construction is nearing completion.

(2) *Pegu-Kayan.* 36·93 miles in length. Construction has been carried on throughout the year but though the work is well advanced it has not yet been possible to open any of it to traffic.

Other important railways which are proposed include:—

(1) the extension of Pyinmana-Taungdwingyi line through Natmauk to Kayoukapadaung.

(2) the Taungdwingyi-Magwe line.

Other lines of less importance are the Mandalay-Madaya suburban railway and the extension of the Malagaon-Bauktow line to New Cantonment East in the neighbourhood of Rangoon.

Surveys will be necessary before further construction can be undertaken and perhaps the most important group of lines to be surveyed are those to serve the Pakhoko District west of the Irrawady. The extension of the Taungdwingyi line to Kayoukapadaung and to the river in the neighbourhood of Pagan will provide with a ferry across the river a possible starting point or a line to serve these districts while the extension to Magwe, with a ferry across to Minbu will afford an alternative route to the same area.

Another valley which appears to offer opportunities of development is the fertile valley running northwards from the Inle lake to the neighbourhood of Hsipaw in the Northern Shan States.

A survey is at present proceeding for the extension of the Moulmein Ye line to Tavoy and Sinbyubyn in view of the possibilities of development at Mergui and in the neighbourhood this survey will be carried on to that place. The country lying between Tavoy and Mergui is said to be rich in timber and minerals and is suitable for rubber cultivation but is practically debarrued from development by lack of communications.

As regards international connections the question of railway connection with China has been much debated in the past and there has been support, for three possible routes. The first is the Bhamo-Tengyueh line which would more or less follow the caravan route to Taliu in Yunan and assist the caravan traffic to the Irrawady at Bhamo. The second

is the extension from Lashio to Kunlong ferry on the Salween river. The third is the extension of the proposed Ta Hapalai Namtu line to Muse on Sweli river opening up the thickly populated Namkham valley. This question however, is not one which can be examined at present.

As regards the remainder of India the most important line sanctioned is the Raipur-Parvatipur section of the Raipur-Vizianagram Railway with which is linked the development of Vizagapatam as a major port.

The proposed Raipur-Parvatipur Railway—260½ miles in length—will traverse near its centre the largest remaining area of India which is devoid of railway communication.

The construction of a railway between Raipur and Vizianagram has been under consideration for many years. A reconnaissance was made in 1881-82 and the Secretary of State sanctioned the project in 1905. Work was commenced between Vizianagram and Parvatipur and this section—49 miles in length—was opened for traffic on the 1st of April 1909. Lack of funds prevented the work being proceeded with beyond Parvatipur. Since then the estimates have been carefully revised and this construction is now linked with the development of Vizagapatam as a major port.

The commercial value of these schemes lies in the fact that it will provide for the development of the East Central Provinces and of the Northern Circars and help to relieve the congestion at the port of Calcutta and also to some extent at Bombay and on the railways leading to them. The provision of an additional port on the east coast of India which has now no safe harbour for some 900 miles between Calcutta and Madras will also help the trade of India.

**Electrification of Railways.**—On the 3rd of February 1925 the Governor of Bombay declared open the first electric railway in India and this marked the beginning of a new era in rail transport as far as India is concerned. The section opened is known as the Harbour Branch Extension of the Great Indian Peninsula Railway from Victoria Terminus to Kurla and consists of 9·45 miles of double track.

The electrification of the Harbour Branch Extension forms only part of the various schemes at present in progress for electrification of the suburban and main line services in Bombay which on the Great Indian Peninsula Railway include the electrification of the main and suburban lines to Kalyan and on the Bombay, Baroda and Central India Railway electrification of the lines between Church Gate and Bôrvili.

The services on the Harbour Branch and Mahim Chord are designed to provide for an entirely new passenger traffic which is expected to result from the development of the Sewri-Wadala, Dadar-Matunga and Sion-Matunga housing schemes of the Improvement Trust of Bombay for the relief of overcrowding in the city.

Sanction has also been obtained to the electrification of the main line of the Great Indian Peninsula Railway to Igatpuri on the northern line and to Poona on the south-east line.

Other schemes which are under consideration are:—

(1) the electrification of the suburban lines in Madras.

(2) the electrification of the suburban lines in Calcutta.

## INDIA AND CEYLON.

The possibility of connecting India and Ceylon by a railway across the bank of sand extending the whole way from Rameswaram to Mannar has been reported on from time to time, since 1895 various schemes having been suggested.

The South Indian Railway having been extended to Dhanushkodi, the southernmost point of Rameswaram Island, and the Ceylon Government Railway to Talaimannar, on Mannar Island, two points distant from each other about 21 miles across a narrow and shallow strait, the project has again been investigated with the idea of connecting these two terminal stations by a railway constructed on a solid embankment raised on the sand bank known as "Adam's Bridge," to supersede the ferry steamer service which has been established between these two points.

In 1913, a detailed survey was made by the South Indian Railway Company, and a project has now been prepared. This project contemplates the construction of a causeway from Dhanushkodi Point on the Indian side to Talaimannar Point on the Ceylon side, a length of 20.05 miles of which 7.19 will be upon the dry land of the various lands, and 12.86 will be in water. The sections on dry land will consist of low banks of sand pitched with coral and present no difficulty. The section through the sea will be carried on a causeway which it is proposed to construct in the following way. A double row of reinforced concrete piles, pitched at 10 feet centres and having their inner faces 14 feet apart, will first be driven into the sand. These piles will then be braced together longitudinally with light concrete arches and chains and transversely with concrete ties, struts and chains. Behind the piles slabs of reinforced concrete will be slipped into position, the bottom slabs being sunk well into the sand of the sea bottom. Lastly, the space enclosed by the slabs will be filled in with sand.

The top of the concrete work will be carried to six feet above high water level, and the rails will be laid at that level. The sinking of the piles and slabs will be done by means of water jets. This causeway, it is expected, will cause the suspended sand brought up by the currents, to settle on either side bringing about rapid accretion and eventually making one big island of Rameswaram Island and Mannar Island.

## Indo-Burma Connection.

The raids of the Emden in the Bay of Bengal in 1914, and the temporary interruption of communications between India and Burma, stimulated the demand for a direct railway connection between India and Burma. Government accepted the position and appointed Mr. Richards, M. Inst. C.E., to be the engineer-in-charge of the surveys to determine the best route for a railway from India to Burma. The

coast route appears to be the best one but at present would not be remunerative. This would start from Chittagong, which is the terminus and head-quarters of the Assam-Bengal Railway and a seaport for the produce of Assam. The route runs southwards through the Chittagong district, a land of fertile rice fields intersected by big rivers and tidal creeks and it crosses the Indo-Burma frontier, 94 miles from the town of Chittagong. For about 160 miles further it chiefly runs through the fertile rice lands of Arakan and crosses all the big tidal rivers of the Akyab delta. These include the Kaladan river which drains 4,700 miles of country and even at a distance of about 80 miles from its mouth is more than half a mile wide. About 200 miles from Chittagong the railway would run into the region of mangrove swamps which fringe the seacoast north and south of the harbour of Kaukkphu stretching out into the mangrove swamps like ribs from the backbone. Innumerable spurs of the Arrakan Yoma have to be crossed, Yoma is a mountain ridge which extends from Cape Negrais northwards until it loses itself in a mass of tangled hills east of Akyab and Chittagong. At its southern end the height of the ridge is insignificant but it has peaks as high as 4,000 feet before it reaches the altitude of Sandway and further north it rises much higher. It is a formidable obstacle to railway communication between India and Burma. This route is estimated to cost about £7,000,000 and would have to be supplemented by branch lines to Akyab where there is at present a considerable rice traffic and the cost of this would have to be added to the £7,000,000 already referred to.

The other routes examined have been the Hukong Valley route and the Manipur route which were surveyed by the late Mr. R. A. Way many years ago. The Manipur route was estimated to cost about £5,000,000 as it has to cross three main ranges of hills with summit levels of 2,650, 3,600 and 8,900 feet long. Altogether there would be about four miles of tunnelling through the three main ridges and through other hills and more than 100 miles of expensive undulating railway with grades as steep as 1 in 50 and 11,000 feet of aggregate rise and fall. The Hukong valley route is only about 284 miles long and it presents fewer engineering difficulties than either the Coast or the Manipur route. One hundred and fifty miles of this route lie in open country capable of cultivation though at present it is only very thinly populated. Only one range of hills has to be crossed and this can be negotiated with a summit tunnel of 5,000 feet long at a height of 2,500 feet. There are less than fifty miles of very heavy work and only about 4,500 ft. aggregate of rise and fall. The Hukong Valley route although cheaper than the Manipur route is not a practical financial proposition and both may be ruled out of consideration.

Main results of working of all Indian Railways treated as one system.

(a) Revised.

(b) Value F. O. B.

(c) Export values.

(d) Copper-ore in 1923; Copper-Matte in 1924.

The feature which stands out most prominently in a survey of the mineral industries of India is the fact that until recent years little has been done to develop those minerals which are essential to modern metallurgical and chemical industries, while most striking progress has been made in opening out deposits from which products are obtained suitable for export, or for consumption in the country by what may conveniently be called direct processes. In this respect India of to-day stands in contrast to the India of a century ago. The European chemist armed with cheap supplies of sulphuric acid and alkali, and aided by low sea freights and increased facilities for internal distribution by the spreading network of railways has been enabled to stamp out, in all but remote localities, the once flourishing native manufactures of alum, the various alkaline compounds, blue vitriol, copperas, copper, lead, steel and iron, and seriously to curtail the export trade in nitre and borax. The reaction against that invasion is of recent date. The high quality of the native-made iron; the early anticipation of the processes now employed in Europe for the manufacture of high-class steels, and the artistic products in copper and brass gave the country a prominent position in the ancient metallurgical world, while as a chief source of nitre India held a position of peculiar political importance until, less than forty years ago, the chemical manufacturer of Europe found among his by-products, cheaper and more effective compounds for the manufacture of explosives.

With the spread of railways, the development of manufactures connected with jute, cotton and paper, and the gradually extended use of electricity the demand for metallurgical and chemical products in India has steadily grown. Before long the stage must be reached at which the variety and quantity of products required, but now imported, will satisfy the conditions necessary for the local production of those which can be economically manufactured only for the supply of groups of industries.

### Coal.

Most of the coal raised in India comes from the Bengal and Bihar and Orissa—Gondwana coal-fields. Outside Bengal and Bihar and Orissa the most important mines are those at Siagaren in Hyderabad, and in Central Provinces but there are a number of smaller mines which have been worked at one time or another.

The subjoined statement shows the production of all mines in British India and in Indian States during 1924, as compared with 1923:—

	1923.	1924.
<b>British Provinces—</b>	<b>Tons.</b>	<b>Tons.</b>
Burma .. ..	1,271	255

Central India (Rewah)	175,950	235,298
<b>Total Indian States ..</b>	<b>841,498</b>	<b>901,943</b>
<b>GRAND TOTAL, INDIA</b>	<b>19,656,883</b>	<b>21,176,606</b>

(\*) Provisional figures.

**A Record Year.**—The total output for 1924 of 21,176,606 tons is, in fact, the greatest yet recorded for this country in any year with the exception of 1919, when the production was 22,028,037 tons.

The export statistics for coal and coke during 1924 show an increase of nearly 70,000 tons to 206,483 tons, a figure still only one-quarter of the pre-war average. In addition the imports fell from 624,918 tons to 463,716 tons, a total nearly one-third of that for 1922, and very close to the pre-war average. As before the exports were mainly to Ceylon, whereas the imports were derived chiefly from South Africa, the United Kingdom and Australia, imports from all sources showing a decline.

Taking 1 ton of coke as equivalent to 2 tons of coal, the net amount of coal available for consumption in India during 1924 was 21,465,673 tons. This is higher than the figure for any previous year except 1919, the total for which was 22,168,495 tons. The closing stocks (2,913,028 tons) in British India at the end of 1924 were however, only 283,836 tons greater than at the end of 1923.

**Over-Production.**—Nevertheless, the fundamental fact of the coal situation in India is that the total capacity of production of the Indian coal mines is now considerably in excess of total demands for internal consumption and for export. This over-production, either actual or potential, has led to severe depression in the coal industry by the beginning of 1925, with heavy falls in the price of coal and the closure of many mines. The decreased export trade referred to is partly responsible for this position, and consequently the Government of India appointed in September 1924 a committee to enquire and report on what measures could be taken to resuscitate this trade. The most important recommendations in the report of the Committee appear to be those devised to ensure that the quality of Indian coal as exported shall reach certain guaranteed standards, for no freight or other concessions of a financial nature will be of avail, if the quality of coal as exported is below anticipated standards.

The next statement shows the quantity of coal available for consumption in India in 1923 and 1924 :—

	1923.	1924.
	Tons.	Tons.
Imports of foreign coal..	624,918	463,716
Re-exports of foreign coal	46,031	65,953

### THE INDIAN COAL COMMITTEE.

The Indian Coal Committee which was appointed by the Government of India in September, 1924, was, in the main, the outcome of a resolution adopted by the Legislative Assembly in March of that year recommending on economic grounds the imposition of a countervailing duty on South African coal imported into India. Before referring to the Tariff Board the question whether the Indian coal trade was in need of protection against coal from South Africa or against imports of foreign coal generally, the Government decided that the technical aspect of the question should be investigated by an expert committee with the following terms of reference:—"To enquire and report (1) generally, what measures can be taken by Government, by the coal trade, by the railways and by the ports, whether singly or in combination, to stimulate the export of suitable coal from Calcutta to Indian and foreign ports; (2) in particular, whether effective measures can be taken for the pooling and grading of Indian coal for export and for bunkering, and how the cost of such measures should be met."

The members of the Committee, which met at Calcutta on October 22nd, were Mr. F. Noyce, C.S.I., C.B.E., I.C.S., Secretary to the Government of Madras, Development Department, (President); Mr. C. S. Whitworth, Chief Mining Engineer to the Railway Board; Mr. C. Stuart-Williams, Chairman of the Calcutta Port Trust; Mr. J. W. A. Bell, of Messrs. Mackinnon, Mackenzie & Co.; Mr. F. C. Legge, C.B.E., Director of the Railway Wagon Pool; Sir Rajendranath Mookerjee, K.C.I.E., K.C.V.O., of Messrs. Martin & Co.; Mr. A. A. F. Bray, Chairman of the Indian Mining Association; and Mr. W. C. Banerjee, Vice-Chairman of the Indian Mining Federation, with Mr. H. P. V. Townend, I.C.S., as Secretary. Its investigations which included visits to Ran-

goon, Penang, Singapore, Colombo, Madras, Bombay and Karachi lasted some five months, its Report being signed on March 28th, 1925.

**Export Trade.**—Chapter I of the Report contains a review of the situation which led to the appointment of the Committee and a detailed examination of the position in those Indian and foreign ports in which Indian coal is or has been imported. The export of coal from India which is almost entirely confined to Calcutta falls under three heads, exports to foreign countries, exports to Indian ports and bunker coal. The history of the export trade in coal likewise falls into three periods, pre-war, war and post-war. The varying fortunes of the three branches is most succinctly shown by the following figures for typical years :—

Year.	Export of coal to foreign countries.	Export of coal coast-wise to Indian ports.	Bunker coal (Calendar years)	Total.
1913-14	887,362	2,210,517	905,000	4,002,879
1918-19	142,942	101,322	378,000	622,264
1920-21	135,722	1,408,686	936,000	3,480,408
1922-23	97,611	812,136	575,000	1,484,747

The very heavy drop in the exports of coal to foreign countries after 1920-21 was due to the restrictions on export which were imposed in the interests of Indian industrial requirements in July, 1920, leading to the total prohibition of export from March, 1921, except on a reduced scale to the Ceylon Government Railways. These restrictions were not entirely removed

until January 1st, 1923, and by that time had led to the disappearance of Indian coal from overseas markets for the time being.

The Report proceeds to examine the nature of the competition met by Indian coal both in the overseas markets in which is endeavouring to regain a footing and in the principal home ports, Rangoon, Madras, Bombay and Karachi, in which its extrusion by foreign imports cannot be attributed to the embargo placed on export. For overseas ports, the Committee points out that the quality and price of the supplies obtained from other sources especially from South Africa after the embargo was imposed proved so satisfactory that the pre-war position has been entirely reversed and established business relationships are now an obstacle to the reintroduction of Indian coal even in markets like Colombo where it once held a commanding position. In Indian ports, the quality of the coal supplied has been the most important factor with the purchasers. The conclusion of the Committee thus is that Indian coal cannot hope to hold its own much less to recover its old position, both in home and overseas markets, unless its quality and price are such as to commend it to consumers.

In Chapter II, the Committee proceed to discuss the comparative merit and prices of Indian and other coals. An instructive table of analyses shows that there are a large number of collieries both in the Raniganj and Jharia coalfields (by far the two most important fields in India) which yield coal which compares most favourably in quality with South African, Japanese or Australian coal. The calorific value of the coal produced by these collieries is only slightly less than that of Natal and Australian coal, is slightly higher than that of Japanese coal and is considerably higher than that of Transvaal coal. As regards price, the Report, in an elaborate series of calculations, shows that Indian coal can only hope to compete in overseas markets if its pithead price is not more than Rs. 2 to Rs. 2-8-0 for Singapore, Rs. 5-5-0 for Colombo and Rs. 5 for Bombay and Karachi. For Madras and Rangoon, the imports of foreign coal are small and the prices of those coals cannot be considered to govern the market. As the average raising costs cannot be placed at less than Rs. 5 per ton for the Raniganj field and Rs. 6 per ton for the Jharia field, it is obvious that in present conditions coal for export can only be produced at a loss. The Committee therefore proceed to discuss the possibilities of economies at the various stages through which coal passes from the seam to the consumer, viz., at the pit, on the railway, at the Calcutta docks and on the steamer. The charges at the port of import are the same for Indian and foreign coals except that, in Indian ports, Indian coal has the advantage of exemption from the customs duty of eight annas a ton which is imposed on other coal.

**Economies at the Coal Fields.**—Chapter III deals with the possibilities of economies at the coal fields. It is held that there is no scope for any reduction in wages whilst the increased use of mechanical appliances for coal cutting would not reduce raising costs unless it were accompanied by an improvement in railway facilities which would permit of an increased output. Some small improvements in working methods might be made in some mines but there are only two methods by which any appreciable reduction

in raising costs can be secured. These are an increase in output by an extension of machine working and the avoidance of stacking by loading all coal raised direct into wagons. If this latter were done, loss from waste, deterioration and theft would be prevented and the raising costs would be reduced by something like eight annas a ton. Both methods of reducing costs in the coal fields thus depend on an improvement of the railway facilities and this brings the Committee to a detailed examination of the working of the two railways which serve the main Indian coal fields, the East Indian and the Bengal-Nagpur Railways.

**Railway Problems.**—In Chapter IV, the provision of a regular and adequate wagon supply throughout the year is considered essential. A number of recommendations for securing this are made, the most important of which are the enlargement of the depot stations, the general adoption of the system already in force on certain of the colliery sections on the East Indian Railway of supplying wagons to the collieries before 7 a.m. and clearing them after 5 p.m., the supply of wagons to the individual collieries at regular hours, the installation of weighbridges wherever practicable in order to avoid delays in weighing, the assembly by the railway in full trainloads of wagons intended for the same ship and a constant check at every stage of the movement of wagons from the coalfields to the docks and back. Chapter V is devoted to the question of railway freights, terminals and rebates. The Report points out that working expenses on both railways have increased in recent years by a very much higher percentage than have their ultimate receipts from coal and that it is impossible to calculate the exact cost of hauling one ton of coal one mile. No comparison between the cost of hauling a ton of coal for a mile and the rate charged for it can thus be made but a comparison between the present railway rates charged on export coal in India and in South Africa is favourable to Indian coal.

The Committee therefore hold that, whilst there is no statistical case for increasing the rebate of 25 per cent. at present granted on export coal in India, this should be increased to 37½ per cent., that is roughly by eight annas per ton, on the general grounds of the importance of the coal trade in the industrial economy of the country and the admittedly inadequate character of the railway facilities for moving it. The grant of a rebate on bunker coal is not recommended as it is not considered that this would have any appreciable effect in increasing the attractiveness of Calcutta as a bunkering port.

In Chapter VI, some general recommendations in regard to railway work are made. Improvements in the system under which the collieries indent for wagons are suggested. It is recommended that collieries should be permitted to put in their own sidings, these to be taken over subsequently by the railways on suitable terms if the traffic passing over them is found to yield a return of 6 per cent. on the capital outlay. The difficulties arising from the overloading of wagons, which have given rise to much criticism from the coal trade, it is proposed to remove by the provision of a type of wagon which when loaded flush with the top would not have too heavy a load what-

ever the specific gravity of the coal carried in it. It is suggested that the feasibility of providing such a type of wagon should be investigated by a small expert committee and that, meanwhile, all wagons should be marked with a mineral loading index figure which should be used for calculating the height to which coal and other minerals should be loaded according to their specific gravities. More outdoor supervision both by the colliery and the railway staffs is advocated whilst it is suggested that monthly meetings on the coalfields between the railway and colliery representatives should be revived. A recommendation to which the Committee attach especial importance is that open wagons should be supplied to all collieries which instal mechanical appliances for loading coal in order to ensure the loading of coal in the best possible condition with the minimum of slack and dust. They also recommend that the control of wagon supplies which was instituted in 1917 when a Coal Controller was appointed who was replaced in April, 1919, by a Coal Transportation Officer working under the Railway Board should be restored to the two railways themselves who should have a joint officer for the purpose. Preference in the matter of wagon supplies for coal should be restricted to coal required by railways, inland river navigation companies and ocean going steamers under mail contracts with Government, to coal for works of public utility and to coal for export certified in accordance with the proposals made later in the Report.

**Docks and Depots.**—In Chapter VII, the Committee examine the working of the Calcutta Docks and coal depots. They conclude that, whilst the turnaround of wagons at the docks could be improved, the delays in shipping coal are mainly due to the irregular arrival of the wagons intended for a particular steamer. If the facilities for the movement of coal traffic in the docks were improved to the extent contemplated by the Port Commissioners, they would prove sufficient to deal adequately with an extension of the existing coal traffic which can be regarded as probable in the near future. The Port has at present two mechanical loading appliances known as Beckett's plant and the Committee consider that, in order to avoid breakage, whenever shippers ask that their coal should be loaded by this plant, every effort should be made to comply with their request and that, save in exceptional circumstances, the first part of each cargo of coal should always be loaded by this plant which could deal with four million tons of coal annually even if only one of the two plants were reserved for coal. The Beckett's plant is, however, only a semi-mechanical plant and the Committee recommend that the question of the most suitable type of mechanical loading appliance for Calcutta should be investigated at an early date by a small expert committee which should report on the best type of mechanical loading appliance adapted to all types of wagon and should also investigate the possibility of using shoots for coal loaded by hand into steamers. A review of the charges levied by the Port Commissioners on coal leads to the conclusion that the financial condition of the Port is not such as to justify a reduction of the charges on coal and that no statistical case can be made out for such a reduction. On much the same

general grounds as for the railways, the Committee, however, recommend a reduction and suggest that this should take the form of a reduction of four annas on the river dues on certified export coal. They do not recommend any alteration in the charges on coal at the bunker depots and their only recommendation of importance in this connexion is that the possibility of extending the pontoons and gangways at the Howrah depot into deeper water with a corresponding extension of the railway sidings should be considered.

**Freights.**—An examination of the steamer freights on coal exported from Calcutta leads to the conclusion in Chapter VIII that the present freights for coal cannot be considered economic in view of the increase cost of working. The Committee explain why Calcutta does not attract tramp steamers which means that freight on coal has always to be paid for at the economic level. They emphasize that freights from Calcutta are fixed on the basis of the demand for tonnage and of the available supply at ports all over the world and cannot therefore be controlled by Government action. They consider that there is no prospect of any reduction in the freight on coal from Calcutta in the near future.

**Grading and Certification.**—Chapter IX, in which the Committee discuss the steps which should be taken to restore the confidence of purchasers overseas in Indian coal is the most important in the Report. They emphasize the necessity that any system of grading and certification should be such as to command the confidence of buyers but should not relieve the exporter of any responsibility as to quality. They point out that it would take too long and would be too expensive to establish a new organisation immediately for the grading of Indian coal and therefore recommend that the organisation of the Chief Mining Engineer to the Railway Board who represents the largest purchasers of coal in India should be utilised for the purpose. It would work in conjunction with a Grading Board of which the Chief Mining Engineer would be Chairman and which would also include a representative of the Indian Mining Association and one of the Indian Mining Federation and also nominees of the Bengal Chamber of Commerce and the Bengal National Chamber of Commerce, the two latter representing the interests of consumers on the Board.

A general outline of a scheme for classifying all Indian coal is given and it is suggested that a grading list should be published by the Board as soon as possible after its constitution. In this list, the different collieries and seams would be classified in accordance with the scheme and an analysis of the coal they produce would be given but no colliery would be included in the list without its consent. The Committee hold strongly that only those collieries included in the grading list should be eligible for the special concessions from the railways and the Port Commissioners recommended in previous chapters and that only certified coal from such collieries should receive these concessions. They consider that the decision of the Grading Board as to the classification of any colliery or seam should be final. They formulate a scheme for the inspection of certified coal and suggest a form of certificate. They recommend that the cost of any

analysis required should be borne by the colliery concerned and that the cost of inspection should be met by the levy of a fee of one anna per ton of coal inspected. They finally urge under this head that as the services of the Chief Mining Engineer and his staff are not likely to be available for more than two years, a scheme should be introduced by the end of that period for the inspection of export coal by independent officers appointed by the Grading Board. The advantages and disadvantages of selling coal on analysis are examined and it is recommended that exporters of coal to Bombay should be prepared to submit their coal to analysis when selling to consumers who have adopted the system of purchase on calories. They do not consider the certification of bunker coal practicable.

In Chapter X, the Committee briefly examine the possibility of pooling coal for export and pronounce it not feasible.

Chapter XI contains a few miscellaneous recommendations such as the necessity for **propaganda** by exporters of Indian coal; the quotation of prices of Indian coal in sterling; the adoption of the system of payment on delivery and of payment of freight on the quantity shown in the bill of lading less an allowance of two per cent. in lieu of weight when competing coals is sold on these terms; improvements in the coal statistics issued by the Director-General of Commercial Intelligence; and the advisability of obtaining the advice of the Chief Mining Engineer before any large contract for coal is placed either by the Imperial Government or by any Local Government.

Mr. Banerjee appended a **minute of dissent** to the Report in which he laid the present position of the Indian coal trade at the door of the

embargo which he attributed entirely to Government action, demanded more railway sidings in the coalfields, considered that the present rebate on coal should be doubled, proposed special rates for coal sent to certain upcountry stations, recommended the grant of lower railway rates in the off season when wagons are not required for the movement of grain, urged the abolition of the present system of propayment of freight on coal, and also the complete abolition of the Coal Transportation Officer, considered that there should be no nominees of the Bengal Chamber of Commerce or of the Bengal National Chamber of Commerce on the Grading Board, dissented from the proposal to publish the grading list and finally argued that the Indian coal trade was in need of a much larger measure of direct assistance than had been recommended by his colleagues.

The recommendations of the Committee were accepted practically in their entirety by the Government of India and the coal trade and a Grading Board, in accordance with the scheme formulated by the Committee, was established by the **Coal Grading Board Act, (XXXI of 1925)** which was passed at the September session of the Legislature. The recommendations of the Committee in regard to the grant of an enhanced rebate and of lower river dues were accepted by the railways and the Calcutta Port Commissioners, respectively, and provision was made in the Act for the grant of rebates and of preference in the matter of wagon supply so far as this required legalisation. Draft rules under the Act were published for criticism in October, 1925. The question of protecting Indian coal against imports of foreign coal was referred to the Tariff Board in that month. The Board had not completed its investigations at the end of the year.

## IRON ORE.

Bengal and Bihar and Orissa are the only provinces in India in which iron ore is mined for smelting by European methods. Iron smelting, however, was at one time a widespread industry in India and there is hardly a district away from the great alluvial tracts of the Indus, Ganges and Brahmaputra in which slag heaps are not found. The primitive iron smelter finds no difficulty in obtaining sufficient supplies of ore from deposit that no European ironmaster would regard as worth his serious consideration. Early attempts to introduce European processes for the manufacture of pig-iron and steel were recorded in 1830 in the South Arcot District. Since that date various other attempts have been made but none proved a success before that now in operation near Barakar in Bengal. The site of the **Barakar Iron-Works** was originally chosen on account of the proximity of both coal and ore supplies. The outcrop of iron stone shales between the coal-bearing Barakar and Raniganj stages stretches east and west from the works, and for many years the clay ironstone nodules obtainable from this formation formed the only supply of ore used in the blast furnaces. Recently magnetite and hematite have been obtained from the Manbhum and Singhbhum districts, and the production from the last-named district has largely replaced the supplies of ore hitherto obtained near the

iron-works. The Bengal Iron and Steel Company, Limited, have now given up the use of ores obtained from the neighbourhood of Barakar and Raniganj and are now obtaining most of their ore from the Kolhan Estate, Singhbhum. Some years ago the Bengal Iron Steel Co., Ltd., secured two deposits of iron-ore in Saranda (Singbhum) forming parts of two large hill masses known as Notu Buru and Buda Buru respectively. Recent prospecting in this part of Singhbhum has led to the discovery of numerous additional deposits of iron-ore, the extension of which has been traced into Keonjhar and Bonal States in Orissa, a total distance of some 40 miles in a E. S. W. direction. At Fansira Buru, a portion of Notu Buru, the deposit has been opened up, and now feeds the Barakar ironwork. Fansira Buru rises to over 2,500 feet above sea level, the low ground on the west side being at about 1,100 feet above sea-level. The uppermost 400 to 450 feet of this hill has now been opened up, and the workings indicate the existence of a deposit about a quarter of a mile long, perhaps 400 feet thick and proved on the dip for about 500 feet. The ore body appears to be interbedded with the Dharwar slates, from which it is separated by banded hematite-jaspers. The ore itself is high-grade micaceous hematite, often lateritised at the outcrop. Cross-cut into the interior of the deposit show that the

hematite becomes very friable not far below the outcrop. In fact the characteristics of this ore, including the surface lateritisation, are almost exactly reproduced in the iron-ore deposits of Goa and Ratnagiri. The Tata Iron and Steel Company at Sakchi possesses slightly richer and purer ore-bodies in the Raipur district, supplies of ore are at present drawn from the deposits in Mayurbhanj. The ore-deposits have all been found to take the form of roughly lenticular leads or bodies of hematite, with small proportions of magnetite, in close association with granite on the one hand and granitic rocks on the other. These latter have been noted in the field as charnockites, the term being employed, rather loosely no doubt, but probably in the main correctly, to cover types of

pretty widely varying acidity. In still more intimate association with the ores than either of the foregoing were found masses of dense quartz rocks, frequently banded, and banded quartz-iron-ore rocks. These last are of the types so commonly associated with Indian iron-ores, but are here not so prominent as is usually the case.

**Production in 1924.**—The production of iron-ore increased by 76 per cent., viz., from 821,053 tons in 1923 to 1,445,313 tons in 1924. The production recorded for Mayurbhanj State represents the production by the Tata Iron and Steel Co. Ltd., whilst that recorded against Singhbhum 138,939 tons were produced by the Indian Iron & Steel Co., and the balance by the Bengal Iron Company.

(a) Estimated.

(b) Not available.

The large increase in the production of iron-ore by the Tata Iron & Steel Co. in Mayurbhanj State is reflected in the figures of production at Jamshedpur, where the output increased from 392,135 tons of pig-iron in 1923 to 540,140 tons in 1924; the production of ferro-manganese rose from 3,606 tons in 1923, to 8,951 tons in 1924; the production of steel including rails rose from 161,097 tons in 1923 to 218,472 tons in 1924. The production of the Bengal Iron Co., Ltd., rose from 119,669 tons of pig-iron in 1923 to 147,733 tons in 1924; but the production of iron castings fell from 41,849 tons in 1923 to 27,045 tons in 1924. The production of the Indian Iron & Steel Co. rose from 77,980 tons of pig-iron in 1923 to 168,249 tons in 1924. No ferro-manganese was produced by either the Bengal Iron Company or the Indian Iron and Steel Company. The production of pig-iron at the Mysore Iron Works at Bhadravati rose from 9,782 tons in 1923 the initial year of produc-

tion to 16,425 tons in 1924. The total production of pig-iron in India rose, therefore, from 599,516 tons in 1923 to 872,547 tons in 1924.

**Exports.**—A portion of this output was, of course, utilised in the production of steel at Jamshedpur, but a large portion was exported; an export market for Indian pig-iron is, indeed, necessary for the continued success of the industry, in view of the fact that the total blast-furnace capacity of the country is much in excess of the steel-melting capacity and the internal requirements of India for iron castings. It is of interest, therefore, to record the data relating to pig-iron exports from India during the years 1923-24 and 1924-25. It will be seen from table 13 that the exports in 1924-25 were 86 per cent. above those of the previous year, but that the export value fell slightly from Rs. 69'8 (£1'65) per ton to Rs. 63'5 (£2'467) per ton.

**Protective Measures.**—In spite of this increased production of pig-iron and steel, the years 1923 and 1924 were not prosperous ones for the Indian iron and steel industry owing to a world-wide slump in the iron and steel trade. For this reason the conditions of the industry were investigated by the Indian Tariff Board and a measure of protection introduced for

steel in 1924. As already recorded the pig-iron section of the industry found an outlet for increased production in increased exports. The prices at which it has proved possible to land cargoes of Indian pig-iron at United States ports have led to complaints from American producers and anti-dumping notices are said to have been issued against certain cargoes of Indian pig-

## MANGANESE ORE.

This industry commenced some thirty years ago by quarrying the deposits of the Visagapatam district, and from an output of 674 tons in 1892, the production rose rapidly to 92,008 tons in 1900 when the richer deposits in the Central Provinces were also attacked, and are now yielding a larger quantity of ore than the Visagapatam mines. India now alternates with Russia as the first manganese-producing country in the world. The most important deposits occur in the Central Provinces, Madras, Central India, and Mysore—the largest supply coming from the Central Provinces. The uses to which the ore is put are somewhat varied. The peroxide is used by glass manufacturers to destroy the green colour in glass making, and it is also used in porcelain painting and glazing for the brown colour which it yields. The ore is now used in the manufacture of ferro-manganese for use in steel manufacture. Since 1904, when the total output was 150,190 tons, the progress of the industry has been remarkable owing to the high prices prevailing. In 1905 production reached 247,427 tons; the following year it was more than doubled (571,495 tons), and in 1907 the figures again rose to 902,291 tons. In 1909, on account of the fall in prices the output contracted to 642,675 tons, but it almost regained its former position in 1910 when the production rose to 800,907 tons. In 1911 it fell to 670,290 tons. In 1916 the output was 645,204 tons valued f. o. b. at Indian Ports at £1,487,026. The ore raised in the Central Provinces is of a very high grade, ranging from 50 to 54 per cent. of the metal, and in consequence of its high quality is able to pay the heavy tax of freight over 500 miles of railway, besides the shipment charges to Europe and America.

The output in 1923 was 695,055 tons valued at £2,215,984 f. o. b. Indian Ports. This rose in 1924 to 803,006 tons valued at £2,719,949.

The exports of manganese-ore during 1924 showed a fall of about 100,000 tons. This fall does not, however, indicate any decrease in the activity of the industry. The high export figures for 1922 and 1923 were much in excess of the quantities produced during those years and were rendered possible only by an encroachment upon stocks accumulated during previous years. There is a steady consumption of manganese-ore at the works of the three Indian iron and steel companies, not only for use in the steel furnaces of the Tata Iron and Steel Co. and the manufacture of ferro-manganese, but also for addition to the blast-furnace charge in the manufacture of pig-iron. The receipts of manganese-ore at the iron and steel works during 1924 were 27,333 tons, the consumption in the industry was 35,238 tons, and the stocks in hand at the end of the year were 21,106 tons. The difference of a little over 50,000 tons between the quantity of manganese-ore produced in India during 1924 and the quantity exported is thus partly accounted for by internal consumption

## GOLD.

The greater part of the total output of gold in India is derived from the Kolar gold field in Mysore. During the last decade the production of this mine reached its highest point in 1905 when 616,758 ounces were raised. In 1906 the quantity won was 565,208 ounces and this figure fell to 535,095 ounces in 1907. The figures for the latter years reveal a small improvement. The Nizam's mine at Hutti in Hyderabad comes next, but at a respectable distance, to the Kolar gold field. This mine was opened in 1903. The only other mines from which gold was raised were those in the Dharwar district of Bombay and the Anantapur district of Madras. The Dharwar mines gave an output of 2,993 ounces in 1911 but work there ceased in 1912. The Anantapur mines gave their first output of gold during the year 1910; the amount being 2,532 ounces, valued at Rs. 1,51,800. Gold mining was carried on in the North Arcot district of Madras from 1893 till 1900, the highest yield (2,854 ounces) being obtained in the year 1898. The Kyankyazat mine in Upper Burma was worked until 1903, when the pay chute was lost and the mine closed down. In 1902 dredging operations were started on the Irrawaddy river near Myitkyina, and 216 ounces of gold were obtained in 1904; the amount steadily increased from year to year and reached 8,445 ounces in 1909, but fell in subsequent years until, in 1922,

it was no more than 24 oz. The small quantity of gold produced in the Punjab, the Central Provinces, and the United Provinces is obtained by washing. Gold washing is carried on in a great many districts in India, but there is no complete record of the amount obtained in this way. The average earnings of the workers are very small, and the gold thus won is used locally for making jewellery.

The continuous decrease in the output of gold in India from the maximum production of 616,728 ozs. reached in 1915, continued during the year 1923, when the total output of gold was 383,697.85 ozs., valued at £1,702,642, rising in 1924 to 396,351.103 ozs., valued at £1,827,433. This improved result was due partly to an increased production from the Anantapur district resulting from the treatment of the payable ore of the Jibutti (Anantapur) Gold Mines, Ltd., in the reduction works of the Anantapur Gold Mines, Ltd., which company had ceased to mill its own ore. But the greater part of the increase was due to an increased outturn from the Kolar mines. It is of interest to record that encouraging results were being obtained from the bottom levels of several of these mines, particularly Champion Reef and Ooregum, the latter of which has now reached a depth of over 6,000 feet vertical from the surface.

## PETROLEUM.

Petroleum is found in India in two distinct areas—one on the east, which includes Assam, Burma, and the islands off the Arakan coast. This belt extends to the productive oil fields of Sumatra, Java, and Borneo. The other area is on the west, and includes the Punjab and Baluchistan, the same belt of oil-bearing rocks being continued beyond the borders of British India to Persia. Of these two the eastern area is by far the most important, and the most successful oil fields are found in the Irrawaddy valley. Yenangyaung is the oldest and most

developed of these fields. Native wells have been at work here for over 100 years, and in 1886, prior to the annexation of Upper Burma, the output is estimated to have averaged over 2 million gallons a year. Drilling was begun in 1887. The Yenangrat field yielded a very small supply of petroleum before 1891, in which year drilling was started by the Burma Oil Company. Singu now holds the second place among the oil-fields of India. Petroleum was struck at the end of 1901, and in 1903, 5 million gallons were obtained. In 1907 and

1908 the production of this field was 43 million gallons, and after a fall to 31½ million gallons in 1910 it rose to 56½ million gallons in 1912. Several of the islands off the Arakan coasts are known to contain oil deposits, but their value is uncertain. About 20,000 gallons were obtained from the eastern Barongo Island near Akyab, and about 37,000 gallons from Ramri Island in the Kyaukpyu district during 1911. Oil was struck at Minbu in 1910, the production for that year being 18,320 gallons which increased to nearly 4 million gallons in 1912. The existence of oil in Assam has been known for many years and an oil spring was struck near Makum in 1867. Nothing more, however, was done until 1883, and from that year up till 1902 progress was slow. Since that year the annual production has been between 2½ and 4 million gallons.

On the west, oil springs have been known for many years to exist in the Rawalpindi and other districts in the Punjab. In Baluchistan geological conditions are adverse, and though some small oil springs have been discovered, attempts to develop them have not hitherto been successful.

**Output in 1924.**—The peak of production of petroleum in India (including Burma) was reached in 1919 and 1921, since when there has been a small but definite fall in production to a figure of nearly 294½ million gallons in 1923. As the total production for 1924 was a little over 294½ million gallons, the decline appears for the moment to have been arrested. Such coincidence of output for two successive years must, however, be regarded as fortuitous, as the total is made up of the production of a large number of fields, some of which record decreases and some increases. During 1924, the Yenangyang field showed an increase of nearly 6½ million gallons in contrast to the decrease of 4½

million gallons recorded in the previous year. The production shown includes an output of nearly 2½ million gallons from hand-dug wells. There was also a substantial increase of over 2 million gallons in the output from the Digbol field. Apart from a trivial increase in the Upper Chindwin, all the other fields showed a decline, which was most serious in the case of Singu, amounting roughly to 7½ million gallons. Less serious decreases were shown by the Badarpur field in Assam and the Minbu, Thayetmyo and Yenangyat fields in Burma, whilst the Attock field, in contrast to the heavy increase, of nearly 4½ million gallons in 1923, showed a small decline.

In the Yenangyang field, the exploitation of the shallow oil-sands, referred to in the previous Review, has continued, and the attention to this hitherto neglected source of supply is delaying the inevitable decline in production from this field. As the recorded figures of production are the nett figures after deduction of quantities of oil used as fuel on the field, the electrification of the field, which has now reached the present limit of practicability, is another factor tending to delay this decline.

The set-back in production in the Attock district is due to the decline in the output from the older wells being greater than the supplies added by new wells. To remedy this, drilling is being conducted with increased activity on the Khaur field, to which the plant in operation at Dhulian has also been transferred, the test boring at Dhulian having thus been suspended at 3,284 feet from the surface.

The rupee value of the output in 1924 was almost identical with that of 1923, but, owing to the higher sterling value of the rupee in the later year, the sterling value of the production showed an increase of over £550,000.

Imports of Kerosine Oil amounted in 1924 to 71,807,575 gallons. Imports of Oil Fuel during 1924 amounted to 89,152,952 gallons valued at Rs. 1,82,89,900. Of this total nearly 70 million gallons came from Persia.

Amber, Graphite and Mica.—Amber is found in very small quantities in Burma, the output for 1923 being 47 cwt. valued at Rs. 13,720. Graphite is found in small quantities in various places but little progress has been made in

mining except in Travancore. The total output in 1921 was 25 tons. India has for many years been the leading producer of mica, turning out more than half of the world's supply. In 1914, owing to the war, the output was only 38,189 cwts. compared with 43,660 cwts. in 1913. Owing to necessary restrictions with regard to the export of mica, the output fell off considerably in the year 1915, but subsequent demand in the United Kingdom for the best grade of ruby mica led to a considerable increase in production during the following years.

There was an increase of about 7,000 cwts. in the declared output of mica in 1924 above that of the previous year. But the output figures are incomplete, and a better idea of the size of the industry is obtained from the export figures. The exports of mica during 1924 exceeded the reported production by over 71 per cent. amounting to 70,095 cwts., valued at Rs. 94,49,168.

**Tin, Copper, Silver and Lead.**—The only persistent attempt to mine tin is in Burma. The output was for some time insignificant but rose in 1913 to 116 tons valued at £46,000 which fell to £38,000 in 1914. In 1924 Burma yielded 1,963 tons. Copper is found in Southern India, in Rajputana, and at various places along the outer Himalayas, but the ore is smelted for the metal alone, no attempt being made to utilize the by-products. In 1924 the production of 2,935 tons of copper-matte valued at Rs. 15,94,527 was reported by the Burma Corporation Ltd., in the Northern Shan States. The only Lead mine of any importance being worked in the Indian Empire is that of Bawdwin, where a very large body of high-grade lead-zinc-silver ore has now been blocked out. For many years the smelting operations of the Company were directed to recovering lead and silver from the slags left by the old Chinese miners. Those slags, however, are now practically exhausted, and the mine has reached a stage of development at which a steady output of ore is assured. In 1923 the output was 46,060 tons valued at Rs. 1,68,18,111. In 1924 the output rose to 50,559 tons of lead and 1200 tons of antimonial lead valued at Rs. 2,35,07,040.

Silver is obtained as a by-product in the smelting of the lead-zinc ores of Bawdwin. The total output in 1924 was 5,309,203 owners valued at Rs. 1,12,71,086.

**Zinc.**—A monograph on zinc ores issued by the Imperial Institute in 1917 says that during the past fifty years zinc ores have received but little attention in India, and no production was recorded until 1913. In 1914 the production was 8,553 tons, and although the output fell to 196 tons in 1915, there is a prospect of India becoming an important producer of zinc ore in the future. Important silver-lead-zinc deposits occur at Bawdwin, in Tawngpeng State, one of the Northern Shan States in Upper Burma. The mines are connected with the Mandalay-Lashio Branch of the Burma railways by a narrow-gauge line 51 miles long, the lines meeting at Manhpwe, which is about 544 miles from Bawdwin. They were worked for many centuries by the Chinese for silver, and have long been known to contain zinc ore; until recently, however, no serious attempt appears

to have been made to market the ore for its zinc values. In 1907 the present undertaking was started by the Burma Mines, Ltd., with the idea of recovering the lead from the old slag heaps left by the Chinese, estimated at 125,000 to 160,000 tons, and later to work the deposit. Smelting operations on these slags were first carried out at Mandalay, but later the works were transferred to Namtu, about 13 miles below the mines on the narrow-gauge railway. The deposits, which comprise an area of about 2,500 acres, have now been taken over by the Burma Corporation, Ltd., 18,650 tons of zinc concentrates were produced by the Burma Corporation, Ltd., in the Northern Shan States during 1924. The exports of these concentrates during the year amounted to 15,192 tons, valued at Rs. 11,60,449 (£83,486). During the year the mill flow sheet of this Company was modified to permit of the production of a marketable zinc concentrate, and an increased output is to be anticipated during 1925.

**Gem Stones.**—The only precious and semi-precious stones at present mined in India are the diamond, ruby, sapphire, spinel, tourmaline, garnet, rock-crystal, agate, cornelian, jadeite and amber. Amber has already been referred to; of the rest only the ruby, sapphire and jadeite attain any considerable value in production and the export of the latter has declined owing to the disturbances in China, which is the chief purchaser of Burmese jadeite. The output of diamonds is comparatively unimportant. The output of the ruby mines in 1924 was only 101.097 carats or less than half the average annual quantity produced during the two preceding quinquennial periods. In 1922 an exceptionally valuable ruby of nearly 23 carats was found of rare size and quality.

**Wolfram.**—Owing to the continued depression in the wolfram market, Tungsten ore is now nowhere extracted except in the Tavoy district, where it occurs chiefly as a constituent of mixed concentrates. The production of wolfram decreased considerably from 872 tons, valued at Rs. 4,79,693 (£31,979), in 1923 to 730 tons, valued at Rs. 3,41,381 (£24,559).

**Radio-active Minerals.**—The General Report of the Director of the Geological Survey of India for 1913 includes a brief report by R. C. Burton on an occurrence of pitchblende at mica mines near Singar, Gaya district, Bengal. The pitchblende occurs as rounded nodules in a pegmatite that is intrusive in mica schists. Other minerals occurring in the pegmatite are mica, tripelite, ilmenite, tourmaline, and uranium ochre; whitish columbite, zircon, and torbernite have also been recorded. Of these minerals tripelite is stated to be the commonest.

The importance of the find of uranium oxide impregnating the tripelite led to the discovery of weathered pitchblende, and as the pits were deepened the weathering became less and less until pure pitchblende was obtained. In the six months from July 1913 to February 1914, eight hundredweight of pitchblende was obtained from Abrahki Hill together with six tons of uranium earth debris, five to six hundred tons of tripelite and two tons of tantalite. These ores were raised under a prospecting license in respect of Abrahki Hill alone and in March 1914,

mining lease for thirty years was obtained in respect of sixty square miles of the Singar estate. The first intention was to work only the five square miles round Abrahki and a syndicate was formed for this purpose, which on the outbreak of war, was refused a Trading License on account of the German element in it.

### Labour in Mines.

The question of the labour supply presents difficulties which are not encountered in countries where mining is a special calling. The majority of the persons working at the Indian coal mines are agriculturists, and the supply of labour, as experience has recently shown, depends to a material extent on the condition of the agricultural industry. "The major portion of those employed," says a report by the Department of Statistics, "are the aboriginal Dravidians from the mountainous country of Chota Nagpur and the Central Provinces, but a large number of other castes is also employed, particularly in the outlying fields. The majority of the workmen follow the vocation of agriculture as well as mining and return to their homes during the period of sowing and reaping, the result being that at such times the output of many of the mines is greatly restricted. At the Makum collieries of the Assam Railway and Trading Company, where

the labour question continues to be a very difficult one, nearly a third of the total labour force are Mekranis, Chinese, and Nepalese. The Chinese have, however, proved unsatisfactory, and it is unlikely that they will in future be recruited." With the increase in the depth of working the need for a skilled mining class will become accentuated, and if the price of coal remains at a sufficiently high level, further development in the introduction of coal-cutting plants may take place. During the period of high prices some nine years ago cutting plants were introduced in order to augment the output. These worked successfully, but the cost proved to be high and as labour conditions improved the machines were discarded.

The average number of persons employed in the coal-fields during the year 1924 showed a slight increase over the figures for 1923, whilst the average output per person showed a considerable improvement, from 97·8 tons in 1923 to 103·5 tons during the year under review; the figure for 1919 was 111·05 tons. The number of deaths by accident was considerably less than in the preceding year, and was, in fact, equal to the average figures for the quinquennial period 1919-23 viz 274. The corresponding death-rate was 1·34 per thousand persons employed, the figure for the preceding year 1923 being 1·81 per thousand.

Average number of persons employed daily in the Indian Coalfields during the year 1923 and 1924:—

## Stock Exchanges.

There are about 446 Share and Stock Brokers in Bombay. They carry on business in the Brokers' Hall, bought in 1899 from the funds of the Share and Stock Brokers' Association formed to facilitate the negotiations and the sale and purchase of Joint Stock securities promoted throughout the Presidency of Bombay. Their powers are defined by rules and regulations framed by the Board of Directors and approved by the general body of Brokers. The Board has the power to fix the rates in times of emergencies. The official address of the Secretary is Dalal Street, Fort, Bombay.

At first the admittance fee for a broker was Rs. 5 which was gradually raised to Rs. 7,000. The fee for the Broker's card has increased and it was recently sold by public auction for Rs. 21,800. The rules of the Association were revised in October 1916 and from the New Year the purchaser of shares has to pay the stamp and transfer fee instead of the seller. There are two classes of Exchange Brokers, Europeans and Indians, the latter being certified for recognition by the native Stock Exchange. Business in Government Paper and all other Trustees' Authorised Securities is carried on under the rules of the Bombay Stock Exchange, but in the street outside the hall.

In November 1917 a second Stock Exchange was opened in Bombay, with its headquarters in Apollo Street, known as the **Bombay Stock Exchange, Ltd.** This separate Exchange no longer functions as the old body; it was revived in 1922 but complaint was made that it did very little, if any business.

**Committee of Enquiry.**—In 1923 the Government of Bombay appointed a Committee to enquire into the constitution, government, customs, practices, rules, regulations and methods of business of the Native Share and Stock Brokers' Association of Bombay and to investigate any such complaints of the public and to make any such enquiries with reference to any of the aforesaid matters or any other matter appertaining to the aforesaid Association as the Committee may deem proper and thereafter with a view to protect the investing public against the interested or irregular control of business to formulate such definite proposals for the future constitution, control, direction and regulation of the aforesaid Association as the Committee may deem proper.

The Committee issued a report early in 1924 signed by all the members save one who appended a minority report. The majority report made several important recommendations for reform, notably one aimed at the prevention of corners and another for facilitating the handling of legitimate complaints against the brokers on the part of the public. The Association, however, adopted the minority report which leaves the constitution and practice of the Exchange very little modified.

In the middle of the year 1925 there was heavy speculation in certain mill scrips. The market was tremendously oversold, the usual crisis ensued, leading to the temporary closing of the Exchange and the suspension of all dealings,

and a public agitation for thorough reform arose. The brokers were at first unwilling to yield to this demand. But a threat of Government intervention and control altered their attitude. In the end, they submitted new draft rules under which wild speculation will be discouraged and the recurrence of such crisis as that indicated above will be unlikely. These have been considered by Government and will probably be approved and adopted.

For many years the **Calcutta Share Market** had its meeting place in various gullies in the business quarter and was under no control except that of established market custom. In 1808 the **Calcutta Stock Exchange Association** was formed, a building was leased in New China Bazar Street now called **Royal Exchange Place**, a representative committee was formed, and the existing trade customs were focused into rules drawn up for the conduct of business. Admittance as a member of the Stock Exchange is by vote of the committee, and the entrance fee is at present Rs. 500. The market custom differs very materially from that of most other Stock Exchanges since there are no settlement days, delivery is due the second day after the contract is passed and sales of securities are effected for the most part under blank transfers. Another difference in procedure as compared with the London Stock Exchange is that there are no "Jobbers" in the Calcutta market. The Dealers who take their place, more or less, are not compelled to quote a buyer's and a seller's rate and are themselves Brokers as well as dealers, calling upon the Banks and other clients and competing with Brokers.

There are about 150 members, besides outside brokers, the former consisting of European, Jewish, Marwari, and Bengalee firms. The Marwaris predominate. The volume of *bona fide* Investment business is comparatively small and insufficient for the number of Brokers. The principal business transacted on the Calcutta Stock Exchange is connected with the shares in Jute Mills. Coal Companies, Tea Companies registered in India, Miscellaneous industrial concerns (such as Paper, Flour, Sugar). Railway and Transit Companies and Debentures, the latter comprising those of industrial concerns and Trustees. Investment Securities, namely, Municipal and Port Trust Debentures. The association has an honorary secretary and is not at present affiliated to the Bengal Chamber of Commerce.

The **Madras Stock Exchange** situated at No. 9 Broadway (in Tata Industrial Bank Buildings) consists of about 100 Members of which 25 are working Members. It was opened on 6th April 1920 and deals principally in Mill shares. Business is regulated by rules drawn up by the Directors. There is a Board of arbitration. There is an admittance membership card of Rs. 1,000 and an annual subscription of Rs. 100. The original 100 members were elected by the first Directors and each of the working members have deposited a security of Rs. 3,000.

## Chambers of Commerce.

Modern commerce in India was built up by merchants from the west and was for a long time entirely in their hands. Chambers of Commerce and numerous kindred Associations were formed by them for its protection and assistance. But Indians have in recent years, taken a large and growing part in this commercial life. The extent of their participation varies greatly in different parts of India, according to the natural proclivities and genius of different races. Bombay, for instance, has led the way in the industrial and commercial regeneration of the new India, while Bengal, very active in other fields of activity, lags behind in this one. Arising from these circumstances we find Chambers of Commerce in Bombay, Karachi, Calcutta, Madras and other important centres, with a membership both European and Indian; but alongside these have sprung up in recent years certain Associations, such as the Bombay Indian Merchants' Chamber and Bureau, of which the membership is exclusively Indian. These different classes of bodies are in no sense hostile to one another and constantly work in association.

The London Chamber of Commerce in 1912, realising the increasing attention demanded by the economic development of India, took steps to form an "East India Section" of their organization. The Indian Chambers work harmoniously with this body, but are in no sense affiliated to it, nor is there at present any inclination on their part to enter into such close relationship, because it is generally felt that the Indian Chambers can themselves achieve their objects better and more effectively than a London body could do for them, and on various occasions the London Chamber, or the East India Section of it have shown themselves out of touch with what seemed locally to be immediate requirements in particular matters.

A new movement was started in 1913 by the Hon. Sir Fazulbhoy Currimbhoy Ibrahim, a leading millowner and public citizen of Bombay, which aims at effecting great improvement in strengthening Indian commercial organization. Sir Fazulbhoy's original plan was for the formation of an Indian Commercial Congress. The proposal met with approval in all parts of India. The scheme was delayed by the outbreak of war but afterwards received an impetus from the same cause and the first Congress was held in the 1915 Christmas holiday season in the Town Hall, Bombay. The list of members of the Reception Committee showed that all the important commercial associations of Bombay were prepared to co-operate actively.

The Congress was attended by several hundred delegates from all parts of India. Mr. (now the Hon. Sir) D. E. Wacha, President of the Bombay Indian Merchants' Chamber, presided, as Chairman of the Reception Committee, at the opening of the proceedings and the first business was the election of Sir Fazulbhoy Currimbhoy as the first President. The Congress resolved upon the establishment of an Associated Indian Chamber of Commerce, and elected a Provincial Committee empowered to

take the necessary steps to get the Association registered and to enrol members and carry on work. The Congress also approved of the draft constitution.

The following are the principal paragraphs of a Memorandum of Association of the new Associated Chamber as approved by the Congress:—

I. The name of the Chamber will be "THE ASSOCIATED INDIAN CHAMBER OF COMMERCE."

II. The Registered Office of the Chamber will be in Bombay.

III. The objects for which the Chamber is established are:—

- (a) To discuss and consider questions concerning and affecting trade, commerce, manufactures, and the shipping interests, at meeting of delegates from Indian Chambers of Commerce and Commercial Associations or Bodies and to collect and disseminate information from time to time on matters affecting the common interests of such Chambers or Associations or Bodies and the commercial, manufacturing and shipping interests of the country.
- (b) To communicate the opinions of the Chambers of Commerce and other Commercial Associations or Bodies separately or unitedly, to the Government or to the various departments thereof, by letter, memorial, deputation or otherwise.
- (c) To petition Parliament or the Government of India or any Local Government or authority on any matter affecting trade, commerce, manufacture or shipping.
- (d) To prepare and promote in Parliament or in the Legislative Councils of India, both Imperial and Provincial, Bills in the interest of trade, commerce, manufactures, and shipping of the country and to oppose measures which in the opinion of the Chamber, are likely to be injurious to those interests.
- (e) To attain those advantages by united action which each Chamber or Association or body may not be able to accomplish in its separate capacity.
- (f) To have power to establish an office, either in England or in any part of British India with an Agent there in order to ensure to the various Chambers early and reliable information on matters affecting their interests and to facilitate communication between the Chamber or individual chambers and the Government or other public bodies, and generally to conduct and carry on the affairs of the Chamber.
- (g) To organise Chambers of Commerce, Commercial Associations or Bodies in different trade centres of the Country.

- (A) To convene when necessary the Indian Commercial Congress at such places and at such times as may be determined by a Resolution of the Chamber.
- (G) To do all such other things as may be incidental or conducive to the above objects.

The Articles of Association provide for the management of the Chamber by an Executive Council composed of a President, Vice-President, and ten other members elected at the annual meeting of the Associated Chamber, the Executive Council to present a report and statement of accounts at each annual meeting.

The Articles declare the number of members of the Associated Chamber not to exceed one hundred, and the Executive Council are given power to elect honorary members. "There shall be an annual meeting of the Associated Indian Chamber held at Bombay on a date to be fixed by the Executive Council in the month of February," or at some other time, and "semi-annual or special meetings may be convened by the Executive Council or on the requisition of one-third of the total number of members addressed to the Secretary."

The following are details of the principal Chambers of Commerce and kindred bodies in India at the present time :—

## BENGAL.

The Bengal Chamber of Commerce was founded in 1834. Its headquarters are in Calcutta. Other societies connected with the trade and commerce of the city are the Royal Exchange, the Bengal Bonded Warehouse Association, the Calcutta Trades Association, the Bengal National Chamber of Commerce and the Marwari Chamber of Commerce. The Bengal Chamber is registered with a declaration of membership of 300. Its objects are the usual purposes connected with the protection of trade "in particular in Calcutta." There are two classes of members. Permanent (Chamber and Associate) and Honorary.

Merchants, bankers, shipowners, representatives of commercial, railway and insurance companies, brokers, persons and firms engaged in commerce, agriculture, mining or manufacture, and joint stock companies or other corporations, formed for any purpose or object connected with commerce, agriculture, mining or manufacture, and persons engaged in or connected with art, science or literature, may be elected as permanent members of the Chamber.

The following are the office bearers of the Chamber for the year 1925-26 :—

*President*.—Mr. Kenneth Campbell, M.L.C., (Messrs. Shaw, Wallace & Co.)

*Vice-President*.—Mr. B. E. G. Eddis, M.L.C. (Messrs. Gillanders, Arbutnot & Co.)

*Committee*.—Mr. W. Clark, (Chartered Bank of India, Australia and China); Mr. G. L. Colvin, C.B., C.M.G., D.S.O., (East Indian Railway); Sir William Currie (Messrs. Mackinnon Mackenzie & Co.); Mr. T. W. Dowling (Messrs. Turner Morrison & Co., Ltd.); Mr. D. S. K. Greig (Messrs. Begg, Dunlop and Co.); Mr. J. Reid Kay (Messrs. James Finlay & Co., Ltd.); and Mr. R. O. Law (Messrs. Birkmyre Bros.)

The Secretary of the Chamber is Mr. H. M. Haywood, C.I.E. Asst. Secretaries.—Mr. D. K. Gunnison and Mr. A. U. Daniel.

The following are the public bodies (among others) to which the Chamber has the right of returning representatives, and the representatives returned for the current year :—

*Council of State*.—The Hon'ble Sir William Currie, Kt.

*Bengal Legislative Council*.—Mr. P. H. Browne, C.B.E. (Messrs. Mackinnon Mackenzie & Co.), Mr. Kenneth Campbell (Messrs. Shaw Wallace & Co.), Mr. B. E. G. Eddis (Messrs. Gillanders, Arbutnot & Co.), Mr. Geo. Morgan (Morgan, Walker & Co.), Mr. P. Parrott (Messrs. Kilburn & Co.) and Mr. C. B. Chartres (Messrs. Burn & Co. Ltd.).

*Calcutta Port Commission*.—Sir Willoughby Carey (Messrs. Bird & Co.), Sir William Currie (Messrs. Mackinnon, Mackenzie & Co.), Mr. B. E. G. Eddis, M.L.C. (Messrs. Gillanders, Arbutnot & Co.), Mr. H. C. Edmondson (Messrs. Turner, Morrison & Co., Ltd.) Mr. J. A. Tassie (Messrs. James Finlay & Co., Ltd.) and Mr. H. B. Whitby (Messrs. Kilburn & Co.)

*Calcutta Municipal Corporation*.—Mr. W. R. C. Brerley, (Messrs. Shaw Wallace & Co.); Mr. J. Campbell Forrester, M.L.C. (Smith Forrester & Co.), Mr. Geo. Morgan, M.I.C. (Morgan, Walker & Co.), Mr. Norman R. Luke (James Luke & Sons), Mr. H. G. Pooler (John Dickinson & Co., Ltd.), Mr. D. C. Stewart-Smith, Octavius Steel & Co., Ltd.)

*Bengal Boiler Commission*.—Messrs. J. Williamson (Kinnison Jute Mills Co., Ltd., No. 2), H. H. Reynolds (Andrew Yule & Co.) and H. E. Skinner (Jessop & Co., Ltd.)

*Board of Trustees of the Indian Museum*.—Mr. H. C. Edmondson (Turner, Morrison & Co., Ltd.).

*Bengal Smoke Nuisances Commission*.—Messrs. T. M. Shewell (Burn & Co., Ltd.) and G. Robertson (Union Jute Coy.'s, S. Mill.)

*Calcutta Improvement Trust*.—Mr. Geo. Morgan, M.L.C., (East Indian Railway.)

The Chamber elects representatives to various other bodies of less importance, such as the committee of the Calcutta Sailors' Home, and to numerous subsidiary associations. The following are the recognised associations of the Bengal Chamber of Commerce :—

Calcutta Wheat and Seed Trade Association  
Indian Jute Mills Association, Indian Tea Association, Calcutta Tea Traders Association, Calcutta Fire Insurance Association, Calcutta Import Trade Association, Cal

cutta Marine Insurance Agents' Association, The Wine, Spirit and Beer Association of India, Indian Mining Association, Calcutta Baled Jute Association, Indian Paper Makers' Association, Indian Engineering Association, Calcutta Jute Fabrica Shippers' Association, Calcutta Hydraulic Press Association, Jute Fabric Brokers' Association, Baled Jute Shippers' Association, Calcutta Jute Dealers' Association, Calcutta Liners' Conference, Calcutta Hides and Skins Shippers' Association, Northern India Tanners' Federation, Indian Indigo Association, Indian Lac Association for Research and Calcutta Accident Insurance Association.

The Chamber maintains a Tribunal of Arbitration for the determination, settlement and adjustment of disputes and differences relating to trade, business, manufactures, and to customs of trade, between parties, all or any of whom reside or carry on business personally or by agent or otherwise in Calcutta, or elsewhere in India or Burmah, by whomsoever of such parties the said disputes and differences be submitted. The Secretary of the Chamber acts as the Registrar of the Tribunal, which consists of such members or assistants to mem-

bers as may, from time to time, annually or otherwise be selected by the Registrar and willing to serve on the Tribunal. The Registrar from time to time makes a list of such members and assistants.

The Chamber also maintains a Licensed Measurers Department controlled by a special committee. It includes a Superintendent (Mr. R. Ellis), Deputy Superintendent (Mr. A. H. Lugg), Head Office Manager (Mr. C. G. Smith) and four Assistant Superintendents (Messrs. J. G. Smyth, A. H. Mathews, and G. C. G. Smyth, E. H. W. Wooten and the staff at the time of the last official returns consisted of 112 officers. The usual system of work for the benefit of the trade of the port is followed. The Department has its own provident fund and compassionate funds and Measurers' Club. The Chamber does not assist in the preparation of official statistical returns. It publishes weekly the *Calcutta Prices Current*, and its *Monthly Supplement*, and also publishes a large number of statistical circulars of various descriptions in addition to a monthly abstract of proceedings and many other circulars on matters under discussion.

### BOMBAY.

The object and duties of the Bombay Chamber, as set forth in their Memorandum and Articles of Association, are to encourage a friendly feeling and unanimity among commercial men on all subjects involving their common good; to promote and protect the general mercantile interests of this Presidency; to collect and classify information on all matters of general commercial interest; to obtain the removal, as far as such a Society can, of all acknowledged grievances affecting merchants as a body, or mercantile interests in general; to receive and decide references on matters of usage and custom in dispute, recording such decisions for future guidance, and by this and such other means, as the Committee for the time being may think fit, assisting to form a code of practice for simplifying and facilitating business; to communicate with the public authorities, with similar Associations in other places and with individuals, on all subjects of general mercantile interests; and to arbitrate between parties willing to refer to, and abide by, the judgment of the Chamber.

The Bombay Chamber was established in 1836, under the auspices of Sir Robert Grant, who was then Governor of the Presidency, and the programme described above was embodied in their first set of rules. According to the latest returns, the number of Chamber members is 144 and the number of Associated members is 8. Of these numbers 19 represent banking institutions, 7 shipping agencies and companies, 3 firms of solicitors, 3 railway companies, 6 insurance companies, 16 engineers and contractors, 93 firms engaged in general mercantile business.

All persons engaged or interested in mercantile pursuits desirous of joining the Chamber and disposed to aid in carrying its objects into effect are eligible for election to membership by

ballot. The Chamber member's subscription is Rs. 300 and the Associate member's subscription is Rs. 200 per annum. Gentlemen distinguished for public services, or "eminent in commerce and manufactures," may be elected honorary members and as such are exempt from paying subscriptions. Any stranger engaged or interested in mercantile pursuits and visiting the Presidency may be introduced as a visitor by any Member of the Chamber inserting his name in a book to be kept for the purpose, but a residence of two months shall subject him to the rule for the admission of members.

#### Officers of the Year.

The affairs and funds of the Chamber are managed by a committee of nine ordinary members, consisting of the chairman and deputy-chairman and seven members. The committee must, as a rule, meet at least once a week and the minutes of its proceedings are open to inspection by all members of the Chamber, subject to such regulations as the committee may make in regard to the matter. A general meeting of the Chamber must be held once a year and ten or more members may requisition, through the officers of the Chamber, a special meeting at any time, for a specific purpose.

The Chamber elects representatives as follows to various public bodies:—

The Council of State, one representative.  
Legislative Council of the Governor of Bombay, two representatives.

Bombay Municipal Corporation, one member, elected for three years.

Board of Trustees for the Improvement of the City of Bombay, one member, elected for two years.

Board of Trustees of the Port of Bombay, five members, elected for two years.

The following are the officers of the Chamber for the year 1925-26 and their representatives on the various public bodies:—

**Chairman.**—V. A. Grantham, Esq., M.L.C.

**Deputy Chairman.**—J. A. Kay, Esq., M.L.C.

**Committee.**—The Hon. Sir Arthur Froom, Kt., J. R. Abercrombie, Esq., A. K. Graham, Esq., R. McLean, Esq., A. B. Morrison, Esq., G. Sugdury, Esq., and L. F. Tucker, Esq.

**Secretary:** Mr. R. J. F. Sullivan.

**Representatives on—**

**Council of State:** The Hon'ble Sir Arthur Froom, Kt.

**Bombay Legislative Council:** J. R. Abercrombie, Esq., and V. A., Grantham, Esq.

**Bombay Port Trust:** Sir Leslie Hudson, Kt., M.L.C., A. K. Graham, Esq., T. E. Cunningham, Esq., V. A. Grantham, Esq., M.L.C., F. C. Annesley, Esq.

**Bombay Improvement Trust:** Harry T. Gorrie, Esq.

**Bombay Municipal Corporation:** A. J. Raymond.

**Sydenham College of Commerce Advisory Board:** Sir Leslie Hudson, Kt., M.L.C., L. F. Tucker, Esq.

**Representative on the Railway Committee:**

G. I. P.—F. C. Annesley, Esq.

B. B. & C. I.—F. C. Annesley, Esq.

**Bombay Smoke Nuisances Commission:** B. Brown, Esq.

**St. George's Hospital Advisory Committee:** O. H. Goodall, Esq.

**Indian Central Cotton Committee:** V. A. Grantham, Esq.

**Empire Cotton Growing Corporation:** Osborne Marshall, Esq.

**Advisory Committee to the Director of Development:** B. O. Reid, Esq.

**Auxiliary Force Advisory Committee:** H. R. Watson, Esq.

**Ex. Officers Association, (India):** V. A. Grantham, Esq., M.L.C. (Ex-Office.)

**Bombay Telephone Co.:** A. B. Morrison, Esq.

#### Special Work.

One of the most important functions performed by the Chamber is that of arbitration in commercial disputes. Rules for this have been in existence for many years and have worked most satisfactorily. The decisions are in all cases given by competent arbitrators appointed by the General Committee of the Chamber and the system avoids the great expense of resort to the Law Courts.

A special department of the Bombay Chamber is its Statistical Department, which prepares a large amount of statistical returns connected with the trade of the port and of great importance to the conduct of commerce. The department consists of fourteen Indian clerks who, by the authority of Government, work in the Customs House and have every facility placed at their disposal by the Customs authorities. They compile all the statistical information in connection with the trade of the port, in both export and import

divisions, which it is desirable to record. No other Chamber in India does similar work to the same extent.

The Bombay Chamber publishes a *Daily Arrival Return* which shows the receipts into Bombay of cotton, wheat and seeds, and a *Daily Trade Return*, which deals with trade by sea and shows in great detail imports of various kinds of merchandise and of treasure, while the same return contains particulars of the movements of merchant vessels.

The Chamber publishes twice a week detailed reports known as *Import and Export manifests*, which give particulars of the cargo carried by each steamer to and from Bombay.

Three statements are issued once a month. One shows the quantity of exports of cotton, seeds and wheat from the principal ports of the whole of India. The second gives in detail imports from Europe, more particularly in regard to grey cloths, bleached cloths, Turkey red and scarlet cloths, printed and dyed goods, fancy cloth of various descriptions, woollens, yarns, metals, kerosine oil, coal, aniline dyes, sugar, matches, wines and other sundry goods. The third statement is headed, "Movements of Piece-Goods and Yarn by Rail," and shows the despatches of imported and local manufactured piece-goods and yarn from Bombay to other centres of trade served by the railways.

The "Weekly Return" issued by the Chamber shows clearances of a large number of important designations of merchandise. A return of "Current Quotations" is issued once a week, on the day of the departure of the English mail, and shows the rates of exchange for Bank and Mercantile Bills on England and Paris, and a large quantity of general banking and trade information.

The annual reports of the Chamber are substantial tomes in which the whole of the affairs of the Chamber and the trade of the port during the past year are reviewed.

The Chamber has also a Measurement Department with a staff of 18, whose business is that of actual measurement of exports in the docks before loading in steamers. Certificates are issued by these officers with the authority of the Chamber to shippers and ship agents as to the measurement of cotton and other goods in bales or packages. The measurers are in attendance on the quays whenever there are goods to be measured and during the busy season are on duty early and late. The certificates granted show the following details:—

- (a) The date, hour and place of measurement
- (b) the name of the shipper;
- (c) the name of the vessel;
- (d) the port of destination;
- (e) the number and description of packages;
- (f) the marks;
- (g) the measurement, and in the case of goods shipped by boats;
- (h) the registered number of the boat
- (i) the name of the tinal.

Certificates of weight and of origin are also issued by the Chamber.

# **Bombay Millowners' Association.**

The Bombay Millowners' Association was established in 1875 and its objects are as follows :—

- (a) The protection of the interests of millowners and users of steam water and/or electric power in India.
- (b) The promotion of good relations between the persons and bodies using such power.
- (c) The doing of all those acts and things by which these objects may be furthered.

Any individual partnership or company, owning one or more mill or mills or one or more press or presses or one or more ginning or other factory or factories actuated by steam, water, electric and/or other power is eligible for membership, members being elected by ballot. Every member is entitled to one vote for every complete sum of Rs. 50 paid by him as annual subscription.

The membership of the Association in 1924 numbered 97.

The following is the Committee for 1924 :—

N. N. Wadia, Esq., C.I.E. (*Chairman*), Ratan-  
si D. Morarji, Esq., *Deputy Chairman*),  
Sir D. M. Petit, Bart., The Hon'ble Sir  
D. E. Wacha, Kt., Sir Fazulbhoy Cur-  
rimbhoy, Kt., C.B.E., Sir Victor Sassoon,  
Bart., H. F. Commissariat, Esq., A. Geddis,  
Esq., J. A. Kay, Esq., M.L.C., H. P. Mody,  
Esq., Lalji Naranji, Esq., M.L.C., J.B. Petit,  
Esq., The Hon'ble Mr. Munmohandas  
Ramji, N. B. Saklatvala, Esq., C.I.E.,  
S. D. Saklatvala, Esq., H. H. Sawyer,  
Esq., F. P. Stileman, Esq., F. Stones,  
Esq., O.B.E., Madhavji D. Thackersey,  
Esq., C. N. Wadia, Esq., C.I.E., T. Watts,  
Esq., T. Maloney, Esq., M.C., A.M.C.T.,  
*Secretary*, J. P. Wadia, Esq., B.A., *Asst.*  
*Secretary*.

The following are the Association's Re-  
presentatives on public bodies :—

**Bombay Legislative Council:** Mr. C. N.  
Wadia, C.I.E., M.L.C.

**Bombay Port Trust:** Mr. N. B. Saklatvala,  
C.I.E.

**City of Bombay Improvement Trust:** Mr.  
N. N. Wadia, C.I.E.

**Victoria Jubilee Technical Institute:** Messrs.  
Jehangir B. Petit and Ratanji D. Mo-  
rarji.

**Bombay Smoke Nuisances Commission:**  
Messrs. N. B. Saklatvala, C.I.E., and  
W. A. Sutherland.

**Advisory Board of Sydenham College of  
Commerce and Economics:** Mr. S. D.  
Saklatvala.

**Central Cotton Committee:** Mr. J. A. Kay,  
M.L.C.

**Development of Bombay Advisory Com-  
mittee:** Mr. Jehangir B. Petit.

**Bombay Technical and Industrial Edu-  
cational Committee:** Mr. J. A. Kay,  
M.L.C.

**Royal Institute of Science Advisory Com-  
mittee:** Mr. J. A. Kay, M.L.C.

**League of Nations—Commissions of En-  
quiry:** Mr. J. A. Kay, M.L.C.

**G. I. F. Railway Advisory Committee:** Mr.  
A. Geddis.

**B. R. & C. I. Railway Advisory Committee:**  
Mr. Munmohandas Ramji.

**Bombay Municipal Corporation:** Mr. H. P.  
Mody.

The Office of the Association is located in  
Sohrab House, Hornby Road, Fort, Bombay,  
and the telephone number is 25350.

## **Millowners' Mutual Insurance Association, Ltd**

The Millowners' Mutual Insurance Associa-  
tion, Ltd., was registered on 30th June 1924, as  
a Company limited by guarantee. The regis-  
tered office of the Association is located in  
Sohrab House, Hornby Road, Bombay.

The objects of the Association are :—

- (a) The mutual insurance of members of the  
Company against liability to pay  
compensation or damages to workmen  
employed by them or their dependents,  
for injuries or accidents, fatal or other-  
wise, arising out of and in the course  
of their employment; (b) the insurance  
of members of the Company against loss  
or damage by or incidental to fire,  
lightning, etc.; and (c) to reinsure or  
in any way provide for or against the  
liability of the Company upon any  
assurances granted or entered into  
by the Company, and generally to  
effect and obtain re-insurances, counter-  
insurances and counter-guarantees, etc.,  
etc., etc.

The Association consisted of 59 members on  
1st November 1925.

All members of the Millowners' Association are  
eligible for admission to the Mutual Company.  
Non-members are also eligible for membership  
of the Mutual, provided their application is  
approved of by the Committee of the Mil-  
lowners' Association.

The affairs of the Mutual Insurance Associa-  
tion are under the control of a Board of Direc-  
tors.

The present Directors are :—

Mr. N. N. Wadia, Esq., C.I.E. (on leave),  
*Chairman*, Ratanji D. Morarji Esq., (Ag.),  
Capt. E. V. Sassoon, Mr. J. A. Kay, Mr.  
C. N. Wadia, Mr. Munmohandas Ramji,  
Mr. G. M. Rose, and Mr. B. K. Mantri,  
B.A., Bar-at-Law, *Secretary of the Asso-  
ciation*.

## **Indian Merchants' Chamber.**

The Indian Merchants' Chamber was estab-  
lished in the year 1907. Its objects are :—

- (a) To encourage friendly feeling and unani-  
mity among business community on  
all subjects connected with the com-  
mon good of Indian merchants.
- (b) To secure organised action on all subjects  
relating to the interests of the Indian  
business community directly and in-  
directly.

- (c) To promote the objects of the Indian business community in matters of inland and foreign trade, shipping and transport, industry and manufacture, banking and insurance.
- (d) To collect and disseminate statistical and other information securing the promotion of the objects of the Chamber and to make efforts for the spread of commercial and economic knowledge.
- (e) To take all steps which may be necessary for promoting, supporting or opposing legislation or other action affecting the aforesaid interests by the Government or any Department thereof or by any local body or bodies and in general to take the initiative to secure the welfare of the business community in all respects.
- (f) To make representations to Local Central or Imperial authorities, Executive or Legislative on any matter affecting trade, commerce, manufacture or shipping, banking or insurance.
- (g) To undertake by arbitration the settlement of commercial disputes between merchants and businessmen and also to provide for arbitration in respect of disputes arising in the course of trade, industry or transport, and to secure the services of expert technical and other men to that end if necessary or desirable.
- (h) To advance and promote commercial and technical education and to found and support establishments and institutions for such purposes.
- (i) To undertake special enquiries and action for securing redress for legitimate grievances of any branch of trade or industry as also all such other actions as may be conducive to the extension of trade, commerce or manufactures, or incidental to the attainment of the above objects.
- (j) To secure the interests and well-being of the Indian business communities abroad.
- (k) And generally to do all that may be necessary in the interests of the realisation of the above objects of the Chamber directly or indirectly.

There are three classes of members :—

- (1) Ordinary, (2) Patrons and (3) Honorary.
- (1) There are three classes of ordinary members :—
  - (a)—Residents of Bombay and its suburbs who will have to pay Rs. 75 as annual subscription ; but joint stock Companies will have to pay Rs. 100 per year.
  - (b)—Mutual members who will have to pay Rs. 25 as annual subscription.
  - (c)—Associations which will have to pay Rs. 125 as annual subscription.

**Admission Fee :—**All the ordinary members and patrons pay Rs. 100 as admission fee which is credited to a capital fund of the Chamber and not expended on revenue account except with the consent of the general body.

- (2) Patrons:—Indian firms or individual Indian merchants can join as Patrons. Firms will have to pay Rs. 5,000 and individuals Rs. 2,500 as donation, the proceeds of which will be credited to a capital fund which shall not be expended on revenue account but the interest whereof shall be taken to revenue account.
- (3) Honorary members :—Gentlemen distinguished for public services or eminent in commerce and manufactures or otherwise interested in the aims and objects of the Chamber may be elected as Honorary members by a General Meeting of the Chamber on the recommendation of the Committee and as such shall be exempted from paying subscriptions. They shall not be entitled to vote at any meeting of the Chamber nor shall they be eligible to serve on the Committee.

Any Indian gentleman, firm or association engaged in mercantile pursuits or interested in trade and commerce desirous of joining the Chamber shall be eligible for membership.

The following bodies are connected directly and indirectly with the Chamber :—

The Grain Merchants' Association (which is a member).

The Hindustani Native Merchants' Association (which is a member).

### **Bombay Native Piece-Goods Merchants' Association.**

The objects of the Association are as follow :—

(a) To promote by creating friendly feelings and unity amongst the Merchants, the business of the piece-goods trade in general at Bombay, and to protect the interest thereof; (b) to remove as far as it will be within the powers of the Association to do so, all the trade difficulties of the piece-goods business and to frame such line of conduct as will facilitate the trade; (c) to collect and assort statistics relating to piece-goods and to correspond with public bodies on matters affecting trade, and which may be deemed advisable for the protection and advancement of objects of the Association or any of them; and (d) to hear and decide disputes that may be referred to for arbitration.

The following are the office-bearers for the current year :—

*Chairman*—Mr. Manmohandas Ramji, J.P.

*Deputy Chairman*—Mr. Devidas Madhownji Thakersey, J.P.

*Hon. Joint Secretaries*—Messrs. Goculdas Jivraj Dayal and Hurjiwan Walji.

*Hon. Treasurer*—Mr. Purshotam Lalji Tricumji.

### **Grain Merchants' Association.**

The object of this body is "to promote the interests of the merchants and to put the grain and oil-seeds trade on a sound footing." It is an influential body of large membership. The office holders for the current year are as follows :—

*Chairman*—Mr. Velji Lakhamji, B.A., LL.B.

*Vice-Chairman*—Mr. Purshotam Hirji.

*Hon. Secretary*—Mr. Nathoo Cooverji.

*Secretary*—Mr. Uttamram Amaram, B.A., LL.B.

The address of the Association is 262, Masjid Bunder Road.

### **KARACHI.**

The objects and duties of the Karachi Chamber of Commerce are set forth in terms similar to those of Bombay. Qualifications for membership are also similar. Honorary Membership may be conferred upon "any gentlemen interested in the affairs and objects of the Chamber" subject to election by the majority of votes of members. All new members joining the Chamber pay Rs. 500 entrance fee and the

monthly subscription is Rs. 18. The subscription to the Chamber's periodical returns is at present fixed at Rs. 5 per month. The affairs of the Chamber are managed by a committee of ten members, consisting of a Chairman, Vice-Chairman and eight members, elected at the annual meeting of the Chamber as early in the year as possible. The Chamber elects a representative on the Bombay Legislative

**Council**, three representatives on the Karachi Port Trust and two on the Karachi Municipality. There were last year 75 members of the Chamber. The following are the officers for the current year:—

**Chairman**.—Mr. F. Clayton, C.I.E., M.L.C. (Fleming, Shaw & Co.).

**Vice-Chairman**.—R. D. England, Esq. (Messrs. Grahams Trading Co., Ltd.).

**Committee**.—Messrs. R. S. Backhouse (David Sassoon & Co., Ltd.), J. R. Baxter (MacKinnon Mackenzie & Co.), P. Crawford (Shaw, Wallace & Co.), J. Mori (Volkart Bros.), W. M. Petrie (Ralli Brothers), A. G. Rice (Chartered Bank of India, Australia and China), A. I. Sleight (North-Western Railway) and H. C. Whitehouse (Strauss & Co., Ltd.)

**Representatives on the Bombay Legislative Council**.—Mr. F. Clayton, M.L.C.

**Representatives on the Karachi Port Trust**.—Mr. F. Clayton, M.L.C., Mr. E. A. Pearson & Mr. J. R. Baxter.

**Representatives on the Karachi Municipality**.—Mr. F. R. Hawkes, O.B.E. & Mr. E. G. H. Mewburn.

**Secretary**.—Major Alan Duguid, A.F.C., late R.A.F.

**Public Measurer**.—Major Alan Duguid (Ag.)

The following are the principal ways in which the Chamber gives a special assistance to members. The Committee take into consideration and give an opinion upon questions submitted by members regarding the custom of the trade or of the Port of Karachi. The Committee undertake to nominate European surveyors for the settlements of disputes "as to the quality or condition of merchandise in which both parties desire the Chamber to do so." When two members of the Chamber or when one member and a party who is not a member have agreed to refer disputes to the arbitration of the Chamber or of an arbitrator or arbitrators nominated by the Chamber, the Committee will undertake to nominate an arbitrator or arbitrators, under certain regulations. Similarly, the Chamber under certain regulations, will undertake to appoint an arbitrator or arbitrators for the settlement of disputes in which neither of the parties are members of the Chamber. A public measurer is appointed under the authority of the Chamber to measure pressed bales of cotton, wool hides and other merchandise arriving at or leaving the port.

## MADRAS.

The Madras Chamber of Commerce was founded in 1836. All merchants and other persons engaged or interested in the general trade, commerce and manufactures of Madras are eligible for membership. Any assistant signing a firm or signing *per-pro* for a firm is eligible. Members who are absent from Madras but pay their subscriptions may be represented in the Chamber by their powers-of-attorney, as honorary members, subject to ballot. Honorary members thus elected are entitled to the full privilege of ordinary members. Election for membership as by ballot at a general meeting, a majority of two-thirds of the recorded votes being necessary to secure election. Every member pays an entrance fee of Rs. 100, provided that banks, corporate bodies and mercantile firms may be represented on the Chamber by one or more members and are liable for an entrance fee of Rs. 100 once in ten years each. The subscriptions shall not exceed Rs. 300 per annum, payable quarterly in advance, subject to reduction from time to time in accordance with the state of the Chambers' finances. Absentees in Europe pay no subscription and members temporarily absent from Madras pay one rupee per month. Honorary members are admissible to the Chamber on the usual conditions. Members becoming insolvent cease to be members but are eligible for re-election without repayment of the entrance donation.

The Chamber undertakes arbitrations and surveys the granting of certificates of origin and the registration of trade marks. One of the rules for the last named is "that no trade mark on ticket shall be registered on behalf of an Indian firm trading under a European name."

The following publications are issued by the Chamber:—Madras Price Current and Market Report, Tonnage Schedule and Madras Landing Charges and Harbour Dues Schedule.

There are 53 members and six honorary members of the Chamber in the current year and the officers and committee for the year are as follows:—

**Chairman**.—Mr. T. M. Ross, M.L.C.

**Vice-Chairman**.—Sir James Simpson, M.L.C.

**Committee**.—Mr. W. M. Browning, Mr. K. Kay, Mr. A. J. Leech, Mr. W. R. T. Mackay and Mr. C. E. Wood.

The following are bodies to which the Chamber are entitled to elect representatives, and the representatives elected for the year:—

**Madras Legislative Council**.—Mr. T. M. Ross and Sir James Simpson.

**Madras Port Trust**.—Mr. T. M. Ross, Sir James Simpson, Mr. K. Kay and Mr. C. E. Wood.

**Corporation of Madras**.—Mr. J. F. Jones and Mr. H. Lee.

**British Imperial Council of Commerce London**.—Sir Gordon Fraser, Kt. M.L.A.

**Secretary**.—Mr. H. Waddington.

## Southern India Chamber.

The Southern India Chamber of Commerce has its Registered Office in Madras. The objects of the Chamber are those usual for such bodies, concerning the promotion of trade, especially in the Madras Presidency, and the interests of members. Special objects are stated to be:—

"To maintain a Library of books and publications of commercial interest, so as to diffuse commercial information and knowledge amongst its members.

"To establish Museums of commercial products or organise exhibitions, either on behalf of the Chamber or in co-operation with others."

There are two classes of members, permanent and honorary. The usual conditions as to eligibility for election prevail.

The right of electing two representatives to the Madras Port Trust was accorded to the Chamber by the Madras Port Trust Amendment Act, 1915. Members of the Chamber hold seats in the Madras Legislative Council and the Chamber has also been accorded the right of electing a representative to that body. Under the Madras City Municipal Act, 1919, the Chamber has the right of electing two Councillors to the Madras Corporation. Under the State Aid to Industries Act 1923 the Chamber has the right to elect one member to the Board of Industries.

### UPPER INDIA CHAMBER.

The Upper India Chamber of Commerce is concerned with trade, commerce and manufactures in the United Provinces and has its registered office at Cawnpore. Members are elected by the Committee, subject to confirmation by the next general meeting of the Chamber. Gentlemen distinguished for public service, or eminent in commerce or manufactures, may be elected honorary members of the Chamber by the members in a General Meeting and such shall be exempted from paying any subscription to the Chamber. There is no entrance fee for membership, but subscriptions are payable as follows:—A firm, company or association having its place of business in Cawnpore, Rs. 200. a year; an individual member, resident or carrying on business in Cawnpore, Rs. 100; firms or individuals having their places of business or residence outside Cawnpore pay half the above rates, but the maintenance of a branch office in Cawnpore necessitates payment of full rates.

The affairs and funds of the Chamber are managed by a Committee of ten members, which has power to constitute Local Committees, of from four to seven members each, at trade centres where membership is sufficiently numerous to justify the step. Such Local Committees have power to communicate only with the Central Committee.

### PUNJAB.

The Punjab Chamber of Commerce has its headquarters at Delhi and exists for the care of mercantile interests on the usual lines in the Punjab, the North West Frontier Province and Kashmir. The Chamber has Branches at Amritsar and Lahore. Membership is by ballot and is restricted to Banks, Merchants (wholesale), Railways and proprietors of large industrial interests. The entrance fee is Rs. 100 and the rate of subscription Rs. 180 per year. The Chamber returns one member to a seat on the Reformed Punjab Legislative Council jointly with the Punjab Trades Association, and shares representation in the Indian Legislative Assembly with other Chambers which are members of the Associated Chambers of Commerce of India and Ceylon, in the seat allotted to the Associated Chambers. The Chamber is a member of the British Imperial Council of Commerce, London, and is represented in England by Sir James Walker, K.C.I.E. The Chamber is also represented on the Municipal Corporation of Amritsar and Delhi as well as on the East Indian Railway Advisory Committee, Cawnpore, the Cotton Excise Duties Advisory Committee, Bombay; and the Auxiliary Forces Committees, Delhi & Lahore Military Areas.

The Chamber has 230 members on the rolls.

*President.*—Sir M. Ct. Muthia Chetty, M.L.A.

*Vice-Presidents.*—Dewan Bahadur Govindas Chathoorbhujadas and Mr. C. Abdul Hakim Sahib, Bahadur.

*Honorary Secretaries.*—C. Gopal Menon M.L.C., and Mahomed Musa Sait, M.L.C.

*Assistant Secretary.*—P. R. Nair, B.A., B. Com.

The Chamber appoints arbitration Tribunals for the settlement and adjustment of disputes when invited, to do so, members of the Tribunals being selected from a regular printed list of arbitrators.

The Chamber has in the present year 79 members, three honorary members and six affiliated members.

The following are the officers:—

*Upper India Chamber of Commerce Committee.*—*President.*—Mr. W. R. Watt, M.A., (British India Corporation, Ltd.); *Vice-President.* Mr. A. L. Carnegie, (British India Corporation, Ltd.); *Members.*—Mr. S. H. Taylor, (Messrs. Begg, Sutherland & Co., Ltd.); Mr. G. M. Hunter Thomas, (Muir Mills Co., Ltd.); Mr. B. West, (Atherton West and Co., Ltd.); Babu Ram Narain, (Cawnpore), Mr. A. C. Prince, (Cawnpore); Mr. J. P. Srivastava, M. Sc., (Cawnpore); Mr. A. S. Knox, (Messrs. Ford & Macdonald Ltd.); Mr. A. R. Smith, (Chartered Bank of India, Australia and China); *Representatives on the United Provinces Legislative Council.*—Sir Thomas Smith, M.L.C., (Muir Mills Co., Ltd.), Mr. T. Covin Jones, M.L.C. (D. Walde & Co., Ltd.)

*Secretary.*—Mr. J. G. Ryan.

*Head Clerk.*—Mr. B. N. Ghosal.

The Managing Committee meets alternately at Delhi and Lahore and the following are office bearers:—

*Chairman.*—Mr. V. F. Gray, M.L.C.

*Deputy Chairman.*—Mr. P. Mukerjee.

*Members.*—Mr. Balj Nath Sayal (Crown Flour Mills, Delhi), Mr. D. N. Bhanja (Kerr, Tarruck & Co., Delhi), Mr. V. H. Boalth (Traffic Manager, Commercial, N.W.Ry., Lahore), Mr. J. Davidson (Messrs. Bird & Co., Lahore), Mr. Bashesar Nath Khanna (The Cotton Trading Syndicate, Lahore), Mr. T. K. Fordyce (Allahabad Bank, Ltd., Delhi), Mr. Lachmi Narain (I. D. Lachmi Narain, Amritsar); Mr. G. V. Lewis (New Egerton Woollen Mills Co., Ltd., Dhariwal), Mr. Motiram Mehra (Messrs. Motiram Mehra & Co., Amritsar), Mr. A. C. Mullen (The Amritsar Distillery Company, Amritsar), Mr. R. E. Grant-Govan (The Delhi Flour Mills Co., Ltd., Delhi), Rai Bahadur Ram Saran Dass, C.I.E., M.C.S., Lahore), Mr. Shri-Ram (Delhi Cloth & General Mills Co., Ltd., Delhi), Mr. D. T. Simpson (Messrs. Turner Hoare & Co., Ltd., Lahore).

*Secretary.*—Mr. E. S. Hearn.

## UNITED PROVINCES.

**Cawnpore.**

The number of members on register is 110 (79 Local and 31 Mofussil). All the important commercial and industrial interests of the Provinces of Agra and Oudh are represented.

## COCANADA.

The Cocanada Chamber of Commerce was established on 29th October, 1868.

The following are the members of the Chamber and has its head quarters at Cocanada, the chief port on the Coromandel Coast, north of Madras:—

Messrs. Simson Bros., Ltd.; the Coromandel Co., Ltd.; Wilson & Co.; Innes & Co.; Ripley & Co.; Volkart Bros.; Shaw Wallace & Co.; Gordon Woodroffe & Co.; J. H. Vavasour & Co., Ltd.; the Northern Circars Development Co.; the Agent, Imperial Bank of India.

### MEMBERS OF THE COMMITTEE.

Mr. C. D. Shores (Chairman).

„ L. F. R. Bosworth.

„ J. Leask.

„ G. A. LeStyng, Secretary.

The rules of the Chamber provide "that by the term 'member' be understood a mercantile firm of establishment, or the permanent agency of a mercantile firm or establishment, or a society of merchants carrying on business in Cocanada, or other place in the Districts of Kistna, Godavari, Vizagapatnam, and Ganjam, and duly electing according to the Rules of the Chamber, and that all such be eligible. but only

members resident in Cocanada can hold office. Members are elected by ballot. The Committee, when called upon by disputing members or non-members of the Chamber, give their decision upon all questions of mercantile usage and arbitrate upon any commercial matter referred to them for final judgment. In either case a minimum fee of Rs. 16 must accompany the reference with Rs. 5 from a non-member and Rs. 1 from a member as payment for the Chamber's Sealed Certificate.

The Committee consisting of 3 members, including the Chairman, are elected by ballot at the general meeting in January in each year, for a term of 12 months. The entrance fee for each member, whose place of business is in Cocanada, is Rs. 100 and for each member whose place of business is elsewhere is Rs. 25. The subscription for each member whose place of business is in Cocanada is Rs. 120 per annum, payable quarterly and for each member whose place of business is elsewhere is Rs. 60 per annum, payable in advance. Committee meetings are held on the 1st Tuesday in the month and general meetings on the 3rd Tuesday or when ordered.

A Fortnightly Circular of current rates of produce, freights, and exchange is drawn up by the Committee.

## NORTHERN INDIA.

The Northern India Chamber of Commerce, Lahore, was inaugurated in November 1923, to watch over the mercantile interests of the hitherto practically unrepresented area of Northern India and the N. W. F. Province.

The main aims and objects of the Chamber are to promote and protect commerce and industries, to obtain the redress of any grievances and hardships under which the general mercantile community suffer, and to establish just and equitable principles of trading, etc. Among its other activities, the Chamber undertakes the conduct of surveys and arbitrations, the registration of Trade Marks, etc.

Members are elected by ballot, the entrance fee and annual subscription for firms in Lahore being Rs. 100 and Rs. 200, respectively.

The following are the Officers, Committee, etc., for the year from April 1925:—

*Chairman.*—Mr. W. R. Macpherson.

*Vice-Chairman.*—Mr. D. J. Horn.

*Committee.*—Messrs. D. May Arindell, P. H. Guest, F. Roy, Croft, H. J. Rustonji, J. H. Chasc, Owen Roberts, Ithagat Govind Das, Raju Ram and B. B. Narsing Das.

*Secretary.*—H. J. Martin.

*Office.*—C. & M. Gazette Buildings, The Mall, Lahore.

## CEYLON.

The Ceylon Chamber of Commerce was established on the 25th March 1889 and was incorporated in 1895, with its headquarters at Colombo. All firms and persons engaged in the general trade of Ceylon are admissible as members and every person or firm desirous of joining the Chamber must be proposed by one member, seconded by another and balloted for by the whole Chamber. The affairs of the Chamber are conducted by a Board of Directors consisting of Chairman and Vice-Chairman and from 5 to 10 members.

The following is the membership of the Board at the present time:—

Hon'ble Col. E. J. Hayward, C. B. E., V. D. (*Chairman*); Mr. C. H. Figg (*Vice-Chairman*); Mr. J. J. Dickson, Mr. S. P. Hayley, Mr. H. G. P. Maddocks, Mr. I. W. Hockley, Mr. H. J. Bromley, Mr. R. M. Milne, Mr. F. Trollope, Mr. E. H. Lawrence and Mr. T. H. Tatham.

*Secretary.*—Mr. C. F. Whitaker.

*Representative in the Legislative Council.*—

Hon'ble Col. E. J. Hayward, C. B. E., V. D.

**DEPARTMENT OF COMMERCIAL INTELLIGENCE AND STATISTICS.**

The Department of Statistics was reabsorbed into the Department of Commercial Intelligence with effect from the 1st December 1922. The joint department has its office at No. 1, Council House Street, Calcutta, the headquarters of the Director-General. It embraces two distinct classes of work: (a) the collection and dissemination of information connected with overseas trade which may be of use to Indian firms, and (b) the compilation and publication of All-India statistics. The latter are published in a series of volumes of which the most important are the sea-borne Trade Accounts, monthly and annual, Statistical Abstract, Agricultural Statistics (in two volumes), and the Review of Trade. The department also publishes a weekly journal—"The Indian Trade Journal"—the principal features of which are (a) information as to tariff changes in foreign countries which affect Indian interests, (b) notices of tenders called for by Government departments and public bodies, (c) crop reports and forecasts, (d) Government orders, communications and other notifications affecting trade, (e) analysis of Indian trade statistics, (f) market reports, prices and trade movements of the staple exports and imports, (g) trade enquiries for securing trade introductions, (h) summaries of the leading features of consular and other trade reports, and (i) abstracts of the proceedings of the various Chambers of Commerce in India.

The Department also administers the COMMERCIAL LIBRARY AND READING ROOM located at No. 1, Council House Street, Calcutta. This was at first a small departmental library used for the purpose of answering enquiries, but in 1919 the Government of India agreed to the formation of a combined technological library of reference in Calcutta in place of the separate libraries attached to the Departments of Commercial Intelligence, Statistics, and Patents and Designs, and the resultant Commercial Library and Reading Room was placed under the administrative control of the Director-General. It has now been expanded into a first-class technical library containing over 9,500 volumes as well as Indian and foreign statistical publications, and 350 technical and commercial journals and market reports. Ordinarily books are consulted in the Library, but they are also available on loan upon deposit of value.

The Department works in close co-operation with Directors of Industries and other Government Departments in India, with the Indian Trade Commissioner in London, with His Majesty's Trade Commissioners in India and the Dominions, and with Consular Officers in various parts of the world. And the yearly increase in its correspondence shows that it is steadily being used more and more both by firms in India and by overseas firms interested in Indian exports.

**THE BRITISH TRADE COMMISSIONER SERVICE IN INDIA.**

The British Trade Commissioners in India are part of the world-wide Commercial Intelligence Organisation of the Imperial Government. The Department of Overseas Trade, London, which is the headquarters of this organisation, is a joint department of the Board of Trade and the Foreign Office and was created in 1917 with the specific object of stimulating the overseas trade of the United Kingdom by securing Commercial information from all parts of the world by disseminating it to British manufacturers and exporters; by undertaking such special constructive activities as may be found possible; and by assisting traders in the removal of their difficulties. The Department has nothing to do with the regulation of trade. It passes no measures and makes no restrictive or regulative orders. Briefly, the policy on which it is based is the policy of assistance without interference.

The Department of Overseas Trade maintains a network of trained and experienced Commercial Intelligence officers throughout the world, who forward a constant supply of commercial information to London and provide local assistance in the promotion of British economic interests. Those overseas officers who are stationed in the British Empire are members of the Trade Commissioner Service while Foreign countries are served by the Commercial Diplomatic Service forming part of the British Diplomatic Missions and by the Consular Service.

Mr. T. M. Ainscough, C.B.E., was appointed His Majesty's Senior Trade Commissioner in India in January 1918 and opened an office in Calcutta in May of that year. For five years, owing to the pressing need for economy in the Public Service, he was singlehanded in covering this vast territory. In 1923, however, two additional Trade Commissioners were appointed to India. Mr. W. D. M. Clarke was posted to the Calcutta office and Major R. W. Clarke opened an office in Bombay at Exchange Building, Sprott Road, Ballard Estate. The territory is now divided between the Calcutta and Bombay posts and this development allows the Senior Officer to travel almost continuously to any part of India which may call for his attention and to devote his time to some of the broader politico-economic problems which are becoming so important in view of the changing political conditions in India.

**Functions of Commissioner.**—The primary duty of the British Trade Commissioner comprises the collection of information in regard to opportunities that may arise within his territory for securing and developing trade by British manufacturers and merchants, both in the United Kingdom and other parts of the British Empire. He is, therefore, enjoined carefully to watch and report from time to time to the Board of Trade and the Governments of the Dominions concerned on all matters affecting the trade.

industry and commerce of his area. His general functions are to maintain cordial relations with the governing authorities of his area; to enter into personal relations with the Chambers of Commerce, Trade Associations, and similar bodies, and with the principal representative importers and local manufacturers; to visit the principal commercial centres; to report upon foreign competition, on financial and trade conditions, and new legislation affecting trade; to make an annual general report on the conditions and prospects of trade in his area; and to furnish special reports and monographs on particular questions which are likely to be of interest to British manufacturers and exporters. He is also expected to supply a regular flow of commercial information of all kinds to his department; to maintain an active correspondence with firms in the United Kingdom or the Dominions who wish to extend their trade with his area; and to give all possible assistance to the representatives of British firms who may visit his territory.

Every effort is made by His Majesty's Trade Commissioners to keep in touch with British representatives and agents in India. The offices are equipped with a complete range of directories and reference books of all kinds and information is available with regard to such matters as tariff conditions, port dues and charges throughout the world, etc. A library consisting of over 1,000 catalogues of the leading British manufacturing engineers is maintained in Calcutta and firms desiring information with regard to specific manufacturers of particular machinery or processes are invited either to call personally or to forward their requirements in writing. It is hoped that local importers and buyers will co-operate by making a more extended use of the information available in the offices and by bringing to the attention of the British Trade Commissioners any cases where the interests of exporters from the United Kingdom or the Dominions may be adversely affected by foreign competition or otherwise.

For many years British traders have deplored the fact that there have not been available

officials with commercial experience who could help them in voicing their difficulties and in meeting foreign competition. As a rule these complaints eulogized the Consuls of other countries and invited the attention of Government to their many virtues. In response to this agitation the greatest care has been taken by the British Government to select, as their trade officers overseas, men of sound commercial training and experience who have acquired some reputation in their respective sphere, and a comprehensive and businesslike organization has been built up at the Department of Overseas Trade, London, to deal with the information sent home. It now rests with the British mercantile community, both at home and also overseas, to co-operate freely and frankly with the Trade Commissioners and to recognize the work they are doing in the Imperial interest by assisting them with such information and particulars with regard to foreign competing goods, conditions of trade, etc., as they are able to afford.

## INDIAN COTTON DUTIES ACT.

The origin of this fiscal measure dates back to 1894 when the embarrassment caused to the finances of India by the fall in exchange drove the Government of India to the necessity of adopting measures to increase their sources of revenue. Among these measures was the re-imposition of the Customs Tariff which had been in force prior to 1882 subject, however, to this difference that cotton yarns and fabrics, which had formerly been subjected to an import duty, were in 1894, excluded from the list of dutiable articles. This partial re-imposition of import duties had been recommended by the Herschell Commission which, in reporting in 1893 on the currency question, had favoured this method of adding to the revenue as being the least likely

to excite opposition. In point of fact, however, this recommendation which was carried into effect in the Indian Tariff Act of March 1894 gave rise to very marked opposition. In support of their policy the Government appealed to the Resolutions passed in 1877 and reaffirmed in 1879 by the House of Commons, the first of which had condemned the levy of import duties on cotton fabrics imported into India as "being contrary to sound commercial policy," while the latter called upon the Government of India to effect "the complete abolition of these duties as being unjust alike to the Indian consumer and to the English producer." It was, however, an open secret that the decision to exclude from the list of dutiable articles cotton yarn

and fabrics was not the decision of the Government of India but that of the Secretary of State. It was pertinently pointed out that the volume of trade in cotton goods and yarns then represented nearly one-half of the total imports from abroad, and that the exemption of these important commodities when practically every single other commodity was being subjected to an import duty could not be justified on its merits as a sound fiscal measure, much less when it was an admitted fact that the Budget would still show a deficit.

**Excise Duties Imposed.**—The opposition to this measure, though it failed to secure its rejection in the Legislative Council, was strong enough to induce the Secretary of State to reconsider the matter. Yielding to the united representations of the Government of India and of Indian public opinion, His Majesty's Government eventually agreed to the re-imposition of import duties on cotton yarns and fabrics provided that it could be shown that such a measure was necessitated by the position of Indian finances, and that it was combined with an Excise duty which would deprive the import tax of any protective character. Accordingly in December 1894, consequent on the further deterioration in the financial position, two bills were introduced in the Legislative Council. The first of these subjected cotton yarns and fabrics to the general import duty of 5 per cent. *ad valorem*. The second imposed an Excise duty on all cotton yarns of 20's and above produced by Mills in British India. In introducing this latter Bill the then Finance Minister, Sir James Westland, was careful to explain that the policy underlying its provisions had been imposed on the Government of India by the Secretary of State in pursuance of the Resolution of the House of Commons quoted above. The provisions of this particular Bill are of little interest. From the first it was recognised that they were unpractical, Lancashire and Indian spinners disagreed as to the point at which the line should be drawn exempting Indian yarns from the Excise Duty. Practical difficulties were pointed out by Indian spinners as to the impossibility of spinning precisely to a particular count. From the Lancashire point of view it was contended that the Bill offered facilities for evasion while it was admitted that under the system adopted in the Bill, the taxation of Indian and Lancashire products was not being carried out on a similar basis.

**Act of 1896.**—The Act was in fact doomed to be short-lived, and in December 1895 the Government of India were compelled to reconsider the whole position and to introduce an entirely new measure which became law in January 1896 as the Indian Cotton Duties Act II of 1896. This measure proceeded from two conclusions, namely, that no attempt should be made to obtain any duty from yarns whether imported or locally manufactured, and that an equal rate of duty should be applied to all woven goods whether imported or of Indian origin. With the object of conciliating the opposition, the rate of duty was fixed at 3½ per cent. as opposed to the general rate of Customs duty of 5 per cent. The main provisions of the Act provided that the assessment for the purposes of collecting the Excise duty should be based on returns submitted by the mill-owners; and

that provision should be made for a rebate in the case of woven goods exported out of India. No control beyond a requirement that statistical returns should be furnished was attempted in respect of spinning mills. On the other hand certain concessions in the matter of import duty on Mill stores were made by executive order so as to place Indian Mills on a footing more or less equal to their Lancashire competitors.

**Criticisms of the Measure.**—It is not possible within the limits of the present article to do more than summarise the criticisms with which this measure was received in India. Much of the opposition was based on grounds of a transient character; as for instance that the Indian industry was then in a state of continued depression and that it had been hard hit, particularly in respect of its export trade, by the currency legislation, and by the uncertainty as to the fiscal policy of Government. In some quarters objection was offered to the exemption of yarn, which it was shown, would place the Indian hand weaving industry at an advantage with the Indian power weaving industry. But the hostility to this measure, as also to the earlier measures already described, clearly proceeded from the feeling that the policy of the Government of India and of the Secretary of State had been dictated by Lancashire, and that the action of Lancashire was due not so much to the fact that there was any real competition between Indian and Manchester goods, but to a desire to handicap the Indian industry whose progress was already causing uneasiness to Lancashire interests. It was argued that the imports from Lancashire were practically all of the higher counts, which, for climatic and other reasons, Indian mills could not produce; that in any case the advantage to the Indian millowner of the import duty was inconsiderable and was counterbalanced by certain drawbacks, arising from the inferiority of Indian labour, which could not be overcome; and that this advantage, such as it was, could scarcely be said to have a protective character, in view of the higher cost of initial equipment in the case of an Indian mill which has to import its machinery, and of working expenses consequent on the scarcity of skilled labour and on the necessity of importing stores required in the production of cloth. Finally, from the standpoint of the consumer, very severe criticism was directed against the reduction, in favour of imported cotton goods, of the general rate of duty from 5 per cent. to 3½ per cent. on the ground that the effect of the legislation would relieve the richer classes who were consumers of the finer Manchester fabrics and impose new taxation on the poorer classes whose requirements were met by the Indian mills.

**Later Factors in the Situation.**—Since the passing of this measure into law the policy of the Government of India in this respect has frequently been the subject of attack in the press and in the Legislatures in India, while it has also formed the subject of continued representations by the industrial interests affected and political organizations. In more recent years the agitation in favour of the abolition of the Excise duties was revived by the growth in England of a strong body of public opinion in opposition to the policy of Free Trade. Ad-

vantage was taken of this new phase in English economic thought to press on behalf of India the acceptance of a policy of Protection—now adopted by the Government of India in the form of discriminating use of the current necessarily high important tariff for fostering Indian industries—and the removal of the Excise duties was claimed by the opponents of this measure as a necessary corollary of the application to the British Empire of the principles associated with the name of Mr. Chamberlain. A new factor in the situation which strengthened the position of those who were in opposition to the Excise duties was to be found in the severe competition which Indian mills have to face in China as well as in India from the Japanese industry. The Japanese market was lost to India in the early years of this century. More recently, however, Japan has entered as a competitor with India into the China market, while within the last few years it has pushed its advantage as against the Indian millowner in the Indian market itself.

**Policy of 1917.**—The policy of Government towards the Cotton Duties underwent a further development in 1917. In the budget of that year provision was made for interest and sinking fund charges on £ 100 millions, the contribution of India towards the cost of the war. This demanded in addition to the natural increase in the revenues fresh taxation to the extent of £ 3 millions per annum. Amongst the expedients adopted to produce this revenue was the raising of the import duty on cotton goods from 3½ per cent. to 7½ per cent., which is the general tariff rate. At the same time the cotton excise duty was fixed to remain at the previous figure of 3½ per cent., thus giving the indigenous industry a slight protection to the extent of 4 per cent. The question of the abolition of the Excise entirely had to be dismissed from consideration in view of the demands upon the exchequer, as it was estimated to produce in 1917-18 £ 320,000. By means of the increase in the tariff on Cotton Duties the Finance Member estimated to produce an additional £ 1 million per annum. The proposal was received with immense satisfaction in India as a step towards the righting of what is almost everywhere regarded as a reverse economic wrong. It aroused very vehement protests in Lancashire where the cotton industry organised its political vote and brought great pressure to bear upon the Secretary of State to withdraw the measure. Mr. Austen Chamberlain, the then Secretary of State for India, stood firm and with the Government at his back refused to budge an inch from the position which he had taken up in supporting the Government of India in this matter. There were anxious moments in the House of Commons when the Labour Party joining with the Irish Nationalists and the Lancashire vote mobilised its forces against the Government especially as the attitude of Mr. Asquith and his following was obscure. In the end Mr. Asquith gave his support to the Government policy on the understanding that this, in common with all other fiscal issues, would be reconsidered at the end of the war. With this support, the Bill was carried through the House of Commons by a large majority.

**The Present Position.**—The question has frequently come under discussion in the Indian Legislature during the past few years and the new political constitution alters its perspective there inasmuch as it subjects taxation not merely to debate but to the actual votes of both Council of State and Legislative Assembly. The latter house has paid most attention to the Excise and both the annual Budgets and the right of unofficial members to move Resolutions have afforded opportunities for pressing the popular view upon Government. During the life of the first Assembly—1921-1923, inclusive—the position was still dominated by the financial difficulties of Government and the necessity for utilising every possible source of income for meeting successive deficits.

**Excise Duty Suspended.**—In November 1925 after an eleven weeks' strike in the Bombay mills, an ordinance to suspend the levy and collection of the Cotton Excise Duty was issued. That ordinance stated that the duty would not be levied and collected or assessed on any cotton goods produced in any mill in British India on or after December 1, 1925, and before March 1, 1926. At the same time a statement was issued by the Governor-General explaining the reasons which led him in exercise of the powers conferred upon him by the Government of India Act, to promulgate that ordinance. The statement was as follows:—In August last when replying to a deputation which waited upon me on behalf of the millowners of Bombay and Ahmedabad to urge the relief of the mill industry from the cotton excise duty, I affirmed the Government of India stood by the letter and the spirit of the pledge given by my predecessor, Lord Hardinge, that the excise duty would be abolished as soon as financial considerations permitted. At the same time, while fully recognising the special difficulties, with which the cotton mill industry in India was faced, it was necessary for me to explain that it was impossible to grant this request in the middle of the financial year before the year had fully declared itself and before the commitments and the prospects of next year were known.

Again, on the 16th September 1925 when a motion for suspension of the collection of the cotton excise duty was debated in the Legislative Assembly it was made clear on behalf of Government that suspension must inevitably be followed immediately by abolition and that abolition ought to be considered only in connection with the finances of the year as a whole, that is, at the time of the budget when the claims of the cotton mill industry could be balanced against rival claims. It was definitely stated that a vote for suspension would be taken by Government as an expression of the view that the abolition of the cotton excise duty should take precedence of other claims. The assembly accepted by a large majority the motion for suspension.

The time has not yet come when a detailed estimate of the revenue and expenditure of the current year or of the prospects for 1926-27 can be made, but the final results of the monsoon are now known and it is possible to make a

more reliable estimate of the financial position than in September. On such information as is now before them, the Government of India are satisfied that there would be no serious risk of a large deficit in the current year if the cotton excise duty were suspended for the rest of the year and that there is a reasonable prospect that the budget for next year can be balanced without assistance from the cotton excise duty in the absence of any big change for the worse in the next few months.

I and my Government have, therefore, come to the conclusion that the moment has arrived when financial considerations permit of the abolition of the duty. This can, however, be

finally accomplished only by the passage of the necessary legislation by the Indian Legislature.

In the meanwhile having regard to the emergency caused by the grave difficulties confronting the industry, to the pledge given and reaffirmed and to the expressed views of the Legislative Assembly, I have decided that with effect from the 1st December 1925 the duty shall be suspended by ordinance. It is the intention of my Government, unless the financial position, as disclosed in the budget estimates for next year substantially fails to confirm present anticipations, to place before the legislature at the time of the budget proposals for the abolition of the duty.

## THE INDIAN CENTRAL COTTON COMMITTEE.

The Indian Cotton Committee of 1917-18, a full summary of whose report appears on pages 291-294 of the Indian Year Book of 1922, reviewed the position of cotton-growing in India very thoroughly and made a series of recommendations for the improvement of cotton-growing and marketing which have proved to be of the greatest value. One of their recommendations was that a permanent Indian Central Cotton Committee should be established to promote the welfare of the cotton-growing industry generally, to advise the Government of India and Local Governments in regard to matters of cotton policy especially with reference to legislation for the prevention of malpractices and similar matters.

The Indian Central Cotton Committee was appointed by resolution of the Government of India in April 1921 and worked as an advisory body until 1923. Another recommendation of the original Committee was that a cotton cess should be levied to provide funds for the work of the Central Cotton Committee and for agricultural and technological research on cotton. The Cotton Cess Act was passed in 1923 and at the same time the Central Cotton Committee was incorporated and its membership enlarged in order to make it fully representative of all sections of the industry. Its constitution and present membership is as follows:—

**President.**—The Agricultural Adviser to the Government of India *ex-officio* (Dr. D. Clouston, C.I.E.)

**Representatives of Agricultural Departments.**—Mr. R. C. Broadfoot, Cotton Specialist, Coimbatore, Madras; Dr. H. H. Mann, Director of Agriculture, Bombay; Mr. G. Clarke, Director of Agriculture, United Provinces; Mr. D. Milne, Director of Agriculture, Punjab; Mr. F. J. Plymen, Director of Agriculture, Central Provinces; Mr. T. D. Stock, Deputy Director of Agriculture, Burma.

The Director-General of Commercial Intelligence (*ex-officio*) (Mr. C. G. Frecke, I.C.S.)

**Representatives of Chambers of Commerce and Associations.**—Mr. W. Ellis Jones, East India Cotton Association, Mr. J. A. Kay, M.L.A. (Vice-President), Bombay Millowners' Association; Mr. V. A. Grantham, M.L.C., Bombay Chamber of Commerce; Mr. Lalji Naranji, M.L.C., The Indian Merchants' Chamber; Mr. F. G. Travers, Karachi Chamber of Commerce; Seth Kasturbhai Lalbhai, M.L.A., Ahmedabad Millowners' Association; Mr. G. V. Meli, Tuticorin Chamber of Commerce; Mr. B. West, Upper India Chamber of Commerce; Mr. W. Roberts, Empire Cotton Growing Corporation.

**Commercial representatives nominated by Local Governments.**—Mr. S. B. Mehta, C.I.A., Rao Bahadur K. S. Nayudu, M.L.C., Central Provinces; Mr. H. F. P. Hearson, Madras; Rai Bahadur Seth Prabhu Dayal, M.B.E., Punjab; Mr. B. K. Lahiri, Bengal.

**Co-operative Representatives.**—Mr. B. F. Madon.

**Representatives of Cotton Growers.**—M.R.Ry. R. Appaswami Naidu Garu, M.L.Ry. B. P. Sesha Reddi Garu, Madras; Rao Bahadur Bhimbhai Ranchodji Naik, Professor S. C. Shahani, Bombay; The Hon'ble Sir Muhammad Muzammil Ullah, Khan, K.C.I.E., O.B.E., and The Hon'ble Lala Sukhbin Sinha, United Provinces; The Hon'y. Lieut. Rao Bahadur Chaudhri Lal Chand, B.A., LL.B., O.B.E., Mr. H. T. Conville, Punjab; Rao Sahib V. G. Kulkarni, Mr. N. V. Deshmukh, Central Provinces and Berar.

**Representatives of Indian States.**—Mr. Mazhar Hussain, Director of Agriculture, Hyderabad State; Dr. S. M. Pagar, Director of Commerce and Industries, Baroda State; Mr. H. H. Pandya, Administrative Officer, Department of Agriculture, Gwalior, Gwalior State.

Mr. A. Howard, C.A.S., Director, Institute of Plant Industry, Indore, Rajputana and Central India States.

*Additional persons nominated by the Governor-General in Council.*—Mr. K. B. Tiloo, Representative of the Indore State; Mr. W. Youngman, Economic Botanist to Government, C.P.; Rao Sahib Bhimbhai M. Desai, Deputy Director of Agriculture, Gujarat; Mr. G. R. Hilson; Mr. G. H. Krumbiegel, Director of Agriculture, Mysore State.

*Secretary.*—Mr. B. C. Burt, B.Sc., M.B.E., I.A.S.

From the commencement the Central Cotton Committee took steps to deal with the various malpractices reported by the original Committee which, by spoiling the reputation of the Indian cottons and rendering them less valuable for spinning purposes, were reducing the returns of the grower and causing great economic loss to the country at large.

The **Cotton Transport Act** passed in 1923 enables any Local Government, with the consent of its legislature, to notify definite areas of cotton for protection and to prevent the importation of cotton from outside the area except under license. Prior to the passing of the Act inferior cottons were imported in large quantities into the staple cotton tracts for purposes of adulteration, and the reputation of several valuable cottons had been ruined by this abuse. The Act has now been applied to the most important staple cotton areas of the Bombay and Madras Presidencies and with excellent results.

More recently the **Cotton Ginning and Pressing Factories Act** (XII of 1925) has been passed which provides for a certain measure of control of ginning and pressing factories and especially for the marking of all bales of cotton pressed with a press mark and serial number which enable them to trace to their origin. This Act, with the minimum of official interference, places the cotton trade in a position itself to deal with abuses, and should lead to a very marked improvement in the quality of Indian cottons.

The Central Cotton Committee has also devoted considerable attention to constructive action for the improvement of the marketing of cottons and to bringing to the notice of the

trade, both in India and abroad, those improved varieties which have now reached a commercial scale. As an instance of the progress in cotton-growing which has been made since 1917 it may be stated that since that date approximately half a million bales of cotton of about 1<sup>st</sup> staple have been added to the Indian crop by the work of the Agricultural Departments. In general it may be said that the Committee affords a common meeting ground for representatives of all sections of the cotton trade and of the cotton-growing industry; thus enabling a number of problems to be tackled from every point of view and definite progress made towards their solution.

**Research.**—By means of the cotton cess the Committee is provided with funds for the promotion of research. It maintains in Bombay a fully equipped Technological Laboratory which includes a complete experimental spinning plant and a scientific laboratory for research on the cotton fibre. This laboratory provides Agricultural Departments with complete and authoritative reports on the spinning value of new cottons, thus providing a much-needed facility. In addition it is now possible to undertake research work on a number of questions connected with the spinning qualities of cotton which have not been touched in the past. The Laboratory is unique in that it is probably the only institution of its kind which approaches the subject primarily from the standpoint of the grower.

The Committee contributes the greater part of the funds for the Indore Institute of Plant Industry which is a Central Agricultural Research Institute for cotton where many problems of fundamental importance are being studied.

In addition by means of grants-in-aid to Agricultural Departments it has provided for special investigations on problems of general applicability which would otherwise have been left untouched through lack of staff and funds. Such schemes are in operation in all major cotton-growing provinces and now number ten.

His Excellency the Viceroy (Lord Reading) when he visited Bombay in December 1924 and formally opened the Committee's Spinning Laboratory laid great stress on the importance and value of the Committee's work.

## THE EAST INDIA COTTON ASSOCIATION, LIMITED.

**Bombay.**—The Association is the outcome of the findings of the Indian Cotton Committee which was appointed by the Governor-General in Council under a resolution dated September 27th, 1917. Until the end of 1917 the Cotton Trade of Bombay was in the hands of seven distinct bodies, viz., The Bombay Cotton Trade Association, Ltd., The Bombay Cotton Exchange, Ltd., The Bombay Millowners' Association, The Bombay Cotton Brokers' Association, Ltd., The Marwari Chamber of Commerce, The Bombay Cotton Merchants' and Mucadams' Association, Ltd., and The Japanese Cotton Shippers' Association. None of these bodies were representative of the trade as a

whole and their interests often came into conflict with each other. The necessity of a system of periodical settlements, such as existed in Liverpool, was badly felt, especially when speculation was rife in futures which was so excessive in 1918 that the Trade had to invoke the aid of Government to prevent a financial crisis.

The Cotton Contracts Committee was created under the Defence of India Act in June 1918 as a temporary measure under the Chairmanship of Mr. G. Wiles, I.C.S. This body was replaced by the Cotton Contracts Board in 1919, which continued to function until May 1922, when the Act under which the Board

worked was repealed and its functions were carried on by the newly constituted East India Cotton Association who were granted a charter by Act No. XIV of 1922. Since then the Association, subject to its By-laws being passed by Government, have controlled the Cotton Trade of Bombay.

The present constitution of the Board is as follows:—Sir Purshotamdas Thakurdas, Kt., C.I.E., M.B.E., M.L.A., President, Importers' Panel; Haridas Madhavdas, Esq., Vice-President, Exporters' Panel; Ratansey D. Morarji, Esq., F. F. Stileman, Esq., Lalji Naranji, Esq., M.L.C., Millowners' Panel; T. H. Cartwright, Esq., C. P. Bramble, Esq., Exporters' Panel; K. H. McCormack, Esq., Murlidhar Shrilal Chokhani, Esq., Importers' Panel; Kishan Prasad, Esq., W. G. McKee, Esq., Commission Agents' and Merchants' Panel; Jannadas Ramdas, Esq., Vassonji Haridas, Esq., Jethawallas' Panel; Major W. Ellis Jones, Durgadutt Sawalka, Esq., Anandilal Podar, Esq., Brokers' Panel.

### Officers.

Rao Bahadur H. B. Kotak, General Manager; D. Mehta Esq., B.A., Secretary; F. F. Wadson, Esq., J.P., Manager, Clearing House.

Some of the objects for which the Association is established are:—To provide and maintain suitable buildings or rooms for a Cotton Exchange in the City of Bombay and elsewhere in India and to regulate admission to and prohibition of the use thereof and the nature and times of such user whether in the case of the general body or particular classes or any individual or firm or company using the Exchange; to provide forms of contracts compulsory or permissive and regulate the making, carrying out and enforcement or cancellation of contracts; to adjust by arbitration or otherwise controversies between persons

engaged in the Cotton Trade; to establish just and equitable principles in the said Trade; to maintain uniformity of control of the said Trade; to fix or adopt standards of classification of cotton to acquire, preserve and disseminate useful information connected with the Cotton interest throughout all markets; to decrease or insure the local risk attendant upon business; and generally to control, promote and regulate the Cotton Trade in the Presidency of Bombay and elsewhere in India, improve its stability and augment the facilities with which it may be conducted. To establish and maintain a Clearing House for the purpose of dealing with cotton transactions, and to regulate admission to and prohibition of the user thereof and the nature and times of such user whether in the case of the general body or particular classes or any individual or firm or company using the Clearing House. To regulate the handling and exportation of Cotton from India and the importation of Cotton into India in so far as it may be imported. To bring, prosecute, or defend, or aid in bringing, prosecutions, or defending any suits, actions proceedings, applications, or arbitrations on behalf of Members or Associate Members or Special Associate Members or otherwise as the Directors of the Association may think proper or conducive to the objects of the Association, and to prescribe the principle of framing of contracts with a view to eliminate the temptation and possibility of speculative manipulation.

The Association has just erected a fine Exchange Building at Sewri Cotton Depot containing 120 Buyers' Rooms and 80 Sellers' Rooms, and a large Trading Hall on the lines of Liverpool and New York Exchanges. There is a membership of 467 members.

The Bombay Cotton Annual containing matters relating to every branch of the Trade is published annually in November and statistics are issued twice weekly.

## The Textile Industry.

India has been the home of the cotton trade from the earliest times. Its cotton, known as white wool, was well known to the ancients and its cloth was familiar to the West in the days of the overland route. The same Calico comes from the fine woven goods of Calicut, and the products of the Dacca handlooms are still remarkable as the finest muslins human skill can produce.

### Indian Cotton.

The exports of Indian cotton began to assume importance with the opening of the sea route.

They received an immense stimulus during the American Civil War, when the close blockade of the Confederate ports produced a cotton famine in Lancashire, and threw the English spinners back on India for their supply of raw material. When the war broke out the shipments of Indian cotton were 528,000 bales, but during the last year of the war they averaged 973,000 bales. Most of this cotton was sold at an enormously inflated price, and induced a flow of wealth into Bombay, the great centre of the trade, for which there was no outlet. The consequence was an unprece-

dented outburst of speculation known as the "Share Mania," and when the surrender of Lee re-opened the Southern Ports widespread ruin followed. It is estimated that the surplus wealth brought into the country by the American Civil War aggregated £92 millions. Since then the cultivation of Indian cotton, although interrupted by famine, has steadily increased. For the last season for which returns are available 1924-25 the total area in all the territories reported on was computed at 26,461,000 acres which is 2,825,000 acres or 12 per cent. above the revised figures of last year. The

total estimated outturn was 6,058,000 bales of 400 lbs. which is 17 per cent. above the yield of last year. To this figure may be added some 17,000 bales estimated as the production in Indian States in Bihar and Orissa which make no return.

Bombay, the Central Provinces and Hyderabad are the chief producing centres. The following table gives the rough distribution of the outturn. The figures are the estimated figures for the past season, and are not exact, but they indicate the distribution of the crop:—

Provinces and States.	1924-25. (Provisional estimates.)	
	Area.	Yield.
	(1,000 acres.)	(1,000 bales.)
Bombay (a) .. .. .	7,510	1,538
Central Provinces and Berar .. .. .	5,202	1,050
Madras (b) .. .. .	2,893	553
Punjab (b) .. .. .	2,536	893
United Provinces (b) .. .. .	1,046	275
Burma .. .. .	326	70
Bihar and Orissa .. .. .	79	14
Bengal (b) .. .. .	77	24
Ajmer-Merwara .. .. .	45	15
Assam .. .. .	45	15
North-West Frontier Province .. .. .	39	8
Delhi .. .. .	4	1
Hderabad .. .. .	3,412	899
Central India .. .. .	1,354	262
Baroda .. .. .	658	171
Gawallior .. .. .	699	145
Rajputana .. .. .	418	99
Mysore .. .. .	118	36
Total .. .. .	26,461	6,058

The distribution of the export trade is indicated in the appended table.

**Exports of Cotton.**—A portion of the Indian crops of the season 1923-24 and a portion of the crop of the season 1924-25 came into the statistical consideration in the exports during the year 1924-25. The exports amounted to nearly 12 million cwt. valued at Rs. 91 crores, against 13½ million cwt. valued at Rs. 98 crores in 1923-24. This represents 47 per cent. of the total value of raw materials exported from India and 24 per cent. of the total exports. The exports showed a decrease of 12 per cent. in quantity and 7 per cent. in value. The average declared value per cwt. rose from Rs. 73 to 77 or by 5 per cent. whereas the total decrease was Rs. 7 crores. The principal purchasers of Indian cotton are Japan and China which together took 59 per cent. of the total export during 1924-25. Besides these, Germany, Belgium, the United Kingdom, Italy, and France who are large consumers of Indian raw cotton, had 5, 6, 5, 14, and 4 per cent., respectively.

(a) Including Sind and Indian States.

(b) Includes Indian States.

† Bales of 400 lbs. each.

Bombay is the great centre of the cotton trade. The principal varieties are Dholleras, Broach, Oomras (from the Berars), Dharwar and Coomptas. Broach is the best cotton grown in Western India. Hinganghat cotton, from the Central Provinces, has a good reputation. Bengals is the name given to the cotton of the Gangetic valley, and generally to the cottons of Northern India. The Madras cottons are known as Westerns, Coconadas, Colmbatores and Tinnevellys. The best of these is Tinnevely. Cambodia cotton has been grown with success in Southern India, but it shows a tendency to revert. The high prices of cotton realised of recent years have given a great impetus to cultivation. Government have also been active in improving the class of cotton produced, by seed selection, hybridization and the importation of exotic cottons. Although these measures have met with a considerable measure of success, they have not proceeded far enough to leaven the

whole outturn, which still consists for the most part of a short-staple early maturing variety; suitable to soils where the rainy season is brief.

Reisence has been made to the popularity of the Indian handloom cloths in the earliest days of which we have record. This trade grew so large that it excited alarm in England; and it was killed by a series of enactments; commencing in 1701, prohibiting the use or sale of Indian calicoes in England. The invention of the spinning jenny and the power loom and their development in England converted India from an exporting into an importing country, and made her dependent on the United Kingdom for the bulk of her piece-goods. The first attempt to establish a cotton mill in India was in 1838, but the foundations of the industry were really laid by the opening of the first mill in Bombay in 1858. Thereafter, with occasional set backs from famine, plague and other causes, its progress was rapid.

The following statement shows the quantity (in pounds) of yarn of all counts spun in all India for the twelve months April to March, in each of the past three years:—

(a) Including the production of one mill only.

Note : The cotton mills in Burma started work in May 1923.

The spinning of yarn is in a large degree centred in Bombay, the mills of that province producing nearly 74 per cent. of the quantity produced in British India. The United Provinces of Agra and Oudh and Madras

produced about 7 per cent. and 8 per cent. respectively, while Bengal and the Central Provinces produced 4·7 and 5·2 per cent. Elsewhere the production is as yet very limited.

**BOMBAY SPINNERS.**

Here is a detailed statement of the quantity (in pounds) and the counts; or numbers; of yarn spun in Bombay Island :—

Wastes, &c.		..	..	..	213,714	513,553	577,745
TOTAL					705,893,539	617,328,682	719,389,994

In the early days of the textile industry the energies of the millowners were largely concentrated on the production of yarn, both for the China market, and for the handlooms of India. The increasing competition of Japan in the China market, the growth of an indigenous industry in China, and the uncertainties introduced by the fluctuations in the China exchanges consequent on variations in the price of silver compelled the millowners to cultivate the Home market. The general tendency of recent years has been to spin

higher counts of yarn, importing American cotton for this purpose to supplement the Indian supply, to erect more looms, and to produce more dyed and bleached goods. This practice has reached a higher development in Bombay than in other parts of India, and the Bombay Presidency produces nearly 78·8 per cent. of the cloth woven in India. The United Provinces produces 8·2 per cent., the Central Provinces 4 per cent., and Madras 4 per cent. Grey and Bleached goods represent nearly 74 per cent. of the whole production.

#### ANALYSIS OF WOVEN GOODS.

The following brief extract is taken from the statement of the quantity (in pounds and their equivalent in yards) and description of woven goods produced in all India, including Native States:—

—	1922-23.	1923-24.	1924-25.
Grey and Bleached piece-goods—			
Pounds .. .. .	300,365,540	287,049,978	325,265,253
Yards .. .. .	1,271,789,694	1,197,054,173	1,382,368,440
Coloured piece-goods—			
Pounds .. .. .	98,634,845	108,330,343	125,580,102

## ! The Jute Industry.

Considering its present dimensions, the jute industry of Bengal is of very recent origin. The first jute mill in Bengal was started at Rishra in 1856, and the first power-loom was introduced in 1859. The original outturn was 8 tons per day. In 1909 it had grown to 2,500 tons per day, it is now 4,000 tons per day, and it shows every indication of growing and expanding year by year. Another interesting thing about the jute industry of Bengal is that, although it is practically a monopoly of Scotsmen from Dundee, the industry itself owes its inception to an Englishman. The founder of the industry was George Acland, an Englishman, who began life as a midshipman in the navy, and was for some years in the East India Marine Service. He quitted this service while still a young man, and engaged in commercial pursuits in Ceylon, where he was successful. Later on he turned his attention to Bengal, and arriving in Calcutta about 1853 he got into touch with the management of the paper works, then at Serampore, where experiments were being tried with country grasses and fibre plants to improve the quality or cheapen the manufacture of paper. This seems to have suggested to Acland the manufacture of reha, and in 1854 he proceeded to England, with a view to obtaining machinery and capital in order to manufacture goods from that material. During this trip he visited Dundee, and while there Mr. John Kerr, of Douglas Foundry, suggested to him the importing of machinery into Bengal "where the jute comes from and spin it there." This suggestion bore fruit, for shortly afterwards Acland placed orders with Kerr for a few systems of preparing and spinning machinery, and returned to India the same year accompanied by his two sons and a few Dundee mechanics who were to assist him in erecting and operating the first jute mill in Bengal. This, as has been stated, was at Rishra, the site of the present Wellington mills, near Serampore, and here, in 1855, the first machine spun jute yarns were made. As not infrequently happens the pioneer got very little out of his venture. After several ups and downs the Acland interest in the Rishra mill ceased in 1867, and the company which Acland had formed in 1854 was wound up in 1868.

**Power-loom.**—The pioneer's example was followed by Mr. George Henderson of that silk and firm, and in 1859 the Borneo Jute Co. was launched under his auspices. To this company is due the credit of introducing the power-loom for jute cloth. Unhampered by the financial difficulties which had burdened the Aclands, the Borneo Jute Co. made rapid progress, doubling their works in 1864, and clearing their capital twice over. In 1872 the mills were turned into a limited liability company, the present "Barnagore Jute Manufacturing Co., Ltd." Four other mills followed in succession—Gouripore, Serajgunge, and India Jute Mills.

"From 1866 to 1873," writes Mr. David Wallace in "The Romance of Jute," "the five mills excepting the Rishra mill simply

coined money and brought the total of their looms up to 1,250." To illustrate the prosperity of the industry at this period we may take the dividends paid by the Barnagore Company. On the working of their first half year, a 15 per cent. interim dividend was declared, which seemed to justify the enormous capital at which the company was taken over from the Borneo Company, and shares touched 68 per cent. premium. The dividend for the first year, ending August 1878, was 25 per cent., for 1874, 20 per cent., and for 1875, 10 per cent. Then came a change. The investing public had forgotten the effect of the Port Canning bubble, and the condition of the jute industry in 1872-73 seeming to offer a better return than coal or tea, both of which had just enjoyed a boom, it was only necessary to issue a prospectus of a jute mill to have all the shares snapped up in the course of an afternoon.

In 1872-73 three new companies were floated locally—the Fort Gloster, Budge Budge and Sibpore, and two Home companies, the Champdany and Samnugger, all of which commenced operations in 1874. In 1874-5 eight other mills were launched—the Howrah, Oriental (now Union), Asiatic (now Soorah), Clive, Bengal Pressing and Manufacturing Co. (now the Bellaghata-Barnagore branch mill), Rustonjee (now the Central), Ganges (registered in England), and Hastings, owned by Messrs. Birkmyre Bros., of Greenock fame—in all thirteen new companies, coming on all of a heap and swelling the total looms from 1,250 up to 3,500. This was too much of a strain for the new industry, and for the next ten years all the mills had a severe struggle. The older ones all survived the ordeal, but four of the new concerns—the Oriental, the Asiatic, the Bengal Pressing and Manufacturing Co. and the Rustonjee—became moribund, to appear again later on under new names and management. Fort Gloster also suffered badly.

Between 1875 and 1882 only one new mill was put up. This was Kamarhaty, promoted by Messrs. Jardine, Skinner & Co., which came into being in 1877, as the result of Dr. Barry's visit to Calcutta in 1876, when he transferred the agency of the Gouripore Co. from Messrs. Jardine, Skinner & Co. to his own firm. This mill, together with additions made by some of the other mills, brought the total looms up to 5,150 in 1882. By the end of 1885 the total was further augmented by the Hooghly, Titagbur, Victoria and Kankarrah mills, bringing the number of looms at work up to 6,700. From this period on to 1894 no new mills came into existence except the Calcutta Twist Mill, with 2,460 spindles, since merged into the Wellington branch of the Champdany Co. Between 1896 and 1900 the following new mills were started:—the Gordon Twist Mill with 1,800 spindles (now acquired by Anglo-India), Khardah, Gondolpara (French owned), Alliance, Arathoon, Anglo-India, Standard, National, Delta (which absorbed the Serajgunge), and the Kinnison. A lull of four years witnessed large extensions to the existing mills, after which came the following series of new

mills, besides further heavy extensions—Dalhousie, Alexandra, Nalhati, Lawrence, Reliance, Belvedere, Auckland, Kelvin and Northbrook.

### Progress of the Industry.

THE record of the jute industry may well be said to be one of uninterrupted progress. The following statement shows quinquennial aver-

ages from the earliest year for which complete information is available with actuals for each year from 1917-18 up to 1924-25 and the figures in brackets represent the variations for each period, taking the average of the quinquennium from 1879-80 to 1883-84 as 100:—

	Number of mills at work.	Authorised Capital (in lakhs of Rs.)	Number (in thousands) of .		
			Persons employed.	Looms.	Spindles.
<b>Average—</b>					
1879-80 to 1883-84 ..	21 (100)	270.7 (100)	38.8 (100)	5.5 (100)	88 (100)
1884-85 to 1888-89 ..	24 (114)	341.6 (126)	52.7 (136)	7 (127)	138.4 (157)
1889-90 to 1893-94 ..	26 (124)	402.6 (149)	64.8 (166)	8.3 (151)	172.6 (196)
1894-95 to 1898-99 ..	31 (148)	522.1 (193)	86.7 (223)	11.7 (213)	244.8 (278)
1899-1900 to 1903-04 ..	36 (171)	680 (251)	114.2 (294)	16.2 (295)	334.6 (380)
1904-05 to 1908-09 ..	46 (219)	960 (355)	165 (425)	24.8 (451)	510.5 (580)
1909-10 to 1913-14 ..	60 (286)	1,209 (443)	208.4 (537)	33.5 (609)	691.8 (786)

1917-18 ..	76 (362)	1,428.5 (528)	266 (668)	40.6 (738)	834 (948)
1918-19 ..	76 (362)	1,477.2 (546)	275.5 (710)	40 (727)	839.9 (954)
1919-20 ..	76 (362)	1,563.6 (579)	280.4 (723)	41.0 (745)	856.3 (973)
1920-21 ..	77 (367)	1,923.5 (712)	288.4 (758)	41.6 (745)	869.9 (908)
1921-22 ..	81 (386)	2,122.4 (784)	288.4 (743)	43.0 (782)	908.3 (1,032)
1922-23 ..	....	....	304.6	45.5	943.4
1923-24 ..	....	....	319.5	47.0	985.4
1924-25 ..	....	....	327.4	48.5	1,017.5

The production of the mills has increased to a still greater extent. The following figures show the exports of jute manufactures and the declared values for the same periods. The value of jute manufactures exported by sea in 1924-25 was over thirty-three times as great as the average value of the export in the period 1879-80 to 1883-84:—

	Jute manufactures.		Value in lakhs of Rs.
	Gunny bags in millions of number.	Gunny cloths in millions of yards.	
1879-80 to 1883-84 ..	54.9 (100)	4.4 (100)	124.9 (100)
1884-85 to 1888-89 ..	77 (140)	15.4 (350)	162.9 (130)
1889-90 to 1893-94 ..	111.5 (203)	41 (932)	289.3 (232)
1894-95 to 1898-99 ..	171.2 (312)	182 (4,136)	518 (416)
1899-1900 to 1903-04 ..	206.5 (376)	427.2 (9,709)	826.5 (662)
1904-05 to 1908-09 ..	257.8 (469)	698 (15,864)	1,442.7 (1,154)
1909-10 to 1913-14 ..	339.1 (618)	970 (2,045)	2,024.8 (1,621)
1914-15 to 1918-19 ..	667.6 (1,216)	1,156 (26,273)	4,019.3 (3,218)
1919-20 ..	342.7 (624)	1,275.1 (28,980)	5,001.5 (4,004)
1920-21 ..	533.9 (987)	1,352.7 (33,800)	5,299.4 (4,273)
1921-22 ..	386.7 (715)	1,120.5 (28,000)	2,999.5 (2,419)
1922-23 ..	344.2 (637)	1,254.3 (31,350)	4,049.4 (3,205)
1923-24 ..	413.7 (752)	1,348.7 (30,652)	4,228.3 (3,382)
1924-25 ..	427	1,456	5,177

Until the outbreak of war the exports by sea of raw jute were marked by increases from year to year, although the increase was very much less than that in the case of manufactures. During the war years exports declined very considerably. The cessation of the war stimulated the export trade and in 1919-20, the exports showed an increase, as compared with the average of the war quinquennium (1914-15 to 1918-19). In the following two years, the exports recorded a decrease and in 1922-23 they again made a recovery and amounted to 578,000 tons :

		Jute, raw, ton.	
Average	1879-80 to 1883-84..	375,000	(100)
"	1884-85 to 1888-89..	445,000	(119)
"	1889-90 to 1893-94..	500,000	(133)

"	1924-25 .. ..	696,000	

The total quantity of jute manufactures exported by sea from Calcutta during the year 1922-23 was 668,000 tons as against 639,000 tons in the preceding year and 603,500 tons in the pre-war year 1913-14. The values of these exports amounted to Rs. 40.28 lakhs, or an increase of Rs. 10.36 lakhs over the preceding year and Rs. 12.08 lakhs over the pre-war year. The shipments of gunny bags were valued at Rs. 15.82 lakhs and of gunny cloth Rs. 24.24 lakhs as against Rs. 13.86 and Rs. 15.92 lakhs respectively in the preceding year and Rs. 12.48 and Rs. 15.58 lakhs in the pre-war year.

The price of raw jute reached a very high point in 1906-07, the rate being Rs. 65 per bale; in 1907-08 it dropped to Rs. 42 per bale, and the fall was accentuated in 1908-09 and 1909-10, the price having declined to Rs. 36.4 and Rs. 31. In 1917-18 it dropped to Rs. 38-8-0 but rose again in 1919-20 up to Rs. 77-8-0. In 1920-21

it dropped to Rs. 65, but rose again to Rs. 66. It again declined to Rs. 66. In 1921-22 the price rose to Rs. 73 at the end of September, but fell back again to Rs. 50 at the end of November and recovered at Rs. 64 at the close of the year.

Price of jute, ordinary, per bale of 400 lbs.

**The Indian Jute Mills Association** now one of the most important, if not the most important, of the bodies affiliated to the Bengal Chamber of Commerce, was started under the following circumstances:—In 1886 the existing mills, finding that, in spite of the constant opening up of new markets, working results were not favourable, came to an agreement, with the late S. E. J. Clarke, Secretary to the Chamber of Commerce, as trustee, to work short time. The only mills which stood out of this arrangement were the Hooghly and Serajgunge. The first agreement, for six months dating from 15th February 1886, was subsequently renewed at intervals without a break for five years up to February 15, 1891. The state of the market at the time of the renewals dictated the extent of the short time, which varied throughout the five years between 4 days a week, 9 days a fortnight and 5 days a week. Besides short time, 10 per cent. of the sacking looms were shut down for a short period in 1890. An important feature of this agreement was a mutual undertaking by the parties not to increase their spinning power during the currency of the agreement, only a few exceptions being made in the case of a few incomplete new mills.

The present officials of the Association are:—

**Chairman.**—Mr. R. N. Dand, M.L.C.

**Members of Committee.**—Mr. E. G. Abbott.

M.L.C., Mr. D. J. Leckie, Mr. G. F. Rose and Mr. J. W. A. Simpson.

**Working days.**—With the introduction of the electric light into the mills in 1896, the working day was increased to 15 hours, Saturdays included, which involved an additional amount of cleaning and repairing work on Sundays. In order to minimise this Sunday work and give them a free Sunday, an agitation was got up in 1897 by the Mill European assistants to have the engines stopped at 2 or 3 p.m. on Saturdays. The local Government took the matter up, but their action went no further than applying moral suasion, backed by a somewhat half-hearted threat. The Mill Association held meetings to consider the question and the members were practically agreed as to the utility of early closing on Saturdays, but, *more suo*, could not trust themselves to carry it out without legislation. Unfortunately the Government of India refused to sanction the passing of a Resolution by the provincial Government under the Factory Act and the matter was dropped. Only a year or two ago the Jute Mills Association in despair brought out an American business expert, Mr. J. H. Parks, to advise them on the possibility of forming a jute trust with a view to exercising some control over the production and price of jute. Mr. Parks came, and wrote a report which the Association promptly pigeon-holed because the slump was over and the demand was so prodigious that there was no need to worry about the price of jute.

An Association, styled the **Calcutta Jute Dealers Association**, has been formed in Calcutta to promote and to guard the common interests of its members as dealers in jute for local consumption. The members are bales and brokers of jute for sale to the jute mill in and around Calcutta. The present Committee:—Mr. Geo. Morgan, M.L.C., **Chairman**, Members:—Messrs. H. K. Banks, J. A.

Galloway, T. C. Moon, A. C. Robertson and Tarbat.

**Effects of the War.**—The official review of the Trade of India in 1916-17 says:—The value of the exports of raw jute increased in 1916-17 by nearly Rs. 65 lakhs to Rs. 1,629 lakhs. The quantity exported, however, was less than in the preceding year. The estimated yield of the crop was 12 per cent. above that of the previous year, viz., 1,490,000 tons or 8,340,000 bales. Owing to the lack of tonnage and other abnormal circumstances brought about by the war, the quantity exported was 10 per cent. below that of the previous year. Of the consumers the United Kingdom and Italy took less, while the United States, France (mainly *via* Dunkirk), Russia (*via* Vladivostok) and Brazil took greater quantities. There were, of course, no exports to enemy countries which took more than 27 per cent. in the five years ending 1913-14, the pre-war year. The increase in the value accompanied by a decrease in the volume of exports was due to the very high range of prices during the months of September, October, November and December. Towards the close of the year under review prices steadily declined, and have since gone still lower.

**Jute Manufactures.**—The value of the exports now approximates to Rs. 42 crores. In spite of the war with its attendant difficulties of freight and finance, the exports of gunny cloth showed an increase of Rs. 241 lakhs of which Rs. 163 lakhs were due to higher prices and Rs. 78 lakhs to an increase in the volume of exports. There were also an increase of Rs. 118 lakhs in the value of gunny bags exported. The number of bags shipped increased while the weight decreased, and bags for war purposes being lighter than the ordinary bags for transporting grain. Exports to Australia in 1916-17 were a record. The United Kingdom with Australia took more than half of the number of bags exported while the United States took more than half of the quantity of cloth exported.

There were 74 mills at work throughout the year with 41,292 looms and 863,339 spindles. The number of persons employed was 285,881. There were no difficulties as regards the supply of labour.

The number of gunny bags shipped from Calcutta during 1922-23 declined from 386 million bags to 342 million bags, but the value increased from Rs. 13,87 lakhs to Rs. 15,82 lakhs. Shipments of gunny cloth rose from 1,120 million yards to 1,251 million yards valued at Rs. 15,92 lakhs and Rs. 24,24 lakhs respectively.

### Hemp and Jute Substitutes.

Experiments have been made during the last few years by the Agricultural Department of the Government of India with the Deccan hemp plant (*Hibiscus cannabinus*), which yields a fibre very similar to jute. As a result, a new variety of the plant, known as Type 3, has been obtained, which it is now proposed to introduce into several parts of India, and, as a beginning, the variety is to be grown on a number of estates in Bihar. A sample of the fibre prepared from this variety by the usual methods of retting was 10 ft. to 12 ft. long, of an exceptionally light colour, well cleaned, and of good strength

It was valued at £18 1/2 per ton with Bimlipatam jute at £12 10s., and Bengal first mark jute at £17 per ton. Decan hemp has been grown fairly extensively in Bombay, the Central Provinces, and Madras, where it is used for ropes and cordage and also for the manufacture of a coarse sackcloth. A valuable feature of the plant is its suitability for cultivation in such parts of India as are not suitable for jute.

Prior to the war, the United Kingdom's requirements of hemp were mainly supplied by the following countries in order of importance:—the Philippine Islands, New Zealand, India, Russia, Italy and Germany. The opinion appears to be held that the effect of the war will be to cause very considerable changes in the character of the fibre market. There will probably be labour difficulties, it is thought, in the prepa-

ration of the hemp crops of Russia and Hungary and it is not unlikely that the world will look to countries such as India for the supply of fibres which may be used as substitutes for the European varieties of hemp. There can be no doubt that one of the early effects of the war was to firm up hemp prices. As far as Indian hemp is concerned, values were persistently depreciated during the first six months of 1914 owing to large stocks held, but the closure of the Russian hemp market on the outbreak of war resulted in a marked improvement in values, and there was a keen demand and a considerable rise in price. Exports from Calcutta during 1922-23 made a great recovery from the previous year. The quantity advanced by 87 per cent. from 197,412 cwts. to 289,487 cwts. and the value from Rs. 26'98 lakhs to Rs. 36'60 lakhs.

## THE WOOL INDUSTRY.

Wool exported from India consists not only of wool grown in India itself, but of imports from foreign sources, these latter coming into India both by land and by sea. Imports by sea come, chiefly from Persia, but a certain quantity from Persia also comes by land, while the main imports are from Afghanistan, Central Asia, Tibet and Nepal. Quetta, Shikarpur, Amritsar and Multan are the main collecting centres for wool received by land from Afghanistan and Persia, whence it is almost invariably railed to Karachi for subsequent export overseas.

**Imports and Exports.**—A considerable amount of wool is imported annually from Tibet and, in normal years, from Afghanistan. Imports of raw wool in 1924-25 were valued at Rs. 78 lakhs and of woollen yarns and manufactures at Rs. 371 lakhs. Exports in the same year were valued at Rs. 507 lakhs (raw wool) and Rs. 114 lakhs (woollen yarn and manufactures).

**Production in India.**—The production of wool in India is estimated at 60 million lbs. the estimate being arrived at from the available figures of the number of sheep in the country and their estimated yield per fleece, the average quantity of wool yielded per sheep per annum being taken at only 2 lbs.

All Indian wools are classed in the grade of **carpet wools**, and it is correct to say of perhaps fully half the breeds of sheep found on the plains of India that they yield a kind of hair rather than of wool. They are reared chiefly on account of the mutton, and the fleece has been generally regarded as of subsidiary interest. In many respects, in actual fact, the Indian plains sheep approximate more nearly to the accepted type of the goat rather than of the sheep. Short remarks in his manual on Indian cattle and sheep, particularly with respect to the Madras type, that they "resemble a greyhound with tucked up belly, having some coarseness of form, the feet light, the limbs bony, sides flat and the tail short."

**Mill manufacture.**—The number of woollen mills at work in British India in 1902 was three, with an authorised capital of Rs. 38,50,000, and employing 23,900 spindles and 624 looms. The number of persons employed in the industry then was 2,559, and the quantity of woollen goods produced 2,148,000 lbs. At

the end of 1917 the number of mill had risen to five, with an authorised capital of Rs. 2,56,50,000 employing 39,608 spindles and 1,155 looms. The weight of goods produced then was 9,744,264 lbs. and the number of persons employed 7,824. With regard to Indian States, there was one mill in Mysore in 1903 with a capital of Rs. 6,00,000, employing 1,433 spindles and 45 looms. The quantity of goods produced was 1,136,000 lbs. and the number of persons employed 297. In 1907 there was still only the one mill working in an Indian State—the authorised capital had been increased to Rs. 15,00,000, the quantity of goods produced to 1,724,087 lbs., and the number of persons employed to 563. Three of the mills manufacture all classes of woollen and worsted goods, the remainder manufacturing blankets only. The existence of these mills in India proved of great service to Government in the meeting of war requirements, and they were all employed to their fullest capacity in supplying army demands for greatcoat cloth, serges, puttees, flannels, blankets and hosiery. Their total capacity, however, was not sufficient to meet the full requirements of the army, and consequently their supplies had to be supplemented by large imports from home. The bulk of the wool used by the Indian mills is Indian wool, although it is supplemented to some extent by the importation of merinos and cross-breeds from Australia for the manufacture of the finer classes of goods. Their market for manufactured goods is almost entirely in India itself.

**Blanket weaving and carpet manufacture** are carried on in various parts of the country, notably in the Punjab and the United Provinces. Woollen pile carpets are made in many of the jails. Amritsar had a considerable trade at one time in weaving shawls from *pashm*, the fine under fleece of the Tibetan goat, but its place has been taken to some degree by the manufacture of shawls from imported worsted yarns, but more generally by the manufacture of carpets of a fine quality which find a ready sale in the world market. This work is done entirely on hand looms and the carpets fetch a high price.

**Bibliography.**—Notes on wool in India. By A. H. Silver and J. K. Mehta, Govt. Press, (Calcutta) (1919).

## Silk.

In the early days of the East India Company the Indian Silk trade prospered greatly, and various sub-tropical races of the Silkworm were introduced. But the trade gradually declined for the following reasons:—

In the seventeenth and eighteenth centuries India's chief competitor in the silk trade was the Levant Company. Successful efforts, however, were made to acclimatise in Europe one or two races of a temperate worm, procured from China and Japan. When sericulture became part of the agriculture of France and Italy, a quality of silk was produced entirely different from that of India and Turkey, and its appearance created a new demand and organized new markets.

All subsequent experience seems to have established the belief that the plains of India, or at all events of Bengal, are never likely to produce silk that could compete with this new industry. On the lower hills of Northern India, on the other hand, a fair amount of success has been attained with this (to India) new worm, as, for example, in Dehra Dun and Kashmir. In Manipur, it would appear probable that *Bombyx mori*, possibly obtained from China, has been reared for centuries. The caprice of fashion has, from time to time, powerfully modified the Indian silk trade. The special properties of the *korah* silk were formerly much appreciated but the demand for them has now declined. This circumstance, together with defective systems of rearing and of hand-reeling and weaving, accounts largely for the present depression in the mulberry silk trade of India.

**Mulberry-feeding worms.**—Sir George Watt states that in no other country does the necessity exist so pressingly as in India to treat the subject of silk and the silk industries under two sections, viz. Bombycidae, the domesticated or mulberry-feeding silk worms; and Saturniidae, the wild or non-mulberry-feeding worms. In India the mulberry worm (*Bombyx mori*) has been systematically reared for many centuries, there being six chief forms of it. In the temperate tracts of India various forms of *Morus alba*, (the mulberry of the European silk-producing countries), are grown specially as food for the silkworm. This is the case in many parts of the plains of Northern India, Baluchistan, Afghanistan, Kashmir, and along the Himalays at altitudes up to 11,000 feet. The other species even more largely grown for the Indian silkworm is *M. indica* of which there are many distinctive varieties or races. This is the most common mulberry of Bengal and Assam, as also of the Nilgiri hills.

India has three well-known purely indigenous silkworms; the *tasar*, the *muga* and the *eri*. The first is widely distributed on the lower hills, more especially these of the great central tableland, and feeds on several jungle trees. The second is confined to Assam and Eastern Bengal, and feeds on a laurel. The third exists in a state of semi-domestication, being reared on the castor-oil plant. From an art point of view the *muga* silk is the most interesting and attractive, and the cocoon can be reeled readily. The *eri* silk, on the other hand, is so extremely

difficult to reel that it is nearly always carded and spun—an art which was practised in the Khasi Hills of Assam long before it was thought of in Europe.

**Experiments and results.**—Numerous experiments have been made with a view to improving sericulture in India. French and other experts are agreed that one of the causes of the decline of the silk industry in India has been the prevalence of diseases and parasites among the worms, the most prevalent disease being pebrine. M. Lafont, who has conducted experiments in cross breeding, believes that improvement in the crops will be obtained as soon as the fight against pebrine and other diseases of the worms is taken up vigorously by the producers of seed and the rearers of worms, while improvement in the quality of the cocoons will be obtained by rearing various races, pure and cross bred.

In Kashmir and Mysore satisfactory results have been obtained. In the former State sericulture has been fostered on approved European principles with Italian reeling machinery, seed being imported annually on a large scale. In 1897 in Mysore Mr. Tata, after selecting a plantation and site for rearing houses, sent to Japan for a Superintendent and trained operatives. The Mysore authorities have made a grant of Rs. 3,000 a year to the Tata farm in return for instruction given to the people of Mysore in Japanese methods of growing the mulberry and rearing the insects. The products of the Mysore State are exported to foreign countries from Madras. The work of the Salvation Army is also noteworthy in various parts of India. They have furnished experts, encouraged the planting of mulberry trees, and subsidised several silk schools. The draft prospectus has been issued of a silk farm and institute to be started at Simla under the auspices of the Salvation Army. The Lieut.-Governor of the Punjab has permitted the school to be called after his name, and the Punjab Government made a grant of Rs. 2,000 towards the expenses. Sir Dorabji Tata has also made a donation of Rs. 1,000. The Bengal Silk Committee under the guidance of some French experts have conducted cross-breeding experiments with a view to establish a multi-voltine hybrid of European quality. There is a Government sericultural farm at Berhampore, where, it is said, a pure white multi-voltine of silk worm is reared. The results of the Bengal Committee's labours may be summed up as follows: the only really effective method of dealing with the problem is to work up gradually to a point at which the whole of the seed cocoon necessary for the province will be supplied to rearers under Government supervision, and to establish gradually a sufficient number of large nurseries throughout the silk districts of the province.

In 1915 there was issued by the Agricultural Research Institute, Pusa, a *Bulletin* (No. 48 of 1915) entitled "First Report on the Experiments carried out at Pusa to improve the Mulberry Silk Industry." In a short Prefatory note Mr. Bainbrigge Fletcher (Imperial Entomo

logist) explains that the object of the Bulletin is to place on record some of the more important experiments which were commenced at Pusa. In the year 1910 and have since been carried on in the endeavour to fix a superior multivoltine race of the Mulberry Silkworm which would not degenerate and which would yield silk better both in quality and outturn than that supplied by the multivoltine races which are reared at present.

**Central Nurseries.**—The report of the Agricultural Department, Bengal, for the year ending June 30, 1913, gives an account of a scheme which has been devised with the object of reclaiming the silk industry. The aim of the scheme is gradually to establish throughout the silk districts a sufficient number of central nurseries with rearing houses and thus enable the whole of the seed cocoons required in the province to be supplied under Government supervision. It is believed that this is the only really effective method of dealing with the problem. A number of the existing smaller nurseries were closed during 1913 and others are being converted into enlarged and improved central nurseries with rearing houses complete. The ultimate success of the scheme depends largely on the willingness of the rearers to pay an adequate price for pure seed.

A pamphlet was published in 1915, by Mr. M. N. De, Sericultural Assistant at Pusa, which contains practical hints on improved methods which are recommended to be used for reeling

mulberry silk in Bengal and other silk producing districts. It has been found that, by the provision of two small pulleys to the ordinary Bengal type of reeling machine, superior thread can be obtained, the cost of the extra apparatus is merely nominal (five or six annas per machine) whilst the suitability of the machine for cottage workers is maintained. By attention to such simple points as the stifling and storage of cocoons and the temperature and quality of the water used in the reeling pans, great improvements can be effected in most silk centres in Bengal and other districts.

**Exports of Silk.**—As a result of the war the trade has showed in some degree signs of revival from its decadent condition, both as regards its volume and value. The value of exports during 1915-16 improved by Rs. 12 lakhs to Rs. 27½ lakhs, of which raw silk accounted for Rs. 24 lakhs. In 1916-17 the total exports rose to Rs. 54½ lakhs. In 1924-25 exports of raw silk amounted to Rs. 38 lakhs and of silk manufactures to approximately nearly Rs. 3 lakhs.

**Imperial Silk Specialist.**—At the end of 1915 it was decided that the first step to be taken to revive the silk industry should be the employment of a qualified expert who, after a careful study of the conditions not only in India but in other silk-producing countries, will formulate recommendations for the consideration of Government.

## Indigo.

Indigo dyes are obtained from the Indigofera, a genus of Leguminosae which comprises some 300 species, distributed throughout the tropical and warm temperate regions of the globe, India having about 40. Western India may be described as the headquarters of the species, so far as India is concerned, 25 being peculiar to that Presidency. On the eastern side of India, in Bihar, Bengal, Assam and Burma, there is a marked decrease in the number of species but a visible increase in the prevalence of those that are met with.

There is evidence that when Europeans first began to export the dye from India, it was procured from the Western Presidency and shipped from Surat. It was carried by the Portuguese to Lisbon and sold by them to the dyers of Holland, and it was the desire to obtain a more ample supply of dye stuff that led to the formation of the Dutch East India Company and so to the overthrow of the Portuguese supremacy in the East. Opposition to indigo in 17th century Europe was keen owing to its interference with the wood industry, but it was competition to obtain indigo from other sources than India that led on the first decline of the Indian indigo industry.

In the middle of the eighteenth century, when the cultivation of indigo in the West Indies had been given up—partly on account of the high duties imposed upon it and partly because sugar and coffee were found to be more profitable—the industry was revived in India, and, as one of the many surprises of the industry, the province of Bengal was selected for this revival. It had no sooner been organised, however, than troubles next arose in Bengal itself through misunderstandings between the planters, their cultivators and the Government, which may be said to have culminated in Lord Macaulay's famous *Memorandum* of 1837. This led to another migration of the industry from Lower and Eastern Bengal to Tirhut and the United Provinces. Here the troubles of the industry did not end, for the researches of the chemical laboratories of Germany threatened the very existence of any natural vegetable dye. They first killed the madder dye of Europe, then the safflower, the lac and the *al dyes* of India, and are now advancing rapidly with synthetic indigo, intent on the complete annihilation of the natural dye. Opinions differ on many aspects of the present vicissitude; meantime the exports from India have seriously declined, and salvation admittedly lies in the path of

cheaper production both in cultivation and manufacture. These issues are being vigorously faced and some progress has been accomplished, but the future of the industry can scarcely help being described as of great uncertainty. The issue is not the advantage of new regulations of land tenure, but one exclusively of natural *versus* synthetic indigo. (See Watt's "Commercial Products of India.") In this connection it may be noted that increases in the price of coal in England, due to labour difficulties, have greatly strengthened the position of natural indigo. In February 1915 a conference was held at Delhi when the possibility of assisting the natural indigo industry was considered from three points of view—agricultural, research and commercial. The agricultural or botanical side of the question is fully discussed by Mr. and Mrs. Howard of Pusa in Bulletins Nos. 51 and 54 of the Agricultural Research Institute. Other aspects of the question were fully examined last year in the Agricultural Journal of India by Mr. W. A. Davis, Indigo Research Chemist to the Government of India. An Indigo Cess

Bill was passed in the Imperial Legislative Council in 1918. It provides for a cess on indigo exported from India for the scientific investigation of the methods of cultivation and manufacture of indigo, the proceeds of the cess being received and expended by Government.

**Decline of the Industry.**—Since synthetic indigo was put upon the market, in 1897, the natural indigo industry of India has declined very rapidly; apart from slight recoveries in 1906-07 and 1911-12, the decline continued without a break until the revival due to the impossibility of obtaining artificial dyes in sufficient quantities during the war.

The total area under indigo in 1924 is estimated at 101,900 acres, which is 45 per cent. below the finally revised area of 1923. The total yield of dye is estimated at 19,100 cwts. (28,500 factory maunds \*) as against 36,200 cwts. (54,100 factory maunds), the finally revised estimate of 1923, or a decrease of 47 per cent. Details for the province are given below:—

Province.	Area (acres).		Yield (cwts.)	
	1924-25.	1923-24.	1924-25.	1923-24.
Madras .. .. .	57,600	95,900	14,000	22,000
Bihar and Orissa .. .. .	16,100	24,800	1,100	4,200
United Provinces .. .. .	12,400	20,000	1,400	2,200
Punjab .. .. .	7,900	36,400	1,300	6,700
Bengal .. .. .	100	900	(a)	(a)
Bombay (including Sind and Indian States)	7,800	7,700	1,300	1,100
Total ..	101,900	186,300	19,100	36,200

**Exports.**—The exports by sea to foreign countries were in each of the last five years (in cwts.) as follows:—

From—	1920-21.	1921-22.	1922-23.	1923-24.	1924-25.
	cwts.	cwts.	cwts.	cwts.	cwts.
Calcutta .. .. .	3,961	6,340	2,180	3,316	2,142
Madras ports .. .. .	4,874	5,062	1,735	2,744	1,034
Bombay .. .. .	1,301	837	555	574	117
Karachi .. .. .	114	123	65	63	15
Total ..	10,250	12,362	4,535	6,702	3,309

\* One factory maund 75 lbs.

(a) Less than 50 cwts.

## OILS AND OIL CAKES.

The exports of oil-seeds in 1924-25 were valued at Rs. 33.17 lakhs, oil-seeds being now ranked as fifth in order of importance among exports. The quantities of the principal seeds exported are shown in the following table:—

	1922-23	1923-24	1924-25
	(Thousands of tons)		
Linseed ..	274	369	371
Rapeseed ..	252	337	261
Groundnuts ..	267	257	378
Castor ..	84	85	95
Cotton ..	183	150	161
Sesamum ..	36	10	31
Copra ..	14	4	..
Others ..	67	43	33
Total ..	1,177	1,255	1,328

A pamphlet on the subject recently published by the Commercial Intelligence Department points out that it is both economically and industrially unsound for India to export her oil seeds instead of manufacturing the oils and oil cakes in India. It allows other countries to reap the manufacturers' profits and at the same time deprives Indian agriculture of the great potential wealth, as cattle-food and manure, contained in the oil cakes. An immense quantity of oil is, as a matter of fact, already manufactured in this country by more or less crude processes. Village oil mills worked by bullocks and presses worked by hand exist in all parts of the country and supply most of the local demand for oil. There has also been a great increase in recent years in the number of oil mills worked by steam or other mechanical power. These crush all the commoner oil seeds and development has been especially marked in the case of mustard oil, castor oil and groundnut oil. In spite of all this there has been a perceptible diminution in the export of oil from India, particularly of coconut oil and linseed oil, and an increase in the export of oil seeds, which is particularly marked in the case of copra and groundnuts. The situation created by

the War has naturally led to too much discussion of the possibility of developing on a large scale the existing oil-milling industry in India.

There are three difficulties with which any proposal to develop in India an oil-milling industry on a great scale is faced. In the first place, there exist high protective tariffs in European countries which encourage the export from India of the raw material rather than the manufactured product. Secondly, there is a better market for the oil cake in Europe than in India and the freight on oil seeds is less than the freight on cake. Thirdly, it is much easier and less expensive to transport oil seeds by sea than it is to transport oil. While this has been the position in the European markets, Indian made oils, other than coconut oil, have made enough headway in Eastern markets to suggest the possibility of a development of those markets.

The problem of finding a market for oil cakes is equally important. The value of oil cakes is much better appreciated in Europe than in India. The Indian cultivator is prejudiced against the use of machine-made cake as a cattle food or as manure because he considers that it contains less oil and therefore less nourishment than the village-made cake. He is therefore unwilling to buy it except at a reduced price. His prejudices on this point have no justification in fact since experts are agreed that mill cake is a better food for cattle than village-made cake. Even when the mill cake contains less oil than the village cake, there is still more oil in the cake than cattle can digest. The excess of oil in the village cake, where it exists, is a drawback and not an advantage to the use of the cake as food. A considerable amount of demonstration work has been done by the Agricultural Departments of Government in order to remove the cultivator's prejudices and there is said now to be an increasing demand for most classes of mill cake.

## COPYRIGHT.

There is no provision of law in British India for the registration of Copyright. Protection for Copyright accrues under the Indian Copyright Act under which there is now no registration of rights, but the printer has to supply copies of these work as stated in that Act and in the Printing Presses and Books Act XXV of 1867. The Indian Copyright Act made such modifications in the Imperial Copyright Act of 1911 as appeared to be desirable for adapting its provisions to the circumstances of India. The Imperial Act of 1911 was brought into force in India by proclamation in the *Gazette of India* on October 30, 1912. Under s. 27 of that Act there is limited power for the legislature of British possessions to modify or add to the provisions of the Act in its application to the possession, and it is under this power that the Indian Act of 1914 was passed. The portions of the Imperial Act applicable to British are scheduled to the Indian Act. The Act to which these provisions are scheduled makes some formal adaptations of them to Indian law and procedure, and some material

modifications of them in their application translations and musical compositions. In the case of works first published in British India the sole right to produce, reproduce, perform or publish a translation is, subject to an important proviso, to subsist only for ten years from the first publication of the work. The provisions of the Act as to mechanical instruments for producing musical sounds were found unsuitable to Indian conditions. "The majority of Indian melodies," it was explained in Council, "have not been published, i.e., written in staff notation, except through the medium of the phonograph. It is possible in many cases to identify the original composer or author, and the melodies are subject to great variety of notation and tune. To meet these conditions s. 5 of the Indian Act follows the English Musical Copyright Act of 1902 by defining musical work as meaning any combination of melody and harmony, or either of them, printed, reduced to writing, or otherwise graphically produced or reproduced."

## Tea.

Tea cultivation in India is chiefly in Assam, Bengal and Southern India, the cultivation elsewhere being comparatively unimportant. The total production of tea in India was estimated at 375 million lbs. in 1924, as compared with 375 million lbs. in 1923 and 312 million lbs. in 1922. Assam contributed 68 per cent. or nearly two-thirds of the total, Northern India (excluding Assam) nearly 24 per cent, and Southern India 13 per cent. The statement below shows the development of the industry during the past years:—

	1915	1920	1921	1922	1923	1924

Exports during the same years were as follows:—

*Exports of tea by sea to foreign countries.*

	1915-16	1921-22	1922-23	1923-24	1924-25
	lbs. (1,000)	lbs. (1,000)	lbs. (1,000)	lbs. (1,000)	lbs. (1,000)
From Northern India ..	301,429	284,378	253,990	296,871	299,810
From Southern India ..	37,035	29,493	34,296	41,879	40,292
From Burma .. .. .	6	7	10	5	5
<b>Total ..</b>	<b>338,470</b>	<b>313,878</b>	<b>288,296</b>	<b>338,755</b>	<b>340,107</b>

The total exports during 1924-25 were 340 million lb. valued at Rs. 33.39 lakhs, as compared with 339 million lbs., valued at Rs. 31.65 lakhs, in the previous year. The quantity exported to the United Kingdom increased by 1 per cent. from 296 to 299 million lbs., and the value by 7 per cent. from Rs. 27.97 to Rs. 29.79 lakhs. The consumption in the United Kingdom expanded less rapidly than in 1921, but the smaller amount imported together with larger re-exports effected a substantial reduction in the heavy stocks. Direct shipments to United States were larger than in the preceding year. Australia slightly improved her demands from 4.3 to 4.4 million lbs. The exports to Ceylon increased from 3.8 to 4 million lbs. On the other hand, Mesopotamia reduced her demand. Bengal supplied 88 per cent. of the exports and Madras nearly 11 per cent.

## EXPORTS AND PRICES.

The following table shows the quantity of Tea exported by sea and by land to Foreign Countries from India, Ceylon, and China in the years 1898-99 to 1924-25 with variations in index numbers, taking the figure of 1898-97 as 100†:—

	India.		Ceylon.*		CHINA.†		Jaya.
	lbs.	Brick, table and dust.	lbs.	Brick, table and dust.	Black and green.	Brick, table and dust.	
1898-99	158,539,488 [105]	68,017,067 [87]	122,335,618 [111]	147,967,200 [91]	132,866,933 [83]	61,498,733 [78]	25,550,156 [100]
1899-1900	177,163,999 [118]	71,205,067 [91]	129,661,908 [118]	153,669,067 [95]	112,152,533 [69]	70,784,267 [91]	27,455,019 [107]

\* Including shipments from the State of Travancore.

(a) Tea consigned from British India to Ceylon is almost entirely transhipped at Colombo to other countries and does not, therefore, appear in the Ceylon Customs Returns as imports into Ceylon.

(b) Exclusive of the exports from the North-West Frontier Province for the months, July 1923 to February 1924, for which returns were not received.

† Includes Mesopotamia

## Coffee.

The history of the introduction of coffee into India is very obscure. Most writers agree that it was brought to Mysore some two centuries ago by a Mahomedan pilgrim named Baba Budan, who, on his return from Mecca, brought seven seeds with him. This tradition is so universally believed in by the inhabitants of the greater part of South India, that there seems every chance of its being founded on fact. About the beginning of the 19th century there is no doubt coffee had found its way to India, and in 1823 a charter was granted to Fort Gloster, near Calcutta, authorizing it to become a cotton mill, a coffee plantation and a rum distillery. Some of the coffee trees planted in fulfilment of that charter are supposed to be still alive, and about the same time coffee was successfully grown in the Botanic Gardens, Calcutta; but the industry of coffee planting nowhere found an abiding place on the plains of India but migrated to the hills of South India, in Mysore more especially, and thus into the very region where tradition affirms it had been introduced two centuries previously.

The first systematic plantation was apparently Mr. Cannon's near Chikmagalur. This was established in 1890. It is supposed, however, that Major Bevan may have actually grown coffee on the Wynad at a slightly earlier date and that Mr. Cockburn's Shevaroy plantation bears the same date as Mr. Cannon's. In 1840 Mr. Glasen formed a plantation at Manantoddy, and in 1846 plantations were organised on the Nilgiri hills.

**The Position of the Industry.**—The number of reporting plantations in the year 1922-23 was 2,998, covering an area of 227,676 acres, as against 2,964 with an area of 216,746 acres reported a year ago. New land planted with coffee in these plantations during the year amounted to 7,224 acres, while the area of old cultivation abandoned was 2,842 acres. This represents a net increase of 4,382 acres over the total area (127,272 acres) under coffee for 1921-22. The total reported area under cultivation in the year 1922-23 was, therefore, 131,655 acres, or an increase of 3 per cent. over that of the preceding year. Of this total area, Mysore accounted for 52 per cent., Coorg 24 per cent., Madras 22 per cent., and Cochin and Travancore together 2 per cent.

It is reported that in some of the coffee-growing districts coffee is giving way to tea, or where the altitude is not prohibitive, to rubber. The advent of large supplies of cheap

Brazilian coffees in the markets of Europe has, by bringing down prices, no doubt injured the coffee industry of India very seriously.

### Exports of Coffee.

1923-24	..	..	..	218,000
1924-25	..	..	..	242,000

The pre-war average value of the coffee exports was Rs. 79,17,000. In 1924-25 the exports were valued at Rs. 2,09 lakhs.

**Labour.**—The daily average number of persons employed in the plantations during 1921-22 was returned at 69,191, of whom 42,036 were permanently employed (namely, garden labour 26,209 and outside labour 15,827) and 27,155 temporarily employed (outside labour), as compared with 74,945 persons (32,598 garden and 17,736 outside labour permanently employed and 24,611 temporary outside labour) in 1920-21.

## INDIAN TOBACCO.

The tobacco plant was introduced into India by the Portuguese about the year 1605. As in other parts of the world, it passed through a period of persecution, but its ultimate distribution over India is one of the numerous examples of the avidity with which advantageous new crops or appliances are adopted by the Indian agriculturist. Five or six species of *Nicotiana* are cultivated, but only two are found in India, namely, *N. Tabacum* and *N. rustica*. The former is a native of South or Central America, and is the common tobacco of India. About the year 1829 experiments were conducted by the East India Company towards improving the quality of leaf and perfecting the native methods of curing and manufacturing tobacco. These were often repeated, and gradually the industry became identified with three great centres: namely, (1) Eastern and Northern Bengal (more especially the District of Rangpur); (2) Madras, Trichinopoly, Dindigul, Coconada and Calcutt in Southern India; and (3) Rangoon and Moulmein in Burma. Bengal is the chief tobacco growing Province, but little or no tobacco is manufactured there. The chief factories are near Dindigul in the Madras Presidency, though, owing to the imposition of heavy import duties on the foreign leaf used as a cigar wrapper, some cigar factories have been moved to the French territory of Pondicherry.

The question of improving the quality of Indian tobaccos has received the attention of the Botanical section of the Agricultural Research Institute, Pusa, and three Memoirs have been published recording the results of investigations in that direction. The immediate problem at Pusa is the production of a good cigarette tobacco. Many attempts have been made in the past to introduce into India the best varieties of cigarette tobacco from America, but the results have been disappointing. It is now hoped to build up by hybridization new kinds of tobacco, suited to Indian conditions of growth, which possess in addition the qualities necessary to obtain a better price.

**Area under Cultivation.**—The cultivation of tobacco is very widespread in Burma. The two main varieties are called "Burmese tobacco" and "Havana tobacco." Of the Burmese tobacco there are two main varieties "Seywet-gyl," the large-leaved variety and "Seywet-gyun," a smaller-leaved variety with pointed leaves. The former yields a heavier crop, but the latter gives better quality. There is always a great demand on the market for both the Havana and the Burma tobacco. The smooth leaves of the Havana plant are used for the wrappers and the coarser Burmese leaf for the fillings.

The most important tobacco tracts in British India are:—(i) the Coimbatore and Dindigul

tract of Madras, where the *Uti-Kappal* and *Wara Kappal* varieties are largely grown, the former supplying the Trichinopoly cigar; (ii) the Godavari Delta of Madras; (iii) the Rangpur tract of Bengal; (iv) the Districts of Bihar and Orissa; (v) Guserat in Bombay and (vi) the delta tract of Burma.

The season for harvesting varies in different localities ranging from December to June, but the bulk of the crop is harvested during the months of February, March and April. The leaves when quite dry, are assorted and placed in heaps in stacks to ferment. They are then tied into bundles of 25 or 30, a useless leaf being employed for tying each bundle. The leaves are laid perfectly flat, the bundles being fan-shaped. In this condition they are baled, the broom-like ends projecting outwards. By varying the degree of fermentation of the leaves, different qualities of tobacco are obtained. A black variety is used in India for cake tobacco, and this is the most common product, but a certain amount of yellow leaf is grown for cigar making.

**Small Holding Crop.**—The area under tobacco in British India is always well above the million-acre line, and there are some 100,000 acres in the Indian States. The outturn varies, according to the attention given to the crop, from 200lb. to as much as 3,000 lb. of cured leaf per acre. The long-established Indian theory has been that the crop is suited only to small holdings, as it requires considerable attention and liberal manuring. But these latter conditions, as the history of the Assam tea industry shows, are not necessarily a bar to large plantations and organized production. The possibilities in this direction have been little explored, largely because cultivation in small holdings was current when British influence was established in India, whereas the cultivation of tea owes its introduction entirely to British enterprise. The great bulk of the tobacco grown in the country disappears in local consumption, but the export trade is developing.

**Export Trade.**—The Exports of unmanufactured tobacco in 1924-25 amounted to 43 million lbs. valued at Rs. 1.18½ lakhs.

Since the duty in England is charged by weight and not by value, India, as an exporter of the relatively cheaper grades, has to pay more duty in proportion than some foreign countries. But the higher degree of preference she will now enjoy will provide a substantial set off, and at the same time stimulate the efforts being made to raise the quality of production. Another factor in the same direction is the effect of the heavier import duties on tobacco shipped to India, and the consequent tendency of middle-class and other consumers to find satisfaction in the homegrown article.

The form of cocaine chiefly used in India is Cocaine Hydrochloride. This salt forms light shining crystals, with a bitterish taste, and is soluble in half its weight of water. The alkaloid cocaine—of which this is a salt—is obtained from the dried leaves of the Erythroxylon Cocaine which grows in Bolivia, Peru, Java, Brazil and other parts of South America. The leaves are most active when freshly dried and are much used by the Natives as a stimulant. Tea made from them has a taste similar to green tea and is said to be very effectual in keeping people awake. In India the Coca plant seems never to have been cultivated on a commercial scale. It has been grown experimentally in the tea districts of Ceylon, Bengal and Southern India and has been found to produce a good quality and quantity of cocaine. As the plant has not been seriously cultivated and as there is no possibility for the present of the drug being manufactured in India, no restrictions have as yet been placed on its cultivation.

**Spread of the habit.**—The cocaine traffic in India which seems to be reaching alarming proportion in spite of legislation and strict preventive measures is of comparatively recent growth; though it is impossible to estimate how widespread it was in 1903 when the Bombay High Court for the first time decided that cocaine was a drug included within the definition of an intoxicating drug in the Bombay Abkari Act. Since that date the illegal sale of cocaine in India has largely increased and the various provincial Excise Reports bear witness to the spread of the "Cocaine habit." The consumers of the drug, which is notoriously harmful, are to be found in all classes of society and in Burma even school children are reported to be its victims; but in India as in Paris the drug is mostly used by prostitutes or by men as an aphrodisiac. The habit has spread chiefly to those classes which are prohibited by religion or caste rules from partaking of liquor and the well-known Indian intoxicating drugs.

**Imports from Europe.**—Cocaine and its allied drugs are not manufactured in India, but are imported. Most of the drug which is smuggled into India, comes from Germany and bears the mark of the well-known house of E. Merck, Darmstadt. This firm issues cocaine in flat packets of various sizes ranging from 1 to 3 ounces which are easily packed away with other articles and greatly favour the methods of smugglers. Owing to its strength and purity cocaine eaters prefer this brand to any other in the market. Cocaine is also being imported into India from Japan and America. The League of Nations has only recently imposed some restrictions on the export of Cocaine but their effect has not yet been felt in India.

**Smuggling.**—So far as the cases already detected show, the persons who smuggle the drug by sea from Europe and places outside India, into India, are chiefly sailors, stewards, firemen and sometimes engineers and officers of foreign ships. The ports through which cocaine enters India are Bombay, Karachi, Calcutta, Madras, Marmagao and Pondicherry. The main inland distributing centres are Delhi, Lucknow, Meerut, Lahore, Mooltan, Surat and Ahmedabad. Delhi especially is notorious for the cocaine trade. Great ingenuity is employed in smuggling cocaine through the Custom houses. It is packed in parcels of

newspapers, books, toys and piece-goods and in trunks which have secret compartments. The retail trade in the towns is very cunningly organized and controlled. In addition to the actual retailers, there is a whole army of watchmen and patrols whose duty is to shadow the Excise and Police Officials and give the alarm when a raid is contemplated. During the War several cases of importation of Japanese cocaine were detected, the importers being Japanese and Chinese sailors, but since the cessation of hostilities and the resumption of trade most of the seizures were made from European seamen chiefly Italians. The cocaine was chiefly of German origin. The original marks on the packets and phials are usually destroyed so that the name of the manufacturing firm may not be found out. In 1922-23 The largest seizure of cocaine made by the Excise Department in the Bombay Presidency was one of 10,500 grains while in 1923-24, a seizure of 24,000 grains was effected. In October 1924 the Excise Department made a seizure of 46,500 grains in a single case.

**Price.**—The amount seized is either given to Hospitals in India or destroyed. It is no longer possible to buy cocaine from any betel-nut seller as it was ten years ago, but scores of cases in the Police Courts show that the retail trade thrives, though to a diminished extent, in Bombay. High profits ensure the continuance of the trade. At present the English quotation varies from 21 to 22 shillings per ounce and the price as quoted by licensed chemists in India varies from Rs. 28 to Rs. 30 per ounce. Since the trade with Austria and Germany has revived, the wholesale illicit dealers have put down their prices for wholesale transactions to from Rs. 50 to Rs. 80 per ounce. The retail price of sale by grains varies from Rs. 120 to Rs. 150 per ounce. These profits are further enhanced by adulteration with phenacetin and inferior quinine.

The above prices are for Bombay. They are much higher up-country.

**The law in regard to Cocaine.**—This varies in different provinces. A summary of the law in Bombay is as follows: No cocaine can be imported except by a licensed dealer and importation by means of the post is entirely prohibited. The sale, possession, transport and export of cocaine are prohibited except under a license or permit from the Collector of the District. A duly qualified and licensed Medical practitioner is allowed to transport or remove 20 grains in the exercise of his profession; and as far as 6 grains may be possessed by any person if covered by a *bona fide* prescription from a duly qualified Medical practitioner. The maximum punishment for illegal sale, possession, transport, etc., under Act V of 1878 as amended by Act XII of 1912 is as follows: Imprisonment for a term which may extend to one year or fine which may extend to Rs. 2,000 or both and on any subsequent conviction imprisonment for a term which may extend to 2 years or fine which may extend to Rs. 4,000 or both. The law in Bombay has been further amended so as to enable security to be taken from persons who have been convicted of cocaine offences. The new Act also contains a section for the punishment of house owners who let their houses to habitual cocaine sellers.

## The Opium Trade.

Two descriptions of opium must be distinguished. *Bengal* opium which is manufactured from poppy grown in the United Provinces; and *Malwa* opium which is almost entirely produced in certain Native States in Central India and Rajputana.

**Bengal Opium.**—Cultivation of poppy is only permitted under license. The cultivator to whom advances are made by Government free of interest is required to sell the whole of his production to the Opium Factory at Ghazipur at a rate fixed by Government, now Rs. 7/8 per seer of 70° consistency. The area licensed for cultivation has in recent years been much reduced as a consequence of the agreement between the Government of India and the Chinese Government, and is now restricted to the United Provinces. The following are the figures of the area under cultivation and of production in 1917-18: Elghas cultivated, 851,216; Gross produce in Maunds, 82,821; number of chests manufactured, 25,146. At the Factory two classes of opium are manufactured:

(1) "Provision" opium intended for export to foreign countries. This opium is made up in balls or cakes, each weighing 8½ lbs., 70 cakes weighing 140½ lbs. being packed in a chest.

(2) "Excise" opium intended for consumption in British India. This is made up in cubic packets, each weighing one seer, 60 packets being packed in one chest. It is of higher consistency than "provision" opium.

"Provision" opium is sold by public auction in Calcutta, the quantity to be sold being fixed by Government. This quantity has been reduced in recent years in accordance with the agreement with China; the figures being 15,440 chests in 1911 and 6,700 chests in 1912. Exports to China have been stopped altogether since 1913.

**Malwa Opium.**—The poppy from which Malwa opium is manufactured is grown chiefly in the Native States of Indore, Gwalior, Bhopal, Jaora, Dhar, Rutlam, Mewar and Kotah. The British Government has no concern with the cultivation of the poppy, or the manufacture of the opium; but it used to regulate, before exports to China were stopped, the import of Malwa opium into, and the transport through, its territories. As the chief market for Malwa opium was China, and as the States in which the drug is produced had no access to the sea, except through British territory, the British Government were able to impose a duty on the importation of the drug on its way to Bombay for exportation by sea.

No statistics of cultivation or production are available. The poppy is sown in November, the plants flower in February, and by the end of March the whole of the opium has been collected by the cultivators who sell the raw opium to the village bankers. It is then bought up by the large dealers who make it up into balls of about twelve ounces and store it until it is ready for export, usually in September or October. The opium is of 90° to 95° consistency and is packed in half chests: con-

siderable dryage took place in the case of new opium while transported to Bombay.

Sales of Malwa opium for export to China have ceased since January 1913 and the trade has become extinct since 17th December of that year when the last shipment was made. Practically the whole of the Malwa opium exported from Bombay went to China. There is no market for it in the Straits Settlements. A few chests annually are shipped to Zanzibar.

**Revenue.**—The revenue derived by the Government of India from opium in recent years is as follows:—

1915-16	..	..	..	1,913,514
1916-17	..	..	..	3,180,008
1917-18	..	..	..	8,078,908
1918-19	..	..	..	8,229,000
1919-20	..	..	..	2,088,000
				Rs.
1920-21	..	..	..	3,72,85,000
1921-22	..	..	..	3,03,24,000
1922-23	..	..	..	3,98,68,000
1923-24	..	..	..	4,30,64,000
1924-25	..	..	..	4,38,60,000
1925-26	..	..	..	2,24,00,000
1926-27	(Budget estimate)			2,26,00,000

**Agreement with China.**—The fluctuations in the revenue derived from opium are directly attributable to the trade conditions arising out of the limitation of opium exports. In 1907 being satisfied of the genuineness of the efforts of the Chinese Government to suppress the habit of consuming opium in China, the Government of India agreed to co-operate by gradually restricting the amount of opium exported from India to China. In 1908 an arrangement was concluded by which the total quantity of opium exported from India was to be reduced annually by 5,100 chests from an assumed standard of 67,000 chests. Under a further agreement, signed in May 1911, the cessation of the trade was to be accelerated on evidence being shown of the suppression of the native production of opium in China, and in accordance with this agreement a further limitation was placed on exports to Chinese ports. The reduction of exports led to an increase in the price of the drug in China and a corresponding rise in the price obtained in India at the auction sales. For some considerable time, however, in 1912 the trade in China was paralysed by the imposition by Provincial Governors in defiance of instructions from the Central Government of restrictions on the importation and sale of Indian opium. Stocks accumulated rapidly at Shanghai and Hongkong and the position in December 1912 had become so acute that a strong and influential demand was made on the Government of India to relieve the situation by the suspension of sales. Sales were accordingly postponed both of Bengal and Malwa opium and in order to afford the Malwa trade the most complete relief, the Government of India undertook to purchase for its own use 11,253 chests of Malwa opium which remained to be exported in 1913. The present position is that the export trade to China has ceased since 1913.

## GLASS AND GLASSWARE.

The total value of the glass and glassware imported into India in 1924-25 amounted to Rs. 260 lakhs compared with Rs. 246 lakhs in the previous year. The imports of glassware in India are showing an upward tendency, they being in 1913-14 over Rs. 246 lakhs. In value, i.e., over the quinquennial average of Rs. 161 lakhs. Austria Hungary and Germany before the outbreak of the war exported bangles, beads, bottles, funnels, chimneys and globes, etc., to the value of Rs. 116 lakhs in 1913-14. The value of average imports from the enemy countries during the five pre-war years was Rs. 93 lakhs or about 57% of the trade. With their disappearance from the Indian market, imports from Japan increased to 71% from 8%, the pre-war average. United Kingdom increased her shipments of sheet and plate glass, which before 1914 came largely from Belgium. Japan, however, could not meet the Indian demand, and hence renewed and pioneer efforts were made in India to satisfy the needs of the Indian consumer. After the war imports from what was the Dual Monarchy quickly revived.

**Manufacture of Glass in India.**—Glass was manufactured in India in centuries before Christ and Pliny makes mention of "Indian Glass" as being of superior quality. As a result of recent archaeological explorations, a number of small crude glass vessels have been discovered indicative of the very primitive stage of the industry. But no further traces of ancient Indian Glass Industry as such survive; yet, it is certain that by the sixteenth century it was an established industry producing mainly bangles and small bottles. The quality of the material was inferior and the articles turned out were rough. Beyond this stage, the industry had not progressed until the nineties of the last century. Manufacture of glass in India on modern European lines dates from the nineties of the last century, when some pioneer efforts were made in this line. Since then a number of concerns have been started, a number of them have failed, while some are still clinging to life owing to war conditions. They mainly devote themselves to the manufacture of bangles and lampware side by side with bottle-making on a small scale. This, therefore, is the criterion which determines the two well-defined classes of the industry in its present stage, (i) Indigenous Cottage Industry and (ii) the modern Factory Industry.

(i) The Indigenous Cottage Industry which is represented in all parts of the country, but has its chief centres in Firozabad District of U. P., and Belgam District, in the South, is mainly concerned with the manufacture of cheap bangles made from "glass cakes or blocks" made in larger factories. The industry is at present in a flourishing state and supplies nearly one-third of the Indian demand for bangles. The quality has been improved by the discovery of new glazing processes and for the present

the turnover in this line has gone up to 20 lakhs of rupees a year. But these bangles have now to face a very hard competition from Japan whose "silky" bangles are ousting the old type Indian ones.

(ii) The modern Factory type of organization of this industry is just in its infancy at present. The existing factories either stop at producing glass cakes for bangle as in Firozabad or simple kind of lampwares and bottles. With the existing state of knowledge and machinery in India they can neither produce sheet and plate glass, nor do they pretend to manufacture laboratory or table glass. Artistic glassware is out of the question and the private capitalists who have to run their concerns mostly with commercial ends do not think it worth their while to spend money and labour on it. War caused a great decrease in volume—though not so much in value which was much increased—of the imports of the lampware, etc., and in order to meet the Indian demand for them, new factories were started and old revived, which produced only cheap and simple kind of lampware and bottles on small scale. The total production of these Indian Glass Works has not been exactly estimated, but it is generally supposed that they were able to meet in these war years nearly half the Indian demand for this kind of glassware. There are at present 14 factories engaged in the production of lampware, of which two or three only produce bottles and carboys also. The chief centres for the former kind are Bombay, Jubbulpore, Allahabad, and Bilhori and Ambala; while bottles are only manufactured at Naini and Lahore, and recently at Calcutta.

During the latter years of the war period, a number of Glass Works were opened in the Bombay Presidency and adjoining districts, local manufacture having been stimulated by the cessation of imports of German, Austrian and Belgian glass.

**Causes of failure.**—Records of the earlier ventures have shown that the failures in some cases were due in part at least to preventable causes, prominent among which were (1) Lack of enlightened management. (2) Lack of proper commercial basis, as in some cases the proprietors had a number of other more larger concerns to look to. (3) Bad selection of site. An ideal site for a Glass Factory would be determined by (a) nearness of quartz and fire-clay, (b) nearness of fuel, and (c) by the nearness of market. At least two must be present. In some concerns, two were absent. (4) Specialisation was lacking, some factories in their initial stages trying to manufacture three or four different kinds of glassware simultaneously like lampware, bottles, and bangles, etc. (5) Paucity of sufficient fluid capital for initial expenses for machinery or other improvements or even in some cases for running the concern in the beginning.

But beyond these there are certain real and special causes that contributed to the failure of

some of these and hinder the progress of the rest. Chief among them are (1) The Industry is in its infant stage and hence such failures are but incidental. (2) No expert guidance in this line, there is a lack of men and good literature. (3) Paucity of skilled labour of higher type. The present Indian workmen in this line and blowers are few in number and illiterate. They, therefore, master the situation and are unamenable to management. (4) Heavy cost of good fuel, the works usually being situated where good sand and quartz can be obtained, and consequently, in most cases, at a great distance from the coal-fields. (5) To a certain extent, competition from Japan and other European countries.

Alkali used is almost entirely of English manufacture being Carbonate of Soda 98-99% in a powdered form. This Alkali has almost completely taken place of the various Alkaline Earths formerly employed by the Glass Bangle manufactures as the latter cannot be used in the manufacture of glass which is to compete

with the imported article. These points must be carefully noted for future guidance.

The Industry developed considerably under war conditions; but in peace times, in this transition stage, immediate efforts must be made in the direction of what the Indian Industrial Commission say in their Report (Appendix E), viz.: "The Glass Industry, even in its simplest form is highly technical and can be efficiently carried on only by scientifically trained managers and expert workmen. The present stage has been reached by importing men, only partially equipped with the necessary qualifications, from Europe and Japan, and by sending Indian students abroad to pick up what knowledge they can. The glass industry is a closed trade and its secrets are carefully guarded, so that the latter method has not proved conspicuously successful."

## WILD BIRDS' PLUMAGE.

The Bill for prohibiting the importation into England of wild birds' plumage, which was introduced into Parliament in 1913, was the occasion of a fierce controversy on the nature of the plumage traffic. Organised opposition to the Bill, although successful in preventing it from becoming law, failed to convince the public that the plumage trade was not one of great cruelty. The controversy continued with unabated vigour until May 1921, when an agreement was arrived at between the two parties. The most important clause in the agreement stipulates that within four months of the Bill becoming law an Advisory Committee shall be appointed by the Board of Trade. This Committee will consist of an independent chairman, two expert ornithologists, three representatives of the feather trade, and four other independent members. The function of this Committee will be to advise the Board of Trade as to additions to and removals from the existing schedule (ostrich and elder duck) of birds whose plumage may be imported. The passing of the Plumage Bill will thus place England abreast of the United States and of her own daughter Dominions in the suppression of a barbarous industry, as all legitimate methods of breeding birds for their plumage will be safeguarded as definite exceptions under the Plumage Bill.

**Plumage birds.**—The birds most killed on account of their plumage in India are paddy birds, egrets, kingfishers, bustards, junglefowl, pheasants, paroquets, peafowl, hoopoes and rollers. Egrets and rollers (popularly known as Blue Jays) are perhaps the birds which have been most extensively killed in the past, and of these, egrets have attracted the greatest attention. There are three species met with in India: the Large, Smaller and Little Egrets. All three are pure white slim birds which develop during the breeding season a dorsal train of feathers, which elongates and becomes "decomposed" as it is expressed, that is to say, the barbs are separate and distinct from each other,

thus forming the ornamental plume or aigrette for which these birds are much sought after and ruthlessly destroyed. Thirty years ago the exports were valued at over six lakhs in one year, but since 1895 the export trade has steadily diminished. But, though legitimate exports have been stopped, the trade is so lucrative as to lead to many attempts at smuggling. Within a recent period of 12 months the Bombay Preventive Department, for example, seized egret plumes worth Rs. 2,19,047 in India and \$44,000 in London. The rupee value represents the sum which the exporters paid to those who took the feathers from the birds, so the loss to the trade was considerable. In addition, penalties varying from Rs. 5,000 to Rs. 10,000 each and amounting altogether to Rs. 59,175 were inflicted on the ten merchants concerned in attempting to export the feathers. A case was reported from Rangoon in 1916 of a man being found in possession of 22 lbs. of egret feathers valued at Rs. 66,000. Although frequently denied, there seems very little reason to doubt, that within the last decade egrets have been successfully bred in captivity by the fisherfolk in the province of Sind. But whether such birds can be bred without cruelty, and if so whether the export of their plumage could be legalised without encouraging barbaries in other areas of the peninsula, is a question which can only be decided as a result of a searching and exhaustive inquiry.

**Legislation.**—Indian legislation on the subject will be studied with interest by those who have followed the course of legislation on this subject in other countries. Until 1887 no legislation was considered necessary in India. An Act of that year enabled local governments and municipal and cantonment authorities to make rules prohibiting under penalties the sale or possession of wild birds recently killed or taken during their breeding seasons, and the importation into any municipal or cantonment area of the plumage of any wild birds during

those seasons; and local governments were empowered to apply these provisions to animals other than birds.

Afterwards, in 1902, action was taken under the Sea Customs Act to prohibit the exportation of the skins and feathers of birds, except feathers of ostriches and skins and feathers exported *bona fide* as specimens illustrative of natural history. Act VIII of 1912 goes much further than the previous law. It schedules a list of wild birds and animals to which the Act is to apply in the first instance, enables local governments to extend this list, empowers local governments to establish "close times," presumably during the breeding seasons, in the whole of their territories or in specified areas, for wild birds and animals to which the Act applies, and imposes penalties for the capture, sale, and purchase of birds and animals in contravention

of the "close time" regulations, and for the sale, purchase and possession of plumage taken from birds during the close time. There is power to grant exemptions in the interests of scientific research, and there are savings for the capture or killing by any person of a wild animal in defence of himself or of any other person, and for the capture or killing of any wild bird or animal in *bona fide* defence of property.

One defect in the law may be noticed. When an exporter is discovered, the Customs Department can on a magistrate's warrant have his house searched and seize the feathers found there to produce as evidence that he is engaged in the trade. But they have to return the feathers and can only take possession of them if they are discovered presently in course of export.

## HIDES, SKINS AND LEATHER.

India's local manufactures of skins and leather have steadily increased in recent years. Previous to the outbreak of war, the trade in raw hides in this country was good; there was a large demand for hides, and prices ruled high. While in the continental markets stocks were high owing to overtrading in the previous year, the United States had a shortage which was estimated at approximately two million pieces. On the declaration of war, the trade which had up till then been brisk was seriously dislocated. Exports to enemy countries, especially to the great emporium of Indian hides, Hamburg, were stopped, and exporters had to find new markets for the raw material. The raw hide business of India, it is well known, has hitherto been largely, if not quite entirely, in the hands of German firms or firms of German origin. Germany has had the largest share of India's raw hides. In the four months before the outbreak of war she took 39 per cent. of the total exports. In 1912-13 she took 32 per cent. and in 1913-14, 35 per cent. Raw hides were exported to Trieste in considerable quantities whence they were taken to Germany or Austria. In the four months before the outbreak of war 15 per cent. of India's exports passed through Trieste; in 1913-14 the percentage was 21.

**Exports.**—The exports in raw hides and skins in 1924-25 amounted in value to Rs. 6.77 lakhs (47,700 tons) compared with Rs. 6.93 lakhs (48,900 tons) in the previous year. The exports of tanned hides and skins in 1924-25 totalled 19,400 tons valued at Rs. 7.18 lakhs.

**Conditions of the Trade.**—The trade in hides and skins and the craft in leather manufacture are in the hands either of Mahomedans or of low caste Hindus, and

are on that account participated in by a comparatively small community. The traffic is subject to considerable fluctuations concomitant with the vicissitudes of the seasons. In famine years for instance the exports of untanned hides rise to an abnormal figure. The traffic is also peculiarly affected by the difficulty of obtaining capital and by the religious objection which assigns it to a position of degradation and neglect: it has thus become a monopoly within a restricted community and suffers from the loss of competition and popular interest and favour.

No large industry has changed more rapidly and completely than that of leather. By the chrome process, for example, superior leather may be produced from the strongest buffalo hides in seven days, from cowhide in twenty-four hours, and from sheep and goat skins in six to eight hours; and these operations formerly took thirty days or as much as eighteen months. Of these changes the native tanners of India were slow to take advantage, but in spite of general backwardness the leather produced by some of the tanneries, especially those under European management, is in certain respects equal to the best imported articles. But since the outbreak of war progress has been more rapid and considerable quantities of special forms of chrome leather, for which Indian hides are particularly suitable, have found a ready market in London.

**Protecting the industry.**—The report of the Industrial Commission pointed out that the principal difficulty at present in the hides and leather industry was the lack of organisation and expert skill. Government action to foster the industry was first taken in September 1919, when a Bill was introduced in the Imperial Legislative Council further to amend the Indian

Tariff Act, 1894. The effect of this Bill was officially described as follows: "It is to impose an export duty of 15 per cent. on hides and skins with a rebate of 10 per cent. on hides and skins exported to other parts of the Empire, and there tanned. Its object is to ensure that our hides and skins shall be converted into fully tanned leather or articles of leather so far as possible in India and failing this in other parts of the Empire, instead of being exported in a raw state for manufacture in foreign countries." Sir George Barnes who was in charge of the Bill and described the tanning industry as one of the most promising Indian industries explained that "the present position is that we have in India at the present time some hundreds of tanneries for the tanning of hides, a large number of which have come into existence in order to satisfy military requirements during the war. We have in fact the foundations of a flourishing tanning industry, but there is reason to fear that it may tend to dwindle and disappear with the diminution of military requirements, if some other support is not given. We want to keep this industry alive, and we believe that in this case protection in the shape of a 15 per cent. export duty is justifiable and ought to be effective. It is clearly just also that the same measure of protection should be extended

to the tanners of skins whose business, as I have already stated, (was injured by the necessities of the war. Though Indian tanneries have enormously increased in number during the past three years, they can only deal with a comparatively small proportion of the raw hides and skins which India produces, and it is to the advantage of India and the security of the Empire generally that this large surplus should, so far as possible, be tanned within the Empire, and with this end in view the Bill proposes a 10 per cent. rebate in respect of hides and skins exported to any place within the Empire. I should add that it is proposed to limit by notification the benefit of this rebate to hides and skins actually tanned within the Empire; and Indian hides and skins re-exported from an Empire port for the purpose of being tanned abroad will not be entitled to any rebate."

**Indigenous methods.**—India possesses a large selection of excellent tanning materials such as *Acacia* pods and bark, Indian *sumach*, the Tanner's *cassia*, *Mangroves*, and *Myrabolans*. By these and such like materials and by various methods and contrivances, hides and skins are extensively cured and tanned and the leather worked up in response to an immense, though purely local, demand.

## GRAIN ELEVATORS.

The question of adopting elevators for the handling of Indian grain has engaged attention for some time and has assumed increased importance in the light of the railway congestion experienced in recent years and more particularly in the grain season. In the last three years great strides have been made by other countries in the adoption or perfecting of the elevator system, and a large mass of contemporary data on the subject has been brought together by the Commercial Intelligence Department. Since the subject is one that cannot receive adequate consideration in India till the facts are before the public, these have been embodied in a pamphlet entitled *Indian Wheat and Grain Elevators*, by the late Mr. F. Noel-Paton, Director General of Commercial Intelligence to the Government of India. The work gives full particulars regarding India's production of wheat, and shows that less than one-eighth of the crop is exported. It describes the conditions under which the grain is held and the risks that it runs. It is pointed

out that the cultivator has no adequate means of preserving his wheat and that he is constrained to sell at harvest time; also that the prices then obtained by him are considerably lower than those usually current in later months. The constant nature of the European demand is explained and an attempt is made to gauge the probability that the enormously increased quantities of wheat to be expected when new irrigation tracts come into bearing would be accepted by Europe at one time and at a good price, or could be economically transported under a system in which a few months of congestion alternated with a longer period of stagnation. Figures are given which suggest that in practice the effect of equipping railways to do this is to intensify the evil and so to engage in a vicious circle. The author explains the structural nature of elevators and their functions as constituted in other countries. Particulars are given as to the laws that govern their operations in such countries.

## TRADE MARKS.

The Indian Merchandise Marks Act (IV of 1889) was passed in 1889, but its operation in the earlier years was restricted, especially in Calcutta, in consequence of the lack of adequate Customs machinery for the examination of goods. In 1894, with the introduction of the present tariff, the Customs staff was strengthened for the examination of goods for assessment to duty, and this increase enabled examination to be made at the same time for the purposes of the Merchandise Marks Act. The Act was intended originally to prevent the fraudulent sale of goods bearing false trade marks or false trade descriptions (as of origin, quality, weight, or quantity). While the Act was before the Legislature a provision was added to require that piece-goods should be stamped with their length in yards. In this respect these goods are an exception, for the Act does not require that other descriptions of goods should be stamped or marked, though it requires that when goods are marked the marks must be a correct description. The number of deten-

tions under the Act during the twenty years ending 1912-13 has been:—

Average of the five years ending		
1897-98	1,886	
1902-03	1,411	
1907-08	1,198	
1912-13	1,900	

Detention is but rarely followed by confiscation, and there have been only 109 such cases during the stated twenty years. Usually, detained goods are released with a fine, and this procedure was followed in 10,282 cases out of the 29,774 detentions ordered in the same period. In 10,364 cases the detained goods were released without the infliction of a fine. In this period of twenty years 42 per cent. of the detentions were on account of the application of false trade marks or false trade descriptions. In 36 per cent. of the cases detention was ordered because the country of origin was either not stated or was falsely stated, and in 21 per cent. because the provisions of the Act for the stamping of piece-goods had been infringed.

## INVENTIONS AND DESIGNS.

A handbook to the Patent Office in India, which is published by the Government Press, Calcutta, gives the various Acts, rules, and instructions bearing on the subject together with hints for the preparation of specifications and drawings, hints for searchers and other valuable information that has not hitherto been readily accessible to the general public in so convenient a form. In the preface Mr. H. G. Graves, Controller of Patents and Designs, explains the scope of the Patent laws in India and indicates wherein they differ from English law and procedure.

The foundation of patent legislation throughout the world lies in the English "Statute of Monopolies" which was enacted in 1623, the 21st year of King James the First. In part this Act has been repealed, but the extant portion of the more important section 6 is as follows:—"Provided also that any declaration before mentioned shall not extend to any letters patent and grants of privilege for the term of fourteen years or under hereafter to be made of the sole working or making of any manner of new manufactures within this realm to the true and first inventor and inventors of such manufactures, which others at the time of making of such letters patent and grants shall not use, so as also they be not contrary to the law nor mischievous to the State by raising prices of commodities at home, or hurt of trade, or generally inconvenient; the said fourteen years to be accomplished from the date of the first letters patent or grants of such privilege hereafter to be made, but that the same shall be of such force as they should be if this Act had never been made, and of none other."

The existing Indian patent law is contained in the Indian Patents and Designs Act, 1911, supplemented by the Indian Patents and Designs (Temporary Rules) Act, 1915, and

by the Rules made under those Acts. The Patent Office does not deal with trade marks or with copyright generally in books, pictures, music and other matters which fall under the Indian Copyright Act III of 1914. There is, in fact, no provision of law in British India for the registration of Trade Marks which are protected under the Merchandise Marks Act (IV of 1889) which forms Chapter XVIII of the Indian Penal Code.

On the whole, Indian law and procedure closely follow that in the United Kingdom for the protection of inventions and the registration of designs, as they always have done in matters of major interest. One main difference exists, however, as owing to the absence of provision of law for the registration of trade marks, India cannot become a party to the International Convention under which certain rights of priority are obtainable in other countries.

The first Indian Act for granting exclusive privileges to inventors was passed in 1856, after an agitation that had been carried on fitfully for some twenty years. Difficulties arising from an uncertainty as to the effect of the Royal Prerogative prevented earlier action, and, owing to some informalities the Act itself was repealed in the following year. In 1859 it was re-enacted with modifications, and in 1872 the Patterns and Designs Protection Act was passed. The protection of Inventions Act of 1883, dealing with exhibitions, followed, and then the Inventions and Designs Act of 1888. All these are now replaced by the present Act of 1911.

The existing Acts extend to the whole of British India, including British Baluchistan and the Santhal Parganas. This of course includes Burma, but it does not embrace the Native States. Of the latter three, (1) Hyderabad (Deccan), (2) Mysore, (3) Gwalior have ordinances of their own, for which particulars must

be obtained from the Government of the States in question as they are not administered by the Indian Patent Office in Calcutta. The object of the Act of 1911 was to provide a simpler, more direct, and more effective procedure in regard both to the grant of patent rights and to their subsequent existence and operation. The changes made in the law need not here be referred to in detail. They gave further protection both to the inventor, by providing that his application should be kept secret until acceptance, and to the public, by increasing the facilities for opposition at an effective period. At the same time a Controller of Patents and Designs was established, with power to dispose of many matters previously referred to the Governor-General in Council, and provision was made for the grant of a sealed "patent" instead of for the mere recognition of an "exclusive privilege." The provisions of the Act follow with the necessary modifications those of the British Inventions and Designs Act of 1907.

**Printed Specification** of applications for patents, which have been accepted (8 annas per copy), may be seen free of charge, together with other publications of the Patent Office at the following places:—

Note.—The quinquennial average figures are inserted only for comparative purposes. The progressive total of additions to stock (item 9) and net progressive absorption (item 10) are calculated on the annual figures and are not based on these averages. Item 9 is the sum of the yearly figures in item 5 and item 10 the sum of the yearly figures in item 8.

(a) Excludes gold imported and exported on behalf of the Bank of England.

(b) Figures are for calendar year ending 31st December.

## Customs Tariff.

**General Import duties** are levied for fiscal purposes and not for the protection of Indian industries. But the tariff has been modified with a view to admitting free or at favourable rates articles, the cheap import of which was considered necessary in the interests of the country. Thus certain raw materials, manures, agricultural implements and dairy appliances are admitted free. Machinery, printing materials, etc. are assessed at 2½ per cent. and iron and steel railway material and ships at 10 per cent. High duties are imposed on tobacco, liquors and matches.

**Re-Imports.**—Articles of foreign production on which import duty has been once paid, if subsequently exported, are on re-import exempted from duty on the following conditions :—

The Collector of Customs must be satisfied—

- (1) of the identity of the articles ;
- (2) that no drawback of duty was paid on their export ;
- (3) that the ownership has not changed between the time of re-export and subsequent re-import ;
- (4) that they are private personal property re-imported for personal use, not merchandise for sale ;
- (5) that not more than three years have passed since they were re-exported.

Duty is, however, charged on the cost of repairs done to the articles while abroad which should be declared by the person re-importing the articles in a form which will be supplied to him at the time of re-importation.

To facilitate identification on re-importation an export certificate giving the necessary particulars should be obtained from the Customs Department at the time of shipment of the articles which should be tendered for examination.

This concession of free entry on re-importation is not extended for the benefit of Companies or Corporate Bodies.

**Drawbacks.**—When any goods, capable of being easily identified which have been imported by sea into any Customs port from any foreign port, and upon which duties of Customs have been paid on importation, are re-exported by sea from such Customs port to any foreign port, or as provisions or stores for use on board a ship proceeding to a foreign port, seven-eighths of such duties shall, except as otherwise hereinafter provided, be repaid as drawback :

Provided that, in every such case, the goods be identified to the satisfaction of the Customs Collector at such Customs port and that the re-export be made within two years from the date of importation, as shown by the records of the Custom House, or within such extended

term as the Chief Customs Authority, or Chief Customs Officer on sufficient cause being shown, in any case determines, provided further that the Chief Customs Officer shall not extend the term to a period exceeding 3 years.

When any goods, having been charged with Import duty at one Customs port and thence exported to another, are re-exported by sea as aforesaid, drawback shall be allowed on such goods as if they had been so re-exported from the former port :

Provided that, in every such case, the goods be identified to the satisfaction of the Officer-in-Charge of the Custom House at the port of final exportation, and that such final exportation be made within three years from the date on which they were first imported into British India.

No drawback shall be allowed unless the claim to receive such drawback be made and established at the time of re-export.

No such payment of drawback shall be made until the vessel carrying the goods has put out to sea, or unless payment be demanded within six months from the date of entry for shipment.

Every person, or his duly authorised agent, claiming drawback on any goods duly exported, shall make and subscribe a declaration that such goods have been actually exported, and have not been re-landed and are not intended to be re-landed at any Customs port ; and that such person was at the time of entry outwards and shipment, and continues to be, entitled to drawback thereon.

**Merchandise Marks.**—Importers into India especially from countries other than the United Kingdom, would do well to make themselves acquainted with the law and regulations relating to merchandise marks. In Appendix II will be found the principal provisions of the Indian Merchandise Marks Act, 1889, and connected Acts and the notifications issued thereunder. The following summary of the regulations in force does not claim to be exhaustive. For those seeking more complete information a reference is suggested to the Merchandise Marks Manual which is published under the authority of the Government of India and obtainable of all agents for the sale of Indian Government publications.

Infringements or offences may be classified conveniently under four heads :—

1. Counterfeit trade marks ;
2. Trade descriptions that are false in respect of the country of origin ;
3. Trade descriptions that are false in other respects ; and
4. Lengths not properly stamped on piece-goods,

Schedule II—(Import Tariff).

Note.— In the expression "*ad valorem*" used in this schedule the reference is to "real value" as defined in Section 30 of the Sea Customs Act, 1878 (VIII of 1878).

\* Under Government of India Notification No. 1428, dated 17th November 1923, Jute Rags such as are used for paper-making are exempt from payment of export duty provided that the Customs Collector is satisfied that they are useless for any purpose to which cloth or rope is ordinarily put.

## Trade.

India is pre-eminently an agricultural country, and that fact dominates the course of its trade. The great export staples are the produce of the soil—wheat, seeds, cotton and jute. If we look back on the course of Indian trade over a long period of years we shall note a striking development towards stability. In the days that are past, the outturn of the soil was subjected to periodic shocks from famines arising from the failure of the rains, when the export trade in these staples dwindled to small proportions. But the spread of irrigation has produced a great change, and though no doubt in future heavy losses may be incurred from the weakness of the monsoons, they are never likely to be as catastrophic as in such years as 1896-97 and 1899-1900. Well over thirty per cent. of the culturable area of the Punjab is under irrigation, and huge new works are in progress to utilise the waters of the Sutlej, and of the Indus in Sind. Whilst these great works have been carried out or are in progress, to spill on the land the floods of the snowfed rivers of the North, other works of a less imposing character have safeguarded the arid tracts of the South. A chain of storage lakes arrests the rains of the Western Ghats and through canals spreads them over the parched lands of the Deccan. The rivers of the South, like the Cauvery, are being harnessed to preserve their flood waters for Madras. All over India irrigation works, large and small, are being restlessly pressed forward, and their effect is to give a far greater stability to Indian agriculture.

The destination of these surplus crops is another factor of importance. The great customer for Indian cotton is Japan, and to a lesser extent the Continent of Europe. Continental Europe is also a large buyer of her oilseeds and other produce, and of her hides and skins. Whilst the United Kingdom is the great market for tea and wheat, foreign countries are the backbone of the Indian export trade; therefore India had a vital interest in the economic recovery of Europe. When the post-war boom collapsed it hit India hard and

for a year or two the export trade reeled under the shock. The progress of the Dawes Plan, and the measures taken under the League of Nations to assist Austria and Hungary back to industrial health had a special bearing on the prosperity of India; they have been elements of importance in inducing her recovery of prosperity.

But whilst India is pre-eminently an agricultural country, she ranks at the International Labour Office at Geneva as one of the great industrial countries of the world. Her manufacturing industries are few in number, and are concentrated in a few areas, but they are of great importance. The largest is the cotton textile industry, which has its home in the town and Island of Bombay, with important subsidiary centres at Ahmedabad, Sholapur and Nagpur. Next in importance is the jute industry. Raw jute is a virtual monopoly of Bengal, and the jute mills are concentrated in and near Calcutta. The metallurgical industry is of more recent growth. The principal centre is Jamshedpur, the seat of the works of the Tata Iron and Steel Company, where subsidiary industries have sprung up to utilise the products of the blast furnaces and mills. A very large proportion of the jute manufactures is exported. The cotton textile industry has lost a considerable part of its export trade to Japan, the Far East and East Africa; the mills find their principal outlet in India itself, and even there they are subject to severe competition from Japan and China. The iron and steel industry is for the most part a home industry, though large quantities of Indian pig iron are shipped to the Far East, and in some years to the western ports of North and South America. Therefore, whilst India is still in the main an agricultural country, three-quarters of her population drawing their sustenance from the soil, her manufacturing industries are of large and growing importance, and their prosperity every year affects in an increasing degree the general prosperity of the people.

### I.—GENERAL CHARACTERISTICS.

Progress towards stabilisation was the keynote of the economic history of 1924-25 in Europe and this necessarily increased the world-demand for raw materials, of which India is one of the most important sources of supply. In consequence the year was one of records in the Indian export trade. A good monsoon for the fourth year in succession led to a large increase in the exportable surplus of crops and the total figure of exports of merchandise rose

from Rs. 363 crores to the unprecedented figure of Rs. 400 crores. The increase was largely in raw and manufactured jute and food-grains. Imports of merchandise also rose from Rs. 237 crores to Rs. 253 crores, largely owing to increased importations of sugar and cotton piece-goods. The following figures show the values of imports and exports of merchandise on the basis of declared values in 1913-14:—

(In crores of Rupees.)

	1913-14.	1920-21.	1921-22.	1922-23.	1923-24.	1924-25.
Imports .. .. .	183	142	124	138	120	137
Exports .. .. .	244	172	182	214	240	250
Total trade in merchandise excluding re-exports .. .. .	427	314	306	352	360	387

**Imports.**—On the import side, cotton piece-goods increased by 837 million yards or 23 per cent. in quantity to 1,823 million yards and by Rs. 12 crores or 22 per cent. in value to Rs. 69 crores. Grey goods rose by Rs. 5 crores, white goods by Rs. 4½ crores and coloured goods by Rs. 2½ crores. The total value of the import trade in other articles (excluding cotton piece-goods) increased by over Rs. 6 crores or nearly 4 per cent. from Rs. 171 crores to Rs. 177 crores. The importations of sugar, including confectionery, increased by 53 per cent. in quantity from 476,000 tons to 729,000 tons and by 35 per cent. in value from Rs. 15½ crores to Rs. 21 crores. In iron and steel the quantity rose by 15 per cent. from 756,000 tons to 869,000 tons and the value by 6 per cent. from nearly Rs. 18 crores to Rs. 19 crores. Machinery and mill-work showed a further decrease in the year under review from Rs. 20 crores to Rs. 16 crores, owing chiefly to the small imports of textile machinery, and railway plant and rolling stock on private account also fell from Rs. 11½ crores to Rs. 6 crores. Imports of hardware increased in value from Rs. 4½ crores to Rs. 5 crores, and motor cars also improved from Rs. 2 crores to Rs. 2½ crores. Imports of foreign coal showed a further decrease from Rs. 1½ crores to Rs. 1½ crores. The value of imported provisions improved by over a crore of rupees to nearly Rs. 4 crores. Alizarine and aniline dyes increased in quantity from 16 million lbs. to 18½ million lbs. and the value showed a small increase of Rs. 5 lakhs to Rs. 2,56 lakhs. Mineral oils rose by a crore of rupees to Rs. 9 crores. There were also increases in raw cotton from Rs. 2½ crores to Rs. 4½ crores and in cotton twist and yarn from nearly Rs. 8 crores, to Rs. 9½ crores, while instruments and apparatus decreased by Rs. 23 lakhs to Rs. 3,02 lakhs, and matches by Rs. 57 lakhs to Rs. 89 lakhs. In liquors there was a small improvement of Rs. 14 lakhs to Rs. 3,28 lakhs.

**Exports.**—On the export side, the value of raw cotton exported decreased from Rs. 98 crores to Rs. 81 crores and the total value of raw and manufactured cotton fell from Rs. 110½ crores to Rs. 103 crores. Shipments of raw jute increased by 5 per cent. in quantity from 660,000

tons to 696,000 tons and by 45 per cent. in value from Rs. 20 crores to Rs. 29 crores. Gunny bags increased in number from 414 millions to 425 millions and gunny cloth from 1,349 million yards to 1,456 million yards. The value of the exports of jute manufactures, including twist and yarn, increased from Rs. 42 crores to nearly Rs. 52 crores and the total value of raw and manufactured jute rose from Rs. 62 crores to Rs. 81 crores. The value of grain, pulse, and flour exported increased by 28 per cent. from Rs. 51 crores to Rs. 65 crores. Husked rice increased in quantity by 96,000 tons to 2·3 million tons and in value by over Rs. 2 crores to Rs. 37 crores, and shipments of wheat also considerably increased from 638,000 tons valued at Rs. 9 crores to 1,112,000 tons valued at Rs. 17 crores. Exports of tea increased in quantity by 1½ million lbs. to 340 million lbs. and in value by Rs. 1½ crores to Rs. 33 crores. Oilseeds also increased from nearly Rs. 30 to Rs. 33 crores, while lac fell from Rs. 9 crores to Rs. 7½ crores. Raw hides and skins showed a small decrease in value from nearly Rs. 7 crores to Rs. 6½ crores, while dressed hides and skins improved from nearly Rs. 6 to over Rs. 7 crores.

**Balance.**—The balance of trade in merchandise in favour of India exceeded the previous year's record and amounted to Rs. 1,65 crores as compared with Rs. 1,45 crores in 1923-24 and Rs. 78 crores, the pre-war average. This was largely liquidated by heavy imports of bullion. The net imports of private treasure in the year under review established a record and amounted to Rs. 94 crores. The net imports of gold reached the record figure of Rs. 74 crores and those of silver amounted to Rs. 20 crores.

**Exchange.**—In spite of the very large importations of bullion and considerable purchases of sterling by Government exchange rose fairly steadily from 1s. 4½d. at the beginning of the year to 1s. 5½d. at the end of September and during the last six months of the year it remained stable, with minor variations. In the neighbourhood of 1s. 6d. The highest point reached was 1s. 6¾d. on the 9th October 1924 and the year closed at 1s. 5¾d., which was 1¾d. higher than the lowest rate 1s. 4¾d. on the 1st of April 1924.

## II.—IMPORTS OF MERCHANDISE.

**Cotton Manufactures.**—After the disastrous slump of 1921-22 and the slow recovery in 1922-23 and 1923-24 stocks in India were light and there was a marked revival in the demand for cotton manufactures. The value of the Imports

of cotton manufactures increased to Rs. 82 crores as compared with Rs. 67 crores in 1923-24, Rs. 70 crores in 1922-23 and Rs. 66 crores in the pre-war year 1913-14. These values represented 33 per cent. in 1924-25 and about 30 per cent.

In each of the two preceding years of the total of Rs. 124 crores and twist and yarn of Rs. 17 crores. The chief descriptions of the imports during the past three years and the pre-war year were:—

Imports of Cotton manufactures.	1913-14 (pre-war year.)	1922-23.	1923-24.	1924-25.
	Rs. (lakhs.)	Rs. (lakhs.)	Rs. (lakhs.)	Rs. (lakhs.)
Twist and yarn .. .. .	4.16	9.26	7.94	9.66
Piece-goods—				
Grey (unbleached) .. .. .	25.45	30.44	23.06	28.49
White (bleached) .. .. .	14.29	15.01	15.44	20.23
Coloured, printed, or dyed .. .. .	17.80	12.80	17.89	20.02
Fents of all descriptions .. .. .	54	40	65	68
<b>TOTAL PIECE-GOODS .. .. .</b>	<b>58.14</b>	<b>58.51</b>	<b>56.84</b>	<b>69.42</b>
Hosiery .. .. .	1.20	80	94	1.12
Handkerchiefs and shawls .. .. .	89	16	23	31
Thread .. .. .	39	70	71	72
Other sorts .. .. .	1.52	70	82	1.06
<b>GRAND TOTAL .. .. .</b>	<b>66.30</b>	<b>70.13</b>	<b>67.48</b>	<b>82.32</b>

**Cotton Twist and Yarn.**—Imports of cotton twist and yarn, which had shown a considerable decrease in the preceding year, increased in 1924-25 by 11 million lbs. or 25 per cent. in quantity from 44½ million lbs. to nearly 56 million lbs. and by Rs. 1.72 lakhs or 22 per cent. in value from Rs. 7.94 to Rs. 9.66 lakhs. The increase was mainly due to larger imports from Japan which rose from Rs. 2.85 to Rs. 4.59 lakhs, while the value of the imports from the United Kingdom fell from Rs. 4.61 to Rs. 4.55 lakhs. The average declared value per lb. showed a small decrease from Rs. 1.12-6 in 1923-24 to Rs. 1.11-8 in 1924-25. The following table compares the imports of yarn with the production of yarn in Indian mills during the past two decades and the year:—

	Imports.	Indian mills production.
	lbs. (1,000)	lbs. (1,000)
<b>Annual average—</b>		
Five years ending 1908-09..	38,573	641,776
Five years ending 1913-14 (pre-war) ..	41,794	646,757
Five years ending 1918-19 (war period) ..	34,063	666,227
Five years ending 1923-24..	44,682	662,512
<b>Year 1913-14 (pre-war) ..</b>	<b>44,171</b>	<b>682,777</b>
" 1914-15 .. .. .	42,864	651,985
" 1915-16 .. .. .	40,427	722,425
" 1916-17 .. .. .	29,530	681,107
" 1917-18 .. .. .	19,400	660,576
" 1918-19 .. .. .	38,095	615,040
" 1919-20 .. .. .	15,097	635,760
" 1920-21 .. .. .	47,333	660,003
" 1921-22 .. .. .	57,125	693,572
" 1922-23 .. .. .	59,274	705,894
" 1923-24 .. .. .	44,575	617,329
" 1924-25 .. .. .	65,907	719,390

Japan considerably increased her supplies from 20 million lbs. or 46 per cent. of the total quantity imported in the preceding year to 32 million lbs. or 57 per cent. of the imports in 1924-25. She had only 2 per cent. of the trade in 1913-14. She has formerly competed mostly with Indian mills in the lower counts of yarn. But of recent years she has turned more and more to the higher counts, leaving the low count trade to Indian mills and competing more with Lancashire in the finer yarns, a trade in which the Indian mills are also tending to compete more. The imports from the United Kingdom fell from 21½ million lbs. or 48 per cent. of the import trade to 20½ million lbs. or 37 per cent. Switzerland increased her supplies from 982,000 lbs. to 1,067,000 lbs. China including Hongkong from 208,000 lbs. to 400,000 lbs. and the Netherlands from 383,000 lbs. to 561,000 lbs. The sum-total of imports and production was 775 million lbs. as compared with 662 million lbs. in 1923-24.

**Cotton Piece-goods.**—The following table compares the imports of the three important classes of piece-goods in millions of yards during each of the past twelve years:—

	Grey (un-bleached)	White (bleached).	Coloured, printed or dyed.
	Million yards.	Million yards.	Million yards.
<b>Year.</b>			
1913-14 ..	1,534.2	793.3	831.8
1914-15 ..	1,320.2	604.2	494.8
1915-16 ..	1,148.2	611.4	358.7
1916-17 ..	847.0	589.8	454.9
1917-18 ..	625.5	502.3	305.6
1918-19 ..	583.4	286.6	227.3
1919-20 ..	533.3	322.0	268.3
1920-21 ..	580.2	421.8	489.3
1921-22 ..	635.6	306.2	138.3
1922-23 ..	951.0	402.6	243.8
1923-24 ..	704.0	415.3	847.5
1924-25 ..	845.5	548.9	407.0

The imports of grey goods from the United Kingdom increased by 21 per cent. in quantity and 25 per cent. in value from 600 million yards valued at Rs. 19 crores to 727 million yards valued at Rs. 24 crores. Japan increased her shipments by 13 per cent. in quantity and 12 per cent. in value from 97 million yards valued at Rs. 3½ crores to 110 million yards valued at Rs. 4

crores. The United States of America supplied 2½ million yards, as compared with one half million yards in 1923-24. In white (bleached) goods 97 per cent. of the total imports came from the United Kingdom and her shipments rose from 403 million yards valued at Rs. 14½ crores to 533 million yards valued at over Rs. 19 crores.

Percentage shares in the total quantities of Piece-goods imported.

	1913-14.	1920-21.	1921-22.	1922-23.	1923-24.	1924-25.
United Kingdom .. .. .	97.1	85.6	87.6	91.2	88.8	88.6
Japan .. .. .	.3	11.3	8.3	6.8	8.2	8.5
United States .. .. .	.3	.9	2.1	.5	.5	.5
Netherlands .. .. .	.8	.0	1.1	.8	.7	.6
Other countries .. .. .	1.5	1.3	.9	.7	1.8	1.9
TOTAL .. .. .	100	100	100	100	100	100

Fents increased from 19 million yards valued at Rs. 65 lakhs to nearly 22 million yards valued at Rs. 68 lakhs, of which 15 million yards came from the United Kingdom and 6 million yards from the United States.

**Sewing Cotton.**—The total imports increased from 1,534,000 lbs. valued at Rs. 71½ lakhs to 1,660,000 lbs. valued at Rs. 73½ lakhs, to which the United Kingdom contributed Rs. 67½ lakhs.

**Hosiery.**—The value of the imports of hosiery rose from Rs. 94 to Rs. 1,12 lakhs. Japan increased her supplies from Rs. 75 to Rs. 85½ lakhs but her share in the total imports was reduced from 80 to 77 per cent. Hongkong and Germany also increased their supplies.

**Haberdashery and Millinery.**—The total imports increased from Rs. 99 to Rs. 1,15½ lakhs. Germany supplied Rs. 33 lakhs as compared with Rs. 27 lakhs in 1923-24. Japan and Switzerland also increased their supplies from Rs. 11 and Rs. 16½ lakhs, respectively, to Rs. 16 and Rs. 18 lakhs. The imports from the United Kingdom fell from Rs. 32½ to Rs. 20 lakhs.

**Wool—Raw and Manufactured.**—Raw wool rose by 70 per cent. in quantity from 4,839,000 lbs. to 8,218,000 lbs., and by nearly 95 per cent. in value, from Rs. 40½ to nearly Rs. 79 lakhs. Australia including New Zealand more than doubled her supplies from 1.7 to 3.8 million lbs. The United Kingdom and Persia also considerably increased their shipments. Woollen piece-goods again showed a noticeable increase, the total imports rising by 57 per cent. in quantity and by 47 per cent. in value from 7½ million yards, valued at Rs. 1,78 lakhs.

**Silk—Raw and Manufactured.**—Raw silk increased by nearly 4 per cent. in quantity from 1,865,000 lbs. to 1,414,000 lbs. but the value was Rs. 1,19 lakhs, about the same as in the preceding year.

There was a noticeable increase in the imports of artificial silk yarn from 406,000 lbs. valued at Rs. 19½ lakhs to 1,171,000 lbs. valued at Rs. 42 lakhs. The United Kingdom and Italy considerably increased their supplies from 247,000 lbs. and 77,000 lbs. to 703,000 lbs. and 398,000 lbs. respectively. The yardage of piece-goods

of cotton and artificial silk imported almost doubled from 8,555,000 yards to 17,030,000 yards and the value rose from Rs. 1,04 to Rs. 1,76 lakhs. The United Kingdom supplied 8 million yards or 48 per cent. of the total quantity imported, Italy 5 million yards or 29 per cent. and Switzerland 2 million yards or 12 per cent. as compared with 4½ million yards, 2½ million yards and nearly one million yards, respectively, in the preceding year. Germany, Belgium, Czechoslovakia and Austria also increased their supplies.

**Sugar.** which in the preceding two years had fallen back to fourth place in India's import trade, ranked second in order of importance in the year under review coming next to cotton manufactures. The total value of all kinds of sugar including molasses and confectionery increased by 35 per cent., from Rs. 15½ crores to Rs. 21 crores. The imports of sugar, refined and unrefined, excluding molasses and confectionery, increased by 63 per cent., in quantity from 411,500 tons to 671,000 tons while the value rose by 38 per cent., from Rs. 14,78 to Rs. 20,87 lakhs, the smaller increase in value being due to lower prices. The imports of Mauritius sugar were the largest on record since the pre-war year 1913-14 and Java sugar also showed a considerable increase. Java accounted for 72 per cent. of the total quantity imported as compared with 90 per cent. in the preceding year and Mauritius raised her share to 20 per cent. from less than one-half per cent. in 1923-24. The quantity imported from Java (including consignments from the Straits Settlements which are forwarding agents for Java sugar) increased by 30 per cent. from 371,200 tons in 1923-24 to 483,100 tons in the year under review.

**Metals.**—The imports of metals and manufactures thereof increased by 15 per cent. in quantity from 808,000 tons to 930,000 tons and by 8 per cent. in value from Rs. 24 to Rs. 26 crores. Iron and steel represented Rs. 19 crores of this total as compared with Rs. 18 crores in 1923-24 and occupied the third place in order of importance among imports, as in the two preceding years. If we include under this, heading machinery and mill work, railway plant and rolling stock, cutlery, hardware, implements

and instruments, and vehicles (excluding carriages and carts), the total value would aggregate Rs. 59 crores. It is interesting to compare this figure with the value of all yarns and textile fabrics imported which amounted to Rs. 93½ crores. In the preceding year the metals head accounted for Rs. 67 crores and the textiles head Rs. 78 crores.

In order to provide for the fostering and development of the steel industry in British India, the Steel Industry (Protection) Act, which came into force on 13th June 1924, imposed protective duties on certain classes of iron and steel. The rates of duty imposed were intended to equalise the prices of imported steel and of similar Indian products. But this protection was soon rendered ineffective by reduced prices of imported continental steel and after further investigation by the Indian Tariff Board additional aid was granted in the form of bounties. The duty on the principally used steel sections stands now at Rs. 30 per ton as compared with 10 per cent. *ad valorem* in 1923-24. And the duty on fabricated material was also altered from 10 to 25 per cent. *ad valorem*.

Manufactured iron and steel imported (excluding pig and old iron or steel) increased by 18 per cent. in quantity from 746,000 tons to 864,000 tons and by 6 per cent. in value from Rs. 17.86 to Rs. 18.88 lakhs. Galvanised sheets accounted for nearly one-third of the total value of the imports of all iron and steel and rose from 165,000 tons valued at Rs. 5.17 lakhs to 209,000 tons valued at Rs. 6.03 lakhs. Imports were, as usual almost entirely from the United Kingdom which supplied 205,000 tons valued at Rs. 5.91 lakhs, as compared with 159,000 tons valued at Rs. 4.99 lakhs in the preceding year. The United States reduced her share in this trade from Rs. 15 lakhs to Rs. 7½ lakhs. In tin plates there was a decrease from 44,000 tons valued at Rs. 1.79 lakhs to 36,000 tons valued at Rs. 1.44 lakhs, a decrease attributable to the increased production in this country of the Tinplate Company. The United Kingdom reduced her supplies from 37,000 tons to 26,000 tons while the imports from the United States increased from 6,600 tons to 10,500 tons. Sheets and plates, not galvanised or tinned, rose from 108,000 tons valued at Rs. 1.81 lakhs to 118,000 tons valued at Rs. 1.91 lakhs. Belgium and Germany increased their supplies from 23,000 tons valued at Rs. 39 lakhs and 16,000 tons valued at Rs. 26 lakhs, respectively, to 38,000 tons valued at Rs. 58 lakhs and 24,000 tons valued at Rs. 36 lakhs while British supplies fell from 68,000 tons valued at Rs. 1.12 lakhs to 53,000 tons valued at Rs. 91 lakhs. The imports of steel bars, other than cast steel, increased from 166,000 tons valued at Rs. 2.39 lakhs to 183,000 tons valued at Rs. 2.32 lakhs. Imports from Belgium rose from 110,000 tons valued at nearly Rs. 1.55 lakhs to 127,000 tons valued at Rs. 1.55½ lakhs, while German and British supplies were reduced from Rs. 37½ and Rs. 26½ lakhs, respectively, to Rs. 29½ and Rs. 24 lakhs. Imports from Luxemburg further increased to Rs. 14½ lakhs. Iron bars and channels again showed a fall from Rs. 23 to Rs. 16 lakhs, Belgian supplies falling from Rs. 13 to Rs. 7 lakhs.

Imports of pig iron fell to 3,425 tons valued at Rs. 4,64,000 as compared with 3,786 tons

valued at Rs. 4,22,000 in 1923-24 and 12,779 tons valued at Rs. 12,95,000 in 1922-23.

**Other Metals.**—Imports of metals, other than iron and steel, increased were valued at Rs. 7.37 lakhs as compared with Rs. 6.40 lakhs in 1923-24. Aluminium increased from 84,100 cwt. valued at Rs. 86 lakhs to 90,600 cwt. valued at Rs. 98 lakhs. Brass increased by 33 per cent. in quantity and 26 per cent. in value from 451,100 cwt. valued at Rs. 2.52 lakhs to 602,000 cwt. valued at Rs. 3.17 lakhs. The imports of copper increased in quantity from 12,800 tons to 13,600 tons, but decreased in value from Rs. 163 to Rs. 160 lakhs. Unwrought copper, which consists mainly of tiles, ingots, cakes, bricks and slabs, decreased from Rs. 31 to Rs. 22 lakhs. Lead fell from 59,600 cwt. valued at Rs. 16 lakhs to 48,300 cwt. valued at Rs. 15½ lakhs.

The quantity of tin imports increased from 47,300 cwt. valued at Rs. 64 lakhs to 53,200 cwt. valued at Rs. 87 lakhs.

Zinc or spelter fell from 5,000 tons valued at Rs. 30 lakhs to 5,300 tons valued at Rs. 26½ lakhs.

**Machinery and Mill-work.**—In the three preceding years machinery and mill-work ranked second in order of importance in India's import trade, being second only to cotton manufactures. In the year under review there was a considerable fall in the importations and this head fell back to fourth place, cotton manufactures, sugar, and iron and steel occupying respectively the first, second and third places. The total imports of machinery of all kinds, including belting for machinery and printing presses during the year 1924-25 decreased to Rs. 16 crores as compared with Rs. 20 crores in 1923-24 and Rs. 24 crores in 1922-23. Cotton mill machinery alone accounted for a decrease of Rs. 2.92 lakhs nearly three-quarters of the total fall in the trade. This was owing to the depression in the cotton mill industry in the Bombay Presidency. Jute mill machinery also showed a further fall owing mainly to lack of new extensions, while as a result of the prosperity of the industry, tea machinery recorded a further considerable increase.

**Railway Plant and Rolling-stock.**—The value of the imports of railway plant and rolling stock on private and Government accounts combined decreased to Rs. 7.37 lakhs (Rs. 6.08 lakhs private and Rs. 1.29 lakhs Government) in 1924-25 as compared with Rs. 14.00 lakhs (Rs. 11.72 lakhs private and Rs. 2.28 lakhs Government) in 1923-24. The average value of the imports during the pre-war quinquennium was Rs. 8.91 lakhs.

**Motor Vehicles.**—Since 1921-22 the imports of motor vehicles have steadily increased and the number of cars imported in the year amounted to 9,380 as compared with 7,981 in 1923-24, 4,321 in 1922-23 and 2,895 in 1921-22. Although the quantitative increase was 17 per cent. the increase in value was only 7 per cent., Rs. 2.20 lakhs in 1924-25 as compared with Rs. 2.05 lakhs in 1923-24. This was due to low prices all round. Of the total imports 42 per cent., came from Canada, 33 per cent. from the United States, and 18 per cent. from the United Kingdom, as compared with 41.36 and 13 per cent., respectively, in the preceding year. The United Kingdom has steadily improved her position during the past three years.

**Hardware.**—This is a comprehensive heading and includes among others the following heads :—

	1922-23 Rs. (lakhs.)	1923-24 Rs. (lakhs.)	1924-25 Rs. (lakhs.)
Agricultural Implements .. .. .	23	21	19
Other Implements and tools (except machine tools)	79	68	65
Builders' hardware .. .. .	35	24	81
Domestic hardware .. .. .	9	9	10
Enamelled ironware .. .. .	24	31	30
Metal lamps .. .. .	57	60	84
Metal lamps, parts .. .. .	12	9	8
Stoves .. .. .	6	7	9
Safes, etc. .. .. .	3	4	4
Gas mantles .. .. .	6	5	6
Other sorts .. .. .	2,61	2,04	2,38

**Mineral Oils.**—The imports of mineral oils into India from foreign countries again increased, the total quantity imported rising by 18 million gallons from 169 to 187 million gallons. Imports of lubricating and batching oils increased from 16 million gallons valued at Rs. 1,74 lakhs in 1923-24 to 21 million gallons valued at Rs. 2,17 lakhs.

**Chemicals.**—The total value of all chemicals imported improved from Rs. 2,05 to Rs. 2,09 lakhs. Soda compounds accounted for Rs. 1,00 lakhs or 48 per cent. of the total as compared with Rs. 95½ lakhs in the preceding year. The bulk of the soda compounds come from the United Kingdom.

**Drugs and Medicines.**—The total imports of drugs and medicines were valued at Rs. 1,81 lakhs, about the same as in the preceding year.

**Provisions.**—This comprehensive head covers a variety of items of which the principal are, in order of importance, canned and bottled provisions, farinaceous and patent foods, condensed milk, biscuits and cakes, bacon and hams, cheese, jams and jellies, pickles and sauces, cocoa and chocolate, isinglass, butter, ghee, lard and vinegar. The total value of imported provisions increased by 40 per cent. from Rs. 2,80 to Rs. 3,92 lakhs.

**Paper and Pasteboard.**—The revival of trade in paper and pasteboard recorded in the two preceding years continued and imports increased by 22 per cent. in quantity from 69,500 tons to 84,900 tons and by 12 per cent. in value

from Rs. 2,71 to Rs. 3,03 lakhs. There were noticeable increases in the imports of printing paper, packing paper and old newspapers in bales and bags. The quantity of writing paper imported was almost the same as in the preceding year. Imports of strawboards decreased. The feature of the year was the increase in importations from Germany.

**Liquors.**—The total imports of liquors increased in quantity by 12 per cent. from 4,738,000 gallons to 5,321,000 gallons and in value by 4 per cent. from Rs. 3,14½ to Rs. 3,28 lakhs. Ale, beer and porter, brandy, gin, spirit in drugs, perfumed spirits and wines increased both in quantity and value, while whisky and rum increased in quantity but decreased in value. Liqueurs and denatured spirit fell both in quantity and value.

**Salt.**—The reduction in the duty on salt to its previous level of Rs. 1-4 per maund from the 1st of March 1924 resulted in a large increase in the importations of foreign salt. And the quantity actually passing into consumption in Bengal was higher than in any previous year on record. Total imports increased by 30 per cent. both in quantity and value from 475,000 tons valued at Rs. 1,10 lakhs to 616,000 tons valued at Rs. 1,43 lakhs. Bengal is always the largest importer of foreign salt and in the year she took 527,000 tons or 86 per cent. of the total quantity imported and Burma 88,000 tons or 14 per cent. as compared with 419,000 tons and 55,300 tons respectively in the preceding year.

**Other Articles.**—Of other imports, the following are those to which special attention is drawn :—

	1913-14 (pre-war year.)	1920-21.	1921-22.	1922-23.	1923-24.	1924-25.
	Rs. (lakhs.)	Rs. (lakhs.)	Rs. (lakhs.)	Rs. (lakhs.)	Rs. (lakhs.)	Rs. (lakhs.)
Instruments, apparatus, etc. .. .. .	1,82	5,81	5,15	3,15	3,26	3,02
Dyeing and tanning substances .. .. .	1,41	3,74	3,21	2,79	2,94	2,91
Spices .. .. .	1,73	1,91	1,93	2,45	2,59	2,58
Glass and glassware .. .. .	1,95	3,38	2,22	2,60	2,46	2,60
Tobacco .. .. .	75	2,96	1,65	2,26	2,26	1,98
Precious stones and pearls, unset .. .. .	..	..	..	2,26	1,80	1,20
Coal and coke .. .. .	11	30	5,85	3,22	1,76	1,32
Matches .. .. .	90	1,67	2,04	1,62	1,46	89
Cement .. .. .	66	1,39	1,39	1,03	77	69

## III. - EXPORTS OF MERCHANDISE.

**Cotton.**—The Indian cotton crop in 1924-25 was estimated at 6,072,000 bales (400 lbs.) as compared with 5,161,000 bales in 1923-24 and 5,078,000 bales in 1922-23. The estimated area of the crop increased by 12 per cent. to 26,465,000 acres.

The quantity exported showed a decrease of 12 per cent. from 3,764,000 bales to 3,326,000 bales and the value fell by 7 per cent. from Rs. 98 to Rs. 91 crores. The value represented 24 per cent. of the grand total value of all Indian merchandise exported during the year, as compared with 28 per cent. in 1923-24 and 24 per cent. in 1922-23. Japan increased her purchases from 1,722,000 bales, 46 per cent. of the total quantity exported, valued at Rs. 42,62 lakhs to 1,671,000 bales, 50 per cent. of the total quantity exported, valued at Rs. 45,88 lakhs.

**Cotton Yarn.**—Despite an increase in imports and a decrease in exports the production of yarn in Indian mills increased to 719 million lbs. as compared with 617 million lbs. in 1923-24, 706 million lbs. in 1922-23 and 683 million lbs. in 1913-14.

Exports established a new low record decreasing in the year to 36½ million lbs. as compared with 38½ million lbs. in 1923-24, and a pre-war average of 193 million lbs. The value of the exports, however, showed a small increase of Rs. 4 lakhs to Rs. 3,70 lakhs, as compared with Rs. 3,66 lakhs in 1923-24.

**Cotton Piece-goods.**—The production of cotton piece-goods, in Indian mills increased by 16 per cent. Exports of Indian-made piece-goods also improved by 10 per cent., but only a small portion of the total quantity produced is exported, 9·2 per cent. of the total produc-

tion in 1924-25 and 9·7 per cent. in the preceding year.

The exports of cotton piece-goods increased in quantity by 17 million yards to 182 million yards and in value by Rs. 23 lakhs to Rs. 6,86 lakhs. Grey and bleached piece-goods increased by 10 million yards to 45 million yards, as compared with 35 million yards in the preceding year and 44 million yards in the pre-war year. Coloured goods rose by 6 million yards to 136 million yards. The exports of coloured piece-goods have trebled since 1913-14. Mesopotamia and Persia, the two largest purchasers of Indian piece-goods, increased their demands and took 49 and 83 million yards, respectively, as compared with 41 and 27½ million yards in the preceding year. Shipments to the Straits Settlements decreased from 23 to 21 million yards, while Ceylon took 16 million yards, almost the same quantity as in 1923-24. The exports to East African ports increased from 21 million yards to 29 million yards. Aden and Arabia took less than in the preceding year, while exports to the Bahrein Islands increased. Bombay, as usual, had the bulk of the trade and accounted for nearly 79 per cent. of the total exports while Madras had about 21 per cent. of the trade as compared with 76 and 23 per cent. respectively in 1923-24.

**Jute and Jute Manufactures.**—The total weight of raw and manufactured jute shipped increased by 7 per cent. in quantity, from 1,407,000 tons to 1,508,000 tons while owing to higher prices, the value of the exports showed an increase of 30 per cent. from Rs. 62 to Rs. 81 crores. Raw jute accounted for 36 per cent. of the total value and jute manufactures for 64 per cent. as compared with 32 and 68 per cent., respectively, in 1923-24. The following statement shows the quantities exported during 1913-14 and the past three years:—

	1913-14.	1922-23.	1923-24.	1924-25.
Jute (in thousand tons) .. .. .	768	578	600	600
Bags (in millions) .. .. .	369	344	414	425
Cloth (in million yards) .. .. .	1,061	1,254	1,349	1,456

**Foodgrains and Flour.**—The exports of grain, pulse and flour in 1924-25 showed an increase of 24 per cent. in quantity and 28 per cent. in value as compared with the preceding year, but the quantity was still 3 per cent. below the average annual shipments, in the pre-war quinquennium. The total exports amounted to 4,280,000 tons valued at Rs. 65 crores, as compared with 3,429,000 tons, valued at Rs. 51

crores in 1923-24 and a pre-war average of 4,411,000 tons, valued at Rs. 40 crores. The important increases, as compared with 1923-24, were in wheat (+474,000 tons or 74 per cent.), cleaned rice (+96,000 tons or 4 per cent.) and barley (+280,000 tons or 166 per cent.).

**Wheat Flour.**—Exports of wheat flour increased to 78,000 tons valued at Rs. 1,69 lakhs from 57,000 tons valued at Rs. 1,14 lakhs, in

**1923-24.** Egypt took 28,000 tons as compared with 12,000 tons in the preceding year, while Arabia reduced her purchases from 11,000 tons to 10,000 tons. Aden took 7,200 tons, almost the same quantity as in 1923-24, while Ceylon reduced her purchases from 7,000 tons to 5,700 tons.

**Other Foodgrains.**—The quantity of other foodgrains exported increased from 527,000 tons to 770,000 tons, mainly owing to larger shipments of barley.

**Tea.**—Tea producers experienced an exceptionally prosperous year and prices were maintained at a high level during the greater part of the year. Good quality and fine teas sold readily at full prices throughout the season.

The total exports of tea, during 1924-25 amounted to 340 million lbs. valued at Rs. 3½ crores, as compared with 338½ million lbs., valued at Rs. 3¼ crores in the preceding year. Of this total 879,000 lbs. were green tea as compared with 255,000 lbs. in 1923-24, the rest being black tea. The total quantity of tea shipped rose by less than one-half per cent., while the value showed an increase of over 5 per cent. The United Kingdom took 298 million lbs. of black tea valued at Rs. 29½ crores as compared with 296 million lbs. valued at Rs. 28 crores in 1923-24. She also took 875,000 lbs. of green tea as compared with only 10,000 lbs. in the preceding year. She had nearly 88 per cent. of the total quantity shipped as compared with 87 per cent. in 1923-24. The re-exports of Indian tea from the United Kingdom during 1924-25 were 38 million lbs. as in the preceding year, of which 19 million lbs. were shipped to the Irish Free State, 10 million lbs. to the Continent of Europe, 3½ million lbs. to the United States of America and 2½ million lbs. to Canada. Direct shipments from India to the United States increased slightly from 5,869,000 lbs. to 6,209,000 lbs. while those to Canada fell from nearly 12 million lbs. to 9 million lbs. Australia took 4 million lbs.—almost the same quantity as in the preceding year. The exports to Ceylon showed a small increase and amounted to nearly 4 million lbs. Mesopotamia again reduced her demands from 3½ million lbs. to 2½ million lbs. and Arabia also took less than in 1923-24. Exports to Persia, Egypt and the Union of South Africa increased, while Chile took less. Russia reappeared in the market and took 1½ million lbs. There were no direct exports to Russia during the preceding four years. As in the two preceding years, 88 per cent. of the total quantity was exported from Bengal and 11 per cent. from Madras.

**Oilseeds.**—The exports of oilseeds increased in value by Rs. 3.35 to Rs. 33.17 lakhs. They ranked fifth in order of importance but were very little behind tea (Rs. 33.39 lakhs). The first three in order of importance are always cotton, raw and manufactured, jute raw and manufactured, and foodgrains, and thereafter follow tea and oilseeds. The most noticeable feature of the year's trade was the large increase in the shipments of groundnuts. Linseed, castor and cottonseed also showed improvement, while rapeseed decreased. Exports of copra were insignificant.

**Hides and Skins.**—The exports of raw hide and skins amounted to 47,700 tons valued at Rs. 6.77 lakhs as compared with 48,900 tons valued at Rs. 6.93 lakhs in 1923-24 and 45,700 tons valued at Rs. 5.71 lakhs in 1922-23.

Raw hides represented 61 per cent. of the total quantity of raw hides and skins exported and increased from 27,900 tons valued at Rs. 2.85 lakhs to 29,200 tons valued at Rs. 3.31 lakhs. Of the total exports of all kinds of raw hides Germany accounted for Rs. 1.71 lakhs and Italy Rs. 73 lakhs. The shipments consisted of 24,300 tons of raw cow hides, 4,300 tons buffalo hides, and 600 tons of calf skins (which are included under raw hides).

**Lac.**—The total quantity of lac exported decreased by 12 per cent. in quantity from 486,000 cwts. to 427,000 cwts. and by 17 per cent. in value from Rs. 9.00 to Rs. 7.55 lakhs. Of the total quantity exported, 76 per cent. consisted of shellac, 5 per cent. butter lac, 8 per cent. seed lac, 2 per cent. stick lac and 9 per cent. other kinds.

**Raw Wool.**—As the result of higher prices and strong demand the exports of raw wool, which were on a reduced scale in the preceding year, showed a large increase in the year and the quantity shipped was almost the same as in 1922-23. The exports amounted to 52½ million lbs. valued at Rs. 5.07 lakhs, as compared with over 36½ million lbs. valued at Rs. 3.17 lakhs in 1923-24 and 52½ million lbs. valued at Rs. 4.41 lakhs in 1922-23. The United Kingdom took 90 per cent. of the total quantity shipped and the United States of America nearly 8 per cent. as compared with 94 and 5 per cent. respectively in 1923-24.

Exports of carpets and rugs increased from 4,200,000 lbs. valued at Rs. 81 lakhs to 5,700,000 lbs. valued at Rs. 1.12 lakhs in 1924-25. Shipments to the United Kingdom increased from 2,600,000 lbs. valued at Rs. 51 lakhs to nearly 4 million lbs. valued at Rs. 77½ lakhs. The United States of America also increased her demands from 485,000 lbs. to 750,000 lbs. while exports to Australia and New Zealand fell from 198,000 lbs. to 78,000 lbs.

**Oils.**—The total value of the exports of oils or all sorts increased from Rs. 2.90 lakhs in 1923-24 to Rs. 3.44 lakhs in 1924-25 of which Rs. 2.48 lakhs or 72 per cent. represented the value of benzine and petrol exported from Burma to foreign countries. The quantity of benzine and petrol shipped increased from 16½ million gallons valued at Rs. 1,87½ lakhs in 1923-24 to over 22 million gallons valued at Rs. 2.48 lakhs in 1924-25. The United Kingdom took 18 million gallons and Egypt 3 million gallons as compared with 15 and 1 million gallons respectively in the preceding year.

The exports of vegetable oils (excluding sandalwood oil) decreased from 1,467,000 gallons valued at Rs. 39 lakhs to 1,332,000 gallons valued at Rs. 37½ lakhs in the year under review.

The quantity of sandalwood oil exported rose from 153,000 lbs. valued at Rs. 28 lakhs to 189,000 lbs. valued at Rs. 33½ lakhs.

The large exports of fish oil from the Madras Presidency in 1923-24 were not repeated and consequently the shipments of animal oils decreased from 1,642,000 gallons, valued at

Rs. 12 lakhs to 366,000 gallons valued at Rs. 8½ lakhs.

The following is a summary of the more important of the remaining articles of export:—

	1923-24.	1924-25.
	Rs. (lakhs.)	Rs. (lakhs.)
<b>Metals and ores—</b>		
Pig iron .. .. .	1,28	2,17
Pig lead .. .. .	1,80	2,30
Manganese ore .. .. .	1,78	1,62
Others .. .. .	92	1,10
Oilcakes .. .. .	1,04	2,20
Manures .. .. .	1,50	1,27
Saltpetre .. .. .	27	27
Coffee .. .. .	1,57	2,00
Hemp raw .. .. .	76	1,73
Fodder, bran and pollards .. .. .	1,28	1,50
Opium .. .. .	2,66	1,47
Rubber .. .. .	1,15	1,43
Paraffin wax .. .. .	1,14	1,37
Dyes .. .. .	1,32	1,36
Tobacco .. .. .	1,03	1,25
Cair manufactures .. .. .	1,02	1,22
Teakwood .. .. .	1,07	1,16
Spices .. .. .	1,11	1,07
Mica .. .. .	86	1,03
Provisions .. .. .	60	59
Coal and coke .. .. .	22	37

**Re-exports.**—The total value of the re-exports of foreign merchandise amounted to Rs. 13½ crores in 1924-25 as compared with Rs. 13 crores in 1923-24 and Rs. 15 crores in 1922-23.

**Government Stores.**—The value of the imports of Government stores further decreased by nearly 30 per cent. from Rs. 9,57 to Rs. 6,74 lakhs.

## IV.--THE DIRECTION OF OVERSEAS TRADE.

The following tables illustrate the direction of India's trade in 1921-25 in two different aspects :—

## Imports.

	1913-14.	1922-23.	1923-24.	1924-25.
	Per cent.	Per cent.	Per cent.	Per cent.
United Kingdom .. .. .	64.1	60.2	57.8	54.1
Germany .. .. .	6.9	5.1	5.2	6.3

Java .. .. .	.8	1.0	1.0	.7

India's exports normally exceed her imports in the case of all countries with which she deals in large quantities excepting the United Kingdom where the reverse has always been the case. There is, however, a tendency on the part of the United Kingdom to purchase more and more from India, her best customer thus reducing the excess of imports over exports from Rs. 70 crores in 1922-23 to Rs. 41 crores in 1923-24 and Rs. 31 crores in 1924-25.

The percentage share of the United Kingdom in the import trade fell from 57·8 in 1923-24 to 54·1 in 1924-25, while her share in the export trade showed a slight increase from 25 to 25·5 per cent. The share of His Majesty's Dominions and British Possessions in imports showed an increase from 6·7 per cent. to 8·1 per cent., chiefly as the result of renewed importations of Mauritius sugar and larger arrivals of raw cotton from Kenya Colony. In exports their share fell slightly from 13·9 per cent. to 13·2 per cent. The whole British Empire had 47·7 per cent. of the total trade (62·2 per cent. in imports and 38·7 per cent. in exports) as compared with 48·8 per cent. (imports 64·5 per cent. and exports 38·9 per cent.) in the preceding year. The share of the United States of

America in imports was 5·7 per cent., as in the two preceding years, while her share in exports has steadily declined from 11·1 per cent. in 1922-23 to 9·4 per cent. in 1923-24 and 8·8 per cent. in the year under review. The share of Japan in the export trade showed no appreciable change and remained at 14 per cent. On the import side her share increased owing to larger supplies of cotton twist and yarn and piece-goods. Germany's share in imports was 6·3 per cent. as compared with 5·2 per cent. in 1923-24 and 6·9 per cent. in the pre-war year and in exports 7·1 per cent. as compared with 6·9 per cent. in the preceding year and 10·7 per cent. in 1913-14. Belgium had 2·7 per cent. of the import trade and 3·9 per cent. of exports as compared with 2·4 and 3·8 per cent., respectively, in 1923-24. There were larger importations of sugar from Java but at lower prices and consequently Java's share of the import trade was unchanged. The imports of sugar from Mauritius increased in the year under review and that colony had 1·5 per cent. of the import trade as in the pre-war year. Larger imports of Kenya cotton accounted for an increase in the share of East Africa in imports from 1·4 per cent. in 1923-24 to 2 per cent. in 1924-25.

## V.—FRONTIER AND INDO-BURMA TRADE.

The value of the total trade across the land frontiers of India, including Burma, amounted to Rs. 42 crores in 1924-25, an increase of 15 per cent. over 1923-24 and of 123 per cent. over the pre-war average.

*Afghanistan.*—Of the trade which crosses the North-Western Frontier that with Afghanistan is the most important. This trade rose by 67 per cent. to Rs. 4·46 lakhs as compared with Rs. 2·67 lakhs in the preceding year, but the figures of 1923-24 were vitiated by the lack of returns from July 1923 to February 1924, from the North-Western Frontier Province, which has always a considerable share in the trade with Afghanistan.

*Persia.*—The total trade with Persia amounted to Rs. 3·22 lakhs as against Rs. 2·08 lakhs in the previous year, figures which are themselves a commentary upon the improvement of internal conditions in that country.

*Nepal.*—Of the trade in merchandise which crosses the North and North-Eastern Frontier,

that with Nepal is always the largest. In 1924-25 it amounted to Rs. 8·61 lakhs or 22 per cent. of the whole frontier trade, as compared with Rs. 8·88 lakhs or 26 per cent. in the preceding year.

*Tibet.*—The trade with Tibet amounted to Rs. 93 lakhs, which was 15 per cent. less than in the preceding year. The imports of wool declined by Rs. 10 lakhs from Rs. 48 lakhs to Rs. 38 lakhs in 1924-25. The imports of borax, skins and salt from Tibet also decreased. The export trade showed a slight improvement in cotton piece-goods of Indian manufacture (Rs. 1 lakh.)

*Shan States.*—The Eastern Frontier trade is recorded as being chiefly with the Shan States, and the total value of this trade in 1924-25 amounted to Rs. 15·47 lakhs, which was 84 per cent. of the total trade on that Frontier, and showed an increase of 14 per cent. over the figures of the previous year.

## VI.—BALANCE OF TRADE AND MOVEMENTS OF TREASURE.

There was a record surplus of exports over imports of private merchandise amounting to Rs. 155 crores as compared with Rs. 145 crores in 1923-24, Rs. 90 crores in 1922-23, and a debit balance of Rs. 21 crores in 1921-22. The average credit balance was Rs. 78 crores in the five pre-war years and Rs. 76 crores in the five war years.

The most important feature of the year was the record import of gold on private account which amounted to Rs. 74½ crores as compared with Rs. 28½ crores in 1923-24 and Rs. 41½ crores in 1922-23. The average annual imports on private account in the pre-war period were Rs. 33

crores and in the war period Rs. 10½ crores. The imports in 1924-25 include nearly Rs. 5 crores of gold imported by letter post from the United States and Switzerland. Importations of silver on private account also surpassed the previous year's record figure of Rs. 21½ crores by Rs. 2½ crores and amounted to Rs. 24½ crores in 1924-25, and the total imports of gold and silver reached the high figure of over Rs. 98½ crores as compared with Rs. 51 crores in 1923-24 and Rs. 62 crores in 1921-22. These large bullion importations are ascribable to the fact that the rupee price of gold was lower than for many years past and, in fact, lower than before the war.

# Bombay Stamp Duties.

	Rs. a.		Rs. a.
<i>Acknowledgment of Debt</i> ex. Rs. 20 ..	0 1	<i>Bill of Lading</i> .. .. .	0 8
<i>Affidavit or Declaration</i> .. .. .	2 0	<i>Bond</i> (not otherwise provided for)—

		<i>Instrument—Apprenticeship</i> .. .. .	10 0
		Divorce .. .. .	2 0
		Other than Will, recording an adoption or conferring or purporting to confer Authority to adopt .. .. .	20 0

	Rs. a.		Rs. a.
<b>Lease</b> —Where rent is fixed and no premium is paid for less than 1 year, same duty as Bond for whole amount; not more than 3 years, same as Bond for average annual rent reserved; over 3 years, same as Conveyance for consideration, equal to amount or value of the average annual rent reserved; for indefinite term, same as Conveyance for a consideration equal to the amount or value of the average annual rent which would be paid or delivered for the first ten years if the lease continued so long; in perpetuity, same as Conveyance for consideration equal to one-fifth of rents paid in respect of first 50 years. Where there is premium and no rent, same as Conveyance for amount of premium; premium with rent, same as Conveyance or amount of premium in addition to the duty which would have been payable on the lease if no fine or premium or advance had been paid or delivered.		In respect of each receipt for any payment of a premium on any renewal of an original policy—One half of the duty payable in respect of the original policy in addition to the amount, if any, chargeable under Art. 53 ( <i>Receipts</i> ).	
<b>Letter</b> —Allotment of Shares .. ..	0 2	(4) <i>Accident and Sickness</i> —Against Railway accident, valid for a single journey only .. ..	0 1
Credit .. ..	0 2	In any other case—for the maximum amount which may become payable in the case of any single accident or sickness where such amount does not exceed Rs. 1,000, and also where amount exc. Rs. 1,000, for every Rs. 1,000 or part .. ..	0 2
License .. ..	10 0	(5) <i>Life, or other Insurance, not specially provided for</i> —	
<b>Memo. of Association of Company</b> —If accompanied by Articles of Association	30 0	For every sum insured not exceeding Rs. 1,000 and also for every Rs. 1,000 or part .. ..	0 6
If not so accompanied .. ..	80 0	If drawn in duplicate, for each part .. ..	0 3
<b>Notarial Act</b> .. ..	2 0	Insurance by way of indemnity against liability to pay damages on account of accidents to workmen employed by or under the insurer or against liability to pay compensation under the Workmen's Compensation Act of 1923. For every Rs. 100 or part payable as premium ..	0 1
<b>Note or Memo. intimating the purchase or sale</b> —		In case of a re-insurance by one Company with another— $\frac{1}{2}$ of duty payable in respect of the original insurance, but not less than 1 anna, or more than 1 Re.	4
(a) Of any Goods exceeding in value Rs. 20 .. ..	0 4	Policies of all classes of Insurance not included in Article 47 of Schedule 1 of Stamp Act of 1899 covering goods, merchandise, personal effects, crops and other property against loss or damage, are liable to the same duty as Policies of Fire Insurance.	
(b) Of any Stock or marketable Security exceeding in value Rs. 20—Subject to a maximum of Rs. 20, a. 2 for every Rs. 10,000, or part.		<b>Power of Attorney</b> —	
<b>Notes of Protest by a Ship's Master</b> ..	1 0	For the sole purpose of procuring the registration of one or more documents in relation to a single transaction or for admitting execution of one or more such documents .. ..	1 0
<b>Partnership</b> —Where the capital does not exceed Rs. 500 .. ..	5 0	When required in suits or proceedings under the Presidency Small Causes Courts Act, 1882 .. ..	1 1
In any other case .. ..	20 0	Authorising 1 person or more to act in a single transaction other than that mentioned above .. ..	2 0
Dissolution of .. ..	10 0	Authorising not more than 5 persons to act jointly and severally in more than 1 transaction, or generally ..	10 0
<b>Policy of Insurance</b> —		Authorising more than 5 but not more than 10 persons to act .. ..	20 0
(1) <i>Sea</i> —Where premium does not exceed rate of 2a., or $\frac{1}{2}$ per cent. of amount insured .. ..	0 1	When given for consideration and authorising the Attorney to sell any immovable property—The same duty as a Conveyance for the amount of the consideration.	
In any other case for Rs. 1,000 or part thereof .. ..	0 2	In any other case, for each person authorised .. ..	2
(2) <i>For time</i> —For every Rs. 1,000 or part insured, not exc. 6 months ..	0 2		
Exceeding 6 and not exceeding 12 months .. ..	0 4		
If drawn in duplicate, for each part:—Half the above rates, for Sea and Time.			
(3) <i>Fire</i> —When the sum insured does not exceed Rs. 5,000 .. ..	0 8		
In any other case .. ..	1 0		

	Rs. s.	Rs. s.
<b>Promissory Notes—</b>		
(a) When payable on demand—		
(i) When the amount or value does not exceed Rs. 250 .. ..	0 1	
(ii) When the amount or value exceeds Rs. 250 but does not exceed Rs. 1,000 .. ..	0 2	
(iii) In any other case .. ..	0 4	
(b) When payable otherwise than on demand—The same duty as a Bill of exchange for the same amount payable otherwise than on demand.		
<i>Protest of Bill or Note</i> .. ..	2 0	
<i>Protest by the Master of a Ship</i> .. ..	2 0	
<i>Provy</i> .. ..	0 2	
<i>Receipt for value exc. Rs. 20</i> .. ..	0 1	
<b>Reconveyance of mortgaged property—</b>		
(a) If the consideration for which the property was mortgaged does not exceed Rs. 1,000—the same duty as a bond for the amount of such consideration as set forth in the Reconveyance.		
(b) In any other case .. ..	10 0	
<b>Release</b> —that is to say, any instrument whereby a person renounces a claim upon another person or against any specified property—		
(a) If the amount or value of the claim does not exceed Rs. 1,000—the same duty as a Bond for such amount or value as set forth in the Release.		
(b) In any other case .. ..	10 0	
<b>Respondentia Bond</b> —The same duty as a Bond for the amount of the loan secured.		
<b>Security Bond</b> —(a) When the amount secured does not exceed Rs. 1,000—the same duty as a Bond for the amount secured.		
(b) In any other case .. ..	10 0	
<b>Settlement</b> —The same duty as a Bond for the sum equal to the amount or value of the property—settled as set forth in such settlement.		
<b>Revocation of Settlement.</b> —The same duty as a Bond for a sum equal to the amount or value of the property concerned as set forth in the instrument of revocation but not exceeding ten rupees.		
<b>Share-warrant</b> to bearer issued under the Indian Companies Act.—One and a half times the duty payable on a conveyance for a consideration equal to the nominal amount of the shares specified in the warrant.		
<i>Shipping Order</i> .. ..	0 2	
<b>Surrender of Lease</b> —When duty with which lease is chargeable does not exceed Rs. 5.—The duty with which such Lease is chargeable.		
In any other case .. ..	5 0	
<b>Transfer of Shares</b> —One-half, of the duty payable on a Conveyance for a consideration equal to the value of the share.		
<b>Transfer of any Interest</b> secured by a Bond, Mortgage-deed, or Policy of Insurance.—If duty on such does not exceed Rs. 5.—The duty with which such Bond, &c., is chargeable.		
In any other case .. ..	10 0	
—Of any property under the Administrator General's Act 1874, Section 31..	10 0	
—of any trust property without consideration from one trustee to another trustee or from a trustee to a beneficiary—five rupees or such smaller amount as may be chargeable for transfer of shares.		
<b>Transfer of Lease</b> by way of assignment and not by way of under-lease—The same duty as a conveyance for a consideration equal to the amount of the consideration for the transfer.		
<b>Trust, Declaration of</b> —Same duty as a Bond for a sum equal to the amount or value of the property concerned, but not exceeding .. ..	15 0	
<b>Revocation of</b> —Ditto, but not exceeding .. ..	10 0	
<b>Warrant for Goods</b> .. ..	0 8	

## WIRELESS TELEGRAPHY AND TELEPHONY.

For reasons of economy, most of the inland wireless stations in India have been practically closed down and placed in charge of "Care and Maintenance" parties which carry out tests twice a month, the exceptions being Peshawar Radio, which maintains official communication with Kabul in Afghanistan and Kashgar in China, and Jotogh Radio which receives British Official Wireless sent out from Oxford and Rugby and passes the messages to Reuter's

Agency for distribution to subscribing newspapers.

The coast stations, however, have been maintained in a state of high efficiency and many improvements effected. The application of the Baudot system to the high-speed continuous-wave wireless stations at Madras Fort and Mingaladon (Rangoon) has proved extremely satisfactory, and a large portion of the traffic between Southern India and Burma is regularly

worked by this direct route instead of the circuitous route *via* Calcutta. The traffic is interrupted occasionally by atmospheric interference, particularly during the hot weather, but the difficulties have been largely overcome by handspeed working during the worst periods.

Radio telegrams exchanged with ships at sea by coast stations in India and Burma continue to increase in number, and totalled 19,551 in the year 1924-25 compared with 18,845 in 1923-24 and 16,278 in 1922-23. A number of official telegrams were also exchanged with the British Naval station at Matara (Ceylon) *via* Bombay Radio. Regular services are also maintained between Burma and the Malay Peninsula *via* Rangoon and Penang, and between Burma and Sumatra, whilst radio traffic is passed between Madras and Colombo when the normal route is interrupted.

**Safety at Sea.**—A noticeable feature of wireless development during the past two years has been the provision of direction-finding apparatus at Bombay and Karachi and facilities at other coast stations whereby ships at sea equipped with direction-finding apparatus can obtain bearings on coast stations and thus determine their position with a remarkable degree of accuracy. Improved arrangements for broadcasting time signals, weather reports and navigational warnings from coast stations have also proved of value to ships at sea.

**Beam Stations.**—After many delays the Indian Radio Telegraph Company was granted, a few months ago, a license to establish, maintain and work short-wave "Beam" stations in India, and the machinery and aerials for transmitting and receiving stations are in course of erection near Poona and at Dhond. A noteworthy feature of these installations is the huge size of the aerial supports, which are 287 feet in height with cross-arms at the top each 90 feet across. Similar stations are being erected in England, and it is anticipated that the service will be commenced during the present year.

**Broadcasting.**—At the time of going to press, Government had sanctioned the formation of a Broadcasting Company in India but the license had not been issued. Exact details are not available, but it is understood that transmitting stations each having an input of 12 kilowatts will be erected in Calcutta and in Bombay. If this proposal eventuates, the stations will be considerably more powerful than any of the British Broadcasting Company's stations excepting the one at Daventry, and it is anticipated that they will "cover" practically the whole of India.

In the meantime, broadcasting on a limited scale is being carried on by Radio Clubs in Bombay, Calcutta, Rangoon and Madras, the Government of India contributing a proportion of the license fees in partial payment of the expenses

involved. Considering the small size of the transmitting stations, these Radio Club programmes have been tuned-in over exceptionally long distances. Bombay, for example, is regularly heard in Lahore and Rawalpindi in the north and in the Moplah country in the south, although the input of the station is no more than one-tenth of a kilowatt.

**Licenses.**—During the year 1924-25, the Posts and Telegraphs Department commenced the issue of Broadcast Receiver Licenses from certain Head Post Offices, and 1,020 such licenses were issued during the nine months ending March 1925. They cover the use of receiving sets throughout British India, except Baluchistan and the North-West Frontier Province.

Licenses for fixed stations for transmitting and experimental purposes are much sought after, and despite a careful scrutiny of the applicants, no fewer than 301 were in existence at the close of the year 1924-25. It is also apparent that traders in wireless apparatus are increasing in number for 35 existing licenses were renewed and 55 new ones issued during the year.

**Prospects.**—The Government of India has always encouraged the development of wireless in India by private enterprise and it is to this source that India must look in the immediate future for internal radio communication. There are two most promising lines of development, *viz.* :—

(a) Erection of small sets either for speech or Morse in districts where no land lines exist, and to link such districts with the existing landlines. In this connection it may be remarked that modern small radio sets are capable of using either Morse or speech at will and if used for speech can be operated by the ordinary desk telephone instrument in daily use all over India.

(b) The use of radio as a substitute for landline to form the trunk telephone route between two cities which already have telephone facilities.

These will open up a new industry which if properly fostered would very soon extend its sales outside the limits of India. There is no doubt that the majority of parts for small radio sets could be more cheaply manufactured in this country than they can be imported and further such an industry would find the right kind of skilled labour already in India.

In the meanwhile a great deal of work has been done both as regards legislative and general organisation to clear the ground, with the result that Government is in the position to exercise the completest control over radio development while at the same time being able, because of its powers, to foster private enterprise to the fullest possible extent.

## The Indian National Congress.

For a complete history of the movement represented by the Indian National Congress the reader is referred to earlier editions of the Indian Year Book. The Congress was founded in 1885 by Mr. Allan Octavian Hume, a retired member of the Indian Civil Service, and it held its first session in Bombay at Christmas of that year; the fundamental principles of the Congress were laid down to be:—

Firstly, the fusion into one national whole of all the different and discordant elements that constitute the population of India;

Secondly, the gradual regeneration, along all lines, mental, moral, social and political of the nation thus evolved; and

Thirdly the consolidation of union between England and India by securing the modification of such of the conditions as may be unjust or injurious to the latter country.

With these objects in view the Congress pursued an uneventful career until 1907. It undoubtedly exercised a great influence in inducing a spirit of national unity amongst the diverse peoples of India, in focussing the chief political grievances, and in providing a training ground for Indian politicians. But in 1907 the Extremists, chiefly of the Deccan and the Central Provinces, who had for some time chafed under the control of the older generation, succeeded

in wrecking the Surat session of the Congress and produced a split which had long been seen to be imminent. The senior members of the Congress therefore re-crystallised its creed in definite terms. They laid down that—

“The objects of the Indian National Congress are the attainment by the people of India of a system of Government similar to that enjoyed by the self-governing members of the British Empire, and a participation by them in the rights and responsibilities of the Empire on equal terms with those members. These objects are to be achieved by constitutional means by bringing about a steady reform of the existing system of administration and by promoting national unity, fostering public spirit and developing and organising the intellectual, moral, economic and industrial resources of the country.”

For some years following 1907 efforts were made to heal the split and these were without avail until 1916 when a re-united Congress met at Lucknow under the presidency of Babu Ambica Charan Munzumdar of Faridpur in Bengal. But the union then effected was purely superficial; the difference between the Moderates and the Extremists was fundamental; the Extremists captured the machinery of the Congress and from the period of the special session held at Calcutta in September 1920 the Congress passed entirely under the domination of Mr. Gandhi.

### THE NON-CO-OPERATION MOVEMENT.

It was in 1920 that Mr. Gandhi, who had only in the previous year unsuccessfully started his Passive Resistance struggle as a protest against the Rowlett Act, conceived his idea of non-co-operation. Originally intended to be a protest against the British policy towards Turkey, the “fighting” of two other grievances was later on added to its first object, namely, the punishment of officials in the Punjab Martial Law regime and the securing of Swaraj for India. Mr. Gandhi and Mr. Shaikat Ali were able in 1920 to get the Calcutta Special Congress to endorse their programme of “progressive non-violent non-co-operation” which was reiterated by the annual session at Nagpur, which, on Mr. Gandhi’s motion, changed its old creed into “the attainment by India of Swaraj by all legitimate and peaceful means.” The stern measures adopted by local Governments led to the imprisonment of a large number of active Congressmen with the result that the Ahmedabad Congress in 1921 made a “grim resolve” to challenge the “repression movement” by appointing Mr. Gandhi as dictator and by resolving to start a “No Tax” campaign at Bardoli. The riots in Chauri Chaura in 1922, preceded by the Bombay riots in 1921 during the Prince of Wales’ visit (see 1923 and 1924 editions of this book) opened Mr. Gandhi’s eyes to the impossibility of maintaining a non-violent atmosphere under exciting conditions. He suspended his proposed civil disobedience campaign, and replaced it by what

is known as the Bardoli Programme which suspended all the aggressive items of non-co-operation in favour of the promotion of inter-communal unity and khaddar. Soon after, Mr. Gandhi was arrested for sedition, tried and sentenced to undergo imprisonment for six years. (See 1923 and 1924 editions.)

This turn of events threw cold water on the enthusiasm of non-co-operators who got discouraged. In order, therefore, to sound the country’s readiness for aggressive action once more, the All-India Congress Committee appointed a Committee, known as the Civil Disobedience Committee, in June 1922. The Committee toured the country and in October, 1922, produced two reports, one favouring Council entry to offer obstruction to Government and the other recommending the adoption of the Bardoli Programme. A battle royal ensued between the two parties at the Gaya Congress. The anti-Council Party won the day, and the Councilites, led by the Congress President, Mr. C. R. Das, formed the Swarajya Party in order to push their own Council programme. The Swarajya Party by its continuous propaganda gained considerable support in the country. The No-Change Party seeing the trend of public opinion got the Congress to lift the ban on Council entry. The Swarajists secured a large number of seats in various provincial Councils and in the Assembly. The annual Congress at Coochabad, under the presidency of Mr. Mahomed Ali, put an end to the Council entry controversy,

## THE CONGRESS IN 1924-25.

The Congress had an eventful career in 1924. Mr. Gandhi, who had an attack of appendicitis of a serious form in the Yerowda Jail, was released by the Government of Bombay. Immediately, the No-Changers revived their hopes of fighting the Swarajists to a finish. In the meanwhile the Swarajists in the Assembly and in the C. P. and Bengal Provincial Councils managed to get the respective budgets rejected. This, preceded by their refusal to take office in Bengal and C. P., appealed to the popular imagination. The scene of activities suddenly changed to Juhu near Bombay, where Mr. Gandhi had gone for his convalescence. He invited Messrs. C. R. Das and Motilal Nehru the Swarajist leaders, to discuss the political situation. Political India was in a fever-heat and was indulging in speculations of all sorts over the Council entry question. After nearly six weeks' discussion, in May, 1924, Mr. Gandhi in a statement to the Press definitely dissociated himself from the Council Programme and the Swarajist obstructive policy; while the Swarajist leaders in a separate statement defended their policy. Public controversy again centred round the Council question. The differences culminated in June at Ahmedabad when Mr. Gandhi succeeded, against Swarajist opposition, in getting the All-India Congress Committee to endorse his policy of excluding Swarajists from that body. Though at the same meeting he subsequently got the original decision rescinded, he shocked the Swarajists by his spinning resolution which made it incumbent on the Swarajists and No-Changers alike to send 2,000 yards of handspun yarn every month. The Swarajist protests were of no avail.

## The Bengal Ordinance.

In the meanwhile, the Government of Bengal with the sanction of the Governor-General promulgated an Ordinance in order to check the forces of the growing revolutionary movement in Bengal. Under this Ordinance and under Regulation III of 1818 they effected several arrests including a few Swarajists. Mr. C. R. Das at once set the cry that the Government of Bengal, feeling the growing power of the Swarajists, got the Ordinance promulgated only to suppress the Swarajist movement. He, therefore, appealed for unity in the country to fight the Government. Mr. Gandhi went to Calcutta and, after a series of consultations with the Swarajist leaders, drew up what is now known as the Gandhi-Swarajist Pact by which Mr. Gandhi agreed to suspend the non-co-operation movement and to recognise the Swarajists as the accredited representatives of the Congress on legislative bodies, while in return the Swarajists agreed to his spinning franchise which laid down 2,000 yards of hand-spun yarn every month as the subscription to Congress membership instead of the four annas a year as decided by the Nagpur Congress.

## The Belgaum Congress.

The Congress which met at Belgaum during Christmas week under Mr. Gandhi's presidency was a tame affair. It endorsed the Bengal Pact and changed its franchise to 2,000 yards of charka

yarn every month as above referred to. The Congress also condemned the Bengal Ordinance and supported Messrs. Gandhi, Das and Nehru in the view that it was directed against the Swarajists. Among the other resolutions passed by the Congress was one suspending the non-co-operation programme. Thus the movement received its final burial at the hands of the very author of its being.

## The Patna Decisions.

The policy of the Congress executive during the first half of 1925 was one of aimless drift. The death of Mr. C. R. Das demoralised the Swarajists. Mr. Gandhi promptly went to their rescue and desisted from all hostile propaganda against them. Pandit Motilal Nehru was in due course elected as the leader of the Swarajist Party. He had good reason to be pleased at the attitude adopted by Mr. Gandhi, not that it was one of active help and encouragement. The Swarajists were gradually emboldened to try and secure a reversal of the yarn franchise adopted by the Belgaum Congress and win recognition as the accredited spokesmen of the Congress in the legislatures. They accordingly forced Mr. Gandhi to summon a meeting of the A. I. C. C. at Patna in September. At this meeting the transfer of the Congress machinery into the hands of the Swarajists was machined. The yarn franchise which had only helped to dwindle the membership in the various Congress organisations was declared optional. It was decided that the Council programme till then worked by the Swaraj Party in the name of the Congress, should thereafter be worked by the Congress through the Swaraj Party. The triumph of the Swarajists against the orthodox non-co-operators was complete, Mr. Gandhi declaring that he had totally surrendered to Pandit Motilal Nehru.

## Cawnpore Programme.

The annual session of the Congress was held at Cawnpore as usual in Christmas week with Mrs. Sarojini Naidu in the chair. She was the first Indian woman elected to guide the Congress deliberations. Her presidential address, although full of poetry and rhetoric, did not give a definite lead to the delegates. After heated debate lasting for two or three days during which Mr. Gandhi remained a silent spectator the Congress recorded on the one hand the adoption of the Swarajist political programme and on the other a serious split in the Swarajist ranks. This split culminated in the despatch of their resignations by Mr. M. R. Jayaker, the Bombay Swarajist leader. Dr. Moonje, the Central Provinces leader and Mr. Kelkar, deputy leader of the Swaraj Party in the Legislative Assembly, of their membership of the Legislature on the plea that they would thereby liberate themselves from the Swarajist obligation and be free to propagate their views for responsive co-operation and acceptance of office.

Though the Congress supported Pandit Motilal Nehru's resolution in favour of non-co-operation, in the various Legislatures, the debate revealed numerous points of view,

Pandit Motilal himself claimed that he was surrendering the Swarajist organization to the Congress and would abide by its programme.

Pandit Malaviya had moved an amendment which proposed a policy of co-operation or obstruction as the interests of the country demanded, and proposed to open the door of Congress to other parties. He felt that Congress was being handed over to a handful of Swarajists. While Muslims, Zemindars, and other political parties were keeping out, the Swarajists had not kept their word in the past,

and could not keep it in the future. He appealed to Congress to save the nation's honour and be honest.

Pandit Motilal Nehru declared that the programme outlined would be carried out. If Government did not respond, they would withdraw from the Councils, and let the Congress Committee draw a programme on which to fight the general election next autumn. Soon after his return to Ahmedabad after the Congress meeting at Cawnpore, Mr. Gandhi announced his resolve to keep aloof from politics at least for a year.

## **The National Liberal Federation.**

The definite breach between the moderate and extremist elements in the Congress at its special session in Bombay in August 1918 (*vide* 1919 edition of this book) witnessed the birth of the National Liberal Federation which has, since then, been the platform of Indian moderate leaders. It held its first session in Bombay in 1918, Sir Surendranath Banerjee presiding. The federation adopted for its creed the old Congress formula which was set aside by the Nagpur Congress. Last year the Federation met during Christmas at Calcutta under the Presidentship of Sir Moropant Joshi who had just then retired from the executive councillorship of the Central Provinces. His presidential address was a long one containing an appeal to the members of the Liberal Party to continue the political education of the electorate and to organise. He suggested that a special effort should be made to secure in the interests of the Progressive Party as many seats as possible in the next elections to the various legislatures. While realising the need for unity, he also realised the fact that the real difficulty lay in the desire of each party to impose its own policy and programme on the others. Sir Moropant demanded that both the Home and Indian Governments should adopt a policy of co-operation and good-will.

The principal resolution of the session, namely, that which related to constitutional reform, was moved by Mr. C. Y. Chintamani. It expressed disappointment at the majority report of the Reforms Inquiry Committee and supported the

amendment to the Home Member's resolution adopted by the Assembly. An immediate reform of the constitution was urged subject to certain restrictions. Provincial governments should be responsible to the provincial legislatures which should be wholly elected. The central government should be responsible to the Assembly in the whole sphere of internal civil administration. Indians should be trained for and admitted to all the arms of defence. The Council of the Secretary of State should be abolished and the latter's position rendered analogous to that of the Dominion Secretary. It was pointed by the mover that while the present system should be worked in a spirit of co-operation, steps should be taken by the other side to put the constitution without delay on a permanent basis with provisions for automatic progress. Sir Provas C. Mitter seconded the resolution which was carried unanimously.

Other resolutions urged the repeal of the Criminal Law Amendment Act and the Regulations of 1818, 1819 and 1827, expressed great concern at the financial embarrassment of provincial governments which had handicapped Ministers of the Legislatures, protested against the Civil Services Act passed by the British Parliament in utter disregard of the Assembly's resolution and Indian opinion, recorded the Federation's indignant protest against the anti-Asiatic Bill before the South African Union Parliament and urged the Government of India to move His Majesty's Government to disallow the Act.

## **The Moslem League.**

The All-India Moslem League came into being in 1904 out of the universal desire among leading Mussalmans at that time for an effective organisation to protect their communal interests. With a view to secure separate Muslim representation in the legislative bodies of the land under the Minto-Morley scheme of constitutional reforms then under discussion, Indian Moslems who had been hitherto keeping aloof from politics organised the League. Its original objects were the promotion of loyalty to British

Government, the protection of political and other rights of Mussalmans and to place their needs and aspirations before Government in temperate language and to promote inter-communal unity without prejudice to the other objects of the League. Moslem opinion slowly advanced; and in 1913 the securing of self-government within the British Empire was included in the objects. The League was a powerful and influential body in 1916 and 1917, and what is known as the Lucknow pact of com-

munal representation arrived at between the League and the Congress in 1916 was bodily incorporated in the Government of India Act, 1919. The birth of the Khilafat Committee however overshadowed the League which from 1919 had almost disappeared till April 1923 when it met for a brief period under the presidency of the late Mr. Bhurgri, but had to be adjourned for want of a quorum. In 1924, however, some influential Moslem leaders like Mr. M. A. Jinnah thought that the Khilafat Committee's functions having ceased in view of the Turkish deposition of the Khalifa decided to revive the League which met under Mr. Jinnah's chairmanship at Lahore in May 1924. The Lahore session practically did nothing else save to reorganise the scattered branches of the League.

**The Aligarh Session.**—The 1925 session of the League met at Aligarh in December. The

presidential address of Sir Abdur Bahim caused a stir in the country owing to its strong pro-Muslim leanings. Hindus and Muslims, he declared, were distinct peoples whose life together in India for centuries had hardly contributed to their fusion into a nation. He severely condemned the Hindu revivalist movements of Sudhi and Sangathan which he regarded as a challenge to the Muslims. The main resolution which was moved by Sir Ali Imam urged the immediate appointment of a Royal Commission to revise the constitution of India with an eye to the interests of Muslims and other minorities. Mr. Mahomed Ali opposed it, but it was passed by a large majority. Among the other resolutions were one urging the grant of reforms to the N. W. Frontier Provinces, another asking the Muslim legislators to co-operate with Government and a third condemning Britain's Iraq policy and the League's Mosul decision.

## The Khilafat Committee.

The Central Khilafat Committee owed its origin to the reticence shown by the All-India Congress Committee in 1920 to the question of the Khilafat and Non-co-operation. Messrs. Gandhi and Shaikat Ali started this organisation with a view to educative propaganda throughout the country and, if possible, to capture the Congress. The object of the Committee was stated to be the righting of the Khilafat "wrongs." As a result of intensive propaganda mainly led by Mr. Gandhi himself, prominent Indian publicists supported the view that the Indian Moslems being deeply concerned over the "exploitation of the Holy places of Islam," had a right to expect the Hindus to help them in securing their rights. Soon after, the Madras Khilafat Conference under the chairmanship of Mr. Shaikat Ali unfolded a programme of progressive non-co-operation and appealed to the country for support. The Khilafat Committee, with the huge funds at its disposal, was able to draft in a large number of delegates to the Calcutta special Congress in 1920 when the non-co-operation programme was accepted by that body with two more objects added; one it, namely, the obtaining of Swaraj and the "righting of the Punjab wrongs.

With the deposition of the Khalifa last year by the Kemalists and the revival of the Moslem League, the Committee's activities have been considerably restricted. Recently the Committee sent a deputation to Nejd to intervene and settle the dispute between the warring elements. Though the Government of India were willing to permit a deputation of the Committee to Turkey, the Turkish Government did not quite like the idea which had consequently to be abandoned.

**The Session of 1925.**—The last year's session of the Khilafat Conference at Cawnpore was rendered lively by Maulana Hasrat Mohani whose speech strongly criticising Sultan Ibn Saud was subsequently expunged. The resolutions adopted by the Conference under the Presidency of Maulana Abdul Kalam Azad condemned the British policy in Iraq and the League's decision on Mosul and declared that if the Turks went to war on the latter issue the Conference would deem it its duty to help them. Ibn Saud was congratulated on his liberation of the Hedjaz and resentment expressed at Government's proposal to make the Moplahs settle in the Andamans.

## The Indian Legislature.

The Indian Legislature in 1925 first met at Delhi, on 20th January, when His Excellency the Viceroy addressed a joint meeting of both Council of State and Legislative Assembly in the latter's chamber. Sir Frederick Whyte presided over the Legislative Assembly throughout the session. The President of the Council of State was Sir Moncreiff Smith, newly appointed to that office on the transfer of the former President, Sir Montagu Butler, to the Governorship of the Central Provinces. The session lasted until 24th March in the case of the Assembly and 26th March as regards the Council of State, both Houses adjourning *sine die*.

A further session of the Legislature was held in Simla from 20th August till 17th September, the dates for the autumn meeting being earlier than usual because of the early days of the Pula holidays this year, and both Houses were then prorogued.

Lord Reading in his speech inaugurating the Delhi session remarked first upon improving the economic condition of the country and the trade prospects and noted the appointments of Sir Bhupendranath Mitra and Sir Muhammad Habibullah to be members of his Executive Council. He then turned to the subject of Indians in the self-governing Dominions, expressing satisfaction at the improved outlook in East Africa, where His Majesty's Government had refused assent to an Immigration Ordinance objectionable to Indians, and regretting that conditions in South Africa had worsened. He specially mentioned the good services of the Committee sent from India to discuss the East African situation with His Majesty's Government and the assurance obtained by Government that a hearing of the Indian point of view should be given by the East African Committee newly appointed by His Majesty's Government to report on administrative and economic question in East Africa. His Excellency noted that despite the strong representations of his Government the Governor General of South Africa has assented to the Natal Borough Ordinance, which would prevent the further enrolment of Indians as burgesses and assured the Legislature that the situation in the Union was engaging the most earnest attention of his Government. "Every endeavour will be made (concluded His Excellency) to discover a remedy, but in view of the powers of Dominion Governments in internal and domestic affairs the position is one of delicacy and a solution will not be easy to find—patience will again be necessary."

Referring to measures likely to engage the attention of the Legislature, His Excellency specially mentioned labour legislation, the question of granting further protection to the steel industry and currency and exchange. He foreshadowed legislation to facilitate the reasonable expansion of currency and said as regards exchange that it was Government's intention to appoint an authoritative committee to consider the question as soon as world economic factors appeared stable enough to justify the formulation of a new policy, a condition which ought to be reached within a year. In view of the opinion expressed by the Assembly,

Government had decided also to appoint a committee to make an inquiry and report on the material available for an inquiry into the economic conditions of the people of India, on the feasibility of such an inquiry and on the manner in which it might be carried out. The Viceroy noted that the Taxation Committee had begun its labours.

Lord Reading dwelt at some length upon political conditions in Bengal and declared that the Governor of that Province had the support of the Central Government in certifying a Bill, that the Provincial Legislature had refused to pass, for prolonging the special provisions previously established for a limited period by Ordinance for the suppression of anarchical crime. His Excellency reminded the House that, "We were not dealing with criminals who could be arrested and tried for crimes on evidence freely given by persons with nothing to fear from their action in giving testimony. . . . We were on the contrary dealing with widespread secret societies with many ramifications, which had taken the greatest care to conceal their insidious organisations and nefarious plans and were prepared to exact swiftly and secretly terrible reprisals upon members of their own society or members of the public giving information as to their actions." His Excellency warned his hearers that, "Terrorism no doubt may sometimes batten on a section of political thought. It may expand like some foul parasite growth deriving strength from living sources outside its own entity. It may flourish for a time in this conjunction if it can cajole or frighten a political party into acquiescence or into encouragement of its activities. But no political party can continue to live with terror for a friend. The parasite will kill the host. True political progress can have no lot or part with terrorism."

His Excellency expressed satisfaction at the establishment of an understanding between Muslim and Hindu leaders at Kohat and earnestly appealed to leaders of Indian public opinion to strive for the removal of the unhappy communal dissensions prevalent in different parts of India.

The session in the Legislative Assembly was chiefly characterized by the refusal of the Independent party led by Mr. M. A. Jinnah to hold their votes at the disposal of the Swarajist party, as the majority of them had done at the Budget session of 1924, and by the general improvement in the tone of the proceedings. The bitterness of a year previously was displaced by a generally friendly atmosphere, there was much genial social intercourse by members of different parties and occupants of the official benches. Swarajists were sometimes on a division found in the Government lobby and they and their former associates, the Independents, were often in opposite lobbies.

### The Budget.

The annual Budget was for the first time presented in two portions, the first dealing separately with railway finance, according to the

endorsement by the Legislature of Government's proposals to this effect, in agreement with the recommendation of the Acworth Committee, and the second containing the remainder of the financial arrangements of the year. The Member for Railways, the Hon. Sir Charles Innes, presented the former on 20th February, when it had already received the assent of the Standing Railway Finance Committee elected by the Chamber and containing only one official member. One day was allotted for general discussion of it and four days for the voting of grants. The revised railway estimates for 1924-25 showed that working expenses, surplus profits paid to Indian States and railway companies, interest charges and miscellaneous charges amounted during the past year to Rs. 86.77 crores and that the gain expected to be derived from commercial lines would amount to Rs. 11.25 crores. The gross receipts would be nearly 5 crores better than those of the preceding year and more than 2½ crores better than the Budget estimate. But for disastrous floods they would have been larger. Sir Charles Innes showed that under the arrangement on which the separate railway budget was based and allowing for the loss on strategic line, which had to be borne by general revenues, the general taxpayer would get from the railways Rs. 564 lakhs or more than one crore beyond the amount budgeted by the Finance Member.

Dealing with the railway estimates for 1925-26, Sir Charles showed that Government were budgetting for gross revenue Rs. 101 crores and gross expenditure Rs. 91 crores, thus allowing for a gain of Rs. 10 crores. He mentioned a new provision of Rs. 70 lakhs for automatic couplers, and one of Rs. 50 for speeding up repairs of rolling stock and another of Rs. 26 lakhs for extending to railway officers on company lines the Lee Commission's concessions. The railway contribution to general revenues was expected to be Rs. 521 lakhs, or Rs. 40 lakhs less than in 1924-25. The reduction was due to the non-recurrence of the windfall which in 1924-25 a Bombay High Court decision brought from Customs revenue. The gross contribution from railways was estimated at Rs. 645 lakhs and the amount to be paid into railway reserves at Rs. 328 lakhs. This would bring up to Rs. 738 lakhs the sum in the reserves-funds available to secure payment of the annual contribution to general revenues, to provide if necessary for arrears of depreciation and for writing down and writing off capital and to strengthen the financial position of railways in order that the services rendered to the public might be improved and rates reduced.

During the subsequent debates criticism was chiefly directed to increase the speed of Indianisation of the Railway Board and railway staffs and other subjects dwelt upon included the question of instituting a rates tribunal, branch line policy, reduction of coal freights, grievances of the travelling public accidents, policy regarding level crossings, separation of audit from accounts, economy in administration and working the Lee concessions, the London Boards of company lines, the attitude of railway Agents towards trades unions, the Railway Transportation School and the education of the children of the railway staff.

The Railway Budget was passed by both Houses subject to certain minor cuts by the Assembly in the detailed grants demanded.

### General Finance.

The Hon. the Finance Member Sir Basil Blackett, introduced his annual Budget on the afternoon of Saturday, 29th February, as the usual day, 1st March, fell on a Sunday. He first indicated certain changes of detail in the form of the Budget in accordance with recommendation of the Public Accounts Committee and showed that the revised estimates for the current year showed a surplus of Rs. 239 lakhs compared with the Budget figures of Rs. 206 lakhs. He showed that Customs receipts had been Rs. 26 lakhs net lower than Budgetted for, taxes on income Rs. 1½ crores less than in the preceding year and salt revenue receipts Rs. 131 lakhs less, net opium receipts Rs. 94 lakhs less. Higher exchange had saved Rs. 215 lakhs (excluding railways) under that head. Steel bounties costing Rs. 62 lakhs and the cost of the Lee Concessions were new items of expenditure. Net military expenditure was Rs. 392 lakhs lower than provided for in the budget. The aggregate result was a surplus of four crores as against a budgetted surplus of Rs. 18 lakhs.

Dealing with important questions of detail, the Finance Member reviewed the newly instituted scheme for systematising the provision for the prevention and reduction of debt and the criticisms of the official exchange policy, and as regards the latter remarked, "When an increase of world competition, inevitable in present world conditions, creates difficulties or reduces profits, at once voice is given to suspicion that in some obscure way the Government of India, whose interests as representatives of the taxpayer are necessarily identical with those of Indian trade, are deliberately trying to damage Indian trade. All sorts of motives which have never entered the head of the government are attributed to them and the tragedy of the position is heightened by the fact that the existence of such suspicions and the attribution of such motives are themselves a bar to effective co-operation between the Government and the people of India and add enormously to the difficulties of arriving at and carrying through the policy most truly beneficial to India."

The Budget for 1925-26 provided for military expenditure amounting to 56½ crores, a substantial reduction on that of the current year, but a figure still so high that the Finance Member foreshadowed a further important reduction in the next budget. Taxes on income were placed at 88 lakhs higher than in the current year, Customs Rs. 1½ crores better. The total revenue was estimated at Rs. 133.68 crores and expenditure Rs. 130.44 crores, leaving a surplus of Rs. 3.24 crores. Of this the Finance Member regarded Rs. 2.68 crores as recurring and he proposed to distribute 2½ crores of it. He then indicated that Government proposed to give the whole for remission of Provincial Contributions. He said, "The Government of India have repeatedly said that their financial policy has been, is being and will be directed,

to the reduction and eventual extinction of Provincial Contributions at the earliest possible date. So long as any of the Provincial Contributions are outstanding we cannot devote our surplus to the reduction of postal charges (unless this can be done out of the surplus of the Posts and Telegraphs Department's Budget itself) or to the reduction of Central taxation without failing to live up to this promise which has been given to the Provinces without qualification. The Provinces were disappointed a year ago. We cannot disappoint them again."

The surplus did not take account of the 63 lakhs contribution now due to Central revenues from Bengal. "The Government of India have after careful and detailed study of the case come to the conclusion that Bengal must be given a further respite before being brought into line with other provinces." They therefore proposed remission of the dues from Bengal for another three years. The remissions to other provinces would be: Madras 126 lakhs, United Provinces 56 lakhs, Punjab 61 lakhs, Burma 7 lakhs. To give the House an opportunity of considering the subject of the reductions in Provincial Contributions, Government promised to bring forward a resolution after the passage of the Finance Bill.

(The resolution in question, approving the remissions, produced only a brief debate and was carried with a rider expressing the view of the Assembly that the amounts remitted in the several provinces should be devoted mainly to expenditure in the transferred Departments.)

The budget debates were expansive as regards the earlier portion of it at the expense of the latter part, but were for the most part germane to the questions at issue, instead of being almost wholly devoted to the constitutional question as was the case a year previously and the constitutional problem was only discussed under one or two heads appropriate to it. The main feature of the discussions was the refusal of the Independent Party to follow the Swarajists into the lobby to throw out the Budget after the fashion of the preceding year and this led to some bitter exchanges on the floor of the House between the leaders on either side. The Finance Bill was finally passed as introduced by 75 votes to 40.

#### Official Bills.

The following Government legislation, in addition to the annual Finance Bill, was passed by both Houses of the Indian Legislature during the Delhi session:—The

Indian Merchant Shipping (Amendment) Bill, 1925.

Indian Paper Currency (Amendment) Bill 1925.

Workman's Breach of Contract (Repealing) Bill, 1925.

Indian Soldiers' (Legislation) Bill, 1915.

Indian Income-Tax (Amendment) Bill, 1925.

Legislative Assembly (President's Salary) Act, 1925.

Cantonments (Amending) Bill, 1925,

Obscene Publications Bill, 1925.

Indian Ports (Amendment) Bill, 1925.

Cantonments (House Accommodation Amendment) Bill, 1925.

Indian Merchant Shipping (Second Amendment) Bill, 1925.

Cotton Ginning and Pressing Factories, Bill, 1925.

Indian Tariff (Amendment) Bill, 1925.

Indian Stamp (Amendment) Bill, 1925.

Indian Income Tax (Second Amendment) Bill, 1925.

Prisons (Amendment) Bill, 1925.

Indian Cotton Cess (Amendment) Bill, 1925.

There was also passed by the Council of State and the Governor General (by certification) the Bengal Criminal Law Amendment (Supplementary) Bill, 1925, which the Legislative Assembly by a majority refused to pass.

The following are leading details of the more important of these measures.

The Bengal Criminal Law Amendment Bill was merely supplementary to legislation already passed in Bengal for the purpose of making permanent certain special provisions instituted by the Governor-General by Ordinance for dealing with anarchical conspiracy. The need for legislation arose from the fact that an Ordinance so issued can have currency for only six months. The initial step was by Ordinance instead of by legislation owing to the need to take the revolutionaries by surprise and the final legislation by the Indian Legislature was required to complete the permanent arrangements by providing certain rights of appeal to the Calcutta High Court, to grant which is beyond the powers of a Provincial Legislature or Government. The opposition to the Bill in the Legislative Assembly was in the nature of a political demonstration not primarily dealing with the merits of the proposals before the House.

The first new Merchant Shipping Bill provided Government with powers to charge fees for the inspection of wireless telegraphy installations and the second had as its object the removal of evils arising from the Haj pilgrimage, particularly by giving power to compel pilgrims to take return steamer passages before sailing for the Hedjaz and so to avert the hitherto regular stranding of destitute pilgrims in Jeddah after the performance of their religious duties.

The new Workmen's Bill contained provisions to remove the possibility of work people who go on strike being prosecuted for breach of contract. The Soldiers' Litigation Bill was to relieve soldiers from some of the legal results of the war, and their enforced absence through the war, upon their position before the Courts. The Bill regarding cotton gins and presses contained provisions for the suppression of fraudulent mixing and adulteration of cotton

in such factories, the measure having long been demanded by the cotton trade.

The Indian Tariff Bill provided, in the interests of trade convenience, for revision of the method of assessing cigarettes and other commodities for charging import duties upon them. The new Stamp Bill provided for the stamp duty to be levied upon policies under the new Workmen's Compensation Insurance law. The Paper Currency Bill increased the extent to which Government can issue paper currency against securities in the Paper Currency Reserve, this being a measure for facilitating the issue of emergency seasonal currency.

The first Income Tax Bill concerned procedure for levying super tax on partners in registered firms and the second was to empower Government to deduct from pay in India the income tax leviable on overseas pay payable in sterling in England in accordance with the recommendations of the Lee Commission.

The Cotton Cess Bill was to provide for refund of the raw cotton export cess in cases where cotton shipping from one port is re-imported elsewhere, being therefore, a coastal trade facilities measure.

The Assembly President's Salary Bill was necessitated by the constitutional provision making the salary votable after the arrival of the time for introducing the electoral method for the appointment of President. The House fixed the salary at Rs. 4,000 a month and entered in the Bill a provision requiring the President to devote his whole time to the duties of his office.

Among official Bills introduced only or taken through merely their initial stages in the Assembly were measures to provide for the registration of trade unions and to punish contempts of courts.

#### Unofficial Bills and Resolutions.

There were several Unofficial Members' Bills concerning important subjects. Mr. V. J. Patel, deputy Leader of the Swaraj party in the Assembly, introduced a measure to repeal numerous special enactments for dealing with various forms of crime and this was passed by the Lower House despite Government opposition. He also introduced a Bill in regard to racial distinctions in legal procedure, but this would have upset the compact between all parties in the House crystallised into legislation by the first Assembly and on the motion for the consideration stage an Amendment postponing the matter *sine die* was carried. A further political Bill introduced by Mr. Patel was one to reduce from transportation or rigorous imprisonment to simple imprisonment the maximum punishment for sedition.

Several unofficial Bills dealing with property and succession were brought before one or other of the two Chambers.

Sir Hari Singh Gour sponsored a Bill to raise the age of consent of girls above its current

age of 12, making it 14 for unmarried girls and 13 for girls married. Government were prepared to support this, but the House by majorities during the detailed consideration stage raised the age to 16 outside marriage and 14 within it. Government, holding the proposed changes to be too drastic to be practicable, voted against the third reading of the measure and thus got it rejected, but promised to introduce legislation of their own on the subject at an early date. (This promise was fulfilled in the following September.)

Mr. K. C. Neogy in September, 1924, introduced in the Legislative Assembly a Bill to prohibit the labelling of compartments of railway trains for any particular class of traveller. The measure was aimed at the custom followed on some railways of labelling third or intermediate class carriages "for Europeans only," a step first taken some years ago at the request of Hindus, who objected to meat-eating Europeans sharing compartments with them, and now continued chiefly, perhaps, for the comfort of Europeans. For the Bill the argument ran that the special reservation of compartments sometimes prevented Indians finding a place in a crowded train and against that contention it was said that the movers of the Bill were actuated by racial feeling. The measure was passed by the Lower House but the Council of State in February 1925 refused to pass the motion for its consideration there.

Sir H. S. Gour moved in the Assembly for consideration of his Special Marriage Act Amendment Bill. This measure was designed to remove an inconvenient legal anomaly in the existing measure, but orthodox members of both Hindu and Muslim communities objected to any extension of the principle of legalising marriages effected otherwise than by traditional communal custom and an amendment was successfully moved for the circulation of the Bill for eliciting public opinion. The same fate overtook a motion by Mr. N. M. Joshi for the consideration of a Bill introduced by him to make provision for payment of maternity benefits to women workers in factories and mines. Mr. Chaman Lal's motion for consideration of a Bill to provide for the weekly payment of wages to workmen, domestic servants and other employees was similarly treated.

Several unofficial Bills were introduced. Sir Purnshottamdas Thakurdas brought in two small measures for the fixing of rupee exchange at one and four pence, Sir H. S. Gour three Bills affecting property transfers and settlement, Mr. Kumar S. Ray a Bill to amend the Indian Medical Degrees Act and Mr. Harchandral Vishindas a Bill to consolidate and amend the law relating to arbitration.

#### Unofficial Resolutions.

A large number of unofficial resolutions was debated during the session. Satiyyid Raza Ali in the Council of State moved for early action in accordance with the North West Frontier Province Inquiry Committee's report, but his motion was withdrawn after considerable

debate in which Government informed the House that the increase of communal bitterness in the Provinces rendered the action desired by the resolution impossible for the present.—**Rai Sahib M. Harbilas Sarda** moved in the Assembly for the institution of a Legislative Council in Ajmer-Merwara and was defeated by 41 to 26.—**Sir H. S. Gour** moved a fresh and old Resolution of his calling for the establishment of a Supreme Court and urged its acceptance on the grounds of the inconvenience of Privy Council appeals and of the desirability of developing the Indian judicial system. The motion was stoutly opposed by **Pundit Motilal Nehru** in the name of judicial purity and despite the support of the Independent Party leader was defeated by 56 to 15.—A two days' debate on a Resolution backed by the Swarajists condemning the Bengal Ordinance ranged broadly over the principles of political administration and the methods of dealing with revolutionary conspiracy and the resolution was carried by 58 to 45.—Other unofficial resolutions moved provided ground for debates on the position of Indians in East Africa, on the encouragement of Indian art, regarding which a resolution was carried, on the encouragement of University Training Corps to assist the army, on the training of Indians or the commissioned ranks of the army, in regard to which the Legislative Assembly adopted a motion for the establishment of an "Indian Sandhurst" on communal representation in the public services, on the alleged grievances of railway and postal servants and on prohibition, opium, cinema films, the public debt, mental defectives, exchange and currency and other subjects.

### Autumn Session.

The customary autumn session, in Simla, was opened there by **H. E. the Viceroy** on 20th August and continued till 17th September. The business of outstanding importance was the discussion of the Report by the Reforms Inquiry Committee presided over by the Hon. the Home Member. Among other matters of general public interest the most noteworthy were the election of President of the Assembly and legislation to apply the accepted policy of tariff protection to various industries.

His Excellency the Viceroy in an inaugural address to a joint session of the two Houses specially addressed himself to agricultural policy. He emphasized the importance of a recent speech by the Secretary of State declaring the intention of Government to take far-reaching measures to stimulate agricultural revival, he dwelt upon the recent expansion of the Central Research Institute at Pusa and its fundamental importance and he announced that in order to facilitate the co-ordination of provincial effort the Government of India had under consideration "a proposal for the establishment of an all-India agricultural organisation which would help towards co-ordinating the activities of the various provincial departments of agriculture, promote research, agricultural education, co-operation and other established aids to agriculture and serve as a medium for agricultural propaganda throughout the country." With this aim in view,

said His Excellency, a scheme had been formulated and Government intended to refer it to the Board of Agriculture at its pending meeting at Pusa in December.

The Viceroy pointed out that the return of sterling to parity with gold provided one of the most important conditions requisite for a fruitful re-examination of the problems of currency and exchange in India and then announced the appointment of a Royal Commission "to examine and report on the Indian exchange and currency system and practice, to consider whether any modifications are desirable in the interests of India and to make recommendations." His Excellency expressed appreciation of the acceptance by the leader of the Swaraj party in the Assembly of Government's invitation to become a member of the Committee appointed under the chairmanship of **Sir Andrew Skee**n, Chief of the General Staff, to report on methods of recruitment and training of young Indians for the commissioned ranks of the Indian Army, and foreshadowed an early announcement of the personnel, functions and constitution of a Public Services Commission.

The Viceroy referred at length to the report of the Muddiman Committee and to his conferences with the Secretary of State in regard to the Indian Political problem and appealed anew for the elimination of the elements of bitterness and suspicion from discussion of it. The minority report of the Committee he recognised to be a demand for an early fresh inquiry with a view to another revision of the Constitution, but while he sympathised with the impatience which this indicated he said that he and his Government, after most carefully considering the demand, had come to the conclusion that the moment for such a new inquiry had not been reached. He reiterated the Secretary of State's point that a necessary preliminary to a new inquiry of the kind desired was co-operation by the leaders of Indian opinion in the working of the existing constitution. He also reminded the Legislature of the stress laid by the Secretary of State on the need to work out important details of the general problem before tackling the whole and concluded that "the time which must elapse before re-examination of the Constitution, whenever that may happen, could not be better occupied by public men in India than by devoting serious practical thought to these problems . . . . We are not wedded to our own particular methods of attaining our object."

### New President.

There were two candidates for election to the office of President, **Diwan Bahadur T. Rangachariar**, Deputy President, and **Mr. V. J. Patel**. The former received the official votes and the latter, as deputy chairman of the Swarajist party in the House, had the support of that party, of most of the Independents and of some Liberals. **Mr. Patel** was elected by 58 votes to 56. All parties joined in expressing appreciation of **Sir Fredrick Whyte's** service to the cause of Indian self-government during his tenure of the presidency and a very friendly welcome was similarly given to the new Presi-

dent, the official Leader of the House, speaking on behalf of the Government members, being the first to assure him of loyal support. Mr. Patel, in a cordial response, declared that while he remained President he should strive to the utmost to maintain the high traditions established by Sir Fredrick Whyte and should consider it his duty to cease to be a party man and to co-operate to the best of his ability.

### Reforms Inquiry Committee.

The Reforms Inquiry Committee Report came before the Legislature on an official resolution moved in the Assembly by the Home Member and in the Council of State by the Secretary in the Home Department, endorsing the principle underlying the Report of the majority of the Committee. Sir Alexander Muddiman's chief point in his speech making the motion in the Assembly was to refer to Lord Birkenhead's statement that co-operation in working the existing Constitution must precede any hastening of the further general constitutional inquiry that must under the Government of India Act take place not later than 1929 and to indicate that the voting of this Resolution would be accepted as co-operation in that regard. But the official Resolution was tabled only a few days before the day for the debate upon it. There followed long negotiations between the unofficial parties with a view to their following an agreed course in regard to it and the lengthy joint amendment in which they resulted was only tabled on the Saturday preceding the Monday when the discussion on the floor of the House had to take place. This allowed insufficient time for informal conversations between the official and unofficial benches with a view to a rapprochement and the delicacy of the understanding between the unofficial parties was such that none on the unofficial benches could agree to the alteration of so much as a comma in the agreed amendment lest so much alteration should break up the temporary general unofficial understanding. The Government offer to accept the passage of the official Resolution as the sign of co-operation required as a pre-requisite to the hastening of a further Constitutional Inquiry was, therefore, passed over without comment, neither the majority nor the minority report of the Muddiman Committee was treated by the unofficial benches on its merits and the speeches showed that while the members of all the unofficial parties were determined to carry their amendment they would do so only because it was an amendment to the Government resolution and despite the fact that many of them were at disagreement on several points that it mentioned and as regards the meaning to be attached to various statements that the amendment made. The debate continued through two days and the amendment, which was moved by Pandit Motilal Nehru, as leader of the Swarajist party in the House, was carried by 72 votes to 45. Liberals as well as Independents following the Swarajists into the lobby. The amendment was in effect a lengthy manifesto and its purport was to go back on the earlier Swarajist declamations against any Constitution imported from abroad and to declare that India must have a form of Parliamentary government similar to those obtaining in the most advanced countries

of the West and without any adaptation in principle to the special conditions characteristic of India and her races, religious divisions and history.

Mr. Phiroze Sethna, from Bombay, moved the same amendment in the Council of State and several other amendments were also tabled there. There was a two-days' debate and in the end the official Resolution was by 28 votes to 7 carried unaltered.

H. E. the Viceroy in a subsequent speech of farewell to the Upper Chamber stated that Government would proceed to examine the Report in the light of both the Resolution adopted by the Council and of the amendment to it carried by the other Chamber.

### Other Business.

Government on 15th September moved a continuation of the payment of bounties to Indian made steel. The current arrangement under this head was for the payment of Rs. 20 per ton during the year ended 30th September. The Tariff Board had re-examined the situation and recommended bounties at the rate of Rs. 18 a ton for the remaining eighteen months of the Steel Protection Act. Government now proposed Rs. 12 instead of the rate which the Board advised. The official proposal was adopted in both Houses and the most significant aspect of the proceedings was the failure of the unofficial benches in the lower House despite canvassing to move an amendment to raise the rate at least to the level recommended by the Board. An official Resolution which was also carried authorised the payment of bounties upon Indian-made railway wagons. The Commerce Member further moved approval of assistance to the bamboo paper and paper pulp industry partly established in Bengal by the imposition until 31st March 1932 of a specific protective import duty of one anna per pound on all printing papers (other than chrome, marble, flint, poster and stereo) which contain less than 65 per cent. of mechanical wood pulp and on all writing paper. This was the subject of prolonged debate, representatives of consumers' interests vigorously opposing the proposals and other members with equal keenness advocating the extension of the new protection to paper making concerns unbenefited by the official plan. Eventually, the original proposal was carried unaltered and legislation to give effect to it was passed through all stages.

The Council of State adopted an unofficial motion for the adjustment of railway freights for the benefit of coal-using industries.

A considerable number of minor legislative Bills came before the two Chambers in various stages. Among more important measures dealt with was a Bill raising the age of consent. This was passed with a provision making the age 14 for unmarried girls and 18 within the marital relation. The report of the Select Committee on the official Trade Unions Bill was presented, but in response to demands by a section of the Assembly consideration of it was postponed. An unofficial Bill sponsored by Mr. Rangachariar to restrict the use of firearms at times of civil disturbance was passed by the Assembly in face of Government opposition.

The session concluded on 17th September, the sittings of the Council of State ending with a farewell address by the Viceroy in view of the fact that the life of the Council was to expire and new elections to that body be held, before the next legislative session.

The most important subject discussed on the initiative of the unofficial benches was the position of Indians in South Africa. In the Assembly the question was only brought up in the form of a series of questions, to which Government gave very lengthy replies. This procedure was adopted after long discussions in the Standing Committee on Emigration, specially attended by all leading members of the House whether belonging to the Committee or not, and was intended to demonstrate the interest of the Chamber in the subject without raising a debate which might prove an occasion for speeches likely to hamper the delicate negotiations now proceeding between Government and the Union of South Africa. An unofficial resolution was moved in the Council of State but rejected by a large majority. The vote indicated confidence in Government in the current negotiations, but the debate drew from Sir Fazl-Hussain, the Acting Member of Government in charge of the subject, the argument that India while demanding Dominion status could not invite the Imperial Government to

exert pressure on the Dominion of South Africa in regard to the Union's internal affairs. His statement that the party leaders in the Assembly had endorsed this view in the Emigration Committee led to an indignant repudiation by them.

The Council of State refused by 29 to 11 to accept a motion by Sir Devi Prasad Sarvadhikari for a modification of Government's opium policy, the Assembly adopted a resolution for total prohibition of liquor in territories administered by the Government of India, a step taken apparently only as a demonstration in favour of a firm liquor policy, because many who voted for the motion are not teetotalers.

The Assembly on the motion of Sir Purshotamdas Thakurdas, of Bombay, adopted by 57 to 32 a resolution recommending the suspension of the collection of the Cotton Cloth Excise Duty for the remainder of the current financial year because of the critical state of the cotton manufacturing industry. Government opposed the resolution and pointed out that the Assembly in March had endorsed the policy of remitting provincial contributions before touching the excise duty, but assured the Chamber that if the Resolution were adopted they would regard it as a revision of that decision and as a recommendation for the total abolition of the excise.

## Calcutta.

### King-Emperor's Cup. Distance 1 mile.—

Mr. Ephraums' Orange William (9st. 3lbs.), Morris .. .. .	1
Mr. Ruiz's Aborigine (9st. 3lbs.), A. T. Harrison .. .. .	2
Mrs. S. F. H. Perera's Dalkester (9st. 3lbs.), Riley .. .. .	3
Mr. Galstaun's Gaurishankar (9st. 3lbs.), Dobie .. .. .	4
Won by three lengths; three-quarters of a length; a short head. Time.—1 min. 39 2-5 secs.	

### Viceroy's Cup. Distance 1½ miles.—

Mr. Ephraums' Orange William (9st. 13lbs.), Morris .. .. .	1
Mr. Ruiz's Aborigine (9st. 12lbs.), A. T. Harrison .. .. .	2
Mrs. S. F. H. Perera's Dalkester (9st.), Riley .. .. .	3
Mr. Galstaun's Gaurishankar (9st. 13lbs.), Dobie .. .. .	4
Won by a neck; a head; two and a half lengths. Time.—3 mins. 5 1-5 secs.	

### Governor's Cup. Distance 1½ miles.—

Mr. Kelso's Revival (8st. 6lbs.), G. Smith .. .. .	1
Mr. Mein Austin's Recalled (7st., cd. 7st. 5lbs.), Parker .. .. .	2
Mr. Galstaun's Gaurishankar (9st. 7lbs.), J. E. L. Harrison .. .. .	3
Mr. Thaddeus' Unitol (7st. 2lbs., cd. 7st. 5lbs.), R. Stokes .. .. .	4
Won by one and a quarter lengths; one length; three-quarters of a length. Time.—3 mins. 7 2-5 secs.	

### Carmichael Cup. Distance 1½ miles.—

Mr. Ephraums' Orange William (9st. 6lbs.), Morris .. .. .	1
Mr. Galstaun's Gaurishankar (9st. 11lb.), Dobie .. .. .	2
Mr. Vernon's Canterbury Lamb (8st. 10lbs.), A. T. Harrison .. .. .	3
Mr. Kelso's Revival (8st. 10lbs.), G. Smith .. .. .	4
Won by half a length; two and a half lengths; two and three-quarter lengths. Time.—2 mins. 19 secs.	

### Cooch Behar Cup. Distance 1 mile 3 furlongs.—

Mr. Eve's The Count (8st. 7lbs.), A. C. Walker .. .. .	1
Mr. Galstaun's Gaurishankar (9st. 12lbs.), J. E. L. Harrison .. .. .	2
Mr. Eddis' Limton (7st., cd. 7st. 3lbs.), R. Stokes .. .. .	3
Mr. Galstaun's Ox Trot (7st. 11lb., cd. 7st. 2lbs.), Siely .. .. .	4
Won by one and a quarter lengths; one and a half lengths; a short head. Time.—2 mins. 30 4-5 secs.	

### Ronaldshay Cup. Distance 6 furlongs.—

Mr. Eve's Flaming Orb (9st. 7lbs.), A. C. Walker .. .. .	1
Mr. Galstaun's Solo Bridge (9st. 7lbs.), J. E. L. Harrison .. .. .	2
Mr. Somji's Murmansk (8st. 7lbs.), Morris .. .. .	3
Mr. Thaddeus' Goldgainer (9st. 3lbs.), Marsh .. .. .	4
Won by three-quarters of a length; a short head; two and a half lengths. Time.—1 min. 14 3-5 secs.	

### Macpherson Cup. Distance 1½ miles.—

Mrs. Perera's Dalkester (7st., cd. 7st. 11lb.), Selly .. .. .	1
Mr. Pannick's Harvest Star (7st. 6lbs.), Parker .. .. .	2
Mr. Galstaun's Gaurishankar (9st. 12lbs.), Dobie .. .. .	3
Mr. Thaddeus' Unitol (7st. 6lbs., cd. 7st. 8lbs.), A. T. Harrison .. .. .	4
Won by one length; three-quarters of a length. Time.—2 mins. 35 3-5 secs.	

### Prince of Wales' Plate. Distance 1 mile.—

Mr. Yoonus' Ballina Breeze (7st. 7lbs.), Parker .. .. .	1
Mr. Vernon's Canterbury Lamb (8st. 10lbs.), Morris .. .. .	2
Mr. Harper's Ship's Biscuit (8st. 11lbs.), Dobie .. .. .	3
Mr. Eve's The Count (9st. 5lbs.), A. C. Walker .. .. .	4
Won by half a length; one and a half lengths; two lengths. Time.—1 min. 34 3-5 secs.	

### Wellesley Plate. Distance 1½ miles.—

Mr. Ephraums' Orange William (9st. 7lbs.), Morris .. .. .	1
Mrs. S. F. H. Perera's Dalkester (9st. 11lb.), Dobie .. .. .	2
Mr. Thaddeus' Aborigine (9st. 7lbs.), A. T. Harrison .. .. .	3
Won by a head; three lengths. Time.—2 mins. 9½ secs.	

### December Plate. Distance 7 furlongs.—

Mr. Ephraums' Orange William (9st. 7lbs.), Morris .. .. .	1
Mr. Pannick's Harvest Star (8st. 7lbs.), Cooper .. .. .	2
Mr. Eve's Flaming Orb (9st. 7lbs.), A. C. Walker .. .. .	3
Mrs. S. F. H. Perera's Dalkester (9st. 7lbs.), Howell .. .. .	4
Won by half a length; one and a half lengths; half a length. Time.—1 min. 27 secs.	

Metropolitan. Distance 4 furlongs.—

Mr. Frank's Very Little (8st.), A. T. Harrison .. .. .	1
Mr. Pannick's Harvest Star (8st. 13lbs.), Hutchins .. .. .	2
Mr. P. B. Avasia's Fille d'Or (8st. 7lbs.), Barnett .. .. .	3
Mr. Galstaun's Solo Bridge (9st. 7lbs.), Dobie .. .. .	4
Won by one and a half lengths; two lengths; one and a half lengths. Time.—1 min. 14 secs.	

Indian Grand National. Distance about 3 miles.—

Mr. Galstaun's The Gift (9st. 9lbs.), C. Black .. .. .	1
Mr. Harrison's Brendan (10st. 2lbs.), Barnett .. .. .	2
Mr. Ever's Llansinfried (12st. 4lbs.), Barnes .. .. .	3
Mr. Leatham's Durban (10st.), Owner .. .. .	4
Won by eight lengths; ten lengths; five lengths. Time.—6 mins. 5 4-5 secs.	

Apcar Plate. Distance 6 furlongs.—

Mr. Eve's Flaming Orb (9st. 13lbs.), J. W. Brace .. .. .	1
Mr. Eve's Ormiston (8st. 4lbs.), A. C. Walker .. .. .	2
Mr. M. Beg Mahomed's Bright Bird II (7st. 9lbs., cd. 7st. 12lbs.), Morris .. .. .	3
Mr. Galstaun's Solo Bridge (7st. 10lbs.), Dobie .. .. .	4
Won by three lengths; short head; two and a half lengths. Time.—1 min. 12 secs.	

Mayfowl Cup. Distance 1 mile.—

Mr. Eve's The Monk (8st. 9lbs.), J. W. Brace .. .. .	Dead 1 heat 1 Brown.
Mr. Pannick's Cheviot (7st. 12lbs.), .. .. .	
Mr. Ruiz's Grand Excel (7st. 10lbs.), A. T. Harrison .. .. .	3
Mr. Austin's Recalled (7st. 11lbs.), Parker .. .. .	4
Dead heat; half a length; four lengths. Time.—1 min. 38 3-5 secs.	

Burdwan Cup. Distance about 1½ miles.—

Mr. Dee's Snowdrift (10st. 3lbs.), Bloss .. .. .	1
Captain and Mr. Mannock's Kilgarvan (10st. 3lbs.), Mr. Pollard .. .. .	2
Mr. Roscoe's Archie's Fancy (11st. 3lbs.), Capt. Pearson .. .. .	3
Major Lucas' Ben Aden (10st. 3lbs.), Barnes .. .. .	4
Won by seven lengths; two and a half lengths; three lengths. Time.—3 mins. 18 2-5 secs.	

Merchants' Cup. Distance 1½ miles.—

Mr. Ever's Minnielement (7st. 8lbs., cd. 7st. 9lbs.), Perryman .. .. .	1
--	---

Mr. Lauder's Dry Wit (8st. 3lbs.), Ritchie .. .. .	2
Mr. Pannick's Tomboy (8st.), Brown .. .. .	
Hajee Sir Ismail Salt's Critical (7st. 11lbs.), Parker .. .. .	4

Won by a short head; three-quarters of a length; half a length. Time.—2 mins. 34 secs.

Eclipse Pony Cup. Distance 7 furlongs.—

Mr. Donett's Love Gift (7st. 9lbs.), H. Walker .. .. .	1
Mr. Dee's Warrior Belle (9st. 1lb.), Barrett .. .. .	2
Mr. Curlender's The Little Corporal (8st. 8lbs.), Cooper .. .. .	3
Raikut of Balkunthapur's Elsie R. (8st. 1lb.), Edwards .. .. .	4
Won by half a length; three and a half lengths; a neck. Time.—1 min. 28 3-5 secs.	

Beresford Cup. Distance 1½ miles.—

Messrs. Currie and Jennings' Yenite (9st. 5lbs.), Ritchie .. .. .	1
Mr. Jones' New Orleans (8st. 1lb.), Hutchins .. .. .	2
Mr. Alford's Minsk (9st.), Sibbritt .. .. .	3
Messrs. Soutar and Simpson's Seta Devi (9st. 2lbs.), Dobie .. .. .	4
Won by a neck; two and a half lengths; one and a half lengths. Time.—3 mins. 4 3-5 secs.	

Monsoon Cup. Distance 1 mile 3 furlongs.—

Mr. Dee's Snowdrift (9st. 7lbs.), Cooper .. .. .	1
Messrs. Soutar and Simpson's Splvis (9st. 6lbs.), Hutchins .. .. .	2
Mr. Jones' New Orleans (9st. 7lbs.), O'Brien .. .. .	3
Mr. Pannick's Anzio (8st. 12lbs.), Riley .. .. .	4
Won by three-quarters of a length; three lengths; two and a half lengths. Time.—2 mins. 25 3-5 secs.	

Grand Annual. Distance 2 miles.—

Mr. Donett's Red Connors (9st. 10lbs.), C. Black .. .. .	1
Mr. Dee's Snowdrift (11st. 5lbs.), Bloss .. .. .	2
Captain and Mr. Mannock's Kilgarvan (10st. 3lbs.), Mr. Pollard .. .. .	3
Raikut of Balkunthapur's Barsen (9st. 4lbs.), Barnett .. .. .	4
Won by one and a quarter lengths, six lengths; seven lengths. Time.—3 mins. 43 1-5 secs.	

Hilliard Plate. Distance 7 furlongs.—

Mr. Eve's Eddy (9st. 5lbs.), A. C. Walker .. .. .	1
Mr. Avasia's Fille d'Or (8st. 13lbs.), Barnett .. .. .	Dead 2 heat 2
H. H. the Maharaja of Mysore's Affable (8st. 7lbs.), Hutchins .. .. .	
Mr. Beg Mahomed's Bright Bird II (7st. 12lbs.), Morris .. .. .	4
Won by a short neck; dead heat; three lengths. Time.—1 min. 27 1-5 secs.	

**Bombay.**

Eclipse Stakes of India. Distance 1½ miles.—

Mr. T. M. Gouldass' Melesigenes (8st. 7lbs.), Herbert .. .. 1

Mr. Kelso's Harry Tate (9st. 4lbs.), Townsend .. .. 2

Mr. Eve's Boscombe (9st. 4lbs.), Bowley .. 3

Mr. C. N. Wadia's Cap-a-Pie (8st. 10lbs.), Buckley .. .. 4

Won by a neck; two lengths; a short head. Time.—2 mins. 5 secs.

Rajpipla Gold Cup. Distance 1 mile.—

Mr. A. E. Ephraums' Orange William (10st. 13lbs.), Morris .. .. 1

Mr. Eve's Plymouth Rock (8st. 7lbs.), G. Smith .. .. 2

Mr. Eve's The Count (8st. 7lbs.), A. C. Walker .. .. 3

Mr. R. R. S.'s Wasp (7st. 5lbs., cd. 7st. 6lbs.), Clarke .. .. 4

Won by one length; three-quarters of a length; half a length. Time.—1 min. 37 3-5 secs.

Grand Western Handicap. Distance 1½ miles.—

Mrs. S. F. H. Perera's Dalkester (7st. 10lbs., cd. 7st. 11lbs.), Morris .. .. 1

Mr. T. M. Thaddeus' Aborigine (8st. 2lbs.), Burn .. .. 2

Mr. Eve's The Count (9st.), A. C. Walker .. 3

Mr. Kelso's Revival (8st. 4lbs.), Herbert .. 4

Won by one and a quarter lengths; two lengths; two and a half lengths. Time.—2 mins. 6 4-5 secs.

Byculla Club Cup. Distance about 1½ miles.—

Joined firm of Andrew Yule & Co., Calcutta, 1875; Director of London Joint City and Midland Bank, Ltd., Mercantile Bank of India, Ltd., Royal Exchange Assurance Corporation. *Address*: 8, Olive Row, Calcutta.

## The Calendars.

A full Calendar will be found at the beginning of this book. Below are given details of the other Calendars in use in India.

The *Jewish* Calendar is in accordance with the system arranged A.D. 358. The Calendar dates from the Creation, which is fixed as 3,760 years and 3 months before the beginning of the Christian Era; the year is Luni-solar.

The *Mohammedan*, or era of the Hejira, dates from the day after Mahomet's flight from Mecca, which occurred on the night of July 15, 622 A.D. The months are Lunar.

The *Pak* year was derived from a combination of the Hejira and Samvat years by the order of Akbar; it is Luni-solar. The *Bengali* year seems also to have been related at one time to the Hejira, but the fact of its being Solar made it lose 11 days each year.

The *Samvat* era dates from 57 B.C., and is Luni-solar. The months are divided into two fortnights—*sudi*, or bright, and *badi*, or dark. Each fortnight contains 15 tithis, which furnish the dates of the civil days given in our calendars.

## RULES OF BUSINESS OBSERVED AT BOMBAY.

### EXCHANGE.

Bills of Exchange payable in the Principal Cities of Europe, India, Africa, America and Australia purchased and collected. Drafts issued at the exchange of the day on the Bank's Head Office, Branches and Correspondents. Instructions respecting Family Remittances are carefully attended to, and, when the necessary particulars are furnished, the Bank will forward first copy of the Bill direct to the parties in England. Remittances may also be sent by telegram.

### CURRENT DEPOSIT ACCOUNTS.

The Bank opens Current Deposit Accounts, and allows Interest at the rate of 4 per cent. per annum on sums from Rs. 1,000 up to Rs. 1,00,000.

### FIXED DEPOSIT.

The Bank receives money on Fixed Deposit on terms which may be learned on application.

### AGENCY.

The Bank undertakes, on behalf of its constituents, the safe custody of Shares and Securities, charging on redelivery a commission of one-quarter per cent. on the nominal value. Dividends and interest are collected subject to a charge of one-quarter per cent. on the amount realised. Government paper and all descriptions of Stocks purchased and sold, the Commission charged on such transactions being one-quarter per cent. on the amount invested or realised.

All remittances should be made payable to the Manager, National Bank of India, Ltd., who will be glad to afford any further information respecting the Bank's business.

NATIONAL BANK OF INDIA, LIMITED,

## STEAM BOILER EFFICIENCY

DISUSE OLD FASHIONED APPARATUS WHICH ALLOWS COLD AIR TO RUSH INTO BOILERS COOLING AND CHILLING TUBES.

**KEEP ABREAST THE TIMES by using  
PILLATT'S PATENT ROCKING "CLOSED IN" PRESSURE  
FURNACES.**

CHEAPEN your COSTS  
AND COMPETE  
SUCCESSFULLY.

CABLES | PILLATT'S  
| STAPLEFORD  
| NOTTS., ENG.

### RESULTS.

CHEAPER STEAM.

MORE WATER EVAPORATED PER LB FUEL.

HIGHER RATE STEAMING.

BLACK SMOKE PREVENTED.

LONGER LIFE.

EASY WORKING.

**PILLATT & Co., Ltd., Stapleford Ironworks** | **STAPLEFORD**  
| **NOTTS. ENG.**

## Sankey All Steel Wheelbarrow

Sankey Barrows can be  
"knocked down" and  
packed for shipment in  
very small space.

This barrow is a distinct advance in Wheelbarrow construction. It is substantially built from fine quality steel with reinforced upper edge, to provide greater strength where the wear comes. The frame projects beyond the toughened steel wheel and forms a rest for tipping and dumping.

## SANKEY HOLLOW-WARE

THIRD EDITION.**SANITATION IN INDIA.**

By J. A. TURNER, C.I.E., M.D., D.P.H.

*Late Executive Health Officer, Bombay Municipality, and*

B. K. GOLDSMITH, M.B., D.P.H., WITH CONTRIBUTIONS

By S. C. HORMUSJI, L.R.C.P., M.R.C.S., M.D., D.P.H.,

K. B. SHROFF, L.M. & S., D.P.H., D.T.M., AND

L. GODINHO, L.M. & S., M.D., D.P.H.

“ Although ostensibly intended for Indian students, we are certain that this work should appeal to students in every clime, for we do not think we have ever read a more comprehensive and yet at the same time eminently practical manual of sanitation. It does not consist, as do so many similar works, of clippings from ancient text-books of theoretical hygiene, but it depicts sanitation in the making and as it is carried out in a region offering insuperable difficulties.”—The SANITARY JOURNAL.

“ The issue of a third edition of this well-known book will be welcomed by sanitarians in India. Considerable additions have been made in many sections and extensive alterations have been made in the chapters dealing with plague, tubercle, leprosy and influenza, so as to embody the latest discoveries in connection with the etiology, treatment, etc., of these diseases. Dr. Turner's book is the only one yet published on Municipal sanitation in India of any real value, and no Assistant Director of Public Health or Municipal Health Officer should be without a copy.”—The PIONEER.

Price : Rs. 15. By V. P. P. Rs. 16-2-0

# *The* "MONOTYPE" Type Composing Machine

THE "Monotype" has a much wider range of utility than any composing machine ever placed on the market. Composes type in any measure up to 60 ems pica, and in any size from 5 point to 24 pcint. Tabular and display work composed as simply as straight-  
:: :: forward composition. :: ::

# *The* "MONOTYPE" TYPECASTER

THIS machine casts type for hand composition from 5 point to 48 point, as well as rules, leads, ornaments, and spacing material. No other typecasting machine can equal it for speed of output, and the quality of product is equal to that of best  
:: :: type-foundry material. :: ::

# **"DRAINAGE PROBLEMS OF THE EAST."**

(*Second Edition*)

BY

C. C. JAMES.

Price per set Rupees 25. Post and V.P.P. R<sup>s</sup>. 1-4.

**M**EMBER of the Institute of Civil Engineers, Fellow of the Royal Meteorological Society, Fellow of the Royal Sanitary Institute, Member of the Incorporated Association of Municipal and County Engineers, Examiner in Sanitary Engineering to the University of Bombay, Author of "Oriental Drainage," "Notes on Sewage Disposal" and "Further Notes on Sewage Disposal." This work issued in two volumes has been thoroughly revised and brought up to date. Mr. Carkeek James had the unique opportunity of seeing practically all the large drainage schemes carried out in Bombay and consequently this new edition is almost certain to win the widespread approval of all engineers dealing with kindred problems anywhere East of Suez.

---

## **Views of Bombay Old and New.**

Price Re. 1-8.

New Edition, Postage 4 annas.

The views show the city as it was sixty years ago and as it to-day.

'Excellent printed views.'—*The Englishman*, Calcutta.

## **THE SYSTEM OF FINANCIAL ADMINISTRATION IN BRITISH INDIA.**

By P. K. WATTAL.

This work has been compiled entirely from official records and describes in plain language the present financial machinery of the Central and Provincial Governments and the financial powers of the reformed legislatures. In addition, it contains a lucid account of the system of accounts and audit, Government cash balances including the Gold Standard Reserve and Paper Currency Reserve balances. The work is intended for the use of members of the Legislative Councils, Ministers of Indian States and students of economics and Indian finance generally.

Price : Rs. 10. By V. P. P. Rs. 10-10.

---

## **THE PRESIDENCY TOWNS INSOL- VENCY ACT.**

By DANIEL CHAMIER, *Bar.-at-Law.*

A clearly printed edition of the text of the act, together with a concise and carefully compiled digest of Indian case-law and a selection of appropriate English decisions.

The Second Edition contains 146 pages of text and commentary and includes the decisions given subsequent to the publication of the first edition.

Price: Rs. 5. By V. P. P. Rs. 5-6.

---

## **LADIES OF MAHABLESHWAR.**

By MOMOS.

A witty collection of poems.
